PRESIDENT WILSON SENDS TO SENATE NAMES OF 22 TEXANS.

Lancaster Postoffice Goes to Wm. S. Strain Republican, Choice of Dem-

ocratic Patrons of Lancaster. Washington. - President Wilson Woods, Teague; J. M. Price, San Au-Daniel, Hughes Springs; S. G. Dean, ers, representing every section of Haskell; Nora Lemmon, Garland; A. Texas, being in attendance. M. Gosch, Flatonia; R. H. King, Alvin; S. M. Davis, Nocona; E. P. Shands, Mesquite; E. L. Correll, El Campo; C. Herbert Walker, Dalhart; B. Wildenthal, Jr., Cotulla; R. A. Motley, Overton; G. H. Riddel, Omaha;

Mrs. W. F. Holmes, Jasper. The Lancaster postoffice goes to William S. Strain, who is declared to be a republican, but he was the choice of the democratic patrons of the Lancaster office in the primary held with the sanction of Representative Beall. Strain was also indorsed by the democratic precinct and county chairmen. The appointment of P. G. Henry at Texarkana puts over the selection of Senator Sheppard, who declined to recognize the action of the postoffice primary held at that town because the Arkansas patrons of the office did

Texas patrons voted. Representative-at-large Garrett had indorsed W. K. Eddy for the office at Jasper, but the recommendation of Representative Dies carried in his own district. Postmaster General Burleson has taken the position that Representatives-at-large have no postoffice patronage to dispense. The list of Texas appointments sent in Thursday carries only names recommended by the various representatives.

HUERTA TO BE EXECUTED IF CAPTURED

Governor Carranza Issues a Decree De claring Law of Jan. 25, 1862, Will Be Enforced in Mexico.

Eagle Pass, Tex.-Governor Carranza has issued a decree declaring that the law of Jan. 25, 1862, popularly known as the law of Maximilian, will be enforced against Huerta and his associates when they are captured. This is the law enacted under President Juarez as an offset to a decree of rested in New York. Now will some Emperor Maxmilian, which provides that any person making any attempt on the life of the chief magistrate of the republic or any of his ministers, engaging in a seditious uprising tion would go to the Panther City than to hear the baby's cry at night, against the legal authorities, or invit- next year. which accounts for his rapidity in wak- ing the invasion of foreign troops shall suffer the penalty of death. TEXAS PRESS ASSOCIATION CLOSES SESSION

San Artonio, Tex.-Resounding with lifty-seven varieties of oratory, the thirty-fourth'annual convention of the for \$6000 carried. Texas Press Association Saturday adjourned its three days' session at San Antonio. Officers were elected, and new \$10,000 fire station at Sherman. Wichita Falls was chosen as the association's meeting place in 1914.

A commission of five members was appointed to seek to standardize foreign and local advertising rates on all country newspapers represented in the organization. The maintenance of ed at Red Oak, Ellis county, last a Texas Press Association representative at Austin during the sessions of the Texas legislature was authorized. Other duties along legislative lines were designated for a newly created committee of three. Another committee of three was authorized to investigate the possibility of establishing on the gulf coast at Fulton, near Rockport, a home for superannuated members of the association and a resort at which other members might enjoy vacations. A demand was made upon the Texas legislature that the pracice of posting legal notices in bulletin form be supplanted by publication in newspapers.

Several addresses on program topics were given, a heated parliamentary battle fought on the convention floor over the proposed indorsement of senate joint resolution No. 18 permitting ident Edward Cunningham of Bridge- by constitutional amendment the issuance of bonds for permanent import and Secretary and Treasurer provements at Texas educational in-Paso as the place for holding their stitutions, and committee reports were

a mixed In "rural organization ga" its chief, T. N. Carver, who Just been appointed, was until recently a professor at Harvard university. If Secretary of Agriculture the government as practical knowl-Houston has his way, Professor Carver probably will be made the chief of another new bureau to be known as the "bureau of markets." There is already a bureau of markets' organization, but it is unofficial, and Mr. Houston will ask congress to give definite question form. approval with a definite appropriation for a bureau of this kind.

Just what the new service will do in detail has not yet been determined, but it is well known that a primary duty will be to study the economics of the marketing of products. It is known that Secretary of Agriculture Houston, with the complete sympathy of President Wilson, will interest himself particularly in an attempt to cut down the cost of living by cutting out inefficient and unbusinesslike methods

in marketing the products of the farm. Dr. George K. Holmes, who is the statistician of the division of production and distribution, has found out that the consumer pays for his vegetables, fruit, poultry and dairy products about twice as much as the farmer receives for them

What Farmer Should Do. Dr. Holmes has said on this matter: "A survey of the systems of marketing farm products clearly discovers what the farmers can best do to their advantage. They must associate themselves together for the purpose of assembling their individual contributions of products, to consider means of shipping in carload lots, of obtaining market news at places to which it is practicable to send their products, to sell in a considerable number of markets if not in many markets, and to secure the various other economic gains of associative selling. But farmers need some help in establishing associations. They always need a leader for such purposes, and there

may be no leader. 'A division of markets could perform excellent service in helping farmers to help themselves to organize marketing associations. These associations could either handle their ily to do for himself. products until sold in various markets or could ship their products to a nonco-operative marketing agency, which to do when he first comes to Washwould take charge of the entire business of distributing from a central rethe present time, when there has been to the present time.

"It seems not always feasible to probably no exaggeration to say that market products co-operatively, or, at every Democratic senator and every any rate, the producers are not always disposed to do so. However, that may representatives has in his office 1,000 be, there are many non-co-operative applications for places under the govmarketing agencies in this country ernment, and each maker of an apthat are performing excellent service plication seemingly believes that hefor farmers, and some of them are do is the only proper person to whom Department of Agriculture Warns ink business of immense proportions. a job should be given. division of markets, equipped with a corps of competent field agents could get into touch with farmers for the purpose of promotin, the organization of marketing associations wherever the farmers request assistance or information; the agent could a majority of cases will be taken, meet the assembled farmers and practically organize them if they desired.

and, eventually, with results greatly an have asked for." beneficial to farmers

gate of more than two or three thousand acres should be planted this coming season. It is highly important that the asso-

ciated cotton growers make an earnest effort to restrict the acreage this year so as to avoid a labor panic when the picking season arrives. More than this, the prospective growers, as well as others interested in the development of the Salt river valley, should make every effort to provide an adequate supply of cotton pickers, and this campaign should be started immediately.

Found to Be Implement of Great Convenience About Farm When Work Done by One Man.

The implement shown in the illustration is a great convenience when posts are sharpened by one man, says Mr. Clement White, in the Iowa

Post Sharpener

in position and all the maker has to do is to wield the ax. The brace is a rents. large post set solidly in the ground It should be set in a leaning position. Nail pieces of planks on the end to make a receptacle for the posts ey," she sneered. depend on the length of the posts.

Bran as a Food.

Bran is one of the best foods the in the work so they can be depended upon to pick a large acreage. This laying stock can have. Being rich in increasing supply of Indian labor, to- protein it helps the hens to digest the gether with the Mexican and other other foods. It is also one of the white labor, will permit a larger crop best preventives against diarrhoea Always keep a hopper full hanging in To plunge into Egyptian cotton, to the house or run, so that the birds plant as much as five or six thousand can help themselves as required acres this year, would be to invite Bran is equally good for the young disaster The prosperity of the Egyp stock, as it is one of the best bone tian cotton industry and of the people forming materials obtainable. It is who produce the crop in the Salt wonderful how quick the chicks take river valley will be much more cer- to it

partly rebuilt and put into shape for her last

On this cruise the Niagara will visit all the

principal ports of the great lakes, decked with

flags and vari-colored bunting, and wallowing

splendidly as befits a ship of her size, entour and

noble achievement. She is 110 feet long, has a

30-foot beam and is about 10 feet deep. There

is nothing of the clipper ship about her, but there

is a stanchness that kept her steady while she

emptied broadsides at a whole English fleet. In

her prime, at the time of the decisive battle of

Lake Erie, she was a brig of the old-fashioned

sort, with an enormous spread of sail for those

days. She had single topgallantsails and, what

was more characteristic of the time, single top-

sails. Thus the number of her sails was not ap-

parently great, but her actual spread of canvas

was very large for her day. Her rigging was all

of the old-style sort. Her main, fore and mizzen

tops were really fenced in for lookouts and she

had a spanker to aid her in maneuvering better

Raising the Niagara was the hardest kind of

work. It is a big feather in the cap of the local

contractor, who succeeded in lifting the hulk

from the mud of the lake bottom, where she had

lain for a hundred years. The task had to be

done in winter in order to use spring to get the

vessel in shape. Winter on the great lakes is

The interstate board of the centennial celebra-

tion had official charge of the work. To raise

the hulk took just three months. The original

contract called for the task to be done in thirty

days, but bad weather knocked this schedule sky

It was planned at first to sink pontoons along-

side the Niagara and pump them out, bringing

the ship to the surface with them. Had the-

weather permitted this the salvage of the hulk

would have been accomplished in contract time.

Storms, however, threatened the undertaking al-

most every day and the contractor dared not

sink his pontoons lest he lose them. Therefore

four pontoens were anchored on either side of

where the ship would lie when raised vertically

to the lake's surface. Other pontoons were sta-

tioned over her bow and stern. Chains were

made fast to the wreck by divers and she was

Ice piled up six feet high about the pontoons,

workmen were in constant danger of losing their

lives in the black and ley water. Several fell

BLAKAN WAR BEGAN IN 1663

Conflict of Races Started Long Ago Seems Destined Now to Be Fought to a Fnish.

An Italian newspaper reminds u. usefully that the Balkan war began centuries ago. In the state archives at Vienna is the declaration of war sent by Sultan Mehemet IV. to Emperor Leopold in 1682. "Be it known to you, the heir of the Caesars, to the king of Poland, and to your allies and omnipotent emperor of the east and west, . . is on the point of invading your paltry territories. We shall bring 1,300,000 soldiers, on horse and foot, to crush you utterly and lay waste all your domains. We command ing snow and cracking ice seemed no deterrent you to await our coming in our resito their frenzy. dence in Vienna, where it is our inten-

tion to have you beheaded." But the war was even then an old shore on pontoons. She is soon to be hauled to story. The delightful writer who con- a shipbuilding yard near by, where she will be tributes "The Office Window" to the Daily Chronicle tells us that while searching through some of the earliest newspapers printed his eye was continually diverted to news letters from the continent giving accounts of the unholy war which Turkey was waging on Hungary and Austria. Almost at random he copies the following from the Newes of Stetember 17, 1633, a grim reminder that the Turk has remained unchanged and unchangeable for these 250 years at

"Vienna, Sept. 6.-In Austria every Fifth Man is to bear Armes; and they hope to raise 20,000 Men upon that Levy to secure the Frontiers. At this instant comes fresh Intelligence of 10,-000 Turks, and as many Tartars, passing the Waegh, and that they carry all before them with Fire and Sword. And again: "We hear that upon the third instant the Enemy has beaten our Foot by the River Waegh, and Possess'd himself of the narrow Passages between the Hills, where he has burnt divers Towns and Villages, and Massacred many Thousands of People, striking off the heads of some, putting other in Chains . . . and cutting to pieces Young and Old without Distinction or Mercy."

Added Injury. He-This steak is burnt. She-That's right-roast it!

PERRY AT THE BATTLE OF LAKE ERIE

guns. It was almost as much of a feat for Oliver Hazard Perry to build the vessels as to win the battle of Lake Erie. The commodore had been in the American navy for some time, and in 1811 as a lieutenant in command of the schooner Revenge he ran the vessel ashore at Watch Hill, R. I., and wrecked it in a storm. He was tried by court martial

for this, but acquitted. He failed to get a command when the War of 1812 started Then he applied to Commodore Chauncey and was ordered to report at Lake Erie.

On March 27, 1812, he arrived at Lake Erie and found a force fifty shipwrights. The squadron had to be built from the forests near by. A fleet of nine vessels was built by him and his men. A regiment of Pennsylvania militia covered the ship-

builders while they were at work. The battle against a superior British squadron lasted all day, and the Lawrence was dismantled, so that Perry had to row through a hail of shot to the Niagara, where he hoisted his hag at At 3 o'clock he was able to send his famous dis-"We have met the enemy and they are patch:

Commodore Perry was then twenty-seven years

Perry was a Rhode Islander by birth. The son of a naval officer and the daughter of an Irishwoman of unusual attainments, he had the most careful early training, so that after Lake Erie some who knew the family spoke of it as "Mrs. Perry's victory." Young Oliver Hazard Perry was fond of Plutarch's Lives, Shakespeare and Addison. He was a pupil of Count Rochambeau.

At fourteen he was commissioned a midshipman. When the war with England began there was probably no better ordnance officer in the American navy, and in the training of his crews he was unwearying in personal attention to details. By assembling his gunboats occasionally he gained actual knowledge of the evolutions of a fleet. He also practiced sham battles, which taught him

Within twenty-four hours after receipt of Commodore Chauncey's order to go to Lake Erie he had sent off a detachment of fifty men, and five days later he set out himself with his younger brother, Alexander. Traveling chiefly in sleighs he reached Erie on March 27. There he found Noah Brown, snipwright, and Salling Master Dobbins awaiting fifty carpenters from Philadelphia. The carpenters were more than five weeks making the wintry journey.

The keels of two twenty gun brigs and three gunboats had already been laid. Incredible toil in the wilderness enabled Perry to collect nine vessels of 1.671 tons with 54 guns capable of throwing a broadside of 936 pounds of metal, of which 288 pounds could be fired at long range. Puny figures these seem in this day of dreadnaughts, but in 1813 they were respectable if not exactly impressive.

The Lawrence and the Niagara, which were the two twenty gun ships, carried two long twelve pounders and eighteen thirty-two pounder carronades. The long range guns were the chief dependents of the Americans. To make his carronade fire effective Perry relied on grape and canister shot and favorite American ammunition, langrage, which was made cut of scraps of iron sewed up in leather bags.

Perry's force of men consisted of about 500 landsmen and sailors, many of whom had never seen salt water. On the British side Captain Barclay had six vessels of 1.460 tons, manned by nearly 500 men, but he had sixty-three cannon Barclay was one of Nelson's veterans.

As the fleets approached each other at about 11 o'clock the bugle sounded from the flagship. The men of the whole British line gave three cheers and the long guns of the Detroit opened on the Lawrence at a distance of a mile and a half. By noon the battle began in earnest in the form of a duel, the heaviest vessel in each fleet confronting the other. Barclay had at first. a manifest advantage. The gunners of the Lawrence, depending too much on their carronades. fired too fast, and overshotting their stumpy guns were able only to pit and dent the sides of the Detroit. So the Lawrence was reduced to a hulk by a steady British fire. After two hours only one gun was left mounted, the cockpit was crowded with wounded and only eighteen unharmed men, including commander and surgeon, were left on board. The Niagara for some reason had remained in the rear. The smaller American vessels seemed

With the audacity of genius Perry called four sallors to man the boats, and with his brother Alexander, the flag of the Lawrence wrapped round his arm, he left the ship. At first he was shielded by the battle smoke. Then he was rowed through the enemy's fire for fifteen minutes, at last reaching the Niagara unharmed. The breeze now freshened, speeding the Niagara and of the American schooners into action. The Queen Charlotte of the British fleet was disabled while getting into position for a broadside. She fell foul of the Detroit. The American schooners took raking positions. The full battery of the Niagara, joining in the steady and rapid fire, swept the British decks. Kentucky riflemen in the tops acting as marines picked off every enemy visible. At 3 o'clock the British flag was hauled down. It was the first time in Britain's history that she had lost a whole squadron. Then it was that on the deck of the Niagara Perry diepatched to the secretary of the navy the brief account of his victory and shortly afterward sent to Gen. William H. Harrison the line: "We have

met the enemy and they are ours." Congress voted Perry thanks, a medal and the rank of captain. The city of Boston presented him with a set of silver, and other cities voted him thanks. He assisted in the defense of Baltimore, and in the squadron that was sent to the Mediterranean in 1815 he commanded the frigate Java. In June, 1819, while in command of the John Adams and other United States ves sels in the West Indies, he contracted yellow fever in the Orinoco and died.

The United States has appropriated \$250,000 for a Perry memorial to be erected at Put-in-Ray on Bass Island. The great shaft will stand in the midst of a park. Individual states have brought the total up to \$700,000. New York gave \$50,000; Ohio, \$83,000; Pennsylvania, \$75,000 Wisconsin, \$50,000. Other states that interested themselves were Michigan, Illinois, Rhode Island.

Kentucky and Minnesota About a year ago the national commissioners of fine arts accepted a design for the memorial submitted by J. H. Freedlander and A. D. Sevmour, Jr. 'The design provides for a plaza 1,000 feet long and about 200 feet deep. On the plaza will be a Doris column 320 feet high. The

island on which the column will rise is one of a group at the western end of Lake Erie The fourteen acres have been acquired to pro vide a reservation around the memorial. The Doric column will serve as a lighthouse. Other features are a museum, a statue typifying peace flanked by a colonnade. In the museum will be panels arranged for mural paintings descriptive of historical events connected with the battle of Lake Erie.

The plan calls for a crypt under the shaft in which will be placed the bodies of American and British sailors who perished in the battle, which were buried on the island. The sum of \$100,000 has been set aside for harmonizing the landscape

with the general scene. The members of the commission having charge of the Perry centennial celebration will try to secure a brief suspension of that convention between the United States and Canada by which warships may not enter the Great Lakes. The idea is to have British and American battleships at the ceremony of dedicating the column to Perry's victory and possibly a warship or two of Canada's new navy.

The national commission of fine arts which se lected the design for the Perry memorial consists of Daniel H. Burnham, chairman; Daniel C. French, Thomas Hastings, Frederick Law Olmsted, Charles Moore, Cass Gilbert and Francis D. Millet. They were unanimous in their choice of a design. Commander George H. Worthington. Gen. Nelson A. Miles and Col. Henry Watterson are on the interstate board in charge of the

After Long

Women Are Constantly Being Restored to Health by Lydia E. Pinkham's Vegetable Compound.

"Worth mountains of gold," says one woman. Another says, "I would not give Lydia E. Pinkham's Vegetable Compound for all the other medicines for women in the world." Still another writes, "I should like to have the merits of Lydia E. Pinkham's Vegetable Compound thrown on the sky with a searchlight so that all suffering women could read and be convinced that there is a remedy for their ills."

We could fill a newspaper ten times the size of this with such quotations taken from the letters we have received from grateful women whose health has been restored and suffering banished by Lydia E. Pinkham's Vegetable Compound.

Why has Lydia E. Pinkham's Vegetable Compound accomplished

such a universal success? Why has it lived and thrived and kept on doing its glorious work among the sick women of the world for more than 30 years? Simply and surely because of its sterling worth. The reason no

other medicine has ever approached its success is plainly and simply because there is no other medicine so good for women's ills. Here are two letters that just came to the writer's desk-only two of thousands, but both tell a comforting story to every suffering woman who will read them-and be guided by them.

FROM MRS. D. H. BROWN.

Iola, Kansas.—"During the Change of Life I was sick for two years. Be-fore I took your medicine I could not bear the weight of my clothes and was bloated very badly. I doc-tored with three doctors but they did me no good. They said nature must have its way. My sister ad-vised me to take Lydia E. Pinkham's Vegetable Compound and I purchased a bottle. Before it was gone the bloating left me and I was not so sore. I continued taking it until I had taken 12 bottles. Now I am stronger than I have been for years and can do all my work, even the washing. Your medicine is worth its weight in gold. I cannot praise it enough. If more women would take your medicine there would be more healthy women. You may use this letter for the good of others."-Mrs. D. H. Brown, 809 North Walnut Street, Iola, Kan.

MRS. WILLIAMS SAYS: Elkhart, Ind. - " I suffered for 16

years from organic inflammation. male weakness, pain and irregularities. The pains in my sides were increased by walking or standing on my feet and I had such awful bearing down feelings, was depressed in spirits and became thin and pale with dull, heavy eyes. I had six doctors from whom I received only temporary relief. I decided to give Lydia E. Pinkham's Vegetable Compound a fair trial and also the Sanitive Wash. I have now used the remedies for four months and cannot express my thanks for what they have done for me.—Mrs. SADIE WIL-LIAMS, 455 James Street, Elkhart,

Some are long and narrow, others quite wide and no more apparent than a man's waistcoat worn with the morning cutaway coat:

Silken Waistcoats.

Waistcoats are much in evidence.

These waistcoats, like the braided coats, are mostly to be seen in bengalines, silk crepons and other silken fabrics. The classical tailor-made is at its newest in violet, green or white serge in thick diagonal rib. Its construction is rather curious, for al. by points and needful to plant life. though there are no draperies the skirts are so cut about in strangely shaped points and squares that the result is slightly puzzling.

Anyhow, the effect is quite interesting, and, what is the chief point, it is very new and very difficult for indifferent workmen to copy successfully. For this reason it will have a certain popularity.

Summer Silks.

and blouse materials is washing silk. This season it will be popular in a white or cream ground with a colored

They are much cooler, these silks. than cotton, for they do not hold any silk does not require as much ironing. quantity of silk weaves for spring and summer use which will be made up into every kind of blouse that a woman wants, plain and ornate.

Hair Ornaments.

The straight fillets, so much seen partially superseded by those arranged in curves which form a wavy line upon the colffure. They end in jeweled circlets with short fringe to match, and can be adjusted in a moment. One of the prettiest of jeweled bands for the hair is in a design of wheels between two bands of jeweling. The whole bandeau ends in a point at either side. It is rather high in front, a fashion which suits the round-faced.

Bouquet Shield.

When real flowers are worn, a bouquet shield is used to protect the gown. It is made of silk or ribbon, with a frill of lace. Corsage bouquets come from the florist with this pretty adjunct. Some of the shields Combination gown with skirt of have drooping ends of narrow ribbon draped, and blouse of printed slik low the flowers. The color is carefully chosen to suit flowers and gown

LESSON FOR MAY 25. JOSEPH AND BENJAMIN.

LESSON TEXT—Gen. 43:18, 19, 23-34.

'GOLDEN TEXT—"He that leveth his brother abideth in the light." I John 2:10.

Jacob's plaintive cry as uttered in verse six of this chapter touches the Ambrose channel, and there are few heart of any father, but God is work more highly responsible jobs. At a ing out his plan unknown to Jacob. cost of five million dollars and eight The brothers must have been impressed by Joseph's words that they should dare starvation, and their fa- and a width of two thousand, from the ther's grief and anger, rather than re- lower bay into the ocean-about sevturn to Egypt without their brother Benjamin.

Judah, who before had sought to de liver Joseph, now offers to become surety for Benjamin. Thus it was that Jacob was persuaded but to make as good an impression as possible with this strange Egyptian ruler Jacob directed that in addition to the, necessary funds a present also be prepared (43:11), and remembering the that this time a double portion be ride the lesson. Fear and Feasting.

Sought His Brother.

1. Fear, vv. 18-25. Ordinarily carelessly sold their brother into sla-"Some of those quaint old things, very are themselves fearful of becomoccasion against them but it was that he might secure his brother Benjamin (the others were only half-brothers), "Some of those Hungarian things to abide with him in Egypt. Notices their fear is not wholly allayed and "I ought to go," said Jones; "but if so they made ready their present feet. of God by giving of their possessions and glows with 1,500-candlepower of

momenchature, but really I ought not the face he could not help following it. In him had begun that divine experience of youth—of youth essentially,—of being carried off his feet by a spirit not himself. He ran like a point at the operation was not as he went.

The dock-hand apathetically trundled a small keg from one pile of peright to another, wiped his hands

The dock-hand apathetically trundled a small keg from one pile of peright to another, wiped his hands

The dock hand a force of youth—of youth essentially, and he can be exact,—with fair to do it. It one can not be exact,—with fair to do it. It one can not be exact,—with fair to do it. It had the thing—that sort of thing—and he rarely talked about ft. It had not be exact, who fair to do it. It had the thing—that sort of thing—and he rarely talked about ft. It had not be exact, who fair to do it. It had the thing—that sort of thing—and he rarely talked about ft. It had should not of reach of his valet and a club cocktail; and he was consequently impressed with his cheeful grin he carried quite impersonally: 'I was thinking of staying long enough to put one question—er, a matter of some a second time they are on their faces before him they are on their faces before him the was consequently impressed with his cheeful grin he thinking of staying long enough to put one question—er, a matter of some a second time they are on their faces before him the was consequently impressed with his cheeful grin he carried quite impersonally: 'I was the world out of reach of his valet and a club cocktail; and he was consequently impressed with his heeful from kerosent and their the company with his cheeful grin he thinking of st who now mock our Joseph will in the min that he made all of these delays in revealing himself to his other brothers. As we have seen Benjamin was Joseph's only full brother 30:22 grocer at Hotchkiss, when he defeatetc. and had had no part in the conspiracy against Joseph, hence Joseph's

Joseph knew full well how to control his emotions (v. 31) till the propminds of these Hebrews when their Egyptian host told the exact order of their respective ages, v. 33 (see also 44:12), and that perhaps Joseph might after all be alive. Doubtless their guilty consciences were again aroused when they beheld their youngest brother singled out for such manifest partiality (v. 34). They, however, made a bold pretense and "drank largely," R. V., making merry to cover their confusion. If their drink caused intoxication we do not know. Anyhow they are not held before us as an example in this particular, nor does the biblical account demand that

This was a strange feast. The sight of Benjamin recalls to Joseph the memories of home and mother and caused him to retire from the presence of his brothers lest he reveal himself through his tears. Returning he restrains his emotions while at the same time his brothers are laboring under the constraint of their fears. What differing emotions haunting memories recall. Joseph's memories fill him with love and tenderness while the brothers are filled with suspicion of the entertainment they are receiving "Conscience doth make In every eye there is a little spot be perfectly blank. OCEAN'S "GREAT WHITE WAY

Richmond Lighthouse at Staten Island Is Built High on Rocks Two Miles Inland.

New York.—Remarkable no less for its distinguished services than for its extreme unconventionality, is that newest safeguard for ocean travelers in and out of New York harbor, the "Staten Island Rear Range Light." Instead of perching on the rocks in the surf, this odd tower makes its home two miles inland on a green and peaceful hill overlooking the sleepy little town of Richmond. The site seems more appropriate for a home for superannuated lighthouses than for a young and vigorous beacon appointed to guard one of the most im

portant ocean canals of the world. The Richmond light is guardian of years of hard work, this channel was scooped out to a depth of forty feet
