SINGING SCHOOL MEMBERS

About 100 Attending 19th Annual School

Sunday night Kenny Hsu arrived to attend the 19th Annual Singing School at the Church of Christ. Kenny is one of about 100 other students attending the school, but there are some unique characteristics about this sixteen year old from Elmhurst Queen, New York City.

This is the first time that Kenny has traveled alone, and his first trip to Texas. He said just before leaving New York City they experienced

some severe thunderstorms, so much that some of his plans had to be changed. He described our weather as "pretty hot."

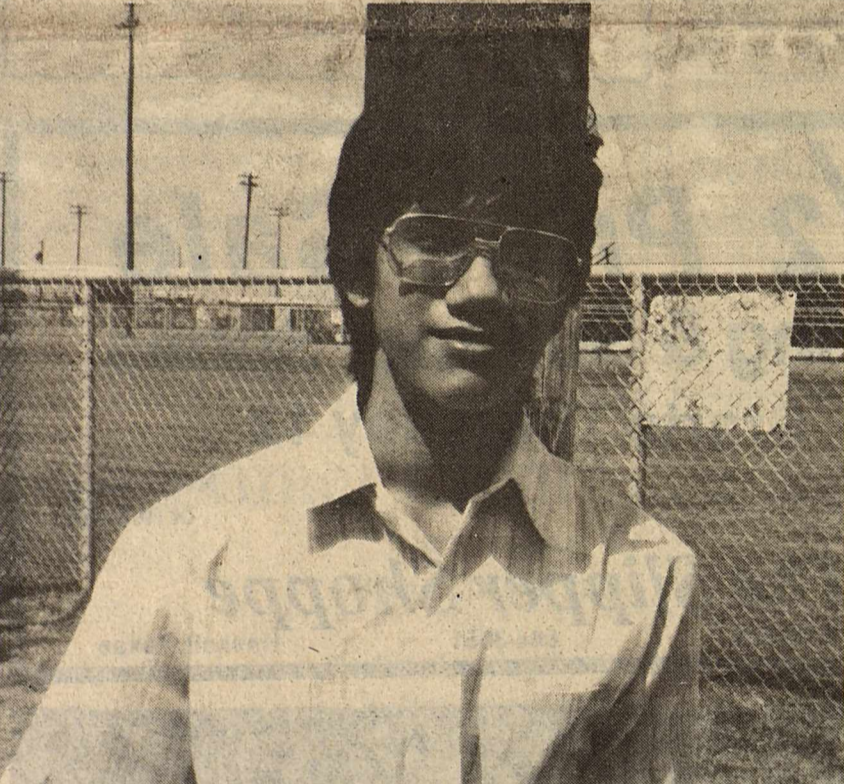

Kenny was born in Manhattan, but his mother is from a village next to Canton, China, and his father is from Singapore. His dad is a taxi dispatcher in New York, and the family attends the Chinese Church of Christ there. They currently have about 85 in attendance each

Sunday. While in Haskell, Kenny is staying with Sam and Nina Wester, along with three other boys from Quannah.

Kenny learned about the Haskell Singing School from the Firm Foundation magazine, and spoke with his preacher about coming to the school. The church in New York is sponsoring his trip. He describes the Singing School as much like regular school. "It is not totally strict, but not totally fooling around either." His one work to describe what he has experienced thus far is "great". Hoping that he will not forget all he has learned this week, he wants to take back what he has learned and share it with members of the church back home.

Kenny said he has felt so welcome from the time he arrived and has been treated special in more ways than one. When the Westers took Kenny by a group of teenagers sitting on a parking lot, he said that was much like the kids back home. At a Monday night devotional he began to realize that he was not all alone, even though many miles separate him from his family and friends in New York.

Kenny enjoys walking, but is afraid he might get lost in Haskell, so he hasn't walked as much as he would like to. All who are around this young man describe him as quiet, polite, and a fine young man. "We are happy to have him with us," states Jim Crain, "and hope he will gain much knowledge in singing this week, and also something about Texas hospitality."

KENNY HSU

Haskell's Sales Tax Receipts Up 4 Percent

State Comptroller Bob Bullock Friday sent checks totaling \$55.3 million in local sales tax payments to the 988 cities that levy the one percent city sales tax.

"We've sent Texas cities nearly half a billion dollars this year," Bullock said. "That's more than 17 percent over what these cities had received by this time last year. Every

one of the 20 biggest sales tax cities is ahead of last year's totals."

Houston's check totaled \$9.4 million, pushing the total Houston payment for 1984 to more than \$82.1 million. Dallas received \$6.8 million, putting 1984 payments to date at nearly 20 percent above 1983.

San Antonio's \$3.1 million check brought its yearly total to \$26.9 million, up \$4 million over the total one year ago. Austin received \$2.6 million, pushing its 1984 total 31 percent ahead of last year.

Midland's check totaled \$616,000, bringing 1984 payments to date 15 percent over 1983.

Bullock also sent checks to Metropolitan Transit Authorities in Houston, Dallas, San Antonio and Fort Worth. The Dallas DART check was for \$8.5 million. San Antonio's VIA check totaled \$1.6 million, and Fort Worth received \$466,000. The Houston MTA check was \$11.8 million.

July payments reflect taxes on sales made in May and reported to the Comptroller by June 20.

HASKELL — A GOOD PLACE TO VISIT. A BETTER PLACE TO LIVE

VOLUME NINETY-EIGHT HASKELL, TEXAS 79521, JULY 12, 1984 NUMBER TWENTY-EIGHT

Satch Lusk To Retire

City Council Approves Fire Dept. Re-organization

Members of the Haskell City Council Tuesday night approved a four point plan to reorganize the Haskell Volunteer Fire Department following the retirement of Satch Lusk on September 1.

Lusk has been the only paid member of the Department for the past 35 years. During that time he has lived above the fire station, received and dispatched all fire calls, driven the first out truck, supervised all training and completed the maintenance on all fire trucks and equipment and the fire station.

Members of the Fire Department submitted the four point plan for Council approval. The plan includes moving dispatch responsibilities of the Fire Department to the Sheriff's Office; hiring a part-time maintenance employee; hiring a part

paid chief; and allowing Satch and Pearl Lusk to continue to live above fire station for as long as they desire.

The dispatch move will include the installation of a new telephone system and a new radio. Dispatchers in the sheriff's office are currently on duty 24 hours per day and with the new system will be able to dispatch fire calls with the same promptness as at the present.

Department members recommended to the Council that the part-time maintenance employee be selected from within the Department if possible. The employee will be under the direction of the fire chief.

Under the new plan, the fire chief will assume the duties of supervision of training and maintenance as well as scheduling manpower of the Department.

In making the presentation to the Council Chief Tom Watson emphasized that it is the goal of a members of the Department to maintain the efficiency of the Department at the current level. "We have a reputation across the area and the state for being prompt efficient and well trained and we intend to maintain this reputation," Watson told the Council.

"We are very fortunate to have such a dedicated man like Satch and he'll be missed, but we have thirty four volunteers dedicated to the goal of saving lives and property and will continue to work hard to improve our Department," said Watson.

Council members approved the plan for a trial period of one year and agreed to consider other changes as they are needed.

City Council Accepts Annual Audit Report

Members of the Haskell City Council accepted the annual audit report during their regular meeting Tuesday night.

The audit, prepared by Mike Harrell, cover the fiscal year ending March 31, 1984.

Included in the report were breakdowns of revenues and expenditures. Major sources of revenue for the City during the last

year included: water collections, \$300,000.00; grant receipts, \$110,000.00; sales tax, \$161,000.00; ad valorem taxes \$71,000.00; revenue sharing, \$26,000.00; franchise taxes (West Texas Utilities General Telephone, CenTex Cable, Lone Star Gas) \$72,000.00; sewer collections, \$57,000.00; garbage collections, \$90,000.00; aviation gas sales, \$75,000.00. These totals are all rounded to the nearest \$1,000.00.

Total revenues for the year were \$1,079,469.00.

Major expenditures included: salaries, \$259,000.00; insurance, \$40,000.00; aviation gas purchases, \$57,000.00; and water purchases, \$168,000.00.

Total expenditures for the year were \$792,507.00.

In other action Council members denied a request for a 12.4% rate increase to West Texas Utilities. The denial will now go to the Public Utility Commission for final action.

Council members also agreed to purchase a computer system instead of leasing the system. The purchase will save approximately \$25,000.00 over the lease on the \$40,000.00 system.

Area Little League Tournament Continues

Stamford and Haskell won the first two games of the area Little League tournament Monday and Tuesday nights in Haskell.

Stamford defeated Twin Cities Monday night, 15-2, to earn the right to meet Haskell in the second game.

Haskell rolled over Stamford 10-3 Tuesday night to advance to Wednesday night play and meet Twin Cities.

Haskell scored three runs in the third inning, six in the fourth, and one in the sixth and allowed Stamford their only three runs in the sixth.

Stamford and Twin Cities met again Wednesday night and Haskell will meet the winner of that game Thursday night at 7:30 p.m.

Haskell coaches are Lonnie Tate and Charles Gibson.

Telephone For Prayer Answers Over 5,000 Calls

On March 17th, 1984 the telephone for prayer was launched in Haskell, today over 5,000 calls have been received.

People from all ages, professions and walks of life are being blessed by the very inspirational ministry. People from all denominations are calling 864-8033.

Do you need a blessing, call today, you will be glad you did. 864-8033.

Bloodmobile To Visit Haskell July 23

Local Red Cross Blood Services chairman, Charles Harvey, has announced that the Red Cross Bloodmobile will visit Haskell on

July 23, between the hours of 1 and 6 p.m. at the First Baptist Church.

If you are between the ages of 17 and 66, and are generally in good health, you are needed to donate blood on this date. Questions concerning eligibility may be answered on site by staff nurses at the Bloodmobile.

In order to assure a safe, healthy and plentiful blood supply it is important that new donors be recruited for each mobile operation. Regular donors are being encouraged to bring a "first-timer".

Donating blood is not something to "fear". It takes approximately 45 minutes to go through the entire process. Those persons who need to have a special appointment time may do so by contacting Harvey at 864-2621.

Kiwanis Club To Sponsor Softball Tourney

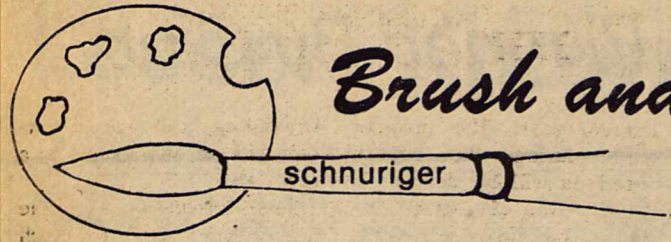

Haskell Kiwanis Club will hold a slow pitch softball tournament July 19, 20 & 21. Trophies will be given for 1st thru 4th place. Entry fee is \$90 per team.

For more information contact Randy Phemister 864-3891 or Conrad Roewe 864-3456. The Kiwanis Club will have bar-b-que available at snack bar during tournament.

Haskell To Host District Masonic Meeting

Members of Haskell Masonic Lodge #682 AF&AM will host the 91st District Masonic meeting July 17.

The meeting will begin at 7:30 p.m. with a supper. Following the meal, the honorable C.W. Westbrook, Past Grand Commander of the Grand Commandery of Texas Knights Templar will speak.

Brush and Palette

Every week I meet someone buying paints and brushes, watercolors or pastels, with the express intention of doing what I have always wanted to do—try my hand at painting. One of the first things I tell beginners is to "grow a thick hide". As you go along someone will inevitably be over-critical of your efforts. Some one will tell you what you have done wrong, even though many times they know less about it than you—and couldn't do as well. Besides, they don't know what you had in mind to say, anyway. So unless it is someone you have asked for criticism or someone whose artistic eye you do not question, pay no mind at all. Go merrily along, expressing yourself—having fun—and if you need to—say, "No, I don't want to change it, that's

the way I see it, and the way I want it." Above all, don't get your feelings hurt or get discouraged. Keep right on doing your thing. I have been in group meetings where critique was done by the group as a learning process—and if ten were in the group, then there would be ten different opinions. Who is to say what is good art?

Q. Have you always used the same palette? Do you ever change?

A. No and yes. No, I have not always used the palette I now use. It is a takeoff from Frederic Taubes, with whom I had several workshops. It is a simple easily managed list of colors and from those I can make any other colors I need. Yes, I change my palette for special workshops. For instance I use the Victorian Palette, the Empire Palette,

the 18th Century Palette and others. It's fun to use limited palettes—try using only one red, one blue and one yellow.

Q. Tell me something about strokes, please.

A. The important thing about strokes is to make them work for you. Think about this. A good rule of thumb for landscapes is to imagine water on the surface of whatever you are painting. Make the strokes go in the direction of the reflections and then in the direction of the water. Painting with a light hand or a heavy hand has to be considered also. Try a small brush (one that I refer to as a 2-hair brush) make flip strokes, make hair-line strokes. Get to know what your brushes will do for you.

HINT: "Anything will give up its secrets if you love it enough." George Washington Carver

Write your questions and hints to me, Faye Schnuriger, P.O. Box 134 Haskell, Texas 79521. I will not use your name but do want you to sign your letters.

Mrs. E.E. Welsh Celebrates Birthday

Mama Maude (Mrs. E.E.) Welsh of 207 S. Ave. C celebrated her 90th birthday on July 7. She was honored at an Open House attended by her family and friends. Mrs. Welsh's seven children were present: E.E. Welsh, Jr., Poteet; Frank Welsh, Midwest City, OK.; Mary Barbara Ankston, Jacksonville; Dorothy Morgan, Arlington;

Billie Bean, Lueders; Ima Jo Watkins, Los Angeles; and Jerry Welsh, Houston.

A special guest was Mrs. Welsh's 91 year old aunt, Belle Cothrum of Temple. Also attending were many grandchildren, great grandchildren and her first great grandchild. A highlight of the day was having five generations together for family pictures.

Mrs. Welsh was born in Holland, Texas. She married E.E. Welsh in 1912 and they moved to Haskell in 1923. She is a survivor of the Galveston flood.

Tips For Keeping Up With Children

In a crowd, a young child is always on the ragged edge of being lost. He is a catastrophe just waiting to happen!

He runs ahead, lags behind, stops to look and touch, takes off in another direction to explore something which has attracted his attention. Parents are only human, and can also be distracted for the moment it takes for a parent and child to lose contact, reminds Growing Child, the monthly child development newsletter. When the child is found—usually only moments later when he begins to wail loudly—both parent and child are relieved. The child is comforted, and the parent takes tighter security measures.

But sometimes it doesn't work out so easily. When the dawdling child looks for his

parents, they are gone. And with them goes his whole world. He is small, and lost in a forest of moving, unfamiliar and uncaring big people.

Where are Mother and Father? They are always there in the world as he has known it. Now his whole world is shattered. How could they leave him? Don't they love him any more? Are they gone forever?

At this point, sheer panic strikes and most children will cry loudly and push here and there calling "Mommy! Daddy! I want my Mommy!" These children are conspicuous and readily recognized as "lost."

But a child may simply freeze in terror at his sudden loss of security and simply stand there, jostled by the crowd, with tears rolling down his cheeks. Another child may

cower in fear and to escape the crowd may crawl under or into any small enclosed space to hide. These children may take hours to find.

And what of the parents during this time? Worried, fearful for the child's safety, angry at his disappearance, angry at themselves for letting it happen, impatient at the time lost, and angry at the thought that the child's "lostness" reflects on their carelessness. It is this strange mixture of worry, fear, guilt, and anger that produces such a mixture of parent response when the child is found.

Here are a few suggestions to avoid lostness:

* If you are using a shopping cart, put the child in the seat provided.

* Many discount houses and department stores provide

strollers for young children. Use them. This is particularly important if you have a lot to do because it keeps the child from becoming overly tired and unhappy.

* Use a child's harness and lead. These are not always easy to find but there are easy alternatives: an old leather belt with a snap ring, or a waist harness made out of cloth and clothesline.

* If the child does get lost, it is important that he know his full name. Make a game of teaching it to him: "What's your name, little boy?" Later add "What's your Daddy's name?" and "Where do you live?" This last becomes very

important if you are a family that moves frequently.

* Finally, should you and your child get lost from each other, remember that it can happen to anyone. Try to "keep your cool," and at the moment of reunion let your child know that you are happy to find him as he is happy to find you.

Growing Child newsletter follows a child's development month-by-month from birth to six years old. For more information and a free sample newsletter, write to Growing Child, P.O. Box 620N, Lafayette, Indiana 47902. Include child's birthdate when writing.

Schroeder Family Reunion Held

The descendants of the late Mr. and Mrs. H.C. Schroeder met for a family reunion June 30, 1984 at the Haskell Country Club in Haskell.

Seventy-five relatives attended from: Haskell, Stamford, Hamlin, Abilene, Ropesville, Alamogordo, New Mexico, Big Spring, Lubbock, Shallowater, Seagraves, Amarillo, Colorado Springs.

Those traveling the farthest were Mr. and Mrs. Kurt Schroeder from Colorado Springs, Colo.

Hostesses for the occasion were: Mr. and Mrs. Eldon Anderson and family from Haskell and Alma Dippel from Stamford.

The oldest Schroeder boy present was Cecil Schroeder from Grand Prairie, and the youngest Schroeder boy present was Gray Swening Schroeder from Austin, grandson of Cecil Schroeder.

Those traveling the farthest were Mr. and Mrs. Kurt Schroeder from Colorado Springs, Colo.

Hostesses for the occasion were: Mr. and Mrs. Eldon Anderson and family from Haskell and Alma Dippel from Stamford.

Prevent Food Poisoning This Picnic Season

July begins the peak picnic—and food poisoning—season.

But with a few simple precautions, this unpleasant and sometimes serious illness can be avoided, says a Texas A&M University Agricultural Extension Service food and nutrition specialist.

The "poison" is actually produced by a certain bacteria, type of staphylococcus, which contaminates the food, says Mary K. Sweeten, the poison is eaten with the food and produces symptoms such as nausea and vomiting.

For most people, food poisoning is just a miserable experience, but it can be serious for babies, elderly people and those with other illnesses, she notes.

Hospital Notes

Visiting hours at Haskell Memorial Hospital are 2 to 4 p.m. and 7 to 8:30 in the evening. No visiting hours in the morning. No children under 14.

ADMISSIONS

MEDICAL: Anita Molina, Haskell; Jesse Parks, Benjamin; Vera Keel, Rochester.

DISMISSALS

Herbert Moy, Jerry Cornett, Pauline Stiewert, Leita Lain, L.J. Dunn, Bertha Humphrey, Lois Speck, Lula Kuenstler, Henry Sosa, Leona McGee, Jack Collins, Billy Anders, J.F. Templeton, Curtis Love, Mark McIntosh, Billie Cadenhead, Robert Brown, Evelyn Balis, Mercedes Caram.

The bacteria often reach food from the hands of the person preparing it. But even when you're careful to wash your hands, bacteria from the skin, hair or throat, can be spread to food, she explains.

Since these bacteria are especially fond of protein, Sweeten recommends precautions when taking high protein foods—such as meat, poultry, salads containing egg, custards and some baked foods—on picnics.

The most likely sources of food poisoning are those dishes that you don't normally heat or reheat before serving on a picnic.

"It's never wise to assume

that high-protein foods are safe after being kept at room temperature," she says. "Since refrigeration prevents the bacteria from making their poison, the most effective way to avoid food poisoning is to eat them right away or else keep them cold until they are served."

Refrigeration temperatures should be below 45 degrees, which may be difficult to maintain in an ice chest or other type of cooler, she cautions. "Contrary to myth, mayonnaise isn't commonly the main culprit in food poisoning," so it's important to keep all hot foods hot and cold foods cold.

Around Town

Mr. and Mrs. Herbert Fischer and Dale spent last week in Billings, Montana with Mr. and Mrs. David Fischer, Christopher and Rebecca. While there, they were joined with Dr. and Mrs. Freddie Sagebiel, Tara and Faron and they all toured the Yellowstone National Park together. All had a very enjoyable trip.

Visiting friends in Haskell recently were Don McClintock of Kerrville, and Margaret McClintock of Dallas. Don was born in Haskell in 1933 and Margaret was a 1944 graduate of HHS.

C.B. and Dee Sprayberry have returned from the Crump family reunion in Columbia, South Carolina.

There were members from Mississippi; Tennessee; Detroit, Michigan; Texas and Virginia.

Shannon and Jennifer Di Lorenzo returned to their home in Cincinnati, Ohio, after spending 3 weeks with their grandparents, Felix and

Lydia Klose; Uncle and Aunt, Jerry Don and Phyllis Klose in Haskell and Loyd and Janis Klose and Linda and Gary Carpenter in Abilene.

Satch & Pearl Lusk
would like to thank everyone who attended their 50th anniversary reception Sunday, July 8. Also a thank you to all who sent gifts, flowers and cards to help make the day so special. We would like to say a special thanks to the ladies of the Haskell VFD Auxiliary for all their work and to Mr. and Mrs. Charles Swinson and Mr. and Mrs. J.B. Gipson for making the reception possible. Again thanks to you all.

Ceremony Unites Chapman, Marquis

Carla Michele Marquis of Abilene and Ricky Lynn Chapman of Hamby were married on Friday afternoon, June 29. The ceremony took place in Abilene in the office of Justice of the Peace Samuel Mata.

Carla is the daughter of Mr. and Mrs. James Marquis of Rule and Rick is the son of Mr. and Mrs. Jack Chapman of Hamby. Attending the wedding besides the parents of the couple were the bride's sister, Cheryl Hertel, nephews,

Michael and Jeremy Hertel, all of Rule and the groom's sons, Tanner and Beau Chapman of Hamby.

The bride is a graduate of Rule High School and Abilene Beauty College and is employed by Westgate Mall Command Performance.

The groom is a graduate of Albany High School and is employed by Abco Boilers in Abilene.

Following a short wedding trip to Dallas, the couple are making their home in Hamby.

ERICA HOLLINGSWORTH

Erica Hollingsworth Attends Contest

Erica Hollingsworth, of Rochester, recently attended the State Pageant of Our Little Miss Universal System at Fort Worth. Erica spent six days at the Green Oaks Inn where she competed in pro/am modeling command performance talent, close-up appraisal, sportswear, party dress, and living doll competition. There were 207 girls who attended the pageant, and Erica was in competition with 60 beautiful girls between the ages of 3-6.

Erica has gained the opportunity to compete in the World Pageant (August 5-12) by winning (1) 1984 Texas Miss LaPetite Universal Beauty Top Ten, (2) Tiny Living Doll 1st Alt., (3) 2nd in talent, (4) best 4 year old, and (5) best sportswear. Winning the opportunity to advance to the fabulous World Finals is important, but not as important as the lessons of friendship and sportsmanship. The

purpose of Universal Pageants is to provide an outlet and to give recognition to beautiful and talented girls throughout the world.

Installation Banquet Planned By Club

Members of the Haskell VFD Auxiliary held their regular monthly meeting July 3 at the Fire Station at 7 p.m. President Betty Stocks presided.

Officers for the coming year were elected, and plans for a installation banquet were made. The installation banquet will be held at 7 p.m.

August 7 at the Fire Station. A business meeting will be conducted at 6:30 p.m. A pot luck supper will be held for members, spouses and guests. Wanda Dulaney, local Chamber of Commerce manager, will conduct the installation ceremony.

Members also voted to discontinue programs in the

coming year. The program Scheduling and sign up periods will be announced at a later date.

work on the upcoming April convention. Hostesses will be responsible for refreshments. A convention chairman will be appointed to chair work details.

A CPR class will be scheduled for firemen and members of the Auxiliary. City Council room.

Final discussion on anniversary party for Satch and Pearl Lusk was held.

Racing practice will be held at 6:30 p.m. July 19. Following racing practice at 7:30 a.

special meeting was called and will be held in the City Council room.

Rochester Hobby Club

Three new members were added to the 31 member Hobby Club roll within the last month. They are Mattie Lou Cole and Ardell Beason of Rochester and Oleta Fitzgerald of Knox City. We welcome them with open arms.

The regular business meeting was presided over by the President, Helen Cox. The secretary, Evelyn Rogers and the treasurer, Mae Speck

made reports to the club. It was made public to the group that the Country Quilt squares donated by club members had been put together and would soon be in the quilting frames. Odessa Erwin was the seamstress who did the work.

The noon meal was a delicious one hosted by Annie Marshall on July 3rd. The July 17th lunch will be a covered dish one and the hostess will be Eunice Newberry.

The dandelion blossom is actually a bouquet of about 150 to 200 tiny flowers set in a solid head on a stem.

Microwave Vegetable Cooking School Set

A vegetable cooking school will be held July 19, at 2 p.m. in the county extension office kitchen.

Interested persons are asked to pre-register by 5 p.m. July 13 by calling 817-864-2546.

Taught by Carolyn Schur and Lou Gilly, the school is sponsored by Modern Way Food Store.

Carolyn will be demonstrating the art of cooking

vegetables in the microwave. Vegetables she will be demonstrating are asparagus, mushrooms, potatoes, and spaghetti squash.

Lou will demonstrate the techniques for preparing shish kabobs, stir fry vegetables, and eggplant.

West Texas Utilities will furnish the microwave.

There is no charge for the school but enrollment will be limited.

Obituaries

Wayne O'Neal

The following article about Wayne O'Neal appeared in the General Hospital News bulletin from Wichita Falls, June 1984.

He was the son of Horace O'Neal who died June 26, 1984 and the former Mattie Lee Cook who died in 1959.

His grandparents were the late Mr. and Mrs. W.H. O'Neal of Haskell and the late Mr. and Mrs. Cook of Weinert.

He is survived by Lydia, his wife; and two daughters Melanie and Deletha of Wichita Falls; his step-mother, Mrs. Bobbie O'Neal of Seymour; two sisters, June Rowan and Elaine Cooper both of Pampa; two step-brothers, Gaylon Chamberlain of Kansas and Keith Chamberlain of Wichita Falls; and a host of relatives and friends.

The death of Wayne O'Neal, RN-ICU, shook the hospital family deeply. A highly skilled intensive care nurse, he was a beloved friend and an eternal smile.

Wayne joined the nursing staff at General in May 1973 as a graduate nurse, working part time in ICU. He became a full-time staffer in January 1974 and had worked in ICU ever since. He believed in education and had taken courses whenever offered to improve his skills in ICU — the ACLS classes, arrhythmia and dialysis training. At the

time of his death, he was preparing to take the CCRN examination. Wayne also liked the other side of education and was an enthusiastic and caring teacher.

The adjectives used by his friends and coworkers are uniformly the same. He was a consummately gentle man, deeply in love with his wife, Lydia, RN, head nurse-4E. He was a very religious man who lived his beliefs every day. He had worked as a lay minister before coming to General. He was a hard worker, willing to fill in or do whatever was needed of him. His gentleness and humor were shared freely with both patients and coworkers. Everyone in ICU and CCU has a favorite anecdote about Wayne and his special bubbling nature.

Away from the hospital, he added another love to his life, the outdoors. He loved to hunt and fish, frequently taking Lydia fishing with him.

Ruby Elmore

Funeral services for Ruby Lillie Elmore, 68, of Atoka, Oklahoma were held at 2 p.m. July 11 in First United Methodist Church in Haskell with Rev. Mike Struve officiating. Burial was in Willow Cemetery.

Mrs. Elmore died July 8 in Mary Hurley Hospital in Coalgate, Oklahoma.

Born June 8, 1916 in Haskell, she was a housewife. She married Chester Elmore November 22, 1934 in Haskell. She moved to Oklahoma in

May of 1975.

Survivors include her husband; two daughters, Joe Ann Lane of Arlington, and Linda Kay Turbyfill of Athens; two sisters, Thelma Perry and Reba Wheatley, both of Haskell and 5 grandchildren.

The pallbearers were Johnny Wheatley, Ray Perry, Tommy Wheatley, Don Perry, W.O. Elmore, Eddie Elmore, Larry McMillan, and Gene Perry.

A&M researchers battle parasite weed

Texas agriculturalists are combating a small parasitic weed, the branched broomrape, that has spread along hundreds of miles of highway in Karnes County and may overrun the Rio Grande Valley's agriculture industry.

The small, yellow plant with white flowers (*Orobanche ramosa*) feeds off and destroys broadleaf plants, including wild plants such as bluebonnets and agriculturally important crops such as tomatoes, clover, potatoes, carrots and lettuce, says Dr. James Chandler, a crop scientist for the Texas Agricultural Experiment Station (TAES), part of The Texas A&M University System.

The weed is currently growing along more than 400 miles of Texas highways near Karnes City, Panna Maria and Runge, he said.

"Our biggest concern now is that the weed isn't spread by someone picking the flowers along the roadside and taking them home to put in a flowerbed in more agriculturally-intensive areas where food is grown," Chandler said.

The plant is found worldwide and has devastated crops in South Africa and in some European countries it has cut the growing season in half.

Small amounts of Roundup, a retail herbicide, have been sprayed along highways to kill the weeds without destroying all the host plants, Chandler said.

He added that researchers are also studying the use of flax, a small plant from which linseed oil is extracted, which can be used to stimulate broomrape germination. But flax doesn't let the weed attach to its root system, which means the weed will ultimately die.

Comptroller's Rep To Visit Stamford

Comptroller Bob Bullock announced he is sending a representative from his Abilene office to Stamford on July 18, 1984 to assist local taxpayers and answer questions about state taxes.

Bullock said Tax Representative Jena Thomas will meet with local taxpayer at the Stamford City Hall Conference Room from 9:00 a.m. until 10:00 a.m.

"If Haskell and Jones County area merchants, or anyone else for that matter, have any questions about state taxes or need help in preparing tax forms, Jena Thomas will be there to assist them", Bullock said.

"We're trying to cut the red tape in this office and we believe these face-to-face sessions with taxpayers help just that", Bullock added.

All propane users will be able to buy 1984 and 1985 prepaid tax decals for their motor vehicles at this time. All vehicles that burn propane are required to have this decal.

Bullock reminded those taxpayers who are unable to meet with this representative on July 18th that they can still get their questions answered quickly by calling his toll free

tax information number in Austin. That number is 1-800-252-5555.

The Abilene office headed by James Martin serves, Taylor, Brown, Callahan, Coleman, Comanche, Eastland, Fisher, Haskell, Jones, Mitchell, Mills, Nolan, Scurry, Shackelford, Stephens, San Saba, McCulloch and Stonewall counties.

WE HAVE pencil cups, stackable trays, book-ends, paper clip holders, stamp cubes and telephone files in matching colors. *Haskell Free Press*

The state flower of Georgia is the Cherokee Rose.

The deer family includes about 60 species, ranging in size from the huge Alaska moose down to the Chilean pudu, which is almost as small as a rabbit.

Shackelford Named Alvord High School Principal

The Alvord ISD is pleased to announce the hiring of Mr. Gene Shackelford Jr. as High School Principal. He will begin his duties on July 2.

Mr. Shackelford is a Stamford High School graduate. He has a bachelor degree from McMurry College and has his Masters of Education degree from Denton. He also has his Principals and Superintendents Certification from Denton.

Mr. Shackelford formerly coached and taught school at Weinert ISD. He was Principal and Head Coach at Rochester ISD. The past four years he has coached at Boyd High School. His teams have a football record of 41-6-2. This past season his team won the Class AA State Championship with a record of 15-0-1.

He served on the THSCA All Star Selection Committee in 1977. He was the Class A coach for the North ALL-STAR Football Game in Dallas in the Cotton Bowl.

He is married to the former Marsha Royall also a Stamford graduate. They have three children; Stacie, a 13 year old eighth grader; Kelly, a 10 year old fifth grader; and Jennifer, a four year old. They have

lived in Decatur the past four years and will continue to make this their home.

He is the son of Mr. and Mrs. Gene Shackelford of

Avoca. His grandparents are Mr. and Mrs. E.V. Shackelford and the late Mr. and Mrs. J.A. Hill all of Munday.

White-tailed Deer Population Studied By Biologists For Book

COLLEGE STATION — Some of the state's top wildlife biologists have embarked on a project to help landowners, lease hunters and hunting clubs get more out of the hunting season by manipulating white-tailed deer population.

The result of the work will be a book written in lay terms to give Texans who aren't trained biologists a better understanding of information such as the deer's life history, habitat requirements, population dynamics and economic value from the standpoint of leasing and hunting, says Dr. William Sheffield of Texas A&M's Department of Wildlife and Fisheries Sciences.

About 2-3 million white-tailed deer comprise the largest proportion of all deer in the state and live throughout most of Texas.

Sheffield and 25-30 other wildlife experts and biologists from Texas A&M's College of Agriculture, the Texas Parks and Wildlife Department, private interests and scientists from the Texas Agricultural Experiment Station and the Texas Agricultural Extension Service are contributing to the book.

CAPITOL UPDATE

John Tower
U.S. SENATOR for TEXAS
WASHINGTON, D.C. 20510

Each summer young people across America are faced with the chore of looking for a job. Although overall unemployment has dropped below 8 percent, jobs for teenagers are still scarce in some areas.

The lack of employment opportunities for young people can be blamed in part on the minimum wage which requires employers to pay nothing less than \$3.35 an hour to workers. Many employers are unable to pay this wage and simply leave jobs unfilled. Young people are particularly hurt because they have less experience and are less productive. Yet, they need work experience to develop productive work habits. Minority youths have suffered the most unemployment due to the minimum wage. Unemployment among teen-age blacks is over 50 percent in some areas of this country.

I have joined in sponsoring legislation that would help ease the teen-age unemployment problem by lowering the minimum wage for summertime employment. The Youth Employment Opportunity Wage Act of 1984 would reduce the minimum wage from \$3.35 an hour to \$2.50 for persons under 20 years of age and only would be effective between May 1 and September 30. I believe this would open up many jobs to teen-agers by creating incentives for businesses to hire young people they could not otherwise afford to employ.

It has been estimated that passage of this bill would open up 400,000 additional summer jobs each year. Based on industry distribution of current minimum wage jobs, less than one-third of the new jobs would be created in eating and drinking establishments. The others would be in businesses such as grocery stores, hotels and motels, educational services and entertainment and recreational outlets.

There has been concern that employers would fire, transfer or demote adult workers and replace them with lower-paid teen-age employees. Stiff sanctions would be imposed upon employers who take such action. Penalties would include a \$10,000 fine, six months in prison and payment of back wages.

Lowering the minimum wage to broaden employment opportunities has been discussed for a number of years without a clear consensus as to its effectiveness. I believe it is time to end debate and simply determine through experience whether the legislation would work. With the present levels of teen-age unemployment, we certainly have nothing to lose. If we don't act, youth unemployment will continue at present levels.

If passed, the Youth Employment Opportunity Wage Act of 1984 would expire September 1986. An evaluation report then would be submitted to Congress.

I believe that young people should be given every possible advantage while seeking summer employment, and obstacles such as an unduly high minimum wage should not be thrown into their path. This bill before Congress would alleviate wage barriers and open up opportunities for teen-agers. I am hopeful that Congress will take favorable action toward the Youth Employment Opportunity Wage Act of 1984.

Ag "Listening Session" Set July 19

The fifth in a series of U.S. Department of Agriculture "listening sessions" to discuss future food and agriculture policy will be July 19 in Dallas. The announcement was made today by President Reagan during an address to the Agricultural Communicators' Congress.

The session will begin at

10:00 a.m. at the Ramada Hotel (formerly the Le Baron Hotel), 1055 Regal Row in Dallas.

It will be designed to give the public an opportunity to express views to the Secretary of Agriculture and other U.S. Department of Agriculture policy leaders. Previous sessions were in Chicago, Ill.;

Riverside, Ca.; Atlanta, Ga.; and Syracuse, NY.

"Our recent session in Syracuse, like those before it, was a great success," Secretary of Agriculture John R. Block said. "The grassroots input we are receiving will be very helpful to us as we begin the task of formulating farm policy. The participants at these sessions are aware of what we are trying to accomplish and they are offering constructive and serious thought."

Block said as many people as possible will be given a chance to make oral presentations. A time limit will be established and announced at the beginning of the session. Also, anyone may submit written comments whether or not they participate at the listening session.

Since a limit may have to be set on the number of oral presentations, persons wishing to participate are encouraged to sign up as soon as possible. Call or write John Kermicle, Room 226-W USDA, Washington, D.C. 20250, (202) 447-4737, prior to July 12.

Soil Scientist Studies Sprinkler Efficiency

COLLEGE STATION — With much of Texas suffering through an unusual drought, homeowners who are struggling to keep their lawns green may be wasting much of the water they are putting on their grass.

A soil scientist with the Texas Agricultural Experiment Station, part of The Texas A&M University System, says much of the water applied to lawns never hits the ground but is lost to the atmosphere. Charles Wendt said his research suggests that more than half of the water applied to lawns is lost because of evaporation and inefficient sprinklers.

Wendt tested six models of commercially available lawn sprinklers and found each lacking in efficiency when evaluated by the water flow rate, evenness of distribution, evaporation loss and wind susceptibility.

The most efficient sprinklers are the stationary ring sprinkler and the traveling sprinkler, he said.

NOTICE OF CALCULATION OF EFFECTIVE TAX RATE AND PUBLICATION OF ESTIMATED UNENCUMBERED FUND BALANCES

J.L. Garrison Tax A/c for Wainwright City

The estimated unencumbered fund balance for Interest & Sinking Fund is \$1,244,897.

CALCULATIONS USED TO DETERMINE EFFECTIVE TAX RATE	
L. DATA	
1. 1983 Total tax levy from the 1983 tax roll	\$ 2,497
2. 1983 Tax rate (Sales M&O and 5-4441 145)	\$ 2,200
3. 1983 Debt service (AS) levy	\$ 2,209
4. 1983 Maintenance & Operation (M&O)	\$ 4,428
5. 1983 M&O taxes on property in territory that has ceased to be a part of unit in 1984	\$ -
6. 1983 M&O taxes on property becoming exempt in 1984	\$ -
7. 1983 M&O taxes on taxable value lost because property is appraised at less than market value in 1984	\$ 3,746,670
8. 1984 Total taxable value of all property	\$ 1,744,897
9. 1984 Taxable value of new improvements added since Jan. 1, 1983	\$ -
10. 1984 Taxable value of property assessed since Jan. 1, 1983	\$ -
11. 1984 Tax levy needed to satisfy debt service (AS)	\$ 5,000
12. Rate to raise 1983 tax due levy to appraised roll errors (Dollars divided by 1984 taxable value) (\$ 100)	\$ -
13. Rate to regain taxes lost in 1983 due to appraised roll errors (Dollars divided by 1984 taxable values) (\$ 100)	\$ -
14. 1983 M&O Taxes used to regain lost 1982 levy	\$ -

II. CALCULATION MAINTENANCE AND OPERATION (M&O) TAX RATE	
1. (A) 1983 Total tax levy (Date 1)	\$ 2,497
(B) Subtract 1983 Debt service levy (Date 3)	\$ 2,209
(C) Subtract 1983 Taxes on property no longer in unit (Date 5)	\$ -
(D) Subtract 1983 Taxes for assumptions (Date 6)	\$ -
(E) Subtract 1983 Taxes for productivity valuation (Date 7)	\$ -
(F) Subtract 1983 Taxes used to regain lost 1982 levy (Date 14)	\$ -
(G) Adjusted 1983 M&O Levy	\$ 4,428
2. (A) 1984 Total taxable value of all property (Date 8)	\$ 1,744,897
(B) Subtract 1984 Value of new improvements (Date 9)	\$ -
(C) Subtract 1984 Value of assessed property (Date 10)	\$ -
(D) Adjusted 1984 Taxable value for M&O	\$ 1,744,897
3. (A) Divide the Adjusted 1983 M&O Levy (G) above by the Adjusted 1984 Taxable value for M&O (D) above	\$ 2.537
(B) Multiply by \$100 valuation	\$ 253.7
(C) Effective M&O rate for 1984	\$ 253.7/100

INTEREST AND SINKING (IS) TAX RATE	
4. (A) 1984 IS levy needed to satisfy debt (Date 11)	\$ 5,000
(B) 1984 Total taxable value of all property (Date 8)	\$ 1,744,897
(C) Divide the 1984 IS Levy (A) above by the 1984 Total taxable value (B) above	\$ 2.866
(D) Multiply by \$100 valuation	\$ 286.6
(E) Effective IS rate for 1984	\$ 286.6/100

APPRAISAL ROLL ERROR RATE	
5. (A) Rate to raise 1983 levy due to appraisal errors (Date 12)	\$ -
(B) Add rate to regain taxes lost due to errors (Date 13)	\$ -
(C) Total Rate to adjust for appraisal roll errors	\$ -

TOTAL EFFECTIVE TAX RATE FOR 1984	
6. (A) Effective M&O rate (2-C above)	\$ 253.7/100
(B) Add Effective IS rate (4-E above)	\$ 286.6/100
(C) Add Rate to adjust for appraisal roll errors (5-C above)	\$ -
(D) 1984 Effective Tax Rate	\$ 540.3/100

1984 Effective Tax Rate is the tax rate published as required by Sec. 26.04, Property Tax Code.

Marriage Licenses

Marriage licenses issued during the month of June, 1984, by County Clerk Woodrow Frazier included:

Billy Thomas Adkins and Michele Denise Wolsch, Rochester.

Carl Ivan White and Karen Sue Isbell, Haskell.

Gerald Eli Ward, Knox City, and Nicole Machell Mitchell, Rochester.

Sammy Lee McFadden and Kelley Lynn Ootton, Haskell.

Stephen Blake Hickman and Judith Mattern Blackwell, Haskell.

Phillips and Elizabeth Franklin, Houston.

Robert Clyde Little and Maggie Delores Mize, Stamford.

Joe Angel Navarratte, Rule, and Charlotte Hernandez, Munday.

Weldon Wesley Hardy and Jewel Mitchell Little, Rochester.

Randy Scott Parker and Deborah Ann Niedecken, Abilene.

Benjamin Biba, Jr. and Jo Cox Blocker, Haskell.

Herminio Hernandez and Nicolasa M. Escobedo, O'Brien.

William Herman Bauer, Big Spring, and Carla Jo Henry, Coahoma.

CONSUMER ALERT

by
Jim Mattox
Attorney General

TIPS FOR TRAVELERS

If you are planning to take your vacation by automobile, you should be aware that some mechanics and gas station employees are waiting for the unwary traveler. The best insurance against these unscrupulous operators is to have your car thoroughly checked—especially the tires, fan belt, carburetor and air conditioning system—before starting on your vacation.

REPAIR GUIDELINES

In our area, we have heard reports of abuses on I-75, which many people use to get to Florida, and on I-40, a route to California. Of course, it's hard to tell at first glance whether you have picked a reputable mechanic. But if you are in unfamiliar territory, it's best to do the following:

- Stay with your car and watch what the mechanic is doing; this will prevent some blatant abuses, even if you don't know the cam shaft from the gear shift.
- Get a written estimate.
- If you are in a town with more than one repair shop and your car is not disabled, consider a second or third opinion.
- Ask for your old parts if new ones are being installed.
- Call the local Better Business Bureau to see if others have complained about the shops you are considering.

CREDIT CARDS

Sometimes unscrupulous operators will try to take advantage of customers who trust them with their credit cards. For example, some attendants have been known to run off two credit card receipts, instead of just the one necessary for actual charges. Then, when the customer is gone, the operator can make up a phony charge. To avoid this possibility, carry your credit card to the machine and watch the attendant write up your ticket.

We certainly wouldn't want to leave you with the impression that most mechanics are waiting to rip off their customers. Most mechanics are hardworking and honest. Just be aware you could run into the other sort and not know it until it was too late.

FOR MORE HELP

If you have had problems with a mechanic, you should let the Better Business Bureau in that town know about it. You may also want to seek assistance from one of my regional Consumer Protection Offices. They are located in Austin, Dallas, El Paso, Houston, McAllen, and San Antonio. For more helpful consumer information, write for our free "Consumer Protection Handbook" and watch for "Consumer Alert" on your local radio station. The Attorney General's office is the people's law firm. We're here to help you.

DPS Urges Bicycle Safety

The Texas Department of Public Safety troopers wish that this Summer of 1984 will be the safest ever in Haskell and Haskell county for bicyclists. State Troopers hope that by explaining some new rules and bike riding tips that everyone can enjoy this summer on their bicycles.

School is out and summer is here so let's look at these bike safety rules as of September 1, 1983:

Senate Bill 843 states
1. A bicycle is now a vehicle due to the deletion of the exception to devices moved by human power.

2. Provides now that a bicycle may be stopped or parked on a sidewalk if it does not impede pedestrian traffic.

3. Bicycles operated at less than speed of faster traffic, shall be operated as near as practical to the right curb or edge of roadway, except when overtaking another vehicle, making a left turn, etc.

4. Bicyclists may not ride

two abreast, if it impedes traffic.

5. Bicyclists will ride in same direction as traffic.

Other rules that have been in effect for bicycles in Texas are:

1. Every bike must have one brake that is operating and will slide on smooth pavement.
2. If bikes are ridden at night, each bike must have a white light on the front and a red reflector on rear that can be seen for at least 500 feet.

ride after dark.
6. Wear proper clothing when riding bikes, especially shoes, and bright colored clothing.

7. Check your bicycle for mechanical defects -- tires, chain, brakes, rims, and seat. Just a reminder, there were 49 fatalities involving bicycles and there were 3,051 injuries due to persons riding bikes.

This has been a message from your Texas State Troopers, working for a safer Texas.

A&M engineer finds oil demand down

COLLEGE STATION — Decreasing demand for oil during the 1980s could extend world petroleum resources as long as 50 years, says an energy expert at Texas A&M University.

"None of the forecasters of the late 1970s was correct in predicting the world supply of oil would begin a long decline by the year 2000," said Dr. Robert Wattenbarger, a petroleum engineer who developed crude oil supply models for Saudi Arabia and the OPEC cartel from 1975 to 1981.

"Increased efficiency, conservation and fuel switching have cut demand for oil," he said. "Forecasters thought the trend of increased oil demand would continue. What has actually happened is outside all our predicted ranges."

Wattenbarger said world oil resources can meet current demand until around the year 2040. Political interruptions could change the future, he admitted.

But "running out" of oil is not a good term, he said. "We will eventually see a long, slow decline with switches to alternate energy sources," said Wattenbarger.

Barbecue To Benefit Church Fund

The Hopewell Baptist Church will be selling barbecue dinners Saturday, July 14, 1984. All who brought tickets for our first barbecue dinner and did not get a plate will be served free. We will have plenty food. Proceeds will go to the church building fund. Tickets \$3.50. Will start serving at 11:30.

Low cost Classified Ads will bring positive results fast. Try them.

The Scientists Tell Me...

Drought-Resistant Hardy Grasses Can Cut Costs And Save Water

By Robert L. Haney
TAES Science Writer

Improved grasses that are not only drought resistant but also more resistant to cold or disease or insects (whatever their present problems), are under development for release to the public in the next few years, according to Dr. James Beard, project leader for turfgrass research for the Texas Agricultural Experiment Station (TAES).

Turfgrasses are already big business in Texas and getting bigger every year. In addition to the turfgrass lawns maintained by over 2 million householders, they're also grown on grounds surrounding businesses, industries and public buildings, as well as parks, sports grounds, golf courses, cemeteries, military installations, and roadsides.

It's estimated that turfgrasses for functional recreational, and aesthetic uses cover about 3,200,000 acres in Texas. The annual cost for establishment and maintenance of these turfs is about \$840,000,000.

With that amount of money and acreage involved it's understandable that homeowners and professional turfgrass managers alike are constantly on the lookout for grasses with better characteristics.

Some want grasses with increased cold resistance. Others want a grass that is resistant to more diseases or insects. A professional turf keeper of golf courses or game fields may seek increased wear resistance.

Many would like a grass that didn't have to be mowed so often, or fertilized, or watered. Some want a grass that will crowd out the weeds.

Scientists involved with grass improvement for the Experiment Station are aware of all these problems and others

and are far along with breeding and cultural programs that will solve many of these problems.

For example, consider St. Augustinegrass which is second only to bermudagrass for distribution and utilization as turf in Texas. The species is recognized for its superior shade tolerance, in comparison to other warm-season grasses.

Drawbacks have included relatively high water use rates, relatively poor cold tolerance, and susceptibility to a variety of problems including SAD (St. Augustine Decline), chinch bug, downy mildew, and brown patch.

Several years ago, TAES scientists, working with their counterparts in the Florida Experiment Station, developed

and released an improved St. Augustinegrass called FLORATAM, (for Florida-Texas A&M), that was resistant to SAD (St. Augustine decline), some chinch bugs, brown spots, and downy mildew.

Trouble was it had no better cold resistance than ordinary St. Augustinegrass so the improved variety was limited to central and southern parts of the state. The bitter December cold of 1983 killed many experimental plots of St. Augustine, including FLORATAM, as far south as College Station.

The good news is that a mutation of FLORATAM, developed by Dr. Robert W. Toler and three associates, shrugged off the cold and had vigorous growth in the spring of '84, alongside the dead

plots of many other St. Augustinegrasses.

Testing now underway suggests that the new grasses, produced by induced mutation, gained cold resistance and retained resistance to SAD and chinch bug. Brown spot and downy mildew are still being evaluated.

But don't ask your nurseryman to order you some just yet; it only has an experimental number now and is probably 2 or 3 years from release to commercial nurserymen.

Some of our grasses now in use require heavy applications of water and fertilizer. TAES scientists at different research centers across the state are doing comparison studies of many different grasses.

Results are preliminary but

it looks like we should be doing more with grasses such as buffalograss or bermuda with their relatively low water requirements. Fescues and zoysiagrasses, by comparison, exhibit much higher water requirements.

Wider use of grasses with lower water requirements could cut maintenance costs and save much water; it's estimated that, at present, 50% of water use in urban areas during the growing season is for grass and landscape plants.

Other research is concerned with use of fungicides, insecticides, fertilization rates, spring dieback, zoysiagrass selections from around the world, improved centipede grass for alkaline Texas soils, and methods to enhance

winter survival of warm-season grasses.

"In the future, water, energy, and non-renewable resources will be of increased concern as supplies become more limited and costs increase," according to Beard.

"It is imperative that we develop turfgrasses and cultural practices that are simpler, with low-cost maintenance requirements, especially with lower water and energy requirements.

"Also, as our population grows, there will be an even greater intensity of use on parks, sports grounds, and related green belt areas in urban centers. This increased use will place even greater stresses on the turfgrasses used on these sites.

"Thus, research is needed to

develop improved grasses and cultural practices which will enable these turfgrasses to survive intense use and satisfy the functional, recreational, and aesthetic needs of more people living in this concentrated urban setting.

"And these new tougher grasses must be able to manage with less water and fertilizer, as well as be more resistant to insects and disease.

"That's quite a challenge, you'll admit, but we're well into solving many of these problems," Beard concluded.

Editor's Note: Any questions regarding this column should be addressed to Science Writer, Department of Agricultural Communications, Texas A&M University, College Station, Texas 77843.

Breakaway Utility Poles Tested At A&M

COLLEGE STATION — Within a year, safety demonstrations using new breakaway

wooden utility poles developed at Texas A&M University may be conducted in three states by the Federal Highway Administration.

As part of the FHWA-sponsored research, crash tests by the Texas Transportation Institute headquartered at Texas A&M showed that the breakaway pole performed as designed when struck by a vehicle, said Dr. Don Ivey, TTI associate director and principal investigator on the program.

The pole slipped free at its base, rotated about the knee or hinge connection to the electric lines, and settled to the ground after the automobile passed underneath, leaving the utility lines intact.

About 2,000 people die each year in the United States from injuries received when their vehicles strike utility poles, Ivey said.

About 100 utility poles, designed to prevent deaths and injuries when hit by vehicles, will be demonstrated in candidate states.

"I was surprised how quick the variety was ready to graze."

"In fact, some of my neighbors tried to rent my pasture when they saw how much better established it was than others all around us."

Pioneer® variety 2157 gets off to a fast start, quickly establishing the kind of healthy, vigorous growing stand so necessary for good pasture. Its upright growth habit helps provide maximum available grazing.

And because 2157 has proven to be such a good yielder, you can count on it to deliver top-quality wheat at season's end.

If pasture is part of your wheat program, new 2157 should be, too.

New Wheat Variety 2157

Superior Yield • Excellent Standability • Outstanding Grazing

"When I pulled my combine into the field, I knew for sure this wasn't an ordinary wheat crop."

"That 2157 was standing out there good and straight. And when I moved down the rows, I could hear the cylinders running full."

Farmers who've seen this impressive new high yielding variety like its standability and tolerance to dry growing periods and severe weather. It has excellent resistance to leaf rust, fungal leaf blights, soil borne mosaic virus and the Hessian fly.

In side-by-side comparisons, Pioneer® brand 2157 wheat has consistently out-yielded other popular varieties. And it has shown consistently high test weights.

AREA II WINNER

Val Simms of Haskell FFA is shown with State President, Brad Bass. Val won the Area II State Public Speaking Contest. He will represent Area II at the State FFA convention in Lubbock on July 11, 12 and 13.

Val Simms To Represent Haskell At Convention

Haskell will be well represented at the State FFA convention July 11, 12 and 13 at the Convention Center in Lubbock.

Attending the convention will be Val Simms, representing Area II in the State Public Speaking Contest; 3 Lone Star Farmer recipients including Joey Kimbrough, David

Adams and Todd Harris; 2 voting delegates, Joey Thomas and Micky Dunnam; and two sponsors, Duane Gilly and James Bevel.

Survey Indicates Number Of Mourning Doves Is Down

Federal and state surveys of mourning dove populations appear to indicate dove numbers in Texas and nationwide may be somewhat below average when hunting seasons open in September.

populations, and furnished their findings to the U.S. Fish and Wildlife Service (USFWS) which compiled similar data from other dove-producing states.

Ron George, dove program leader for the department, said Texas' decline is fairly insignificant, but larger declines were noted by the USFWS in Kansas (down 24.9 percent), Arkansas (down 21.3 percent) and Oklahoma (down 29.9 percent). All these states contribute a portion of the doves which migrate into Texas. However, George noted that Nebraska, New Mexico and Missouri posted modest gains in the count, and Colorado biologists estimated a 13.6 percent increase.

The data indicate breeding populations in Texas are down approximately 2.6 percent from 1983, which was not considered a banner year for dove production.

TAX PLANNING

Written by James E. Rodgers, CPA

CHECK YOUR SOCIAL SECURITY

The Social Security Administration is a huge bureaucracy and can make mistakes. They process millions of contributions week by week and yours are part of the immense process. It's also vitally important to you and your spouse that they record your contributions accurately to your account.

There is a simple way to confirm the contributions credited to your account. Call your local Social Security office and have them send you a copy of Form OAR-7004. This is a request that they send you a record of your earnings as they show in your file. Review that record to be sure it is correct. If not, you can then let them know.

You should make this check approximately every three years because errors can only be changed for up to 39 months. It's particularly important to do this if you have changed jobs often. It's easy for a new employer to pick up your Social Security number incorrectly, resulting in your contributions going to someone else's account.

The "Sweet Home Singers" came out to help us celebrate our Nation's birthday. After a sing-along of old time favorites, everyone was treated to homemade ice cream and cake. Mr. and Mrs. J.R. Crane, the former Margrete Freeman came out to join in the festivities.

Residents had to "earn" their fourth of July dinner.

Lorene Beason brought a load of fresh black-eyed peas and everyone helped to shell them. The kitchen, supervised by Georgia Shipman, cooked up a delicious meal from the peas, fried chicken, squash, hot rolls, with watermelon for dessert.

The families of A.J. Patterson and Cleve Hester got together for a "mini"

family reunion last week. Those visiting were J.A. and Mildred Patterson of Big Spring, Zada Ann and Wyndell Stephens of Farmington, New Mexico, Mike, Nadine and Paul Patterson of Oklahoma City, and Ozelle Stephens of Knox city. Joining them was A.J.'s wife and Cleve's daughter, Geneva Patterson of Denver

City and Cleve's husband, Lewis Hester from Rochester.

Henry Langford, from Arizona, was here to visit with his brother C.V. Langford. They were joined by a nephew, Roy Langford of California. The three of them then joined other family members to eat barbecue and catch up on the family news.

Mr. and Mrs. Camp of Colorado visited with their brother and his wife Ray and Billie Oliphant. Also visiting with Ray and Billie, were Wynona Leeks, and Maerine Roberts of Plainview.

Mrs. Iva Ferguson was here from Tulsa to see Mrs. Eashter

May. Visiting with Lydia Green and Linnie Hickman was Ada Lee Hefferman from Tulsa, Oklahoma.

Sue and Talanda Hackney of Fort Worth, were down to visit with Eva White.

Those visiting with Pauline Williams this week were, Iva Lee Rose and Floyd Davis of Hawley, Joy, Bobbye, Deann and Melissa Spaulding from Hamlin.

If anyone has any old magazines or quilt scraps they would like to get rid of please bring them out. We can always use them and they are greatly appreciated.

Aging brings about physical and emotional changes in everyone. Your body changes and certain functions slow down, which you must learn to accept.

That does not mean your health should automatically go downhill, says the Texas Medical Association. In fact, taking care of yourself can greatly improve your chances of a longer and more enjoyable life.

A TMA pamphlet titled "Aging in Good Health" offers suggestions on doing just that:

*Checkups: A personal physician who knows your medical history can best determine how often you need a checkup. Jot down questions or problems you may have before visiting your doctor.

*Diet: Your diet need not change radically unless special foods or supplements recommended for certain conditions. In general, cut down on the amount of fat you eat. For some women, a lack of calcium can bring about a degeneration of bone, called osteoporosis. Your doctor may want you to consume more dairy products. Many people, as they grow older, must watch their weight because their energy needs are less. Cutting back on sweets can help solve the problem.

*Exercise: It helps maintain muscle tone, helps keep your weight down, aids digestion, and helps relieve stress. The

type of exercise depends on your physical condition, which your doctor can best determine. If you have been inactive for a while, see your doctor before starting an exercise plan.

*Sleep: As you grow older, sleep patterns may change significantly. Falling asleep and achieving a deep sleep may not come as easily as before. You may just need less sleep at night. If falling asleep becomes difficult, physical activity during the day may

help by making you tired by bedtime. Avoid sleeping aids unless your doctor recommends them.

Finally, a positive attitude about yourself can help immensely in adjusting to natural process of growing older.

(Copies of the TMA pamphlet and seven others in its HealthWise Series are available by writing to the Texas Medical Association, Communication Department, 1801 N. Lamar Blvd., Austin 78701.)

Report Changes To Social Security

This is a special reminder to persons receiving supplemental security income (SSI) checks! A change in your monthly income or your address may affect the amount of your SSI check. These changes must be promptly reported to the Social Security office by telephone (698-1360) or in person at our office located at 142 S. Pioneer in Abilene.

Other events that must be reported include marriage, divorce, death and changes in

the number of people who live in your household. If you own checking or savings accounts and the balance added together exceeds \$1,500 (\$2,250 for a couple) on the first day of any month, you should report this immediately.

Prompt reporting of changes will help us pay you the correct amount of SSI and prevent underpayments or overpayments. Failure to promptly report changes may result in a penalty deduction of \$25 from your next SSI check.

K & K STORM CELLARS

Complete Installation
Just in time for the storm season!

We offer two sizes:
6 ft. x 12 ft. 6 ft. x 8 ft.
Our cellars are 6 1/2 ft. tall inside.

NOTICE OF CALCULATION OF EFFECTIVE TAX RATE AND PUBLICATION OF ESTIMATED UNENCUMBERED FUND BALANCES

J.E. Rodgers & Company, Inc. (as N.C.M.W.A. Auditor)

In accordance with the provisions of Sec. 26.04, Property Tax Code, have calculated the tax rate which may not be exceeded by more than three percent by the governing body of the *1984-85* without holding a public hearing as required by the code. That rate is as follows: *2.2625* per \$100 of value.

The estimated unencumbered fund balance for Maintenance & Operation fund: \$ *1,177,857*. The estimated unencumbered fund balance for Interest & Sinking fund: \$ *1,679,020*.

(Date: *7/12/84*)

CALCULATIONS USED TO DETERMINE EFFECTIVE TAX RATE	
1. 1983 Total tax levy from the 1983 tax roll	\$ 2,288,839
2. 1983 Tax rate (5.00% M&O and 6.25% I&S)	\$ 2,288,839
3. 1983 Debt service (8.5% levy)	\$ 2,288,839
4. 1983 Maintenance & Operation (M&O)	\$ 1,177,857
5. 1983 M&O taxes on property in territory that has ceased to be a part of unit in 1984	\$ -
6. 1983 M&O taxes on property becoming exempt in 1984	\$ -
7. 1983 M&O taxes on taxable value lost because property is appraised at less than market value in 1984	\$ 1,177,857
8. 1984 Total taxable value of all property	\$ 1,679,020
9. 1984 Taxable value of new improvements added since Jan. 1, 1983	\$ -
10. 1984 Taxable value of property appraised since Jan. 1, 1983	\$ 1,679,020
11. 1984 Tax levy needed to satisfy debt service (8.5%)	\$ 1,428,139
12. Rate to raise 1983 tax due levy to appraised roll errors (see dollars divided by 1984 taxable value) ()	\$ -
13. Rate to regain taxes lost in 1983 due to appraised roll errors (see dollars divided by 1984 taxable value) ()	\$ -
14. 1983 M&O Taxes used to regain lost 1982 levy	\$ -

II. CALCULATION MAINTENANCE AND OPERATION (M&O) TAX RATE	
1. (A) 1983 Total tax levy (Data 1)	\$ 2,288,839
(B) Subtract 1983 Debt service levy (Data 3)	\$ -
(C) Subtract 1983 Taxes on property no longer in unit (Data 5)	\$ -
(D) Subtract 1983 Taxes for exemptions (Data 6)	\$ -
(E) Subtract 1983 Taxes for productivity valuation (Data 7)	\$ -
(F) Subtract 1983 Taxes used to regain lost 1982 levy (Data 14)	\$ -
(G) Adjusted 1983 M&O levy	\$ 2,288,839
2. (A) 1984 Total taxable value of all property (Data 8)	\$ 1,679,020
(B) Subtract 1984 Value of new improvements (Data 9)	\$ -
(C) Subtract 1984 Value of appraised property (Data 10)	\$ 1,679,020
(D) Adjusted 1984 Taxable value for M&O	\$ 1,679,020
3. (A) Divide the Adjusted 1983 M&O levy (1-G above) by the Adjusted 1984 Taxable value for M&O (2-D above) ()	\$ 1.3638
(B) Multiply by \$100 valuation	\$ 136.38
(C) Effective M&O rate for 1984	\$ 136.38
INTEREST AND SINKING (I&S) TAX RATE	
4. (A) 1984 I&S levy needed to satisfy debt (Data 11)	\$ 1,428,139
(B) 1984 Total taxable value of all property (Data 8)	\$ 1,679,020
(C) Divide the 1984 I&S levy (4-A above) by the 1984 Total taxable value (4-B above) ()	\$ 84.46
(D) Multiply by \$100 valuation	\$ 8,446
(E) Effective I&S rate for 1984	\$ 8,446
APPRAISAL ROLL ERROR RATE	
5. (A) Rate to raise 1983 levy due to appraisal errors (Data 12)	\$ -
(B) Add rate to regain taxes lost due to errors (Data 13)	\$ -
(C) Total Rate to adjust for appraisal roll errors	\$ -
TOTAL EFFECTIVE TAX RATE FOR 1984	
6. (A) Effective M&O rate (2-C above)	\$ 136.38
(B) Add Effective I&S rate (4-E above)	\$ 8,446
(C) Add Rate to adjust for appraisal roll errors (5-C above)	\$ -
(D) 1984 Effective Tax Rate	\$ 144.82

1984 Effective Tax Rate is the tax rate published as required by Sec. 26.04, Property Tax Code.

Info On VA Burial Allowance Available

Many families of veterans are not familiar with the fact that the Federal government provides a headstone or grave marker for a veteran's grave when he is buried in a private cemetery. According to C.H. Herren, Veterans Service Officer for Haskell County, family members will choose

and pay for a grave marker when one could be furnished free of charge by the Veterans Administration.

Even though last year the Veterans Administration provided more than 210,000 free grave markers for graves of veterans, many people still do not know that the VA does not pay for the installation of the marker at the grave site. The marker itself is provided free of any charge, and all shipping charges to its destination are paid by the government, but the cost of installing the marker at the grave site must be borne by the family member or members who authorized the burial. The charge for such installation is generally rather small, approximately \$50 or less.

The VA can also pay a burial allowance of \$300 if the veteran, at the time of his death, was in receipt of disability compensation or pension benefits. An addi-

tional \$150 can also be paid in most instances as a pot or grave space allowance. The burial allowance and plot payment are applicable only if the veteran served during a period of wartime.

If a veteran's death is shown to have been caused by disabilities which were incurred during his or her military service, the VA can pay as much as \$1,100 toward the costs of the burial. Application for the burial allowance must be filed with the Veterans Administration regional office serving the area where the veteran is buried. In most cases, the funeral directors will file the claim with the VA, and deduct from the total bill the amount that is paid by the VA.

Additional information on the VA burial allowance and the grave marker may be obtained from your local Veterans County Service Officer.

4-H Fiesta International Set July 17-19

Theme for the 1984 Texas 4-H Congress, set for July 17-19 in Brownsville, will be "4-H Fiesta International," says Lou Gilly & Max Stapleton, county Extension agents, Texas A&M University System.

More than 500 4-H delegates, their agent advisors, and members of the Texas 4-H Council which assists with the operation of 4-H Congress, are expected to take part in the activity, to be headquartered at the Fort Brown Motor Hotel.

Representing Haskell County in the 4-H educational activities will be Chad Ballard and Richard Shaver of the Rochester 4-H Club. While seminar sessions are scheduled at Jacob Brown Auditorium, adjacent to host motel, other features of the program will include a study of the interrelationship of the U.S. and Mexico in regard to trade, and educational tour to study the shrimp industry and a boat manufacturing company near

Brownsville, and the Gladys Porter Zoo in Brownsville, a source zoo for restocking other zoos around the country.

Featured speaker for the 4-H Congress will be Michael Broome of Charlotte, N.C. a

humorist and futurist, who will discuss "Tomorrow's America."

Other special attractions of 4-H Congress include a chartered bus tour into Mexico to study agricultural facilities

near Matamoros; a simulated air-sea rescue program coordinated by the U.S. Coast Guard just off South Padre Island, and a tour of historic homes in that area.

Texas 4-H Congress is an

annual highlight of 4-H careers of many 15 to 18-year-old club members, it is held in different Texas cities each year to enable of various unique educational aspects of programming.

Men In Service

Capt. Steven D. Knott, son of Leslie J. and Evelyn L. Knott of 3835 University St., Eugene, Ore., has entered the Air Force Institute of Technology (AFIT) to study for a master's degree in operations research at Purdue University, West Lafayette, Ind.

His wife, Julie, is the daughter of John W. and Jewell L. Wallace of 600 S. Ave. G, Haskell.

Lesser - Known Park Areas Can Afford Enjoyable Vacations

It's great to get away from the wide open spaces on a summer weekend or holiday, and every year, millions of Americans head for one of our beautiful national parks. Unfortunately, with so many visitors, many of our parks are jammed bumper to bumper and elbow to elbow. It's hard to feel like you're getting away to the wide open spaces when you're spending half your time waiting in line.

atives to the Big Park scramble this summer, the U.S. Department of the Interior has prepared a booklet which lists and describes some of the lesser-known, less crowded park areas in this country. The U.S. Park Service booklet "Lesser Known Areas of the National Park System" is available for \$4.50 from the Consumer Information Center, Dept. 215M, Pueblo, Colorado 81009.

known parks have stories to tell, and are delightful places for youngsters of all ages to learn about our heritage. There are mountain gaps that became gateways to new frontier lands, Native American and colonial villages preserved in their original states, battlegrounds that saw the course of history change. Cumberland Gap, located where Tennessee, Kentucky,

and Virginia come together, afforded early Americans easy access across a high mountain ridge, enabling early settlers to reach the new land west of the mountains. The Gap and majestic Cumberland Mountain are now part of the national park system. Hiking trails, campgrounds, caves, a museum, spectacular views, and a restored pioneer settle-

ment await visitors who leave the beaten path to visit this lesser-known park.

Many of the parks can be the object of weekend jaunts in the country, or places to stop off on the way to another destination. Some are located inside cities, such as John F. Kennedy's birthplace in Brookline, near Boston, or Thomas Edison's laboratory in West Orange, New Jersey.

Others are located in truly wide-open spaces, far from the crowding of large populations, where nature seems to have established the more incredible wonders. Spectacular canyons and dinosaur fossils are hidden away on the Colorado-Utah border, but meals and lodging are available in town just 14 miles away. Sandstone cliffs in many colors, beaches, dunes, inland lakes and waterfalls await at Pictured Rock National Lakeshore on Lake Superior.

The Park Service's book describes over 160 park areas, and lists chief attractions, historical notes, and mailing addresses for more information.

About one-fifth of the lesser-visited parks charge entrance fees ranging from \$1 to \$3 per vehicle, but a \$10 Golden Eagle Passport allows entry to all national park areas for an entire year. Persons who are 62 or older, blind, or disabled are eligible for lifetime Golden Age or Golden Access Passports which provide free entry to all parks. More information on obtaining these passes is available free of charge by writing Consumer Information Center, Department 582M, Pueblo, Colorado 81009.

A-1 MOBILE HOMES

Why is A-1 #1?

- Largest selection of homes
- Free Delivery & Set Up With-In 150 miles
- \$99 down on pre-owned homes
- 5% down on new homes

Christie Leedy Receives Dental Surgery Degree

Christie McAdams Leedy has received a Doctor of Dental Surgery (D.D.S.) degree from the University of Texas Health Science Center at San Antonio. She is the daughter of Mr. and Mrs. Tommy McAdams of Abilene. Her grandparents are Rev. and Mrs. C.T. Jackson of Haskell.

Dr. Leedy is 1976 graduate of Haskell High School and attended Tarleton State University and Abilene Christian University.

The 23 women and 112 men who were candidates for the degree were honored at the dental school's commencement exercises May 19. Dr. Rene Rosas of El Paso, president of the Texas Dental Association, was principal speaker.

Dr. Leedy and her husband, Dr. Robert W. Leedy will be practicing in Anson.

Brightly colored — attention getting — Open-Closed Signs for your office or business. Comes complete with changeable letters in black or red. Also includes a sign for counter top use. See at the Haskell Free Press.

Money Matters

A Series Of Informative "Plain Talk" Thoughts Regarding Your Money Matters

Today's Farmer

With each year farming seems to be getting more complex. Today's farmer must be an economist and agronomist, not to mention a mechanic, veterinarian, chemist, biologist, purchasing agent, commodity broker, computer programmer, and the list goes on and on.

Throughout the years we've seen several changes in farming and none of them seem to make things any simpler. So our hats are off to today's farmers. They deserve the respect of us all.

When you stop to consider what today's farmers are up against, you realize just what kind of a job they are doing feeding a hungry world.

We Think Money Matters!
