

# Langford, Opitz Repeat Vows

MRS. TERRY SCOTT LANGFORD  
...formerly Betsy Nan Opitz

Betsy Nan Opitz and Terry Scott Langford were united in marriage December 29, 1979 in the Trinity Lutheran Church in Haskell with Rev. Harvey Faltisek officiating. The bride is the daughter of Mr. and Mrs. Milbert E. Opitz of Haskell. The groom's parents are Mr. and Mrs. Harley F. Langford also of Haskell.

Soloist at the wedding was Mrs. Doyle High accompanied by organist Mrs. Elton Klose. Christi Opitz, the bride's sister, was maid of honor and bridesmaids were Connie Frierson, Mrs. Rex (Camin) Pittman and Connie Liles. Matt Langford, brother of the groom, served as best man and other groomsmen were Michael Bartley, Bill Steele and Gary Thomas. Candle-lighters were Rob Opitz, the bride's nephew, and Dyanna Andress, the groom's cousin. Nephew of the bride, Sean Opitz, acted as ring bearer and Terry Bartley and Dennis Opitz, the bride's brother, were ushers.

Given in marriage by her father, the bride wore a white formal gown of sheer ganza and re-embroidered chantilly lace. The empire bodice, fashioned with a Queen Ann neckline sculptured in lace extending to the waistline,

was beaded with iridescents and pearls. The bishop sleeves held by a deep lace buttoned cuff were finished with ruffles. The slim front skirt with apron-look peplum was trimmed with two deep sheer flounces edged with matching wide lace. Six graceful sheer ruffles swept to a cathedral train with the bustle look, each ruffle edged with wide bands of re-embroidered chantilly lace. Her chantilly lace cloche held the fingertip veil of silk illusion, circled with matching lace.

The bride carried a cascade bouquet. It consisted of a Cattleya orchid, stephanotis, and English ivy and was attached to a white Bible, borrowed from Mrs. Dennis Opitz, the bride's sister-in-law.

The bridesmaids wore identical dresses of terra cotta quina polyester. The long straight skirt was topped with the disco-type wrap skirt, held by the blouson waist. The high fitted collar was sheered into folds. The full raglan sleeves, tied below the elbow, were slit to the shoulder. The natural waistline was held by a self-trim belt. The bridesmaids carried long-stemmed yellow roses.

A reception for the couple was held in the Haskell National Bank Community Building. A wedding trip was planned for New Mexico.

The bride, now attending Texas Tech University, plans to attend McMurry College beginning with the spring semester. The groom is employed with Sojourner Drilling Corporation. The couple will reside in Haskell.

### Hospital Notes

**ADMISSIONS**  
MEDICAL: Warren Elliott, Haskell; William London, Stamford; Becky Mendez, Stamford; Bertha Humphrey, Haskell; Bobbie Williams, Haskell; Bill Shaw, Haskell.  
**SURGICAL:** Birdie Fischer, Haskell.

**DISMISSALS**  
Vannah Little, John Earp, Ezra Burton, Anna Herring, Roddy Townsend, Pamela Gibson, Twyla Sorrells, Avis Pennington, Angeline Griffin.

### Around Town

Mr. and Mrs. Jetty Clare have been visiting their daughter Dr. and Mrs. T.W. Williams Jr. and family of Houston through the Christmas holidays.

Mr. and Mrs. Robert Dumas' grandson, Keith Bartley, is in Midland General Hospital in Midland, convalescing after emergency surgery last Saturday. Paternal grandparents, Mr. and Mrs. John Bartley are currently in Midland with their grandson. Keith is the son of Mr. and Mrs. Donald Ray Bartley.

Bennie Roberts of Garland spent the Christmas holidays with his parents, Mr. and Mrs. Ben F. Roberts.

Bruce Andress and C.B. Baker, both of Hurst were recent week-end visitors in Stamford and Haskell.

Philip Bledsoe & family of Ft. Worth and Vicki (Bowen) Guzman and family of Alvin spent a few days during the Christmas season with their parents and grandparents, Mr. and Mrs. Slover Bledsoe.

Mr. and Mrs. Ronald Hilliard, Jarred and Jason have moved to Odessa recently. Ronald was transferred from Lockhart to Odessa to be promoted to District Conservationist for the Odessa area Soil Conservation Service. He was also appointed Company Commander for a new National Guard unit in Midland.

Christmas Holiday visitors in the E.L. Hilliard home were Mr. and Mrs. Ronald Hilliard, Jarred and Jason of Odessa. Mr. and Mrs. Larry Short of Rochester, Ellen Hilliard and Jean Ballard of Abilene.

Mr. and Mrs. E.L. Hilliard were in Brownfield for a few days visiting Mr. and Mrs. Kenneth Hilliard and Nicole.

Visiting in the E.L. Hilliards' home this week-end were Mr. and Mrs. Gary Shaw, Darren, Karen, Laren and Marshall.

Mr. and Mrs. Kenneth Hilliard are proud parents of a baby girl born Dec. 30, 1979 at the West Texas Hospital in Lubbock.

Visitors in the C.E. Tidwell home over the weekend were Dan Burson, Arlington, Travis and Peggy Burson, Lubbock, Vadie and Jerry Harrell of Rule and Leonard and Minnie Davis of Haskell.

# Wedding Set February 15

Karin Sherrill Pippin and Robert W. McIntire, Jr., both of Austin, will be married on Friday, February 15. Karin is the daughter of Carolyn Williams Pippin and the late George Marion Jack Pippin. She is a graduate of Haskell High School and the University of Texas at Austin.

The prospective bridegroom, a graduate of Carlsbad, New Mexico High School, and the University of Eastern New Mexico, is

Vice-President, CFA, Trust Division, of the Capital National Bank of Austin. He is the son of Dr. and Mrs. Robert W. McIntire, Sr., of Carlsbad, New Mexico.

The couple will be married in the First Presbyterian Church of Haskell, with a reception planned at the Haskell Country Club.

A reception announcing the couple's engagement was hosted by Mr. and Mrs. Ira Hester in their home at 1307 N. Ave. G., on Saturday, December 29.

The Hester home was festive with holiday decorations. Guests were served from two buffet tables decorated with red tablecloths, votive candles, poinsettias and azaleas. Green holly and ivy carried out the holiday scene. Guests were greeted by Mrs. Hester and her daughter.

A SUBSCRIPTION to The Haskell Free Press is an ideal gift for any occasion. We do all the work. Just come by and give us the name and address and we'll send a gift certificate in your name. Haskell Free Press.

### BIRTHS

Mr. and Mrs. Billy Ray Luna of Lueders announce the birth of their son, Clemente Luna, born December 29, 1979 at Haskell Memorial Hospital weighing 7 lb 3 1/2 oz.

Mr. and Mrs. Philip Ooten of Humble announce the birth of their daughter, Ronda Kay, born Dec. 12th. Ronda Kay weighed 7 lbs 14 oz and was 19 1/2 inches long. The grandparents are Mr. and Mrs. E.H. Ooten of Denton and Mrs. and Mrs. Bailey Foster of Rochester.

### Evaluate Fertilizer Practices

"Fertilizer prices have increased, and this situation requires the producer to re-evaluate 1980 fertilizer practices, says Max Stapleton, county Extension agent. Reports are that fertilizer costs will be from \$20 to \$30 per ton higher for 1980. Increases in energy costs and transportation costs are responsible for this new price schedule. With this information on hand, the producer must become more keenly aware of crop fertility needs and the residual soil fertility levels.

Soil testing, reports Stapleton, offers two methods to manage fertility inputs for 1980. Having a good understanding of what fertilizers are required allows the producer to apply only what is needed. This knowledge prevents unneeded production inputs. Secondly, a good soil testing program provides the farmer information on residual or carryover fertility levels in soils. Taking advantage of residual nitrogen or accumulated phosphorus often allows the producer to reduce fertility inputs during a given year, reports Stapleton.

Anyone interested in soil testing can obtain information sheets, information for sampling, and mailing cartons at the Haskell County Extension Office.

## The Consumer Alert

by Mark White  
Attorney General

Since this is my last column of the decade, a few moments of reflection on consumer protection seems in order.

During the 1970's consumer protection grew up. The sometimes turbulent and always controversial years of "Nader's Raiders" moved aside as a new consumer consciousness among all Americans took hold.

The 1970's were years of legislation for consumers. New laws are on the books in nearly every state in the Union and the federal government, which are designed to protect consumers in every conceivable type of consumer transaction. Air fares, warranties, automobile repairs, business opportunity schemes, nursing homes, mail order sales, are merely representative of the myriad consumer transactions in which the impact of new legislation has been felt.

The Consumer Product Safety Commission was established as an integral part of the federal government. During its brief existence, the Commission has recalled more than 20 million allegedly unsafe consumer goods.

The Federal Trade Commission woke up from its apparent repose of previous decades to become a national leader and trend setter in consumer protection.

The Consumer Information Center was established by presidential order in 1970 to distribute federal publications on topics of interest to consumers. By the late 1970's, the center was distributing more than 25 million booklets, pamphlets and other publications each year.

In Texas the 1970's saw the birth of the Deceptive Trade Practices and Consumer Protection Act, the centerpiece of all Texas consumer protection activities. The passage of this statute not only provided immediate assistance to consumers in the marketplace, it also represented the beginnings of a shift in the responsibility for consumer protection away from the federal government to the states.

The Consumer Protection and Antitrust Division of the Attorney General's Office was created during the early part of the decade and has since become an important source of assistance for tens of thousands of Texas consumers.

It would be impossible to catalogue each of the significant strides taken by the consumer movement during the 1970's. An accurate summation of the progress made is contained in a 1978 report, "Consumer Protection: Gains and Setbacks", published by Congressional Quarterly, Inc.

"Perhaps the most significant achievement of the consumer movement has been an attitudinal change in the public. People are more aware of their consumer rights, more willing to complain about shoddy goods and services and more careful about where and what they buy in the first place."

There also has been a general recognition that effective consumer protection helps the business community as much as it does consumers by insuring that those few who engage in unlawful, harmful

practices do not long remain a part of the business community.

The decade of the 70's has been good for consumer protection. Our challenge now is to continue moving forward with a renewed sense of fairness to all concerned and with confidence that, because of the progress made in the 1970's, consumer protection is here to stay.

### Social Security Tax Rate Same-Base Increases

The social security tax rate will stay at 6.13 percent for 1980 but there will be an increase in the earnings base, Glyn Hammons, district manager in Abilene said recently. The earnings base is the maximum amount of annual earnings subject to the social security tax, Mr. Hammons said. The base will be \$25,900 in 1980, compared to \$22,900 for 1979.

Workers who earn less than \$22,900 will pay no more tax in 1980 than they did in 1979. Those who have earnings of \$25,900 or more in 1980 will pay an addition \$183.90 in social security taxes. The maximum 1980 social security tax will be \$1,587.67 for workers with annual earnings of \$25,900 or more. The maximum tax for 1979 is \$1,403.77.

The tax rate for self-employed people will stay at 8.10 percent for 1980, Hammons said, but the higher earnings base will mean a bigger tax bill for those with earnings of more than \$22,900.

Workers should check their W-2 forms carefully when they receive them. A copy of this form is used to enter a person's covered earnings in social security records. Any difference between the worker's own records and the information on the W-2 form should be reconciled.

For further information you can contact the Social Security office at 142 S. Pioneer or call 698-1360.

### Couple To Celebrate 60th Anniversary

Mr. and Mrs. Aubrey A. Harrison of Booneville, Ark. (former residents of Weinert) will celebrate their 60th Wedding Anniversary January 12th with a reception from 2-4 p.m. at the home of their daughter, Mr. and Mrs. Leon Crowley of Booneville.

Cards, letters and calls would be appreciated from long-time friends in the Weinert-Haskell area, to help them celebrate this special day.

Mr. and Mrs. Harrison are the parents of Juanita Severe, Jewell Porter, Robbie Logan, Wanda Partain, Naomi Crowley, Floyd and Lloyd Harrison.

## More Tourist Money Used For Fuel

Higher gasoline prices took a bigger chunk out of the Texas auto visitor's travel dollar during the first six months of 1979.

Auto visitors to Texas who averaged a week's stay had to squeeze two more cents out of each travel dollar to pay for higher fuel.

Tom H. Taylor, director of the Travel and Information Division of the State Department of Highways and Public Transportation, said an average 28.8 cents from the out-of-stater's travel dollar went for auto expenses during

the first half of 1979. In the January through June 1978 period, auto expenses took 26.6 cents of the short-term visitor's travel dollar.

Food and lodging each took an average of about a penny more in the first six months of 1979. But the auto visitors spent about half a cent extra from each dollar on entertainment, too. All the increases were at the expense of the miscellaneous "other" category.

These statistics are detailed in a report recently released by the department. The

mid-year survey results can be obtained by writing VIR Survey, DHT, Box 5064, Austin, Texas 78763.

Taylor said the report is an interim tabulation of data collected year-round by the department. There is no tabulation of total visitors, but the survey contains breakdowns profiling short and long-term U.S. and foreign visitors who drove to Texas. The report does not include visitors from Mexico since partial year figures on Mexican tourists are unavailable.

Visitor totals for 1979 will be included in the department's

authoritative Visitor Industry Report, due out next spring.

San Antonio was the city visited by the majority of out-of-state tourists during the first half of both 1978 and 1979, while Houston ranked number two. Oklahoma beat out California during January through June 1979 as the state providing Texas with the most auto visitors.

Foreign visitors, excluding Mexicans, came primarily from Canada and Great Britain in the first half of 1979. Canada and West Germany ranked first and second during the same period of 1978.

# '70s Was Decade Of Building At Texas Tech

The decade of the '60s at Texas Tech University was marked by the greatest increase in student numbers, but the '70s was the decade for building. In the 10-year period, 1970-79, more than \$139 million created a new look for the institution.

The new structures contain more than half the present total floor space at Texas Tech. The largest expenditures went to build the Health Sciences Center Building. The shell for that building was completed in 1977 but interior construction continues. The total expenditure, including a second heating and cooling plant needed for the facility, amounted to \$63,196,925.

The remainder, slightly more than \$75 million, was spent on buildings serving university students.

Dr. Glenn E. Barnett, vice president for Planning, said that the comparative magnitude of the building program was unprecedented and likely would never be repeated at Texas Tech.

"There undoubtedly will be slight increases in future enrollments at Texas Tech," he said, "but there is little to indicate the kind of growth that led to this building program."

Construction reflected increases in enrollment which more than doubled in the decade of the '60s and rose steadily from 20,008 in 1970 to 23,129 in 1979.

Giving special emphasis to plans for a building program was a jump of almost 2,500 students in the fall of 1965 and increases of about 1,000 per year for the two succeeding years.

Dormitory space had a high priority in the 1960s, culminating in the construction of the Wiggins Complex of three high-rise buildings and a dining area, completed in 1967 at a cost of almost \$11 million.

To expand classroom, laboratory and office space the university erected 38 barracks-type buildings on the campus at about the same time, to make an eventual total of 55. Many regular classes and even the School of Law activities first were housed in some of these. The Law School's permanent building, costing more than \$3

million, was completed in 1969, two years after the first students enrolled and in the early stages of the great building decade.

Dr. Charles S. Harwick, vice president for Academic Affairs, explained that several factors contributed to the need for the new buildings. Not

## John Harrell Named To 1980 Legislative Committee

Helping Americans protect the cash value of their family home will be a key Congressional problem in 1980, an area financial leader said today.

"Congressmen, Senators, and Government officials won't put it that way," John W. Harrell said, "but that's what they'll really be talking about when they debate the financial legislation and regulations being proposed for 1980 action in Washington."

Harrell, President of First Federal Savings and Loan Association in Stamford was named today to the 1980 Legislative Committee of the U.S. League of Savings Associations. The League is the main trade organization of the nation's 4,400 S&Ls, which provide the bulk of home mortgages in the U.S.

Harrell said some of the proposals "could hamper the ability of savings and loan associations to continue their performance as the mortgage lenders that people can rely on, year-in and year-out, when they want to buy or sell a home."

"It's not just the potential home buyer who benefits from our system," Harrell said. "Families who hope to sell their home so they can unlock the built-up savings it represents have a vital stake as well. This 'other savings' can never be realized if persons seeking to buy can't find financing," he said. The system of specialized institutions, he said, "helps insure the cash value of every home."

But some proposals pending

only was undergraduate enrollment growing, but graduate students also were registering in record numbers.

"The increase in the number of students made most of the extra academic space mandatory," he said, "but as the graduate program increased there was the addi-

tional need for more research laboratories and more sophisticated laboratories.

"While the research capability at Texas Tech expanded, there also was a technology explosion occurring. The laboratories we had were outdated and their renovation alone was insufficient to handle research needs," he explained, "and all graduate programs demand adequate research facilities."

During the decade of the '70s graduate degrees awarded doubled over all the previous years of Texas Tech's existence.

Between 1970 and May 1979 the university awarded 4,957 master's and 872 doctor's degrees. Before 1970 there had been awarded 3,379 master's degrees and 369 doctor's degrees. The growth, again, began in the '60s. Between 1927 and 1960, 2,496 master's degrees and 63 doctor's degrees had been awarded. In

Washington could undermine the ability of S&Ls to perform their specialized function by treating them as "second-class banks," by blocking efforts to modernize loan instruments, by pushing up the cost of funds permanently in response to temporary high market rate conditions and by imposing new regulatory and paperwork burdens that interfere with service to the public.

"Will Plain Joe wanting a home mortgage loan stand a chance if he has to line up against a business wanting a commercial loan—a businessman able to pay higher commercial interest rates?" he asked.

He quoted the League's new Executive Vice President William B. O'Connell as saying, "If we're not allowed to continue as a system of specialized thrift institutions, housing and home ownership will suffer."

Congress created the modern type of savings and loan association during the depression years—not only to help Americans buy and keep their homes, but also to help employment in home building, home furnishing and related industries, he noted.

The growth and performance of the specialized home finance system has led to almost 65 percent of Americans owning their own homes today—compared to only 40 percent at the end of World War II.

The U.S. League Legislative Committee will hold its first meeting in Washington, D.C. February 25-27, League Presidents Edwin Brooks, said.

the 1960s 883 master's and 306 doctor's degrees were earned. None of the figures include medical doctors' degrees awarded.

Support for research rose more than \$10 million over the decade, with monies coming both from state and federal governments or other sponsors. Support totaled \$3,401,572 in 1970 and \$13,508,594 in 1979, with a peak year in 1977-78 when the total was almost \$15 million (\$14,863,751).

"The laboratory space needed for that level of research simply wasn't available before 1970," Harwick said.

"In addition to that, some disciplines which had never before required lab space now had to have it." As one example he cited the laboratories required for learning foreign languages.

"We are used to thinking of laboratories in the disciplines of science and engineering,"

he said, "but the social sciences, too, require this kind of space."

Funds for construction came from a variety of sources, federal and state governments, student fees and private gifts.

The Museum of Texas Tech University was completed in 1970 at a cost of \$2,516,004, much of it from private gifts. The Goddard Range and Wildlife Management Building, completed in 1975 at a cost of \$845,000 also was initiated through a private gift as was the Ranching Heritage Center orientation building, completed in 1976 at a cost of \$415,000.

The biggest changes were visible in 1976. The Mass Communications Building, University Center-Music Building addition and Holden Hall addition for social sciences were completed at a total cost of about \$14 million to change the look of the central campus. Construction that year included several renovative projects also, work at the Texas Tech University Agricultural Field Laboratories-Lubbock County near New Deal and additions for food technology, Tech Press and Jones Stadium offices.

For students 1976 marked the real start of massive program to improve recreational facilities. The Recreational Aquatic Center was built at a cost of \$1.5 million. Recreational facilities construction is continuing with the new Recreation Center, expected to open next year, costing about \$5.5 million.

Because of vastly increased research the Textile Research Center, built in 1969 at a cost of \$1.5 million, was expanded in 1977 with a \$1.2 million addition.

The library, built in 1962 at a cost of \$2.2 million, was almost doubled in space in 1975 at a cost of \$4.8 million.

The last large-scale academic structure to be completed was the Food Science-Home Economics Building, which cost \$4 million.

Other buildings constructed in the '70s and contributing to a major change in the face of Texas Tech University included: the Art-Architecture Building built in 1970 at a cost of about \$5 million; the Chemistry Building addition, 1971, \$5.5 million; the Civil Engineering Building addition, 1971, \$1.27 million; and the Home Economics Building addition, 1975, \$1.9 million.

Other projects included in the \$139 million were smaller ones, renovation of numerous buildings, Astroturf and other changes for Jones Stadium, air conditioning, construction and renovation at the Texas Tech University centers at Amarillo and Junction, and construction of Regional Academic Health Centers at El Paso and Amarillo.
