At region, the girls took an easy 63-41 win over Grandview, their first opponent. The next game was a different story, however, as Cooper defeated them by nine points, 95-86. The regional competition left them among the eight top 10 Class A teams in Texas.

The girls averaged 72 points per game during the season. In addition to being the district and bi-district champions, they took championship trophies in tournaments at Bronte, Robert Lee and Forsan.

TREES SAVE ENERGY

Properly placed trees, shrubs and vines in the home landscape can cut the cost of cooling and heating your home, says a landscape horticulturist with the Extension Service. Such plants can protect the home from wind, heat and cold as well as provide natural beauty. A row of evergreen trees on the northwest side of the home can be particularly effective against chilling winds in the winter and in directing cooling breezes around the home in the summer. Tall trees on the west side of the home can afford some relief from summer heat.

It takes more than optimism!

The farmer/rancher is an eternal optimist. He must be content with such imponderables is weather, prices and costs.

Yet, it takes more than optimism in today's high cost agriculture. It takes an organization the farmer/rancher knows he can count on. Farm Bureau is such an organization. That's why four out of five farmers in the nation are members of Farm Bureau.

FARM BUREAU WORKS FOR AGRICULTURE ON 3 BROAD FRONTS -

- 1. To Increase Economic Opportunity-Through effectiveness in Public Affairs (policy development & legislative activities)
2. To Strengthen Farmers' Competitive Position in Marketplace-Through marketing programs, commodity activities, market expansion
3. To Control Production Costs-Through group purchasing (tires & batteries), insurance protection (fire, life & casualty), group insurance (medical care)

LAND PRICES RISING

Rural land values continue to increase over the United States although the rise hasn't been as fast in Texas as in the Midwest. For the year ending Nov. 1, farm real estate values jumped 17 per cent for the entire nation but only about 7 per cent in Texas, notes an economist with the Extension Service. The sharp increase raised the U. S. average price per acre for rural land from \$380 to \$445. The increase in rural land values stems mainly from a strong farm income

as a result of increased demand for agricultural products, especially from foreign countries.

Try not to organize more than 40 per cent of your day. Take into account if you are an early starter or a late starter.

Reddy's helpful tips for your

HOME LAUNDRY

Wash and dry a full load, but never overload... it is essential for each item to move freely for proper cleaning and drying.

Choose the correct cycle for washing modern materials. Perhaps hot water isn't needed, and only a gentle drying temperature.

Too much detergent can clog machine and drains... always measure, don't guess!

Follow the manufacturer's recommendations for your type equipment.

Mixing brands of detergents can cause graying of clothes.

Many manufacturers of permanent press garments recommend machine washing and machine drying for best results. Following instructions on the garment tag can help preserve the life of your clothing and give you wrinkle-free clothes without need for ironing. A big savings!

## Plans Made for Child Day Care

A Family Day Home Program is in the process of being initiated in Robert Lee and Bronte, according to Margaret Martin, representative of the Community Action Program of Tom Green County, sponsor of the program.

The program is designed to take care of children up to 14 years of age in private homes of qualified Day Mothers while the mother is at work.

Children of parents with low income are primarily the ones to be helped by the program, and in order to be eligible the parents must meet guidelines which have been set up by the CAP.

Guidelines also have been set up and must be met by those who qualify as Day Mothers, making them eligible to keep children.

Mrs. Martin said that persons who are interested in having someone keep their children, as well as those who are interested in keeping them, should call the Coke County Neighborhood Center immediately for information and applications. Robert Lee residents should call Jamie Meyers at 453-2314, and Bronte residents should call Mrs. Martin at 473-5561 after 5 p.m.

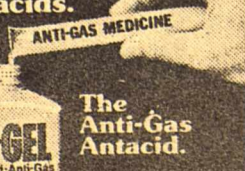

Mrs. Artie Walls spent several days last week in Grand Prairie with her daughter, Mrs. Joy Spradlin and family. She accompanied her niece, Mrs. Arline Nardine of Van Horn, who attended a meeting in Dallas. The ladies spent Wednesday night in Abilene with Cathy Rowe, daughter of Mrs. Nardine.

Mrs. Bobby Walker and Rex of Odessa spent Saturday night and Sunday with her parents, Mr. and Mrs. Dave King.

Visiting with Mr. and Mrs. Ray Aldridge and girls from last Friday until Monday were his mother, Mrs. Warren Aldridge of Jal, N. M., and his grandmother, Mrs. Edward Guess of San Angelo.

**NEW VARIETIES OF WHEAT DEVELOPED**

Several people have commented about a field of wheat near San Angelo that remained green and making some vegetative growth while other small grain fields in the area have been completely stopped by the winters' cold weather.

The variety name of the wheat in question is sage. This is a variety developed in Kansas. Another variety you may be hearing about is osage. This variety was developed in Oklahoma from sage parent stock.

The Chillicothe Experiment Station tests last year indicate sage and osage will produce well in Texas. Sage was the top grain producer and osage was second in the station tests last year. Similar results were recorded in field tests near Merkel in Taylor County. We do not have any forage test results on the two varieties, but they appear to be able to withstand severe cold weather better than some other varieties.

**CONTROL OF GARDEN INSECTS IMPORTANT**

Although things may be looking good for your spring vegetable garden as far as the eye can see, there may be a hidden problem in the form of soil insects.

Checking a soil sample can reveal some of these pests.

Insects such as wireworms and false wireworms are the biggest damagers to plant seed and roots of young plants.

The white grub or grubworm is also a common soil pest, and the cut worm and its cousins can cause large losses in the garden during the night hours.

Other pests that do severe damage to vegetable crops underground include soil maggots, rootworms and more crickets.

These soil insects along with damaging nematodes may be controlled with Diazinon. For an area of 1,000 square feet, use three-fourths cup of a 25 per cent emulsion concentrate in two and one-half to three gallons of water or a half cup of 50 per cent wettable powder in the same amount of water.

Treat the soil just before seeds are planted. Apply the insecticide to the soil surface and then till the soil to a depth of four to six inches.

### WARM WEATHER ALERTS GARDENERS

The warm, sunny days the last several days were a welcome relief. Many people were looking forward to some pretty weather so they could do some yard work and/or get the garden ready. According to statistics, more and more people are turning to gardening as a pasttime and as a means of possibly helping feed the family.

The Texas Agricultural Extension Service has several bulletins on gardening that are free for the asking. One of the more popular ones is B-1139, "Home Gardening in Texas."

One of the newer publications is MP-1171, "Garden Calendar." This is a regular calendar with helpful hints recorded on the calendar. It also includes suggested planting information and variety information. This area of the State is slightly behind (cooler) the area the calendar is specifically written to serve. We need to adjust the dates slightly. Also, information printed on a certain date on the calendar is intended as a guide only--the information can be used before or after the date specified.

If you would like to have one of the calendars or some other gardening bulletins, contact the county Extension Service office in the Courthouse in Robert Lee.

## Emergency Loans Are Available

WASHINGTON-- Congressman Bob Krueger (D-Texas) today noted that the U. S. Small Business Administration is making Emergency Energy Shortage Loans to small businesses which have suffered or appear likely to suffer substantial economic harm because of shortages of energy or energy-related materials.

According to Krueger, the loans are available to firms throughout the country and can be used for working capital to settle debts which would have been paid had there not been an energy shortage. In addition, the funds may be used to refinance short-term, and some long-term, debts and to convert a small business to alternative fuel usage.

Krueger said the SBA informed him that the direct, immediate participation, or bank guarantee loans may be made for a period of up to thirty years. Direct loans and SBA's share of an immediate participation loan may not exceed \$500,000, except in cases of extreme hardship, and bear an interest rate of 6-5/8% per annum. Bank guarantee loans and a bank's share of an immediate participation loan have no dollar limitation. Interest rates on bank guarantee loans and a bank's share of an immediate participation loan are set by the bank, Krueger said.

"These loans are in addition to loans that may be made under the regular physical disaster loan program to business of all sizes in states and areas that have been declared major disaster areas by the President, or disaster areas declared by the Administrator of SBA," Krueger said.

According to information released by the Small Business Administration, small business owners interested in applying for SBA Emergency Energy Shortage Loans should contact their nearest SBA office, which is listed in the telephone directory under "U. S. Government."

Mrs. Joe (Jerry) McCutchen is reported to be much improved after emergency surgery last week at Shannon Hospital in San Angelo. She was dismissed from the hospital Wednesday afternoon.

## Teachers to Have Legislative Meet

Teachers and school officials in 18 West Texas counties have been invited to attend a "Legislative Update Session" of the Texas State Teachers Association at 6 p.m. Thursday, March 3, at the John Glenn Junior High School Cafeteria, 2201 University.

This briefing on TSTA-proposed bills and other education legislation now pending in the 65th Texas Legislature will be presented by John Hill of Austin, director of the TSTA membership and member services division.

TSTA District XV leaders expected to assist include Billy Harwell, district president, and Jeanette Boster, legislative chairperson, both of San Angelo.

TSTA Executive Secretary Callie W. Smith of Austin said, "We invite and urge all educators in the district to attend this legislative update session to learn what the Legislature is doing about public education in general, and the six bills of TSTA."

One of the bills sponsored by the 140,000 member teachers association which has already been passed and sent to Governor Dolph Briscoe is Senate Bill 188, by Sen. Lindon Williams of Houston.

This bill calls for a change in present teacher certification to allow persons with high school certificates to teach in grade 6 as well as in grades 7 through 12.

A TSTA-sponsored sick leave bill (Senate Bill 313 by Sen. H. Tati Santiesteban of El Paso) has been voted out of the Senate Education Committee with a recommendation that it be passed. This bill would change the present teacher sick leave law to provide all Texas public school employees at least one day sick leave for each month they work.

Other TSTA-backed bills which were awaiting action in Senate and House committees in mid-February are a school finance bill, teacher retirement bill, professional consultation bill, and a teacher contract bill. Current status of each of these will be discussed at the legislative briefing.

Commitment adds a time dimension to marriage and provides the momentum for facing new challenges in the relationship.

## INSUR-MATION

WALDON MILLICAN  
FARM BUREAU INSURANCE, 453-2812

I am planning on selling my car and driving my roommate's. Will my present automobile policy insure me against any liability while driving my roommate's car?

Liability insurance is attached to the vehicle, not the driver. If your roommate's car has adequate liability coverage you will be covered ... his liability insurance paying for any damage. However, your basic Automobile Policy or Family Automobile Policy has non-owned automobile coverage which will continue in force. If you have no intention of getting another car for quite some time, cancelling your Basic Policy and substituting Non-Owned coverage will save you money and will protect you fully. Remember to notify your agent if you do acquire another car since Non-Owned Endorsement excludes protection on an automobile owned by the policy holder.
