

# City Gives Green Light To Packers

A temporary permit will be issued Salt River Valley Produce Co. to operate a cantaloupe packing shed on Highway 86. City Commissioners voted last week to issue the permit on an 80-day basis to allow the firm to operate this packing

season. The commissioners issued a statement with the decision that explained the group's thinking in the controversy. The statement pointed out that the cantaloupe firm has no other place to go with a shed and

that the commissioners would like to have the business enterprise here although they realize the location is out of zone. In other business, the commission instructed City Secretary Henry Minter to write Pioneer Natural Gas Co. and

ask for a larger monthly payment to the city for handling the gas company's money each month. Minter said the request will be made because of an increase in gas business which requires

more time of city employees in collecting bills, making deposits, etc. The city will ask for \$100 per month instead of the \$60 it currently receives. In response to several complaints regarding the operation

of city dumping grounds, commissioners voted to try for a while a plan that will allow free supervised dumping each second and fourth Thursday afternoon from 1 to 5 o'clock. Minter was authorized to take his vacation from July 18 to

23. The commission was faced with one of its toughest decisions in recent months in granting the cantaloupe shed operating rights. A group of citizens who live near the shed where melons

will be packed had protested against issuing such a permit, even on a temporary basis. A permit had to be issued for the shed to operate because it will be located in a zone that prohibits vegetable packing sheds.

"In The Agricultural Center Of Parmer County"

THE NEWSPAPER THAT WORKS FOR A BIGGER, BETTER BOVINA

WEDNESDAY, JULY 13, 1960

BOVINA, TEXAS

VOL. VI, NO. 3

### WHITTLIN'

BY DOLPH MOTEN

We're continually handicapped by a lack of smart.

This week we're handicapped by the time element---we're writing this before it is known exactly what happened at the Democratic convention . . . and you're reading it, in all probability, after the situation is cut and dried.

We have some things we want to say about it. And will next week, if we don't change our mind.

\*\*\*\*

According to a story in this issue, Bovina city commission has given Salt River Valley Produce Co. the right to operate in the location it desired during cantaloupe season this year. And that location, you'll remember, wasn't according to the rule book until some changes were made.

We're glad the changes were made. They had to be for the best growth interests of the community.

With our dim, hazy view into the future we can see vegetables as the best prospect for growth, both city and rural. They are our big chance.

Therefore, we think it's greatly to the community's advantage to court vegetable companies, who in turn, promote vegetables. They are the big chance for growth from an economic and population standpoint.

There are some things we don't like about the situation. At the same time, there are some things we don't like about money. Figures that out.

Communities comparable to ours throughout the country are working hard to attract industry. They want the payroll and the growth that industry brings with it when it moves to a town.

Vegetables, which can be considered an industry, can do the same thing for Bovina that other communities want a more exacting industry to do for them.

So, we need to cooperate with vegetable companies as much as is feasibly possible and fair.

If we, as a community, give one vegetable company a raw deal, and leave the impression that we don't want vegetable packing sheds operating here, the word will spread fast.

The companies don't have to locate here. And they probably know that better than we do. Certainly they plan for their Bovina operations to be profitable. But at the same time, we think their operation will be profitable for us, too.

In short, we probably need them over the long haul worse than they need us. Our community is blessed with good land and good water, but we have several neighbors who are riding in the same boat.

And if those neighbors we're talking about don't have vegetable companies operating in their communities, they wish they did have. If you don't believe that, ask said neighbors.

We've said it before: PROGRESS IS ALWAYS PAINFUL.

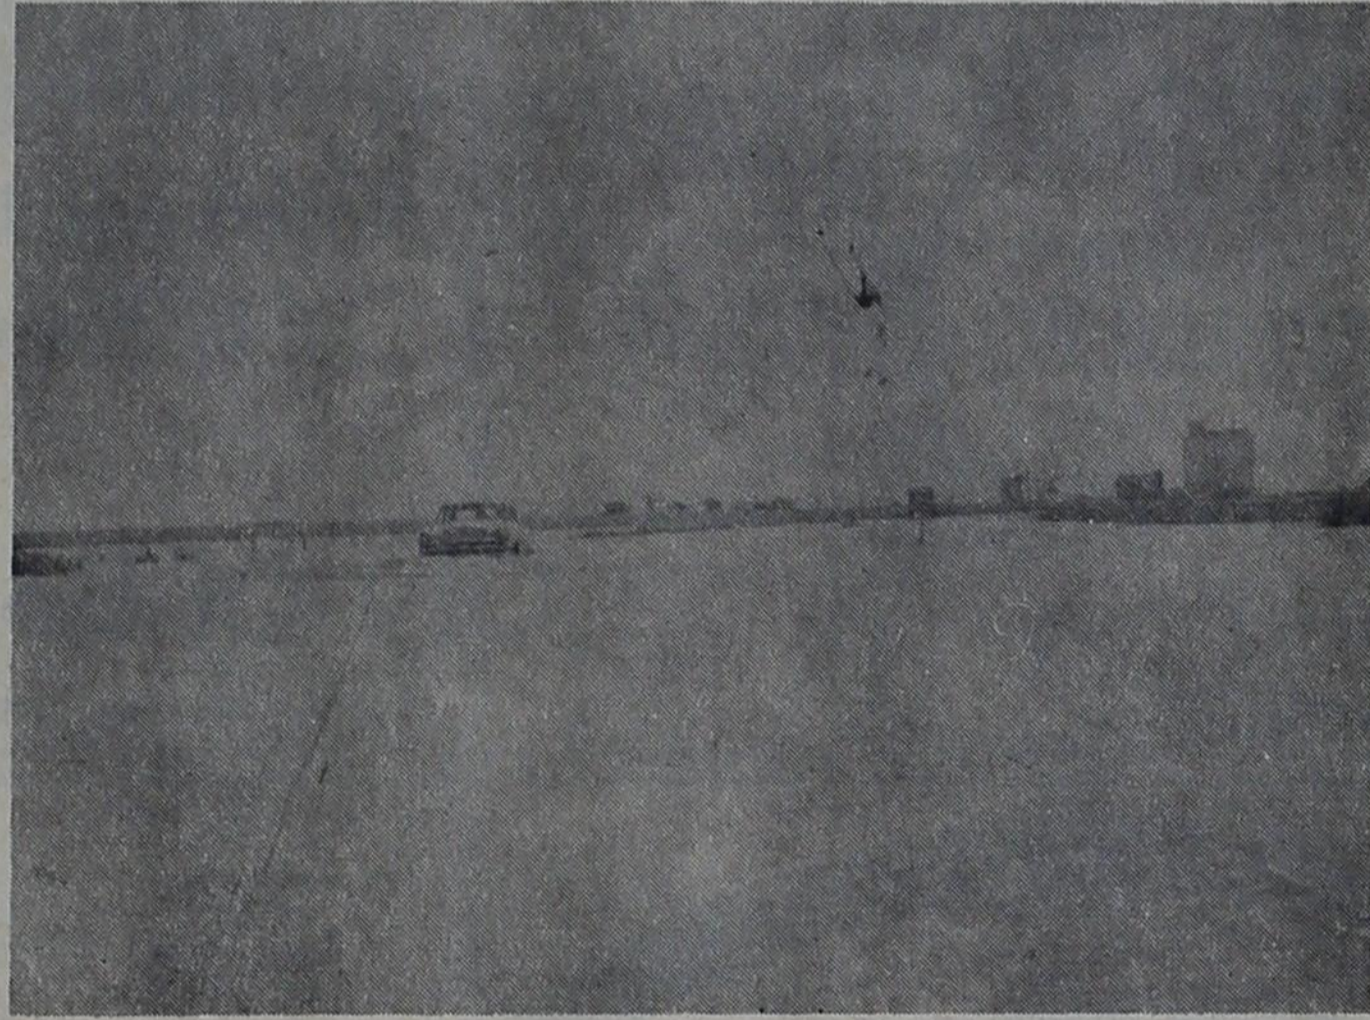

\*\*\*\*

Jack Patterson, the Rhea farmer and a good friend of ours, approached us this week with this question:

"If a community like Grady, New Mexico can have a swimming pool and can offer driver training as a course in its school, why can't Bovina?"

Jack was serious and curious. He didn't want to argue. He just wanted to know the answer. And that answer isn't one of a black and white nature. It's complex and probably it would take weeks of research for a layman to really find out all the parts to the answer. And

(Continued on page 6)

SPEED ZONE AHEAD says the sign at right. But it really isn't needed since drivers have to slow down for the deep water on Farm Road 2290 just north of Bovina over the weekend.

### Don Tabor Now With Southwestern

Don Tabor has been appointed to represent Southwestern Life Insurance Co. in this area.

Son of Bovina Mayor and Mrs. Emmett Tabor, Don is a native of Bovina. He attended West Texas State College.

Prior to joining the life insurance firm, he was with Texas Department of Public Safety and worked this area.

Mr. and Mrs. Tabor and their children, Mike, 7, Jim, 5, and Melinda, 4, live in Dimmitt.

Mr. and Mrs. Howard Quickel and family of Woodward, Okla. visited in the home of his brother, Mr. and Mrs. I. W. Quickel, recently.

### TO DEGREE--

## Rea Moves Step Closer

Duane Rea, outstanding Bovina FFA member, was notified this week that his American Farmer application has been approved by the state commission and will be sent to national competition.

The letter also said that Rea could expect the results from the national judging by August 10.

Rea will be recognized at the State FFA Convention in Houston July 20-22 at the Lone Star Farmer Awards Banquet. Rea received the Lone Star degree in 1959 and served as District Secretary of FFA last year.

Earlier in the year, FFA Advisor R. M. Crawford told Rea that the state committee would be the big hurdle toward the coveted national title.

Crawford will also make the trip to Houston.

The National FFA Convention will be conducted in Kansas City, Mo. October 12-14.

American Farmers will be awarded \$15 at the convention in prize money, with 50 coming

### WEATHER BY WILLIE

Some showers this week. No big rains.

--Willie

## Guages Run Over

Bovina rain guages that were emptied often enough registered some 10 inches of rainfall from Monday afternoon to Saturday morning.

A funnel cloud was spotted northwest of town Friday evening. Deputy Sheriff Henry Minter said he watched the cloud for several minutes. "It dropped down a few feet

and then raised back up into the clouds several times," Minter said.

At almost the same time the twister was flitting around the sky, a fire alarm was turned in and most residents thought the siren warning was because of the storm rather than for a fire.

Roads were closed in both directions out of Bovina at various times during the five-day deluge, which was part of an unusual weather pattern that flooded most of the South Plains-Panhandle area throughout the week.

A light shower fell Saturday afternoon, as if Mother Nature were trying to set a record for most consecutive days with rainfall. It marked the sixth day in a row that rain has fallen in Bovina.

Mr. and Mrs. Lowell Cook and children visited in the home of her father, Mr. and Mrs. N. E. Bonds, recently. Mrs. Cook is a former resident of Bovina and now resides at Vona, Colo.

MET HEADON--These automobiles were involved in a headon collision four miles west of Bovina Friday night. Shirley Kesner of Bovina was driver of the Ford (in background) and a family from New Jersey was occupants of the Chevrolet.

### OVER PACKING SHED--

## Arbitration Could Settle Controversy

Vegetable shed controversy was drawing to a head this week, with city commissioners expressing willingness to approve a temporary permit for the shed to operate and citizens against the shed vowing to find new ways to block it.

Mayor Emmett Tabor said a meeting between commissioners and residents of the area where the shed seeks operating rights will be conducted sometime this week.

Tabor said a proposal would be presented by the commission which he hopes will be satisfactory to both sides. He declined to disclose the nature of the proposal because it hasn't been written.

"We don't want to lose business for the city but on the other hand, don't want to impose on anyone," Tabor said.

"If we can, we will work out a compromise that both sides will accept."

A spokesman for the group that has opposed permitting the cantaloupe packing shed to operate in a prohibited zone, said he does not know what methods

the residents will take now that city commissioners have expressed desire to approve the permit.

### Parmer County To Get Separate District Clerk

In the democratic primary and general election of 1962, Parmer County voters will elect for the first time a district clerk separate from the county clerk.

Separation of the two offices, which have in the past been held by one man, will take effect due to the county's population exceeding 8,000 in the 1960 census. The county population in 1950 was 5,787 and this year's census showed a populace of 9,492.

According to the state constitution, the two offices will be separated when a county's population exceeds 8,000. A written opinion on this subject from Will Wilson, attorney general, was received last week by Hurshel Harding, Parmer county attorney.

Harding had written to the attorney general asking for a

(Continued on page 6)

public hearing before amendment to zoning ordinances can be made.

At a meeting last Thursday night, the commission decided to grant a permit to the produce company allowing it to operate 80 days. But more procedure must be dispensed with before such a move can become official.

The commission needs a recommendation from the zoning and planning board and

Rev. and Mrs. R. P. Thompson and children of Oklahoma City are visiting in home of her parents, Mr. and Mrs. Robert Harris, this week. Rev. Thompson is pastor of South Lindsey Baptist Church in Oklahoma City.

### AT METHODIST CHURCH--

## Revival July 17-23

Revival services at Bovina Methodist Church are slated next week--July 17 thru 23. Announcement of the series of meetings was made by Rev. Davis Edens, pastor.

Dr. Hubert H. Bratcher will be guest speaker. He is district superintendent of Methodist Churches in Pampa district. Prior to being named to his

present position, he was pastor at St. John's Methodist Church in Lubbock.

Three services are scheduled for each weekday. There will be men's breakfast service at 6 a. m., mid-morning services at 9:30 and evening services at 8, Rev. Edens says.

"Everyone is welcome to attend any or all of the services," the pastor invites.

### DAMAGE HEAVY--

## Lightning Starts Fire In Gilreath Home

Lightning that apparently traveled down a television antenna started a fire in the Boyd Gilreath home in Bovina during a thunderstorm Friday afternoon.

Gilreath estimated damage at from \$2500 to \$3000.

Electric appliances and wall outlets were knocked loose and melted.

The shock ignited a carpet and drapes around a picture window. No one was at home when the bolt struck and neighbors called firemen after seeing smoke coming from an open door.

Severity of the storm made firemen think the siren was screaming for a tornado warning instead of a fire alarm. Only Dave Wines and "Hop" Hopgardner answered the alarm.

The fire was extinguished quickly but most of the damage had already been done.

### Bovina Teams Divide With Lazbuddie

Bovina teams split a double-header with Lazbuddie here Monday afternoon.

Little leaguers came from behind to win, 16-15. Pee-wees lost, 1-14.

Little leaguers' record now stands and 2-1 while the Pee-wees and winless in three starts.

Gilreath said the antenna appeared to be melted. All the electric appliances were ruined. He said the telephone cord's tie-in to the wall was also knocked loose from the wall.

"If some of our neighbors hadn't been going to the cellar, the house would have been destroyed," Gilreath said.

Fire Chief O. M. Hammonds, who was out of town on a business call, said it is next to impossible to work out a siren code that will warn effectively for both fires and storms with one siren.

WAS SPREADING FAST--Max Gilreath, 18-year-old son of Mr. and Mrs. Boyd Gilreath, examines damage to ceiling in his home. The blaze climbed from a television antenna cord to drapes the window and onto the ceiling.

#### LATIN LEARNS--

## Smokey Cost Too Mucho

BY J. VERNON STEWART

Joe Gloria, Austin Latin American will quite likely give up the tobacco habit. It cost him \$40.50 Friday night and he still didn't get a cigarette.

Gloria, who works at a gin in the Hub community, was driving around Bovina with a friend, Filomeno Dorilla, when he got the nicotine urge.

He stopped at what he thought was a cafe and got out of his car to make the purchase. He and his friend had been having a little party so Gloria had some trouble getting up to the cafe door.

But once he got the door open he was sure he had it made until a tall fellow, slightly similar in appearance to television's Mr. Dillon barred the way.

"What d'ya want?" the husky man asked rudely. "Jus' gimme a pack of Camels," Gloria said, holding forth a piece of currency and allowing the door barrier to help support his drooping frame.

When the doorkeeper still refused to admit him Gloria, his brow furrowing with profound puzzlement asked why he wasn't receiving the typical customer treatment.

"This is the Minter residence. I'm the deputy sheriff here" the tall man said.

At this precise moment, Gloria remembered a brother he needed to see immediately, but Minter, who had been working wrecks and keeping a check on rising floodwaters had other plans for Senor Gloria.

Deputy Minter hauled Gloria and Filomeno in and Saturday morning Gloria was fined \$40.50 by Justice of the Peace W. J. Parker.

"What a night," Minter remarked after the case was closed.

Gloria mumbled something like "there's no use worrying, nothing's going to turn out alright," as he left glumly but soberly.

## A Warning

Forces of nature showed the inadequacies of Bovina's fire and tornado warning system Friday afternoon when a fire occurred during a turbulent thunderstorm.

The storm could have contained a twister so when the alarm sounded, many residents, including firemen, thought it was a warning that a tornado had been sighted and immediately sought shelter.

As was pointed out by Fire Chief Otho Hammonds, it is difficult, if not impossible to work out a successful warning system for both emergencies with only one device.

City of Bovina shouldn't be expected to provide an elaborate civil defense warning setups similar to those in larger cities, but a less expensive device might have another chance to save property again.

There is always the slim chance that a siren blast when there seems to be no chance for a storm could call firemen and sightseers out just in time to catch the brunt of a tornado.

This would be more costly and tragic than the entire town burning down while firemen were in cellars hiding from a non-existent tornado.

#### IN IRVING SCHOOLS--

## Former Resident Heads Department

Mrs. Dottie D. Stark, daughter of Mr. and Mrs. I. W. Quickel of Bovina, has been appointed director of special education for Irving Schools.

Mrs. Stark has been serving in special education at Irving High School.

The department the former Bovina resident will head will have 12 teachers during coming school year. It provides special training for children who have handicaps of various types, including speech therapy, work with homebound students and slow learners.

Mrs. Stark, who has been with Irving Schools one year, started in special education work five years ago in Fort Worth.

Prior to that time, she taught speech and music for two years.

A graduate of West Texas State College, she has done advanced work at Texas Tech and Hardin - Simmons University and is now in advanced speech correction work at Southern Methodist University. In connection with the SMU course, she is working this summer in the Cerebral Palsy and Speech and Hearing Clinic in Dallas.

#### POOR CIRCULATION

"You sure kept your word, Doc, when you told me I'd be walking in a month."

"Oh, you're feeling fine? Your broken leg doesn't hurt anymore?"

"No, I had to sell my car to pay your bill."

... Santa Fe Magazine

She is the wife of Elman Stark, systems manager for Abco, Inc., in Dallas. They have four children, Mike, 13; Daryl, 12; Sabra, 6; and Kevin, 5.

# Of Interest To THE WOMEN

## Williams-Burnam Exchange Vows

Miss Eileen Williams, daughter of Mr. and Mrs. Dennis Williams, and Carroll Burnam, son of Mr. and Mrs. Bill Burnam, exchanged wedding vows Sunday afternoon at 3 in First Baptist Church.

Rev. John Ferguson, pastor, performed the ceremony.

Wedding music was provided by Miss Verna Marie Estes, organist, and Miss Judy Roach, soloist. Miss Janice Leake presided at the guest book.

The sanctuary was decorated with cathedral candelabra and arrangements of yellow gladioli and emerald greenery. In the center of the setting was an archway enhanced with greenery and adorned with white wedding bells. Potted palms flanked each side of the archway.

Mrs. Julius Bradshaw was her sister's matron of honor and Mrs. Erith Hawkins and Miss Marilyn Brandon were bridesmaids. They wore gowns of yellow taffeta with white

chiffon overskirts, fashioned with scoop necklines and short cap sleeves. The tightly-fitted bodices were enhanced with yellow cummerbunds. Attendants wore matching yellow hats and carried nosegays of yellow carnations.

Kenneth Redwine was best man. Tommy Williams and Julius Bradshaw served as groomsmen. Joe Jones and Pat O'Brien served as ushers and candlelighters.

Given in marriage by her father, the bride wore a formal wedding gown of Chantilly lace over diamond white taffeta. The sweetheart neckline of the molded bodice was scattered with seed pearls. A pointed waistline accented the bouffant skirt and chapel train. Her fingertip veil of lace illusion fell from a crown of white feathers and rhinestones. She carried a cascade arrangement of orchids and stephanotis atop a white Bible. For something blue, she wore a garter given to her by Mrs. Bob Johnston, something old was her grandmother's ring; she borrowed pearls from her sister, and Mrs. Burnam supplied the good luck penny.

For her daughter's wedding, Mrs. Williams chose a yellow eyelet shirtwaist dress and white accessories. She wore a corsage of white gardenias. The groom's mother selected a beige linen sheath with beige accessories. Her dress was accented with a corsage of white gardenias.

Fellowship hall of the church was the scene of a reception following the ceremony. The table was covered with a white cloth centered with an arrangement of yellow lilies. The three-tiered yellow cake completed the setting.

Reception assistants included Misses Judy Meacham, Linda Gilreath and Floy Smith.

For her wedding trip, the bride selected a white dress accented with blue eyelet with white accessories and a white orchid corsage.

## Attend Wedding

Relatives of Mr. and Mrs. Bill Burnam who attended their son's wedding Sunday include Mr. and Mrs. Max Hulin from Sentinel, Okla., Mr. and Mrs. Homer Norwood, Santa Rosa, N. M. and Mr. and Mrs. James Burnam of Dimmitt.

## Burnams Host Rehearsal Dinner

Mr. and Mrs. Bill Burnam hosted a rehearsal dinner for their son's wedding party Saturday evening in the fellowship hall of First Baptist Church.

Refreshments of pin wheel sandwiches, ka-bobs, relishes, Waldorf cake, coffee, and Cokes were served from a buffet table laid with a white cloth and decorated with an arrangement of artificial spider mums.

Attending were Eileen Williams, Carroll Burnam, Verna Marie Estes, Joe Jones, Pat O'Brien, Marilyn Brandon, Mr. and Mrs. Julius Bradshaw, Mrs. Pat Hawkins, Mr. and Mrs. Dennis Williams, Rev. John Ferguson and Mr. and Mrs. Bill Burnam.

## Friendship Class Entertained

Friendship Class of Methodist Church was entertained with a party Tuesday evening in the fellowship hall of the church.

Following a supper of hot dogs and trimmings, homemade ice cream, cookies, cake and ice tea the group played ping pong.

Present were Mr. and Mrs. Gerald Hardin, Mr. and Mrs. Leon Ware, Mr. and Mrs. Jim Ware and children, Mr. and Mrs. D. R. Bushnell and children, Mr. and Mrs. Richard Baxter and daughter, Mr. and Mrs. David Haerber and daughters, Mr. and Mrs. Vernon Willard and children, and Mr. and Mrs. Oakley Stevenson.

Hostesses for the party were Mr. and Mrs. Bushnell, and Mr. and Mrs. Richard Baxter.

## Mrs. Newberry Hosts Circle

Mrs. Mable Newberry hosted the Dorcas Circle in her home Wednesday.

Following a covered dish luncheon the devotional was presented by Mrs. Newberry, and the study on Isaiah was discussed by the ladies.

Attending were Mrs. John Wilson, Mrs. Pat Kunselman, Mrs. L. C. Moore, Mrs. Earl Richards, Mrs. T. J. Hopingardner, Mrs. Frank Wilson and one guest Mrs. Dorothy Blaylock.

## Mrs. Hagens Visits Parents

Mr. and Mrs. William Hagens of New York City, N. Y. are visiting in the home of her parents, Mr. and Mrs. O. W. Rhinehart. Mr. Hagens returned to New York, but Mrs. Hagens plans to continue her visit here. They had previously vacationed in Mexico.

The typical family man has a billfold full of pictures and no money.

## Thrifty Club Meets With Mrs. Bradshaw

Mrs. Bill Bradshaw entertained Bovina Thrifty Club Monday afternoon in her home.

Refreshment of banana nut cake and cherry float punch were served to those present.

Attending were Mrs. Clarence Gauntt, Mrs. Wilbur Charles, Mrs. L. M. Grissom and Lola, Mrs. E. M. Ware, Mrs. J. T. Jones, Mrs. G. A. Bandy and the hostess.

## Shower Planned

Mrs. Wendol Sikes will be honored with a pink and blue shower in home of Mrs. Connie O'Brien Tuesday, July 19, at 3 p. m.

## Attend Youth Assembly At McMurry College

Patsy Richards, Roger Ezell, Don Caldwell, Penny Lloyd, and Brenda Jones attended Youth Assembly at McMurry College at Abilene last week.

General studies at the assembly included program planning, Bible study, publicity and recreation. Individual classes were also part of the program.

Roger Ezell enrolled in "What It Means to be a Christian," Patsy Richards, "Prayer," Don Caldwell and Penny Lloyd studied "Understanding Ourselves" and Brenda Jones, "Meaning of Methodism."

Following studies and classes each day the group participated in fellowship and recreation.

## W.M.U. Has Royal Service Program

An impressive Royal Service program highlighted WMU meeting at First Baptist Church Tuesday afternoon of last week.

Mrs. John Ferguson presented the devotional. Others taking part on the program were Mrs. P. A. Adams who gave "Love Overcoming Social and Economical Barriers"; Mrs. Ovid Lawlis, "Peace for National Language Groups and Wonderful Counselors for the Brokenhearted"; and Mrs. E. H. Moody presented, "Jesus Savior of All Men."

Those present included Mrs. Bill Bradshaw, Mrs. James Russell, Mrs. Allen Cumpton, Mrs. P. A. Adams, Mrs. John Ferguson, Mrs. Ovid Lawlis and Mrs. E. H. Moody.

## Sudderths Have Birthday Party

Mrs. Haskell Sudderth, Mrs. Glendon Sudderth and Mrs. Herbert Sikes were honored with a chicken fry birthday supper last Monday evening in the home of Mr. and Mrs. Haskell Sudderth.

Attending were Mr. and Mrs. Sam Sudderth and children, Mr. and Mrs. Don Sudderth and children, Mr. and Mrs. Eddie Redden and children, Mr. and Mrs. Glendon Sudderth, Mrs. Lee Sudderth, Mrs. Herbert Sikes and the hostesses, Mr. and Mrs. Haskell Sudderth.

## Barnetts Have Baby Boy

Congratulations to Dr. and Mrs. Jack Barnett, 12124 Eunice St., Dallas, on the birth of a baby boy born Monday afternoon.

Grandparents are Mr. and Mrs. W. E. Williams of Bovina.

A fellow wouldn't mind loaning his lawn mower if the borrower wouldn't take it out of the yard.

courteous enough to put it inside the door. Think this is commendable since it would be easier to throw it and not worry about which puddle it landed in.

Heard the other day that women voters are less emotional than men. This isn't my opinion. It is the opinion of several news commentators. Seems men worry about the candidates appearance more than women, and women are more vitally concerned with basic issues such as education and qualifications. The commentators also sited the fact that women are constantly becoming more influential in politics and we can expect in the not too far future to find them seeking some of the higher positions.

While on the subject of women I'll relate this: read somewhere the other day that women are restaurant owners greatest patrons; if it were left up to the men they might be out of business.

It seems men are content to eat at home because it is much easier. However, they don't stop to think that a woman enjoys getting out away from all the dirty dishes and mess that follows cooking.

The article also pointed out that new brides should start from the very beginning making their husbands take them out once a week, thus they form a habit just like brushing their teeth and don't complain. Think this is a real good suggestion.

Several local Masons are among the men of this area who donated a therapy machine to Parmer County Community Hospital. This is a worthwhile project and would like to take this opportunity to express the sentiments of many. I'm sure.

Do hope Willie's prediction of hot weather prevails since we're beginning to feel like it is the monsoon season.

### Woltmon Car Catches Fire

Bovina Volunteer Fire Department answered a call to a burning car at intersection of Highway 86 and FM Road 1731 south late Monday afternoon.

Electrical system of the car, an Oldsmobile owned by Jack Woltman, was destroyed, according to a report from a member of the department. Flames

were extinguished before more damage was done.

ruling on the separation of these offices. The opinion received was a copy of one written for Andrews County, which had previously submitted the same question.

Here is the summary of the opinion:

"Where a county had a population of less than 8,000 inhabitants, according to the 1950 federal census, and has a population of more than 8,000 inhabitants, according to the 1960 federal census, the combined office of a single clerk who shall perform the duties of the district and county clerk do not become separated until the expiration of the term of office to which the incumbent was elected, January 1, 1963."

Hugh Moseley is now county and district clerk for Parmer County. He was re-elected to the office in 1958.

When elected, the new district clerk will handle all district court proceedings in the county. He will be elected for four years.

The county clerk will be clerk of the county and commissioners court and will be recorder for the county.

# Heavy Rains Were Generally Beneficial

## Cotton In Poor Shape

Heavy rains which brought from 7 to 15 inches of moisture to the High Plains last week were for the most part beneficial to area farms.

That was the consensus of opinion among farmers in spite of the fact that prospects aren't too bright for this year's cotton crop. Except for isolated areas near Texico-Farwell where there was some hail damage, the weather did not severely affect the cotton crop.

Neither did the large amounts of moisture help this basic High Plains crop which got off to a slow start this year due to a cold spring and insect infestations. The week-long, unseasonal rains came at a time when the sun was needed to bring out the blooms and point the crop toward maturity.

"Right now the cotton crop doesn't look very good," points out Joe Jones, Farmer County agent. "It wasn't in very good shape before the rain and naturally this moisture hasn't helped."

Jones was out over the county on Monday of this week checking some of the cotton and he reported much of it in poor shape. Some of the cotton is suffering from Ascochyta and Bacterial blight, fungus diseases which affect the leaves.

Due to the cold, wet spring, which contributed to widespread disease in the plants, some cotton had already been plowed under and sown into maize before the rain. There are still more fields which are suffering.

However, with the proper weather conditions from here on out, there is a possibility for what Jones termed a "fair" cotton crop. By proper weather conditions he was referring to plenty of sunshine for the next

several weeks and a late frost. Jones says that cotton is several weeks behind schedule. "In past years we have had blooms on the cotton by July 4, but this year it looks like it will be early August before there will be many blooms," he says.

What the cotton needs along with the sunshine is good cultivation, Jones says.

Aside from this year's cotton crop, the rains were generally a boon to agricultural prospects in the area. Grain sorghums and other feed crops will benefit the most from the moisture. Water is what was needed for and these crops and the rain couldn't have come at a more opportune time for the feed.

Also, the moisture on the wheat stubble will aid in getting this ground prepared for the next crop. It will now be much easier to plow under and the rain will help to provide a good moisture base for the next

seed bed. Weeds will naturally be a problem in all the fields now and will be hard to control. The rains will make them shoot up rapidly.

Because the moisture totals are already the highest on record for July, it would appear that additional water is something the crops can do without for a while. This is true to a certain extent, but it won't be long until the irrigation wells are running again, providing it doesn't rain some more.

"It won't take long for the cotton and feed to sap out the moisture from the top soil," Jones says. "And, the farmers will be turning on irrigation wells before the ground really needs it. That's so all of the fields will be covered by the time the crops are in need of added moisture."

(Check the rain map on next page for rain totals throughout the county.)

SCENES LIKE THIS WERE common sights throughout the county early this week following the week-long rains which brought as much as 15 inches to some areas. This picture was taken on a farm northwest of Bovina.

## THE HIGH PLAINS FARM AND HOME

### Farmers Union Asks President For Sugar Quota

A letter congratulating President Eisenhower for having cut the Cuban sugar quota and asking him for sugar beet acreage for Texas farmers was sent to the President last week by Alex Dickie, Jr., president of Texas Farmers Union.

In the letter Dickie said, "Congratulations on having cut the Cuban sugar quota. I think the vast majority of the citizens of this country feel this was long past due and you and the Congress have acted wisely. I would respectfully like to urge you to immediately take steps to have the Department of Agriculture distribute sugar beet acreage to our many thousands of adaptable sugar beet acres in Texas and

surrounding states. Our farmers are in desperate need of this money crop.

"I strongly feel that the United States consumer would prefer sugar grown on American farms to that of any other country in the world. We in Farmers Union stand ready to help in promotion of the sugar beet acreage in the adaptable areas in any way that we can."

Dickie stated that he would like to urge all interested farmers and sympathetic citizens to write to their congressmen and senators to release sugar beet acreage to adaptable farm areas throughout Texas.

"We should all work through our organizations, both farm and civic, to get this story of

the domestic production of sugar across not only to our elected officials, but to the citizens of the United States," Dickie said.

#### NEWS FROM THE

#### FARM BUREAU

BY RAYMOND EULER

We hope all of you will remember to file for the Federal Road use tax refund on your farm fuels. You can do it now. Your dealer will give you the amount of gas you bought prior to, and after, October 1, 1959. The refund is 3¢ per gallon on that prior to that date and 4¢ after that date. We will be glad to help you with it if you wish. Some of you still have invoices that can be sent in for refund of the 5¢ state tax, too.

If you are one of those, be sure to come in soon, before more of them expire.

Did you know that only five and six tenths per cent of the wheat farmers in the United States voted in favor of quotas last year? This is about four times as many as voted against them, but it still is not a very representative vote, is it? Why don't you vote this year?

Because of various things, Rhea Community did not hold a Fourth of July celebration this year. That's the first time in many years. Wheat harvest, other farm activities and work being done on the Parish Hall, where such meetings are usually headquartered were the reasons.

Farm Bureau Directors will meet Monday night. They skipped meeting the Fourth, too. You are welcome to attend. They'd be glad to see you, says Herman Gerles, and his directors and other officers join him.

July 24-30 is National Farm Safety Week. We suggest that, in preparation for that week's observance, you practice safety beginning now. Think about this subject, and you will no doubt make some changes in some of your procedures on the farm for the sake of safety.

We've always wanted to see that new volcano in Mexico (it appeared in 1942) and if we were in a position financially and had time, we'd go on the Texas Farm Bureau Goodwill tour July 14-24. Maybe you can go.

CONSIDER THIS: He that justifieth the wicked, and he that condemneth the just, even they both are abomination to the Lord. Prov. 17:15

### Magnesium In Cotton Production Studied

Magnesium is one of the essential nutrient elements required by higher plants for normal growth and reproduction. Until recently, very little work had been done in relation to the magnesium requirements of cotton.

The Texas Agricultural Experiment Station has completed a series of studies in an attempt to learn these requirements. The studies were made under controlled conditions, and should be very useful as a guide for future field experiments. American Upland (Stoneville Z-106) and Egyptian (Pima S-1) cottons, grown in a nutrient solution under greenhouse conditions, were used in the tests.

The characteristic foliage symptoms of magnesium deficiency appeared first in the lower leaves of Pima S-1 plants which were more sensitive to magnesium deficiency

than the Stoneville Z-106 plants. Magnesium content of the plants reflected a positive correlation with the magnesium supply on which they were grown.

Substrate magnesium had a marked influence on plant growth and development as measured by height, weight, flowering, boll set, relative chloroplast pigment content and chemical composition. Differences in the response of the two species to various levels of substrate magnesium were also pronounced.

Complete results of these tests have been published by the Texas Agricultural Experiment Station. This publication may be obtained by writing the Agricultural Information Office, Texas A & M College, College Station, Texas. Ask for MP-411.

### New Cotton Defoliation Guide Released

Effective March 5, 1960, defoliants and desiccants came under the regulations of Public Law 518. The basis for the control program on farm chemicals is to prevent undue risk from residues of the chemicals in the raw agricultural product.

Certain of these chemicals, however, have been granted an extension by the Food and Drug Administration, explains Fred Elliott, extension cotton work specialist. This extension is good until March 5, 1961, he says.

Any defoliant or desiccant used will eventually have tolerances or an exemption from tolerances designated for its safe use or will be registered on a nonresidue basis. Until official Federal regulations are issued governing the use of a specific defoliant or desiccant, it should not be used, Elliott warns.

In a recently published Texas Agricultural Extension Service leaflet, Elliott lists the chemicals that have been granted this extension, and gives a guide for their use. This leaflet may be obtained from the local county agent or from the Agricultural Information Office, College Station, Texas. Ask for L-145.

Accounting for almost one out of every nine automobiles in the United States, California tops all other states in gasoline consumption.

FLOOD WATERS WASHED OUT this road north of the Pleasant Hill community near Frío Draw. The washed-out area was about 15 feet in depth and 30 feet across. This area received nearly 10 inches of rain in one 24-hour period.

### Buske Named To FHA Committee

W. D. Buske, who farms near Friona, has been named to serve on the Farmers Home Administration county committee, announces Billy R. Boling, the agency's county supervisor in Farmer County.

Buske succeeds Richard V. Rocky of Black, who has served on the committee for the past three years. Buske, also selected for a three-year term, will serve with Earl D. Stevenson, Bovina and M. T. Glasscock, Farwell.

Mr. and Mrs. Buske have three children and have lived in the Friona area for the past six years. They farm 1300 acres of wheat, grain sorghum

and cotton and also run some cattle. "With his knowledge of the county and farming conditions here, Buske will be a valuable addition to the committee," Boling says.

The county committee determines the eligibility of individual applicants for all types of FHA loans. The committee also reviews borrowers progress and aids the county supervisor in adapting the agency's loan policies to conditions faced by farmers in this area.

Members are selected and appointed so that, as far as possible, different areas or neighborhoods are represented, Boling says.

Get your weed killer Wonder Bar soon. Also insecticides and fly bait. From us. We have them.

We are ready to double treat and clean your seed wheat and barley.

Also we are buying seed wheat and winter barley each week. See us.

Some farmers are now booking their requirements for winter barley and seed wheats. We have these.

Atlas Sargo, African Millet and Red Top will make a lot of ensilage or bundles if planted now. Might make grain if frost is late.

Texas No. 590 and Genetic Giant, No. 99 might make grain. They are fast.

We will buy your wheat and barley. Got any oats?

"Your Authorized Ford Dealer"

### MOISTURE MAP (From Last Sunday Through Monday)

# Wheat Allotment Virtually Same

Notices of the 1961 wheat allotment have been mailed to Farmer County farmers, and there is virtually no change in acreage as compared with the present year. Farmer County's allotment is 106,354--down only four acres from the 1960 total.

The national acreage allotment remains at the minimum 55 million acres which has been in effect for the past six years. That is the main reason for the local allotment stability.

Individual allotments are based primarily on past wheat production history.

"All growers who will produce more than 15 acres of wheat in 1961 will be eligible to cast ballots in the July 21 referendum, on marketing quotas for the 1961 crop," points out Prentice Mills, ASC office manager.

"Growers who have smaller acreages and those who are taking part in the feed wheat pro-

gram are not eligible to vote, since the wheat from such farms would not be subject to marketing quota penalties."

Mills says the referendum will decide important questions for wheat producers. If at least two thirds of the growers approve quotas, then they will be in effect for the 1961 crop, marketing penalties will apply to the "excess" wheat of growers who do not comply with their farm allotments, and price support will be available at not less than 75 per cent of parity. The exact support price level is soon to be announced.

If more than one third of the voters approve the quotas, there will be no quotas or penalties for the 1961 crop, and price support will be at 50 per cent of parity. Allotments will remain in effect as a condition of price support eligibility only.

## Flocculent May Prove Successful For Removing Playa Lake Sediments

Tests conducted recently on the High Plains indicate that a commercial flocculent, Separan AP-30, may prove successful for removing sediments from playa lake water used for groundwater recharge. Application of the flocculent reduced the amount of silt plus clay entering a recharge well in a 24-hour period by 49 per cent.

During the test, which consisted of a 24-hour recharge period, the flocculent was added at a constant rate of 0.7 ppm to the water at the inlet pipe in the lake. The irrigation pump was operated for one hour at the end of the recharge period. Samples were taken of the unflocculated water at the pipeline intake and of the flocculated water at the well inlet. All samples were mixed for a minimum of 3 minutes, and no dispersant was added. The sediments in the flocculated samples were determined in only two categories: sand and silt plus clay.

There was an increase in sediments in the untreated water about 4 hours after the test was started. This sediment increase was caused by an increase in wind velocity. A correspondingly smaller increase in sediments occurred in the treated water. The smaller increase in the sediments in

treated water indicates that the flocculent may be more efficient when used in water containing higher amounts of sediments. The total silt plus clay flocculated from the water that entered the well, using Separan AP-30, was 1,576 pounds, or 49 per cent of the total sediments in the water.

Results from this test indicate that, under more favorable conditions, Separan AP-30 may prove to be a successful flocculent for removing sediments from playa lake water used for groundwater recharge. More tests are planned for the future in which conditions will be varied to determine if more efficient results can be obtained.

These studies were conducted cooperatively by the Texas Agricultural Experiment Station and the Soil and Water Conservation Research Division of the USDA.

## WITH THE COUNTY AGENT

JOE JONES

Those of you who plan to sidress grain sorghum should remember that for best results the sidressing should be done about 35 to 42 days following planting. This will insure you that the plant food is there for head formation.

Applications should be made in or near the middle of the row to prevent root injury. Sidress with nitrogen only. Phosphate should be put down prior to planting or at planting time.

nitrogen and tillage practices necessary to decay the straw and just a little extra. A lot of the wheat produced in 1961 will be produced within the next 30 days.

Every form of fertilizer has its place and you may find it advantageous to use a dry form of fertilizer such as ammonium sulfate or ammonium nitrate, urea, or uran which is a liquid form of urea.

The rains have come and gone for the present and left us just as wet as we can possibly be, but our early grain sorghum will need water sooner than you may think, so be ready and don't get caught.

"Wardrobe Dollars and Sense." Principles given in the publication apply to all family members.

Ask for a copy of the bulletin from your county home demonstration agent's office.

**KEEP VEGETABLES FRESH -- STORE THEM PROPERLY...**

Store those fresh vegetables properly, when you bring them from the store or garden. Otherwise, they will lose flavor, food value and appeal quickly, says Frances Reasonover, extension foods and nutrition specialist of the Texas A & M College System.

Refrigerate all vegetables except potatoes and dried onions, as soon as possible after purchasing or harvesting. Exposure to air and light causes wilting and a great loss of essential nutrients.

Wash and clean vegetables carefully. Dirt may hasten spoilage. Drain off excess water, but store while moist for better crisping. Trim away bruised or spoiled areas to prevent rapid spoilage.

All leafy vegetables and broccoli, cauliflower, peas, beans, carrots, celery, green onions, radishes and cucumbers, should have moist cold. Store them in the crisper pan of the refrigerator in moisture-vapor-proof wrapping, such as aluminum foil, cellophane or plastic.

Never pare or cut vegetables before storing. Peas or fresh lima beans retain more vitamins if stored in the pod. If they must be shelled in advance, store in tightly covered jar or plastic bag in the refrigerator.

For more information on vegetables, get a copy of "VEGETABLES--SELECTION, CARE, COOKING" from your county home demonstration agent.

# County FHA Loans Total \$552,955

Loans totaling \$552,955 were made by the Farmers Home Administration to farm families in Farmer County during the fiscal year ending June 30, reports Billy R. Boling, FHA's county supervisor.

Borrowers repaid \$722,543 during the year on loans of all types, Boling says. These payments were on loans made in past years and they came mainly from the sale of wheat, grain

sorghum and cotton.

The bulk of the loans made this past year were for operating purposes, such as the purchase of feed, seed, fertilizer, pesticides, livestock, machinery and equipment, and the making of recommended adjustments in farming systems. Loans made to meet this type of need totaled \$545,005.

Farm real estate loans during the year totaled \$7,950.

Farmers used these loans to improve or purchase farms or farm land, to build or repair farm dwellings, to install and repair irrigation systems, and to finance other essential farm construction.

Throughout the county are many farm families who have borrowed from FHA in former years and are still making scheduled repayments, Boling says. Many other families in

Tascosa wheat looked good this year. It is just a little shorter, has a strong straw, the kernels are held tightly by the glumes. It is just a little harder to thresh in most instances which could also be an advantage in case of light hail or hard winds. No one has reported any difficulty with combining Tascosa even though it is held a little tighter by the glumes.

Two-hundred-ninety-six pairs of Bobwhite Quail were delivered to 29 co-operators last week. J. L. Ivy of Lazbuddie did not receive his, but they are ordered and will soon be here making 30 co-operators receiving quail.

If you want fish for your lakes you had better hurry and order. I have been informed that deliveries will be made to Farmer County in late July or early August. I have order blanks in my office. A. L. Kirby, Bovina; W. L. Edelman, Friona; and Bill Nichols, Friona, also have blanks.

This year's wheat crop will soon be history except for the residue left around. What is done with this residue within the next 30 days will greatly influence the 1961 wheat crop and future crops.

It takes moisture, temperature and nitrogen for the bacteria to feed on to decompose organic matter. If you want to get your land in the best possible condition for a 1961 wheat crop, you had better consider addition of a nitrogen fertilizer before turning the straw under. Try to get the breaking job done in July if possible while there is plenty of moisture and warm weather left to rot the straw.

Wheat straw rolled into a lister ridge does not make a good seed bed. In most instances such preparation of land results in lower yields, which in turn means you have paid for

the county, who have received loans in the past, have now repaid them in full and are now financing their needs through banks and other lenders, he adds.

## H. D. AGENT'S CORNER

Jimmie Lou Wainscott

### MAKE THE MOST OF MID-SUMMER CLOTHING SALES...

There's something about a sale that seems to arouse a sense of adventure in women--an expectant sort of feeling that has to do with "getting a really good buy."

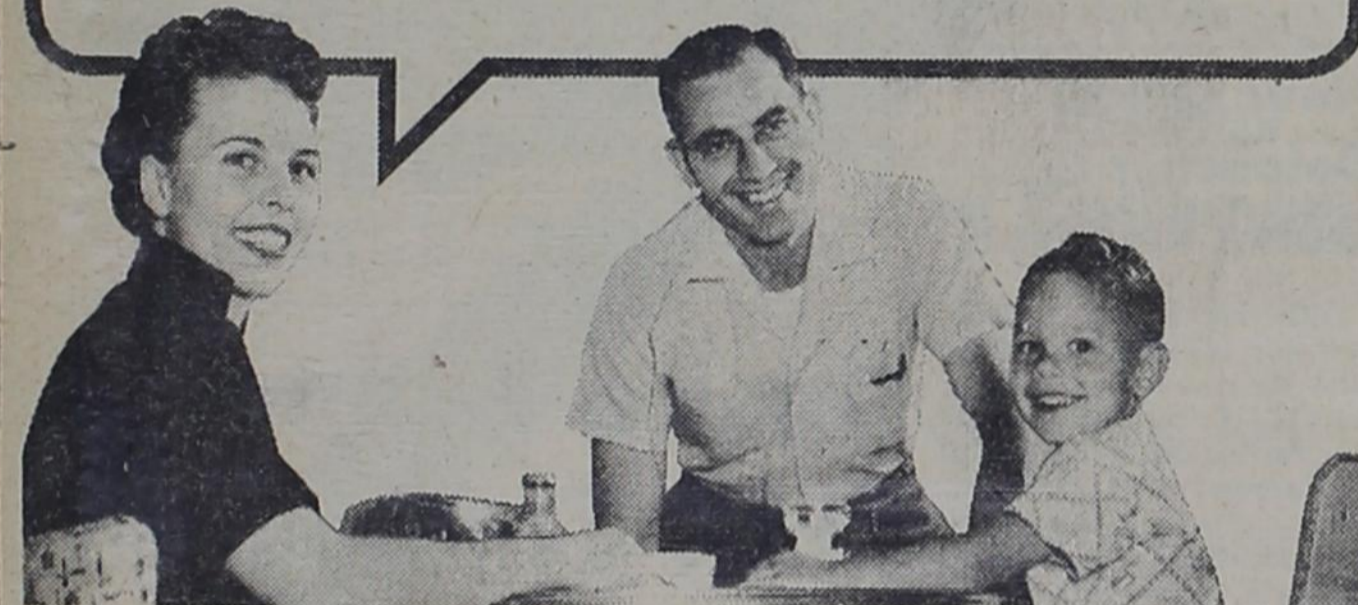

Right now, many stores are having sales - featuring fabrics, summer dresses, and other items. Extension clothing specialists of Texas A & M College point out that as a careful shopper, you can make the most of these special prices to fill gaps in wardrobe, or add some needed pieces.

Here are some tips offered by specialists for analyzing the situation before you buy a certain fabric or clothing item on sale or otherwise:

- Keep your total wardrobe plan in mind. Buy only those items that fit in with your budget, color plan, accessories and activities.
- Consider lines, color and texture of the garment. Are they really suited to your type? Are they extreme or high fashion - likely to look wrong next season?
- Look at the label carefully. Get as much information as possible on care and cleaning.

Other suggestions for stretching clothing dollars are given in the extension bulletin,

## "From 3 to 13 My Dishes Get Clean.. Automatically--"

says Mrs. Don Winter, 1401 W. Beaver, Guymon, Okla.

Here's an enthusiastic homemaker who fully utilizes her electric dishwasher, whether it's just the family three for breakfast or a friendly dinner group of thirteen. In either situation, Mrs. Winter merely "pushes the button" for sanitary, clean dishes. Incidentally, all the dishes used by the thirteen people in the actual dinner party pictured easily went into Mrs. Winter's electric dishwasher with plenty of room for proper washing.

"OUR ELECTRIC BILL IS THE BIGGEST BARGAIN WE HAVE"

It's the man of the house who usually pays the bills and Mr. Winter is no exception. Despite unlimited use of electric service in the Winter home, Mr. Winter is happy with the low cost of his electric service. No wonder he says, "Our electric bill is the biggest bargain we have."

### WATCH AND WIN

It's WATCH AND WIN at your Reddy Kilowatt Electric Appliance dealer. Yes, watch a demonstration of an electric dishwasher, home freezer, range, clothes dryer, or all 4 appliances... then register once for each demonstration you receive. # Wheat Harvest Above Average

For all practical purposes, this year's wheat harvest, considered above average by most elevator men, has drawn to a close. Last week's soaking rains came before all of the wheat was out of the fields, but only a few acres remained to be cut. "It's at least 95 per cent over," was a statement heard from most elevator men in the county early this week. If it doesn't rain any more, combines should start getting back into the field this week and by the early part of next week the harvest should all be over with. As far as the wheat crop as a whole was concerned, the rains couldn't have come at a better time.

This large amount of moisture will make the wheat stubble much easier to handle and it will also help the moisture base of the next seed bed. Average yields on irrigated wheat this year were from 40 to 50 bushels per acre and some yields were 70 bushels and above. Quality of the wheat was

considered above last year, weighing in the neighborhood of 60 pounds. There was considerably more hail damage in the county last year than this year, thus the reason for this crop being considered a little better. There was some hail this year but it was spotted and not nearly as widespread as last year's.

## The HAPPY HOMEMAKER

BY JUNE FLOYD

Some of the most interesting articles in print today are anonymous. Someone jokingly remarked on day "That Mr. Anonymous must have been a very intelligent person. He wrote so many interesting things." Our first recipe this week was probably written by "Mrs. Anonymous." How To Cook A Husband. A good many husbands are utterly spoiled by mismanagement in cooking, and are not tender and good. Some women go about it as if their husbands were bladders and blow them up -- others keep them constantly in hot water--and others let them freeze by their carelessness and indifference. Some keep them in a stew by irritating ways and words--others waste them. Then some keep

them in a pickle all their lives. It cannot be supposed that any husband will be tender and good if managed in this way, but they are extremely delicious when properly managed. In selecting your husband you should not be guided by the silvery appearance as in buying mackerel, or by the golden tint as if you wanted salmon.

# Edelman Predicts Tascosa Will Be "Most Popular" Wheat

"Tascosa wheat has a shorter straw and therefore easier to work back into the ground, not as susceptible to rust, and is ready to harvest earlier," says Edelman.

Walking across the stubble ground on his place where the test plots were planted he pointed out the variation in stubble length and picked up a few heads of wheat on the

ground. "We got 16 per cent hail on our wheat this year and several of the varieties really got hurt," he says. "I feel that the Tascosa will still produce more after such treatment than most of the wheat we had planted," he says.

"Tascosa wheat will be the most popular planting wheat on the Plains when they get enough seed to go around," predicted W. L. "Preach" Edelman, a Farmer county farmer who runs his own experiment station on his land in the Black Community.

Edelman based this prediction on his own experience with the new wheat variety after cutting the 12 varieties of wheat he had sown on his land this year. Despite the fact that Concho wheat out produced his Tascosa variety Edelman stuck with his opinion and based it on three facts--

## New Wheat Variety Released For '61

Seed from Tascosa, a new hard red winter wheat variety which produces excellent yields of outstanding quality, will be

available from producers of certified seed after the 1960 harvest. Tascosa was developed by the Small Grains Section of the Texas Agricultural Experiment Station in cooperation with the USDA. It was named for Tascosa, the early Panhandle settlement west of Amarillo.

Be sure to select him yourself as taste differ. Do not go the market for him as the best ones are always brought to the door. It is far better to have none unless you will patiently learn how to cook him. A preserving kettle of finest porcelain is best, but if you have nothing better than an earthenware pipkin, it will do with care.

See that the linen in which you wrap him is nicely washed and mended and has the required number of buttons and strings neatly sewed on. Tie him into the kettle by a strong silken cord called comfort, as the one called duty is likely to beweak. They sometimes fly out of the kettle and so become burned and crusty on the edges, since, like crabs and lobsters, you have to cook them alive.

Make a clear steady fire out of love, neatness and cheerfulness. Set him as near this as seems to agree with him. If he sputters, do not become anxious. Some husbands do this until they are quite done. Add a little sugar in the form on what confectioners call kisses, but no vinegar or pepper on any account. A little spice improves them, but it must be used with great judgment.

Do not stick any sharp instruments into him to see if he is becoming tender. Stir him gently, lest he lie too flat and close to the kettle and so become useless. You cannot fail to know when he is done.

If thus treated you will find him very digestible, agreeing perfectly with you and he will keep as long as you want, unless you become careless and set him in too cold a place.

Edelman planted 12 varieties of wheat in a 25-acre plot and treated all the varieties alike. All were watered four times, once in December then two times in April and the last time May 10. The land was fertilized with 100 pounds of anhydrous ammonia and the wheat was sown on summertilled land.

All 12 varieties were planted October 15, 1959 and all were harvested on the same date, June 22, with the exception of Cheyenne which was too wet to cut and was harvested one week later. Edelman got seed for three of his plots from the Bushland Experiment Station near Amarillo. These were Tascosa, Westar and Aztec. Community Grain contributed the Knox seed and John Mars the Kiowa seed.

Tascosa differs considerably from the present commercial varieties grown in Texas. The plants are shorter in stature and the straw is strong, which aid in resisting lodging. The variety resists shattering and may require special setting of the concaves for threshing because the kernels are held tightly by the glumes.

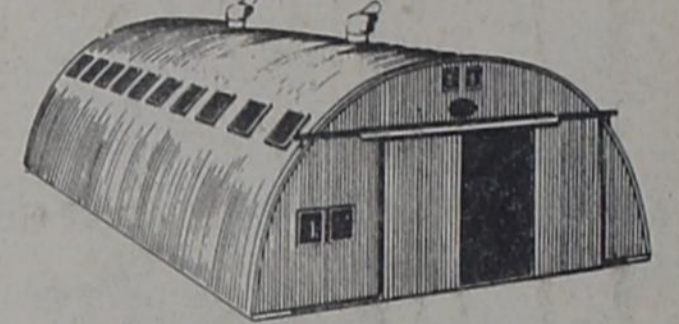

Further information about Tascosa can be obtained by writing the Agricultural Information Office, College Station, Texas, and asking for Leaflet 483.

PART OF PAVED STATE LINE ROAD north of Pleasant Hill was washed away during the downpour. Further down the road (just off the pavement) is where the complete road was washed away. Beyond the next hill is Frio Draw.

LOTS OF WATER was running under this bridge on Running Water Draw between Bovina and Farwell. This is the fastest the water has been sweeping down the draw in many years.

## Market Development Program Expanded

The entire feed grain industry including corn producers, the grain seed industry, export firms and cooperative and independent grain dealer, it was announced this week, are mustering forces behind the foreign market development program which the Grain Sorghum Producers Association of Amarillo initiated and has been administering the past two years.

It is expected that this new and broader interest in financing and directing the export promotion program will increase activities in this connection as much as five times over the present program.

The announcement relative to the expanded program was made after an area directors' meeting of the Grain Sorghum Producers Association in Tulia last Wednesday. The Board acted on the recommendation of R. G. Peeler, Director, of Hereford, and Bill Nelson, Amarillo, the Association's Executive Officer, who have been negotiating with the other grain interests in the past several months. Organizations joining with the

Grain Sorghum Producers Association are the Hybrid Corn and Hybrid Sorghum Divisions of the American Seed Trade Association, Chicago, Illinois; the National Corn Growers Association, Boone, Iowa; The North American Export Association, New York City; Farmers Grain Dealers Association of Des Moines, Iowa; Continental Grain Company, New York City and Cargill Grain Corporation, Minneapolis, Minnesota.

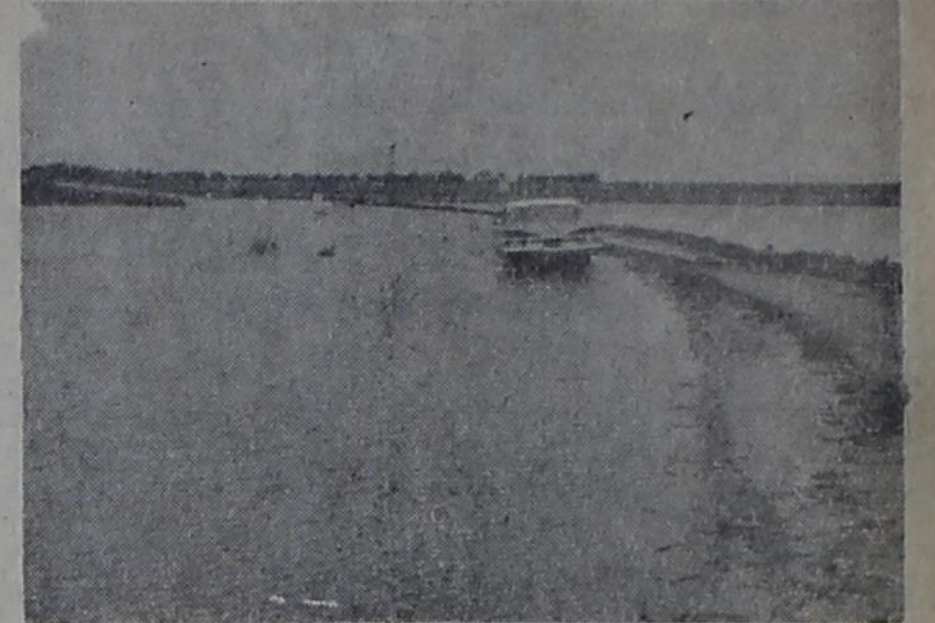

All of these grain industry groups are combining forces for this effort through a newly formed organization which is to be known as the U. S. Feed Grains Council. The expanded Council program is to remain under the administrative direction of Bill Nelson who is to serve as the executive director.

It is expected that this council approach will provide for an increase in the exchange of county agents and other agricultural leaders in potential U. S. grain market areas, as well as allow for the bringing of an increased number of

foreign feed grain users and processors to the area to study grain sorghum and other feed grains, and provide greater understanding of our grades, standards and trading practices.

Other business at the Grain Sorghum Producers Association meeting in Tulia included a report from Charles C. Gidney, Jr., from Rome, Italy who is administering the European feed grain market development projects. He is encouraged at the potential for expanding grain sorghum and other U. S. feed grain exports to the European area if continued efforts are made toward removing or lessening trade barriers, import duties and licensing restrictions.

There are indications, says A. M. Meekma, extension dairy husbandman, that the number of dairy animals may increase during the next year or two. A strong factor is the increased number of replacement animals now on hand.

FARM-TO-MARKET ROAD west of Bovina was flooded and closed to traffic following a three-inch rain Friday night which brought to a close the week's rainfall. This car started to go through the flooded area but decided against it when the water reached a depth of two feet.

### Asgrow Seed To Sponsor Tour

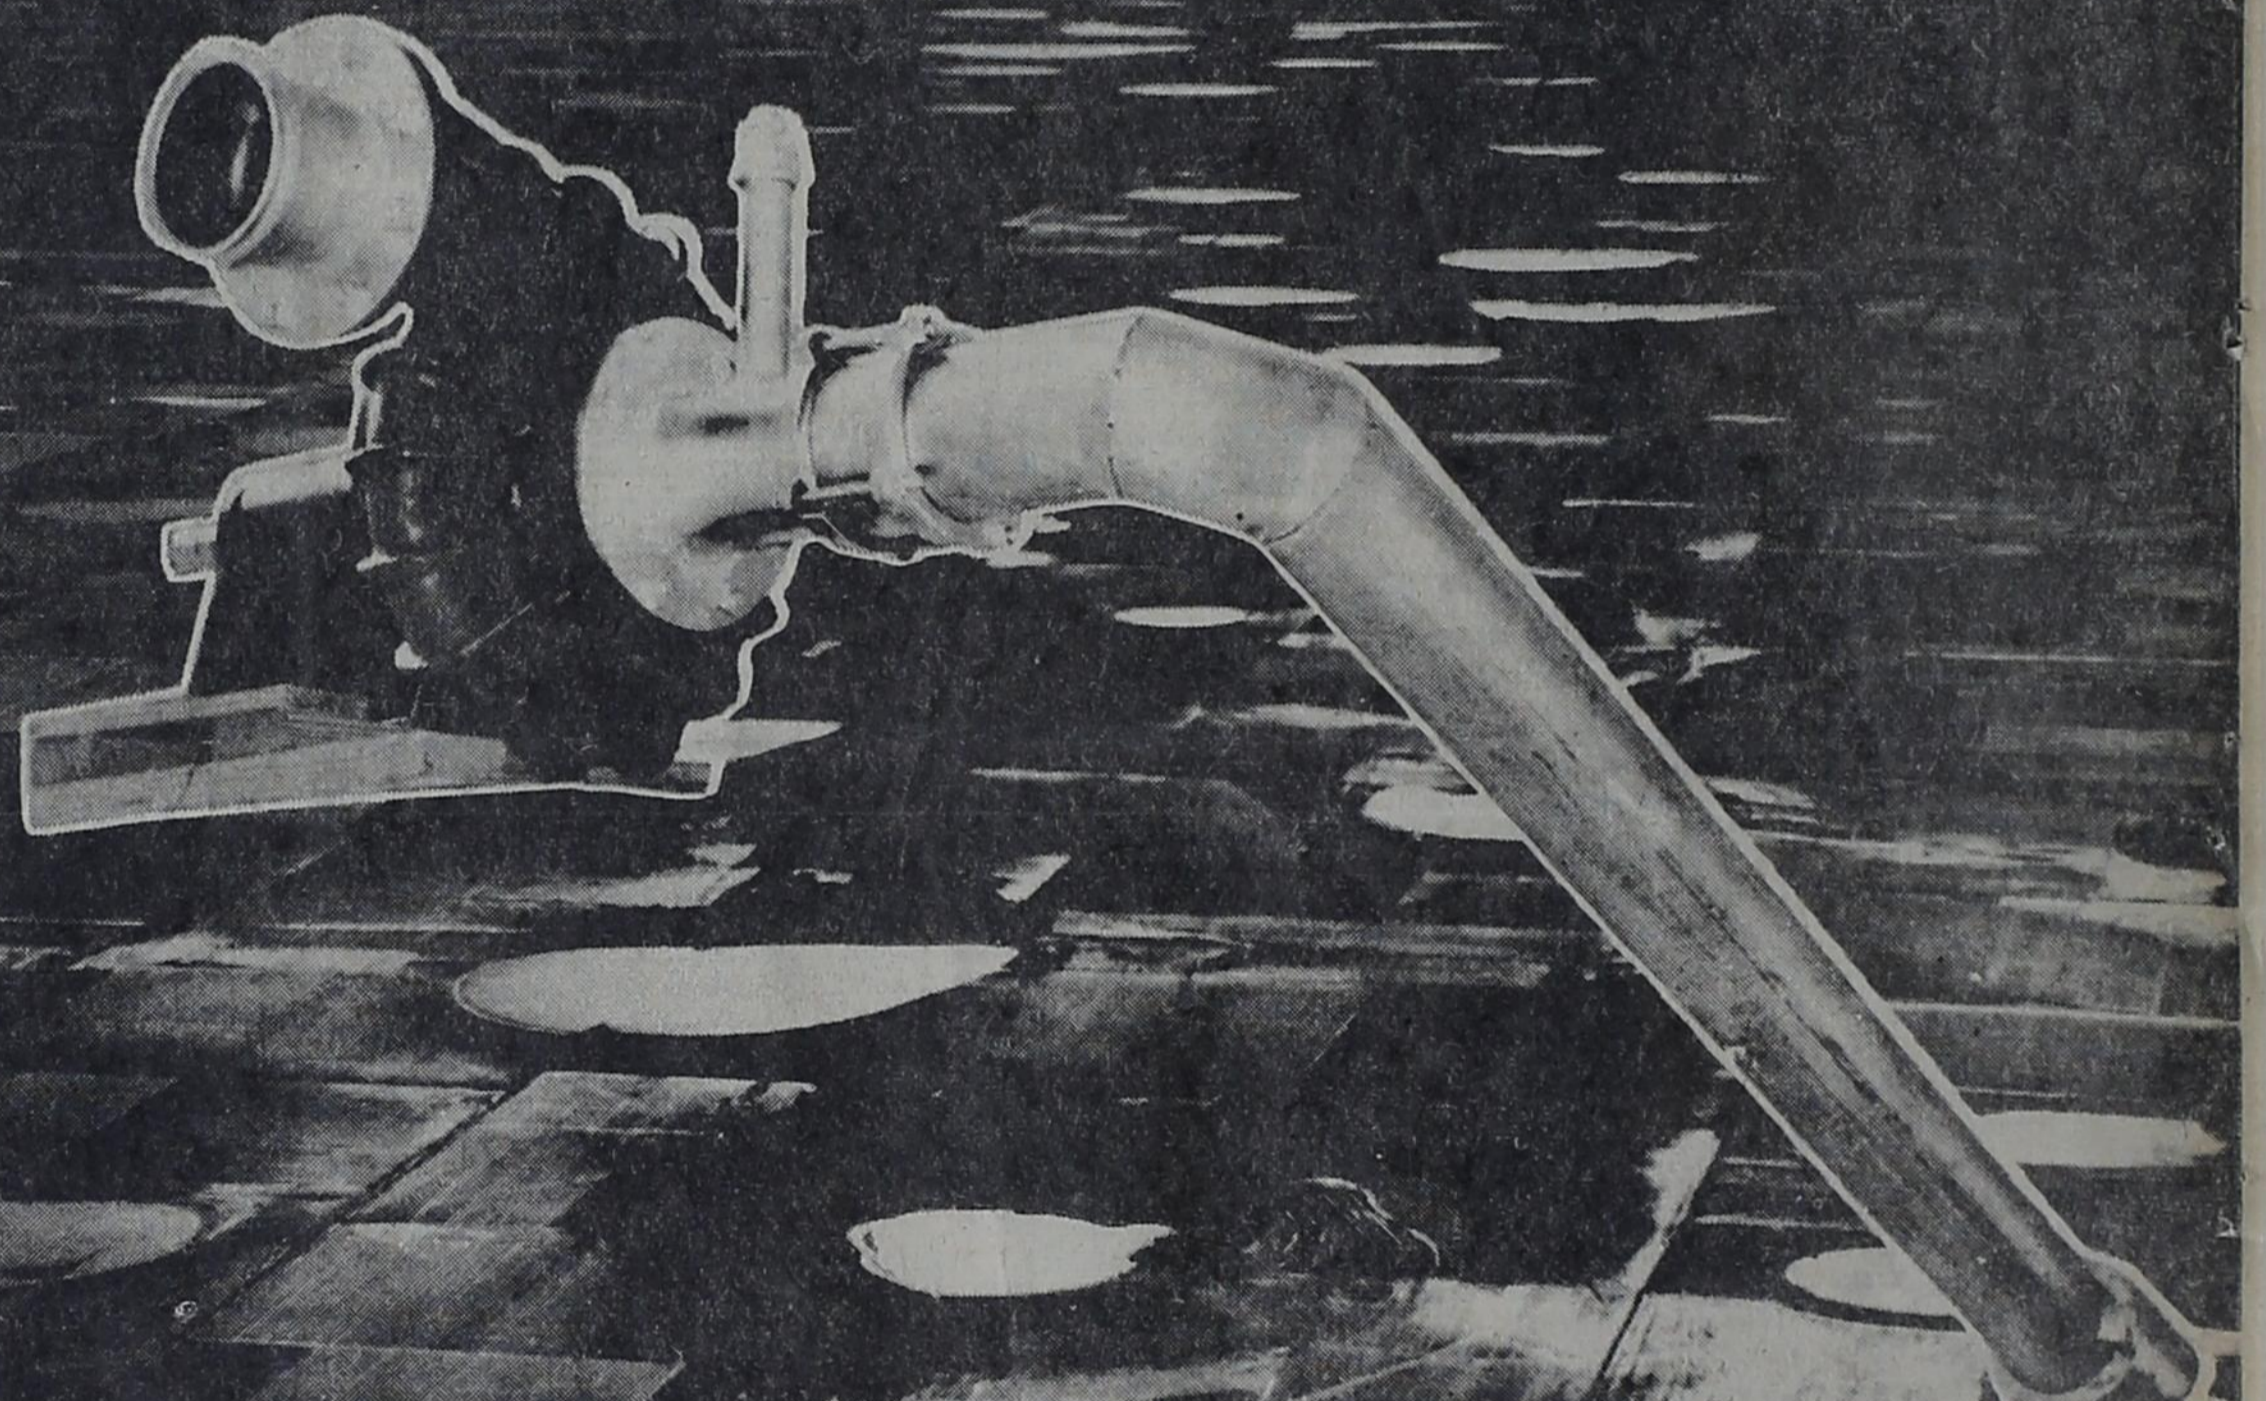

Asgrow Seed Co. of San Antonio is sponsoring a tour of its production fields and seed processing plant next week for its area seed dealers and several newsmen in the area.

A group of about 40 area men will leave by bus Wednesday, July 20 for Uvalde where they will spend the night. Thursday they will tour Asgrow's production fields near Crystal City and later in the day tour

the company's seed processing plant in San Antonio. They will return Friday.
