

THE MESSENGER

THIRTY

HAGERMAN, CHAVES COUNTY, NEW MEXICO, THURSDAY, FEBRUARY 26, 1931.

NUMBER 11

Hagerman—Where the spring with healing in its waters is located.

MAN PURCHASES FIRE EQUIPMENT FOR FIRES NOW

Man has less to fear from fires now, because a truck was purchased Tuesday by C. and C. Garage, and fitted up with first class fire fighting apparatus.

The truck is a Chevrolet Six replace "Henry's Pride" seen service at various fires for the last eight months. It has a pump to-minute fire equipment ordered, but the parts have not yet been received. For several weeks, the truck has been occupied with fire fighting machinery of various kinds. The need for fire protection along this line has been felt for some time. The old fire truck, "T.," could be cranked up only about the new truck. However, it is hoped that the initiation of the new apparatus will be postponed for a long time until the new truck will be started.

MAN PARTRIDGES RELEASED HERE LATELY

Man has released here lately several pairs of Hungarian partridges from Austria Hungary, raised February 19th, on the farm in the game reserve Game Commissioner W. A.

the first time that this game fowl has ever been released in New Mexico. They were introduced several years ago on the side of the mountains in the Washington, and those released now open hunting season. They multiply very rapidly. They multiply very rapidly. They multiply very rapidly.

ann has been confined to bed for several days with sickness.

BASEBALL GAMES TO BE PLAYED IN THE VALLEY TOWN TOURNAMENT

With the addition of New Hobbs, teams will compete in the town tournament on March 6 and 7.

- When the tournament will start promptly at 10:00 a. m. Friday morning. Hagerman will meet the local boys at 9:00 a. m. on Saturday. The following is the schedule:
- FRIDAY, MARCH 6th
 - 1-9:00 a. m. Hagerman vs. Hagerman.
 - 2-10:00 a. m. vs. Lovington.
 - 3-11:00 a. m. vs. Carlsbad.
 - 4-2:00 p. m. vs. New Hobbs.
 - 5-3:00 p. m. vs. Lake Arthur.
 - 6-4:00 p. m. vs. loser game No. 1.
 - 7-7:30 p. m. game No. 2 versus loser No. 3.
 - 8-8:30 p. m. game No. 4 versus loser No. 5.
- TUESDAY, MARCH 7th
 - 9-9:00 a. m. game No. 1 versus winner No. 2.
 - 10-10:00 a. m. game No. 3 versus winner No. 4.
 - 11-11:00 a. m. game No. 5 versus winner No. 6.
 - 12-2:00 p. m. game No. 7 versus winner No. 8.
 - 13-3:00 p. m. game No. 9 versus winner No. 10.
 - 14-4:00 p. m. game No. 11 versus winner No. 12.
 - 15 (Championship)—8:30 game No. 12 versus winner No. 14.
 - 16 (Consolation)—game No. 13 versus loser No. 14.

JENKS FAMILY WILL LEAVE STATE—PUBLIC SALE ON MARCH FIFTH

Thursday, March 5th, W. F. Jenks and son, C. F. Jenks are offering a complete set of farming implements, a number of livestock and some household goods, at a public sale to be given on the Jenks farm, about a mile and a half southeast of Artesia. W. F. Jenks has recently sold the 160 acre farm to R. L. Paris, of Artesia, hence the public sale. See their announcement elsewhere in this issue.

The Artesia community regrets to lose the Jenks family and the family are just as loathe to leave the friendship ties made here. W. F. Jenks and family, by the way have been interested in New Mexico for more than twenty-five years and are among the pioneers of the state, first entering northwest New Mexico in the Indian service. Later Mr. Jenks moved his family to the farm in 1918. Mr. Jenks is a pioneer of both New Mexico and Oklahoma. He was with the first rush of settlers that crossed the Oklahoma border, after Indian Territory was admitted to statehood and secured a piece of property near Shawnee, which he still owns.

TURNING ON THE GAS

This week we are sponsoring a "paint 'em up" campaign calculated to furnish enough inspiration for everyone in town who is financially able to paint his house, wife or fence.

On second thought, I had better leave the women out of this discussion, because I absolutely cannot get along with any of them—not even my own. A few days ago a lady called yours truly over the phone, and the line sizzled and fried with her expletives. I wasn't able to find out what her grievance was because she hung up too quick. I don't even know who she was, but I sure pity her husband. However, if she reads this, said husband is liable to give me a licking.

As long as my car doesn't have to be driven farther than twenty miles, it's alright, but after the first twenty miles, I have to put water in the radiator, pump up the tires, and clean the spark plugs.

Ops. Note—We heard the parson was gonna get a one lung iron horse to make the neighboring vicinity, so if you hear something comin' poppin' down the road like the devil was after him, its not, its the parson after the devil. Picture the sky pilot straddle of his trusty iron horse, lariat in hand, chasin' down and hawg tying sinners. Boy, Howdy! "Ain't that sumpin'."

We notice that a wet snow fell in Hagerman Sunday night. Now Harold where did you ever see any dry snow? Maybe the dry snow you saw had been rolled up in balls and hung out till it was dry, but honest we ain't never seen no dry snow down here.

LOCAL

R. Jennings has been confined to his bed for a week with illness.

Mr. and Mrs. Paul Rubincam, were transacting business in Hagerman Friday afternoon.

The P. T. A. will meet at the school house on Tuesday afternoon, March 3rd, at 3:30 p. m.

Rev. Bryan Hall returned Saturday from Las Cruces, where he had been engaged in teaching a church training school.

Mr. and Mrs. R. L. Collins accompanied the town basketball team to Capitan on Saturday afternoon, returning Sunday morning.

Mr. and Mrs. C. W. Curry and Ted Curry, of Artesia left Friday for Las Cruces. Ted is being transferred to the Willard station.

Mr. and Mrs. C. W. Cole, received a wire Wednesday morning, from California, that Mrs. Edna Cole had undergone a major operation at the St. Helena hospital. Her many friends at this place, hope for an early recovery.

: DEXTER NEWS :

Dexter is having new water mains installed.

Ray Bartlett of Artesia was in Dexter Friday on business.

Bob Crosby of Roswell, was in Dexter on business Friday afternoon.

Mr. and Mrs. J. T. Neal and family attended the show at Artesia Sunday afternoon.

Messrs Edwards, Phillips and Fleet-hart, of Chicago were in Dexter Saturday morning on business.

Mr. and Mrs. Lee Allred were in Dexter Tuesday afternoon from their ranch, west of Dexter.

Mr. and Mrs. George Bixler, are the house guests of their father and mother, Mr. and Mrs. J. W. Knight.

C. N. Moore returned Tuesday from State College and Santa Fe, where had been on business since last Friday.

The new manse of the Presbyterian church is nearing completion and is surely a nice building, which will be most comfortable.

Oscar Kunkel sold and shipped a bunch of calves last Monday evening. These calves had been on the Kunkel farm for the past two months.

Mrs. Meade of El Paso, arrived Saturday to spend the week with Mr. and Mrs. C. B. Krukenmiller. Mrs. Meade and Mrs. Krukenmiller are sisters.

Earl Latimer had a near accident Monday morning, when his car was overturned just this side of the Fairbanks Filling Station. Mr. Latimer's car escaped damage.

Many farmers around Dexter have their spring plowing finished. Some are planting barley, some getting ready for their spring alfalfa planting and many have their cotton ground broken.

E. L. Love entertained with a delightful line party at Artesia last Sunday evening. Mr. and Mrs. Harold Crosby of Roswell, Mr. and Mrs. Breeb Hurst, E. L. Love and Mrs. L. B. Hurst were in the party.

Mr. and Mrs. Bob Reid, Mr. and Mrs. Paul McMains, Mr. and Mrs. Ashton and boys, Mrs. Chas. Beck, Mrs. R. C. Reid, Carl Coruthers, Miss Alma Thompson and Miss Avalee Barns attended the show in Artesia Sunday night.

Mr. and Mrs. S. A. Pritchard and children will leave Monday or Tuesday for Missouri where they will spend the next three or four months. Mrs. Thompson and Miss Alma Thompson will occupy the Pritchard home until school closes.

Rev. N. L. Linebaugh, presiding elder, of the Methodist church of the Roswell district, is conducting a community revival meeting at the Methodist church in Dexter. Rev. John Klossen of Hope has charge of the music and there are special numbers each evening. P. N. Albright is assisting Rev. Klossen with the young peoples services which are held at seven o'clock, the regular services following these services. Rev. Linebaugh is a most entertaining speaker, the music is most pleasing and the whole community is urged to not only attend these meetings, but to come and take an active part and help make it one of the best meetings ever held in this vicinity. The meeting will be in progress until March the 9th. Come.

CLARK LAKE MAY BE MEANS OF SUPPLYING NEEDED WITH FOOD

The Clark Lake north of town may supply some needed food for the poor, during the period that the State Game Department will attempt to partly rid the lake of carp. The department is now constructing wing walls to the carp traps and once this is done, 700 to 800 pounds of carp may be removed from the lake every week. Saturday the traps were seined under the supervision of the game department and more than 100 pounds of carp were caught and distributed to the poor thru the efforts of M. W. Evans. Mr. Evans believes that the lake will yield as much as 10,000 pounds of carp. The carp caught Saturday ranged in size from a pound and a half to five pounds. It may interest local sportsmen to know that about 300 blue gills were caught in the traps and thrown back in the lake. Apparently all of the blue gills planted in the lake last fall have done well.

Misses Ruth West and Madgie Bell Dozier accompanied Mrs. N. S. West to Roswell Monday, for a shopping tour.

SOCIAL ITEMS

HOME UNIT NO. 1

The Home Unit club No. 1 met at the home of Mrs. O. J. Atwood, Friday, at 12:30 o'clock for a breakfast. Hostesses for the day were Mesdames Lloyd Harshey, Aaron Clark and Edmund McKinstry. Breakfast was served at three small tables to the following members present: Mesdames George Wade, Ross Jacobs, James McKinstry, Tom McKinstry, C. O. Holloway, I. B. McCormick, Ernest Utterback, Louie Burck, Orville Atwood, Grace McNamara, Miss Borschell and the hostesses. Members who came later were: Mesdames Ernest Langenegger, Elmer Graham and Waldron Jacobson. Subject study for the year is, "Buying Problems of the Home." Subject for the day was: "Package Groceries."

HAGERMAN WOMAN'S CLUB

The Hagerman Woman's club will meet March 6th with Mrs. Howard Russell. It is hoped that all members will be present.

DINNER BRIDGE

Mr. and Mrs. J. T. West entertained members of the bridge club and Mr. and Mrs. Clifton Hearn at a dinner bridge last evening at their home, complimentary to Mr. and Mrs. Harold Miller, who left today for Carlsbad to make their future home.

WILL ENTERTAIN BOYS

Mable-Lowrey Hardware Company will be hosts to the Hagerman high school basketball team in the tournament, with a dinner.

METHODIST MISSIONARY SOCIETY MEETING

The Methodist Missionary Society met in the education building Wednesday afternoon with Mrs. Carter as leader. Subject for the afternoon: "Missionary Aim and Message for the New Day." Talks were made by Miss James, Mrs. Hall, Mrs. McNamara. Scripture was read by Mrs. Mann. After the program a short business meeting was held. The following members were present, Mesdames Mann, Hall, Stine, Cowan, Carter, Campbell, Bailey, Floto, Walton, Atwood, McNamara, Tom and E. R. McKinstry and Miss James. Mrs. Tom McKinstry was hostess.

LOCAL

Miss Pearl Richards was confined to her bed with influenza for several days of last week.

A wet snow fell Sunday night, but melted quickly Monday morning. Monday continued to be misty, rainy day.

Robert Cumpsten has been doing his share toward making this "paint 'em up week" by painting the house owned by Mrs. Lang.

Mr. and Mrs. J. E. Wimberly and Mrs. Floyd Childress were week-end guests of Mr. and Mrs. Perry Sears and Clifford Wimberly, in Capitan.

Kenneth Servatius returned Wednesday night from a two weeks stay in California. Servatius went to California by plane, and returned by train. He says that California is very beautiful, but that he likes Hagerman very well.

AGRICULTURE CLASS OF HIGH SCHOOL TO STAGE POULTRY SHOW

During the second week in March with a tentative date of March 10, the agricultural department of the high school will put on a poultry and egg show. The details of the show will be under the management of the local chapter of the Future Farmers of America.

No entry fee will be charged for either poultry or eggs. Ribbons will be awarded to the winners of first, second and third places in each class. All standard breeds in the community will have classes provided, and it is hoped that sufficient entry will be made to result in the greatest measure of educational value.

We have been assured that Mr. Ginn, state extension poultryman, will be here to judge the show. Mr. Ginn is an expert judge, and his work here should be most interesting as well as of great value to poultry breeders.

The educational department of the Purina Mills is furnishing entry blanks, score cards, first, second and third place stickers, egg trays and a special Purina knife for the sweep-stake prize on the eggs. This splendid co-operation on the part of the Purina people is very much appreciated.

Next Monday and Tuesday nights at 7:30 the poultry classes will be held as usual at the high school agricultural room. The discussion on Monday night will be one factor in poultry feeding; and on Tuesday night the discussion will be led by Mr. Hortenstine of the Roswell hatchery. Mr. Hortenstine is very well informed on poultry problems and is sure to make the evening one of value and interest. Everyone is welcome to the class.

RAIN AND SNOW IN VALLEY DURING WEEK

Another good rain, interspersed with snow fell here Sunday night and Monday. Moisture fell from Clovis to Carlsbad, with snow from the north valley to Clovis. The snow fall was particularly heavy in the mountains and extended east as far as Hope. Mountain highways were blocked in places and the El Paso-Roswell highway was blocked at the Bonnell ranch by 12 inches of snow, according to reports.

HOUSE BILL WOULD REDUCE AUTO LICENSE AFTER THE FIRST YEAR

SANTA FE—The house of representatives Tuesday afternoon passed the administration measure providing for a reduction of approximately 40 per cent in the license fees of cars in the state after the first year and for five years thereafter, when a flat rate is placed in operation. Only two votes were cast against the bill.

The new scale for passenger cars as provided by the bill does not include taxis and driverless cars. It follows:
First year—\$18 plus \$2 for each 100 pounds or major fraction thereof in excess of 2400 pounds.
Second year—\$15 plus \$1.50 for each 100 pounds or major fraction thereof in excess weight.
Third year—\$12 plus \$1 for each 100 pounds or major fraction thereof.
Fourth year—\$7 plus \$1 for each 100 pounds or fraction thereof.
Fifth year—\$5 plus 50 cents for each 100 pounds or major fraction thereof in excess weight.

For motor trucks the rates are:
For each truck, if the truck has not been registered during the two years prior to the date of application, if the weight is 1,600 and 2,400 pounds, \$18 plus \$10 for each 100 pounds or major fraction thereof in excess of the minimum; if the weight is more than 2,400 pounds, \$26 plus \$2 for each 100 pounds or major fraction thereof in excess of 2,400.
When the truck has been registered during the two prior years, \$18 plus \$3 for each 100 pounds or major fraction thereof in excess of 1600 pounds; if registered for two preceding years, \$10 plus \$2 for each 100 pounds or major fraction thereof excess weight.

For taxis the rates are: If not registered for two prior years, \$18 plus \$3 for each 100 pounds or major fraction thereof in excess of 1600 pounds; if registered for two preceding years, \$10 plus \$2 for each 100 pounds or major fraction thereof excess weight.

CHURCHES

Presbyterian Church

"To testify the Gospel of the Grace of God"

NEXT SUNDAY

Sunday School 10:00 a. m.
Next Sunday last Sunday of contest. It has been fine and the spirit fine. Let next Sunday be the best of all. All out and on time.

Morning Worship 11:00 a. m.
Subject for the morning: "Full Storehouses and Way Into Them." Special music.

Vesper Service 4:30 p. m.
Subject for the Vesper Service: "A Business Man Rejects a Great Invitation." Special music. A good place to spend an hour Sunday afternoon. Come.

JAMES A. HEDGES, Pastor.

THE CHURCH OF CHRIST

The Church of Christ meets for worship every Lord's Day at 10:45. Elder McGuffin preaches every second Sunday. Everyone is invited to attend these services.

CHURCH OF THE NAZARENE

Sunday school 10:00 a. m., Rev. Walter Orr, superintendent.
Morning worship 11:00 a. m.
Evening service 7:30 p. m.
N. Y. P. S. 6:30 p. m.
A revival campaign beginning Sunday, March 1st with Rev. Walter Orr, Rev. George Pierce of Artesia, and the local pastor in charge of the services. We solicit the cooperation of all the pastors and Christian workmen of the town to help us reach the needy souls of Hagerman. We invite everyone to attend the services at 7:30 p. m. each evening and prayer meetings in town in any home where one is

wanted.
If you love God and lost souls, let's show it by our actions in these next few days or weeks as it may be.
Yours in the interest of the lost. We welcome you to all of these services. Come with us and we will do the good.

MARY L. HARTLINE, Pastor.

METHODIST CHURCH

Sunday school at 9:45 a. m. E. A. Paddock, Superintendent.
Morning worship at 11:00 a. m. subject: "Worship Him in Truth."
Union League service 6:15 p. m. in basement.
Evening worship at 7:15 p. m. Dr. N. L. Linebaugh will preach and hold our second quarterly conference. Welcome all the time.

BRYAN HALL, Pastor.

HAROLD DYE, Managing Editor

SHALL WE HAVE A PARK?

The citizens of Lake Arthur are busy building a park. This little town recognizes the value of a community place of beauty, and is acting wisely in planting trees, shrubs and grass on a plot of ground to be designated as a public park.

Dexter has its little community corner with a grassy spot, flowering plants and trees. The people of that thriving center are taking advantage of the opportunity to make their town beautiful.

What has Hagerman done in this way? Nothing in the nature of a community enterprise. Our town will continue to suffer without it.

PAINT YOUR HOUSE

The two oldest houses in Hagerman are to-day among the best looking. One of these is the house occupied by Vedder Brown, and the other, the home of Jim King. What is the answer? These houses have been kept painted and repaired. It pays to invest a few dollars in paint. Wind and weather steal dollars from the value of any building which is not protected by a coat of paint.

Besides: think how much prettier your home would be all dolled up. Then, think how much the looks of our town would be improved with every house painted.

"Let us rise and shine," with a paint brush in one hand and bucket of paint in the other.

THE PERFECT ALIBI

Editors who are driven to near insanity by the futile efforts to keep errors from getting into their papers and readers who take delight in pointing out the occasional mistakes which all newspapers make may now devote their energies to other pursuits. The perfect alibi has been found. A statistician has worked out a number of chances for mistakes in one column of print. The number is 70,000 to one.

In an ordinary newspaper column there are 10,000 letters of type; there are seven wrong positions that a letter may be put in; there are 70,000 chances to make an error, and millions of chances for transpositions. In the short sentence, "to be or not to be," by transposition alone, it is possible to make 2,758,009 errors.—The Earth.

POSSIBILITIES

Albert W. Weigel, domestic trade commissioner of the Los Angeles Chamber of Commerce, who visited the various valley towns the past week, presents some interesting figures about southern California. Among the things that we learn is that practically all of the orange groves are irrigated from pumping wells. It should interest Pecos valley farmers to know that California fruit growers have made a success of farming when they had to lift water a greater depth than pumping plants in the Artesian basin. While they can grow citrus fruits and have advantage of a cheap power rate, at one time they labored under a far greater handicap than is found under similar conditions here.

What has brought about success then? Co-operation and advertising. Letting the people know they had something to sell.

HERE'S GOOD ADVICE

Kenneth M. Goode, noted advertising writer, says, "By far the most important source of waste in advertising is quitting, and this can be charged against no one but the man, or concern, that pays the bill."

"No business should start advertising unless the controlling executives realize that advertising is one race that has no finish line.

"Even a bad advertisement will come to mean something and be productive if run long enough, while a good advertiser who quits, loses in time probably all he has put into his campaign.

"I honestly believe that the losses sustained by American advertisers who have quit during the past fifty years, total as large as the cost of our participation in the World War." Moral: Don't quit, it costs too much.

ANOTHER SOURCE OF SUCCESS

Another worthy objective that deserves success and one that comes pretty close to home is the present campaign undertaken by the wool growers of the state to encourage the public to eat more mutton. Mutton is really a palatable dish. It provides another source of revenue for the sheepmen when the price of wool is so low. The public has responded generously to the slogan of "Eat More Lamb," and have added another item to their menu.

"Save the Surface and You Save All," is a good slogan. But one may be pardoned if he wonders if it ever sold very much paint. There are a lot of things the public doesn't know about paint that might be told with profit. "Say It With Flowers" is another catchy slogan. But how many flowers has it sold? Personally, neither of these slogans has even had the slightest effect in making us want to buy either paint or flowers. A lot of other catchy advertising ideas are equally open to question. Place a litter of frolicsome pups in a show window and the sidewalk will be thronged with people all of the time. There will be an endless amount of comment. But how much merchandise will such an exhibit sell? How many people will be attracted to spend money in that store by such an exhibit? A druggist friend of ours had a display of mud turtles in his window several days last summer. He confesses that he cannot trace the sale of a single additional sandwich to their presence. Something besides catchy ideas are necessary to make a good advertisement.—United States Publisher and Printer.

Indications are that an attempt will be made to abolish capital punishment by legislation. Other states have tried it and we don't know that they have profited by it, certainly not from a moral standpoint. When the public has to deal with a gang of criminals, who do not hesitate to shoot their victim in the back with a machine gun, if the opportunity presents itself, surely deserves no leniency. It is only the fear of the rope or the electric chair that deters some of the worst criminals. Remove this fear and the public would be at the mercy of the criminal more than ever.

Don't leave scattered straw stacks around to breed stable flies. Plow straw under or burn it.

A heavy coat of white lead will protect tree wounds resulting from the removal of large branches. This does not make the wound heal more quickly but protects the heartwood from decay until the new growth develops. Yellow ochre, coal tar, and grafting wax also are used for this purpose.

Copper carbonate is the most satisfactory dust for controlling stinking smut, or bunt, of wheat, says the U. S. Department of Agriculture which has tested many fungicides for this disease. Copper chloride and copper oxychloride control smut but are too corrosive for general use in drills, the department found.

Cattle owners in sections where the fever tick is a pest should begin now and dip their cattle every 14 days until next November. If thoroughly done, this will eradicate the pest. The parasite transmits tick fever, reduces beef and milk production, and ticky cattle can not be shipped interstate. Such cattle usually sell for from one-half cent to 2 cents a pound less than tick-free cattle, says the bureau of animal industry, U. S. Department of Agriculture.

The viability of alfalfa seed is clearly shown by its appearance. Plump seeds of a bright olive-green color almost invariably germinate well, whereas shriveled seeds or those of a brownish color usually germinate poorly. Alfalfa seed turns reddish brown with age, and though some viable seed may have this color, it is better not to use such seed without a germination test. This can be made by placing 100 seeds between cloth or blotting paper and keeping them moist and at a temperature of about 70° F. After 5 or 6 days most of the readily viable seeds will sprout, but some remain hard, especially if they are of the variegated varieties. Many of these hard seeds will grow when planted and should be considered in estimating the per cent of germination.

Skyscraper May Be Nearing End.

Reader is of that restless turn that makes him wonder what will be like 100 years from now. He has the assurance of the prophet, who is Francis, asserts that the increasing height of buildings has doomed the type of construction, because extra high building is an extra cost and convenient air. He visualizes cities using the buildings for airplane parking, the airplane as a method of transportation as common and generalized as the automobile today, as men who speed to the city will literally fly to the city. Of course, when they descend home they will not want less of taking off complicated not picket fence of towers. So they think there will be no more, just mile after mile of buildings of uniform height, made reasonable. But if the years' progress may be judged of the past 100, whoever his predictions about what the future will be taking a long time, it is not now in sight. It is, in time, a transportation that will make the airplane as old-fashioned as the steam locomotive today.—Fort Worthogram.

Explosives Differ in Results Produced

Bureau of mines says that the black powder works upward and white works downward is only a general effect. Repeated experiments show that in case of all explosives the tendency is for the effect to be exerted in all directions about the center of the explosion. When explosives are exploded in the open and apparently uniform, such differences seem to occur because when dynamite is exploded upon the rock, the rock is shattered, but black powder is exploded upon the rock, the fact is that of these explosives are contained in the atmosphere about them. They are exploded, however, the rate of explosion is not greater than that of the black powder. The gases which are produced by its explosion are therefore so fast that they become conical about them and thereby exert pressure upon the rock at to break the rock. In the case of the black powder the gases are off so slowly that, like the flame from a chimney fire, they mingle with the atmosphere and therefore the effect is not so great as that of the black powder upon the rock is too little to have any breaking effect.

Elk's Teeth Are Taboo

Custom of wearing elk's teeth for ornamental purposes has been a protest from government officials. The United States bureau of survey has recently circulated a petition throughout the western states calling attention to the disaffecting the custom was having on the now dwindled herds of these animals. Two of these teeth cost the one of these interesting animals a number of them in this country the present time is so small that it is only a short time before it will be wiped out entirely. Thousands of elk have been sacrificed to a questionable custom.

Why Heat Stimulates Brain

Putting one's head into an electric field in order to think better and rapidly has been successfully practiced in Germany in recent months, according to Modern Science Magazine. Currents were applied to the living brains of animals by means of electrodes outside the skull. By testing their responses and other bodily functions it was discovered that such heating greatly stimulates the activity of the brain and makes other parts of the nervous system more active and effective.

Why Bakers Protested

A campaign to persuade the people of Germany to eat more rye bread, thus save the German farmers, the ministry of agriculture proposed legislation compelling the bakers to use a certain percentage of rye flour in all their bread. The bakers of the country, foreseeing the difficulty they would have in trying to sell fancy bread and pastries made mostly of wheat, made a denunciation. The following day the ministry of agriculture withdrew its proposal.

Or a Chicken Dinner

A well-organized farm with 1,000 acres, the birds should yield an average of 100 or more, says an expert from Country Home.

Lengthy Highway

From the highway from Vancouver to the Mexican boundary line of San Diego is about 1,675 miles long.

Lead in Primitive Way

Lead in Peru, who built their stone houses, did not, apparently, use tables or chairs.

Call for Enlightenment

Old adage that says two can be as cheap as one neglected to be mentioned in Dallas News.

ADVERTISING — ITS POWER

Here's what Brisbane, noted columnist says about advertising: The people have money and will spend it, even for things not necessary to life, if you advertise with energy.

While some industrial presidents fill pages telling why business is bad and profits down, R. W. Woodruff, president of the Coca-Cola Company, uses only 60 words in a report telling stockholders that business is good, profits up, both exceeding all records.

Business men with sob stories to tell will observe that Mr. Woodruff's company has been advertising more energetically than ever.

Similarly, George W. Hill, whose success as president of the American Tobacco Company, succeeding his father, has been phenomenal, makes his report of business and profits sound like his own radio song: "I'm lucky. This is my lucky day."

Only, of course, there is no luck about it.

Business and profits for his company continue to break records and so do his advertising expenditures.

"If your business is not worth advertising, advertise it for sale." To retrench on advertising in "hard times" is false economy.

CIVILIZATION MAY WIPE OUT ESKIMOS

Arctic Visitor Says Race Faces Extinction.

New York.—Mrs. Maude Redford Warren, writer and traveler, returned recently from a three months' journey within the Arctic circle. In the northwestern part of Canada with Aklavik as her headquarters. She traveled alone, with the aid of Indian and Eskimo guides, except when she went by airplane, the most comfortable means of travel in the Northwest.

Of strong physique and indifferent to hardships, Mrs. Warren found the life of the frontier villages the "most thrilling adventure" she had known since her work in first aid stations during the war, but does not recommend the trip to the average woman traveler. "Bulldogs," or moose flies, as big as wasps and twice as voracious, impaired the pleasure of sleeping out of doors, she confessed.

Influence Wiping Out Race.

Mrs. Warren returns an enthusiastic admirer of the Eskimo, a cheerful and industrious people, but she is alarmed lest they vanish from the Northwest within 50 years. "The Eskimos are dying off in great numbers from the ravages of influenza and other diseases brought in by the white man," she said. "They have learned to eat white man's food instead of the good caribou meat and fish which used to be their chief diet. This summer I saw them eating soggy pancakes covered with syrup three times a day."

"The Indians have an arrangement with the Canadian government by which they 'take treaty,' becoming the wards of the government, and are thus guaranteed against starvation. But the Eskimos, being a more independent race, have no such arrangement. The white man could not survive within the Arctic circle without the Eskimo and the Indian."

Village Life Simple.

Mrs. Warren found village life in Aklavik charmingly simple for one who longed to escape the trivialities of modern America, but confessed she would not care to endure it permanently.

"In the winter there is no amusement at all, not even a pool table, in the entire village," she said. "They read all winter, after their day's work is done. The newspapers are brought in during the summer and they save them, in order, and read them later day by day."

"There are seven nuns in the village and five other white women connected with the Anglican missions. There is also one American woman who runs the restaurant."

"The people in Aklavik prefer the long lonesome winter to the uncertainties of summer, when strangers come poking into their peaceful village, and inspectors and all sorts of officials disturb their routine." Messenger want ads get results.

INSIDE INFORMATION

There are several kinds of salmon and after canning they vary in color from bright red to almost white.

Children should eat bananas only when they are fully ripe. For cooking, bananas that are still slightly hard may be used.

Always grease an iron with lard or vaseline before putting it away for a long time, or it will rust. To remove rust from an iron, scour it with scouring powder, and rub well with a flannel cloth.

Too much water in a washing machine causes excessive splashing and often reduces the efficiency of the machine. Observe where the water line is, and also be careful not to overload the machine with clothes.

Three-cornered wire sink baskets make good receptacles for dusty and oily cloths in the cleaning closet, as they permit the circulation of air and reduce the danger of fire. They take up very little space in a small closet.

Always iron with the thread of the goods and iron until the garment is dry. Otherwise it will pucker. To remove the shiny gloss on seams, tucks, or hems, moisten a piece of soft cloth in clear water, wring it dry, and wipe it quickly over the shiny surface.

Do not add water when roasting meat. Sear the roast at a high temperature, then reduce the heat and cook 15 to 20 minutes to the pound. Better still, use a roast meat thermometer, which tells exactly when the meat is rare, medium or well-done.

The right height for the kitchen sink depends on the height, length of arm and general build of the person who is to use it. Thirty-six inches from the rim to the floor is often given as a good average height. If the sink is too low, a flat box or block may be used on which to set the dish pan while working at the sink.

In making fruit salad, cut the fruit in small, shapely pieces. Do not stir them about or they will look mushy and unattractive. Any sorts of fruit that combine well may be used, depending on the season. Fruits for salad are not sweetened; those for fruit cup, used as an appetizer or dessert, usually have a little sugar sprinkled over them before serving time.

Experts Approve of Use of Color in Kitchen

The use of color in home decoration has invaded the field of kitchen equipment, and is becoming a standard recommendation of architectural experts. The general color scheme of a kitchen, however, does not need to take account of "smart trends." In fact, Miss Betty Thornley of Collier's Weekly insists that the kitchen should mirror the personality of the woman who decorated it to suit herself.

"Suppose," writes Miss Thornley, "a woman never gets enough color in ordinary life—how about yellow walls in the kitchen, above a black linoleum floor? The woodwork will be yellow, too, with moldings picked out in red. A yellow kitchen cabinet, red saucepans and teakettle, red oilcloth curtains—and here's where we'll wear white smocks if we feel extravagant or bright blue ones if we don't. A pot of primroses on the window sill will add to the gaiety—and don't forget a mirror in a good light, with a shelf below it for a bright red make-up box with powder and all the rest of our beauty arsenal."

But such a kitchen might stun some women, as too colorful. In that case they should consider white walls with dark blue woodwork, blue and white linoleum on the floor, white curtains with red edges, cupboards and kitchen cabinet in blue and white with red inside. Blue pots and pans, or shiny aluminum.

Another colorful kitchen recently installed by a prominent interior decorator has white walls and brilliant yellow woodwork, a red linoleum floor in solid color, red and white gingham curtains and yellow pots and pans. Another begins with walls of powder blue above a floor of gray, black and white checked linoleum; the woodwork is white, the curtains pink voile.

Housewives are constantly discovering new methods of using color in the kitchen. A bakeshop in Columbus, Ohio, makes colored bread, and its pastel shades have great appeal for afternoon tea sandwiches. So also have the red and orange loaves, but the general public preference is for blue. On patriotic holidays, the shops sell bread striped the colors of the flag.

Avoid Damp Cellars

All earth around the house should slope away from the foundation walls to prevent rain from seeping into the cellar. Rain water from the roof should be led away from the house and not be allowed to soak into the ground close to foundation walls. Roof drainage is one of the chief causes of damp cellars.

The Back Yard Garden, and What May Be Grown In It

By CAROLINE B. KING

A LITTLE garden at the back of the lot, a bit of space where green things may grow in neat rows, a few tomato plants, bush beans, carrots, onions, what a real joy it can add to one's life! And whether one lives in the city, suburbs, or the real country, the little garden conveniently located near the house where it may be looked after in spare hours is easily acquired.

In planning a little backyard garden it is wise to look first of all to the type of soil available, remembering that almost any kind of soil may be put into proper condition for growing garden crops. It will be well to remember also that your garden will get more sunshine and more protection from cold winds if it is planted south or east of the house, if this is possible.

Guide your rows by a line stretched on two small posts and regulate the spaces between by marks previously measured off. In this way you can obtain a pleasingly symmetrical result and a neat garden adds much to the owner's pleasure.

Rows running the long way of the garden are easier to cultivate, especially with the wheel hoe, but if the family is small so that only a little of each vegetable is used at a time, or if one can work in the garden only a few minutes a day, short rows may be better.

In a little garden it is well to plan

crops so that the soil is working all through the summer for you! You can do this by systematic planting. Draw your garden map on paper, sow your seeds according to your plan, and you will have some delicious vegetables ready for the table every week.

Group the early crops such as lettuce and radishes, then later you can use the same space for late beets, beans or cabbages. Plant bush beans early and follow them by turnips and parsnips; early cabbage may give its place to spinach. By rotating crops in this way it is possible to have a gratifying variety of fresh vegetables for the table.

The time for planting the garden depends, of course, on the date when the last frost makes its appearance. Some vegetable seeds may be sown even before the freezing season is over, radishes, turnips, lettuce, peas, kale, spinach and parsley are all good soldiers when it comes to cold weather, so get them into the soil as early as possible.

A little later, in fact when you are quite sure that last night's frost was the last of the season, you may plant early beets, early carrots, chard and onion seed. But do not put bush beans, or corn into the ground until all danger of frost is over. Then later still when the soil has had time to become warm and mellow, you may sow tomato, egg plants, peppers, cucumbers, squash and melons.

FORMER OFFICERS ARE REELECTED AT ANNUAL SCOUT MEET THURSDAY

The annual meeting of Boy Scout leaders from fourteen communities in eastern New Mexico closed with a banquet at Roswell Thursday night.

Lloyd O'Neal, deputy regional scout executive of Dallas, Texas, was the principal speaker at the banquet and outlined briefly the growth of the scout movement in this section.

All former area officers were re-elected including E. B. Harrison of Carlsbad, president; A. W. Hocken-hull, Clovis, vice-president; C. G. Mason, Hagerman, secretary; Geo. B. Jewett, Roswell, secretary.

At this time Minor Huffman of Roswell, area scout executive made the following annual report: 135,000 miles traveled between towns; 164 troop visits made; 31 court of honors attended; 26 district meetings;

16 rally and field meets; 24 sessions of leaders training, conducted; 32 civic clubs attended.

Under the caption "Advancement," Mr. Huffman says the following badges were awarded: 291 tenderfoot, 151 second class, 68 first class, 398 merit badges, 20 star, 15 life, 4 eagle, 2 bronze palms. Under membership, Mr. Huffman states that the area has 40 troops, 709 scouts, 40 scout masters, 25 assistant, 186 councilmen, 70 members of wolf clubs, total membership 1,030.

BILL FOR ADDITIONAL JUDGE PASSES HOUSE

The house of representatives at Santa Fe Tuesday passed a committee substitute bill to administration measure HB 104 creating an additional judge in the fifth judicial district by a vote of 48 to 1. Representative Patton argued that the bill was necessary to take care of the many criminal cases that have arisen in the district. Representative J. D. Lamb argued against passage on the grounds of economy.

MELBA DEAD

MELBOURNE, Australia—Dame Nellie Melba, who in 1902 persuaded the London opera house to give Caruso a trial, died here Monday after an illness of several weeks.

Death came to the opera star, one of the world's great sopranos, in her sixty-sixth year after an illness which befell her while in Cairo, Egypt, and for which she consulted specialists in Germany, Austria and France and England without success.

Homeward bound to her native Australia, she became seriously ill aboard the line Cathay, November 4, before the ship docked at Freemantle and doctors would not permit her to land. When the Cathay touched Melbourne she was taken ashore to a hospital and since that time has hovered between life and death.

Verdi coached her in the part of Gilda in "Rigoletto." She helped Puccini create the role of Mimi in "La Boheme."

She created roles in operas by Gounod, Mascagni, Leoncavallo, Saint Saens, Samboise, Thomas and Massenet.

Among the celebrated singers with

whom she was associated were Enrico Caruso and Jean de Reske. Sarah Bernhardt, Duessa and Ellen Terry were coaches in acting.

MAY SHELVE PROHIBITION

The prohibition referendum in New Mexico senate at a position akin to an orphaned child left step of the Old Woman in a Shoe.

That the measure would be shelved by the senate is a possibility on expressions of belief in repeal or modification of individual senators, is but what to do with it is a problem which has been figuring.

U. S. TAKES STEPS TO AID PRISON HEALTH

Plan Close Scrutiny of Penal Institutions.

Washington, D. C.—What is believed to be the most extensive effort ever made to apply the latest approved findings of modern medical science to treatment of both human physical and mental ills is being undertaken this year by the United States public health service in the federal penal institutions.

Under authority of an act of congress signed recently by President Hoover, the health service is gradually taking over supervision of the health and mental problems of the 12,000 men and women prisoners in federal institutions. Prisoners at Leavenworth and Atlanta penitentiaries and at the Alderson (W. Va.) woman's prison have already been placed in charge of health service physicians.

Study Mental Ailments.

Emphasis is placed by the health service program on the mental well-being of prisoners as well as on their purely physical disorders. It is hoped through careful treatment under modern psychiatric methods to restore many prisoners to useful citizenship.

Progress is being made meanwhile on construction of two narcotic farms where drug addicts, comprising one-third of the federal prison population, can be segregated from other prisoners. Selection of a site near Lexington, Ky., has been announced for one of the farms and a second is to be built in the West.

Federal prisoners hereafter will be given a painstaking examination when they are committed to discover their physical condition and also what kinks in their mentality or character are responsible for their having chosen a career of crime. In the case of first offenders, or those who are regarded as promising subjects for treatment, expert psychiatric care will be provided to aid them in rehabilitating themselves.

Plan Outside Aid

The program will not end when the prison door clangs behind the prisoner. In most sections of the country a combined probation and parole officer will be available to aid those

released to overcome the handicap of their prison record.

New probation officers are now being appointed throughout the country under an expanded appropriation of \$175,000 voted by congress at the last session. The Justice department expects to have 51 such officers on duty by November 1. At present there are only 15 probation officers and no parole officers in the federal prison system.

Treatment of prisoners in this way and expansion of the parole system is part of the general federal prison program adopted by Sanford Bates, federal superintendent of prisons. Meanwhile, the government is proceeding with a \$6,000,000 prison-building program expected to aid greatly in relieving present congestion in federal prisons.

BIG BILL WINS

CHICAGO, Illinois — "Big Bill" Thompson, invincible as ever, won his fourth mayoral nomination in the republican primary election Tuesday, defeating by a plurality estimated at 45,000 the crime-battling Judge John H. Lyle.

With less than 800 precincts missing, Chicago's cowboy mayor had corralled 200,343 votes, while Judge Lyle harvested 164,680 and Alderman Arthur F. Albert, leader of anti-administration forces in the city council and a partisan of Senator Charles S. Deneen, trailed with 70,916.

Against Mayor Thompson in the April election will be pitted Anton J. Cermack, commander-in-chief of Cook county democracy, who won his party's nomination hands down. In the few precincts tabulated in the democratic primary Tuesday Cermack had more than sixty votes to every one cast for his single opponent, John B. Devoney.

NO INCREASE IN COAL RATES

A communication from the Pecos Valley Traffic Bureau at Roswell, advises that the petition of the Santa Fe Railroad, asking for an increase on intra-state coal rates to points in the Pecos valley has been withdrawn. The application of the Santa Fe was cancelled on February 20th.

Lane and Zea Pate went Monday.
Jimmie Urton has been ill with pneumonia.
Sharp, of Dexter was a visitor at A. V. Flowers home Sunday.
Ben McLarry and daughter, are visiting relatives in Ar-may.
Oliva Garner of Cottonwood week-end guest of Minnie.
C. R. Bernard substituted as a teacher during the illness of Mrs. Ewing.
intendent C. R. Bernard and are transacting business in Saturday.
Clyde Latta and A. V. were transacting business Saturday.
Dalton and Mr. and Mrs. Wilkins were week-end guests at Rock, Texas.
Bessie Meadows was visiting Mr. and Mrs. John Saturday.
Maggie Lane of Weed, was her parents, Mr. and Mrs. Lane, this week.
Ned Hedges, who has been from sinus trouble is reported to be improving.
Mrs. J. B. Crook who has been at Seven Rivers for some time have moved back to Lake.
Mrs. Oscar Moore of were visiting Mrs. Moore's Mr. and Mrs. A. G. Lane.
Tula Harvey who has been relatives here for some time to her home in Sibly, Iowa.
Juniors of Lake Arthur gave a roast last Wednesday evening. The all reported a most enjoyable time.
Senior B. Y. P. U. plans to special program at the Hag-Baptist church Sunday evening, 6:30.
Lake Arthur high school girls the Dexter girls last Friday. The score was 19-28 of Dexter.
Mrs. Fletcher Campbell returned from a visit in Texas (Mrs. Campbell's mother, who is seriously ill).
Nellie Dee Norris who has been from school for some time because of illness was able to return Monday.

TODAY LAST DAY BILLS MAY BE INTRODUCED IN THE NEW MEX. HOUSE

SANTE FE—The New Mexico legislature adjourned for Washington's birthday, and was not in session Monday. Many of the law-makers went to their homes over the weekend, but a number of the senators took advantage of the holiday to get in some committee work on various bills.
So far this session only seventeen bills have passed both houses. Eleven of these have been passed in the house and six in the senate. Not all, however, have reached the governor as yet.
Up to Monday the house has introduced 232 bills and the senate 94. Of this number the house has killed 32, all its own measures, and the senate has killed 14 senate bills and 11 house bills.
The house has passed 54 measures including the eleven killed in the senate, and the senate has passed 34 of its own bills and 11 house bills.
Thursday will be the last day in which bills may be introduced in the house of representatives and the senate no-more-bills rule goes into effect five days later.

No Place Like Home
A person is hurt every 30 seconds in the American home. The trouble is that is where the jaywalkers, the speed boys, the youngsters who race for crossings, the idiot who takes the wrong side of the street, the daredevils at intersections, the morons on the wheel, the drunk drivers, the aged, the babies that play in the street, the absent-minded, the fellows who race through signals, the near-sighted, the road hogs, the slow pokes, folks who are just learning to drive, the children who are too young to get a license, the careless, the incompetent, the scamp who gets mad, all live.—Los Angeles Times.

Bid for Fame
The late Luther Burbank said one day to a Los Angeles reporter: "Almost any man can succeed if his aim is a good one. Too many men adopt bad aims.
"A long-haired musician rushed into the kitchen and said to his wife: "At last, love, I have fame within my grasp."
"How so?" the poor woman asked, and she looked up at him from the washtub rather skeptically.
"You know Mendelssohn's 'Wedding March'?"
"Yes."
"Well, I'm going to write a 'Divorce March'."

Brittany Druid Stones
Brittany, the "Land of the Sea," is one of the oldest lands in the world, and its Druid stones of colossal size date back thousands of years before the Christian era and, like those at Stonehenge, in England, are visited annually by thousands.
St. Malo, on the coast, has the appearance of a large ship at anchor. It stands on a rocky peninsula and is surrounded by massive walls which were built in the sixteenth century as a defense against the French and the British. The town is named after a Welsh monk named St. Malo, or Maclou, who held a bishopric there in the sixth century.

ANNOUNCE LOW BIDS THIRTEEN EMERGENCY STATE HIGHWAY PROJECTS

Low bids totaling approximately \$932,000 were received by the New Mexico highway commission yesterday on thirteen projects in New Mexico emergency federal aid construction program.
Bid were close and the following figures were low on tabulation. No contracts have been awarded:
Raton to Maxwell Junction; Hamilton and Gleason Company of Denver, \$74,366.50.
Clovis to Portales: Lee Moore Construction Co., El Paso, \$87,483.19.
Gallup project, not ready.
La Bajada Hill project between Santa Fe and Albuquerque: Mountain States Construction Company, \$133,817.29.
Socorro to Mountainair: Everly and Allison, Des Moines, N. M., \$51,515.83.
Socorro to Magdalena: Armstrong and Armstrong of Roswell, \$24,302.47.
Tucumcari to Glenrio: Everly and Allison, \$26,187.36.
Tucumcari to Glenrio (additional work on same project): W. T. McClure, Tucumcari, \$85,687.08.
Portales to Roswell: Armstrong and Armstrong \$139,517.18.
Clovis to Melrose: New Mexico Construction Company \$118,359.60.
Project north of Gallup: E. J. Maloney, Gallup, \$36,492.48.
Wagonmound to Las Vegas: Hamilton and Gleason, \$106,281.
Roswell to Portales project near railroad mountain: Armstrong and Armstrong \$36,523.32.
North of Deming on road to Silver City: S. W. Hill of Artesia, \$11,637.34.

NO DECISION BY STATE ON SANTA FE'S TAX SUIT
Consideration of the state's answer to the Santa Fe Railroad \$900,000 tax suit was still under discussion in the office of Attorney General E. K. Neumann in Santa Fe Tuesday.
Mr. Neumann said there will be no announcements for another day or two.
Summer Boarder: But why are those trees bending over so far?
Farmer: You'd be bendin' over, too, Miss, if you were as full of green apples as those trees are.
We regret to announce that the boxing match arranged for to-day has been canceled, as the two fighters have had a disagreement.—Musketee (Vienna).

The multitude of motorists who have switched to Conoco Germ-Processed Motor Oil know what a great oil it is for summer use. Maybe they are wondering how it will act in cold weather at zero and below. The makers of Conoco know. Better still, thousands of users know, from their experiences of last winter. In Canada, Montana, the Dakotas... in Denver... with temperatures far under zero, Conoco Germ-Processed did not congeal. It remained fluid and continued to furnish efficient lubrication.

This accomplishment is no surprise. Conoco Germ-Processed is easy starting, non-congealing at sub-zero temperatures, because it is a thoroughly de-waxed paraffin base oil. The Penetrative Lubricity of Germ Process makes certain an ever-present lubricating film in your motor, even after long periods of idleness... particularly valuable at starting time, when 40% to 60% of motor wear occurs.

Save this wear on your motor... your battery... your nerves. Drain and refill now with the proper grade of Conoco Germ-Processed oil at the sign of the Conoco Red Triangle. All grades, 35¢ per quart.

Putting Up a Good Front

Whether it's a man or a house, a new coat makes all the difference... Fresh paint, skillfully applied, adds elegance to your home and years to the life of the surface lumber... Have it done NOW while the fine weather lasts.

Kemp Lumber Company

The makers of Conoco know. Better still, thousands of users know, from their experiences of last winter. In Canada, Montana, the Dakotas... in Denver... with temperatures far under zero, Conoco Germ-Processed did not congeal. It remained fluid and continued to furnish efficient lubrication.

This accomplishment is no surprise. Conoco Germ-Processed is easy starting, non-congealing at sub-zero temperatures, because it is a thoroughly de-waxed paraffin base oil. The Penetrative Lubricity of Germ Process makes certain an ever-present lubricating film in your motor, even after long periods of idleness... particularly valuable at starting time, when 40% to 60% of motor wear occurs.

Save this wear on your motor... your battery... your nerves. Drain and refill now with the proper grade of Conoco Germ-Processed oil at the sign of the Conoco Red Triangle. All grades, 35¢ per quart.

CONOCO GERM PROCESSED PARAFFIN BASE MOTOR OIL

Time is on Conoco's Side... On 16 leading stations across the country... a program somewhere every day from Monday to Friday. Your nearest Conoco station will give you a log of stations, days and times. Here is a unique radio program... built upon the preference of the motorists.

THINGS THAT NEVER HAPPEN

MASONS TO ASSEMBLE IN CAVERNS OPENING SESSION ON MARCH 17

The oldest fraternity in the world, will convene during the regular annual communication of the oldest lodge room in the world at Carlsbad, New Mexico, on Tuesday, March 17, when the grand master will assemble the brethren in the "King's Palace" of the Carlsbad Caverns National Park, which geologists estimate to have taken 60,000,000 years in the forming.

The sessions will be a tiled communication of the grand lodge, designer to afford the expression of greetings from the grand masters and brethren of the several jurisdictions who have been invited to attend the proceedings of the great Masonic week.

While the grand lodge is in session, Carlsbad Lodge, U. D. Eastern Star will entertain the visiting ladies in the lunch room, of the Carlsbad Caverns and following both assemblies, the parties will re-unite and proceed on the tour through the Caverns, under the direction of the Thomas Boles superintendent of the Carlsbad Caverns National Park, who is himself a Mason of long standing, being a member of all branches of the order.

All Master Masons and the members of the Eastern Star, will be welcome at this annual communication and Cavern trip, and attendance is expected from all over southwestern America.

The fifty-third annual communication of the grand lodge, Ancient Free and Accepted Masons of New Mexico will be held in Carlsbad beginning Monday, March 16 and continuing through Wednesday.

The Grand Chapter Royal Arch Masons will be in Convocation on Thursday; the Knights Templar on Friday and the Order of the Eastern Star will begin their three-day session on Thursday.

It is expected that the brethren will begin to arrive in Carlsbad Saturday night, and for the reception of these delegates and Masons and the public generally, a grand union service will be held on Sunday evening at the Carlsbad armory, the sermon being delivered by Rev. John P. Sinclair, of Artesia, grand chaplain of the Grand Lodge. This annual sermon will be one of the spiritual events of the session of the grand lodge and will be accorded a large attendance. It is, of course, open to all of the people, regardless of whether they are Masons or not.

The local committees are preparing a complete programme of entertainment for the week, and it is already apparent that there will be a very large attendance. In view of this, and although the hotel capacity of Carlsbad is large, as become a convention city, the suggestion is made to the brethren this early that they write or wire reservations. Of course the homes of the city will be thrown open after the hotels and excellent camps are filled with hundreds of persons they can entertain, but early requests will make comfort certain.

Requests for hotel reservations should be sent to Joseph Wertheim, chairman of that committee.

Bore—You know, I'm funny—I always throw myself into anything I undertake.

Pretty Girl—How splendid! Why don't you dig a well?—Missouri Outlaw.

How about your sport togs? They need frequent cleaning and refinishing to be up to the minute. We can help you make a hole in one by the proper cleaning and pressing—Santa Barbara Paper.

WHY

Nickname of "Hawkeye" Was Given State of Iowa

"Hawkeye" as the nickname for Iowa was first formally proposed by James G. Edwards in the issue of the Fort Madison Patriot dated March 24, 1838. David Rorer, a pioneer lawyer in Des Moines county, claimed to have suggested the cognomen to Edwards. According to Benjamin F. Shambaugh, superintendent of the State Historical society of Iowa, the sobriquet was immediately approved by many prominent Iowans and it was gradually adopted by common consent after it was used in a series of letters printed in the newspapers of the territory in 1839. It is supposed that "Hawkeye" was suggested by the name of the famous Sac and Fox chief, Black Hawk, who led the Black Hawk war of 1832 and who died on the Indian reservation on the Des Moines river in 1838, the year that Edwards proposed the nickname in the Patriot. Edwards himself thought that the adoption of the nickname would "rescue from oblivion a memento, at least, of the name of the old chief (Black Hawk)." Many reference works state that Iowa was given the nickname "Hawkeye" because a famous Indian chief so named was a terror to the early voyagers and traders who visited that region. There is, however, no evidence that Black Hawk or any other Indian chief answering the description was ever known as Hawkeye.—Pathfinder Magazine.

Why Ozone in Upper Air Is Benefit to Mankind

Ozone is queer stuff. Science would like to know more about it. There is much ozone in the atmosphere at high altitudes. In fact, there seems to be a sort of layer of it far aloft, which is exceedingly fortunate for man, inasmuch as it absorbs, and thereby shuts off, most of the ultra-violet rays that come from the sun.

The ultra-violet solar rays are exceedingly healthful for human beings. But there may be too much of a good thing. If all the ultra-violet rays that reach the earth's atmosphere came through the latter, unobstructed, every one would be obliged to wear orange yellow or blue goggles, or perhaps smoked glasses, to escape being blinded.

Ozone is simply oxygen with an extra atom to the molecule. It is an unstable gas, readily breaking up and converting itself into ordinary oxygen.—Exchange.

Why Niagara's Flow Varies

The flow of water at Niagara varies with the height of Lake Erie, which in turn is influenced by rain on the territory drained, direction of wind, and diversions from Lake Michigan at the Chicago drainage canal, diversions through the Welland canal and the New York barge canal. The average flow is placed at 191,000 cubic feet per second. The total diversions average 73,000 cubic feet, or considerably more than one-third the average flow.

Why Scold Is "Xantippe"

To say of any woman that she is a Xantippe is not to flatter her. On the contrary, it is epithet of opprobrium with which few members of the fairer and not always weaker sex care to be identified.

For to be a Xantippe is to be a scold, to be a nuisance, to be a constant complainer, and, as Johnny would phrase it, a "killjoy."

The allusion is to the wife of Socrates—Xantippe—notorious throughout the ancient world for her tartness, her bad temper and her ill-nature.—Kansas City Star.

Gigantic Structure Herodotus estimated that 100,000 men were engaged for 20 years in building the Great pyramid.

Scientist Finds Ancient Idol of Pre-Aztec Era

Mexico, City.—What is alleged to be the largest idol ever found in America was discovered recently near Teacoco, 40 miles from Mexico City, by a Hindu archeologist, Pandurang Khankhoje. It is 3 feet high and is supposed to date back to pre-Aztec times.

Its existence is said to have been known in the days of Porfirio Diaz, president of Mexico in 1877-80, and again in 1884-1911, although no books mentioned it.

The stone idol represents the Goddess of Water and is called Chalcutlique. It has a thickness of 20 feet and is fantastically carved. Traces of the original green paint which ornamented the head are still visible.

The ancient image will probably have to lie in the deep ditch where it was found because it would be necessary to build a railroad to haul it out.

Woman Builds Shrine That Attracts Tourists

Canton, Ohio.—Mrs. Joseph Naegelen spent several weeks of hard labor building, with her own hands, a miniature shrine of Our Lady of Lourdes. Hundreds of persons from many parts of the state now make pilgrimages to her shrine. Mrs. Naegelen's shrine is a place of beauty. Flowers bloom in a profusion of colors around it and small granite stones decorate the backyard in artistic design.

Yes, Sir, This Must Be Ye Perfect Humbug!

Cambridge, England.—Mark Webb, bacteriologist, told students that two youths who had grafted the head of a bee on a beetle afterward maintained they had evolved the perfect humbug.

Knife User Bitten, Opponent Wounded

San Francisco.—Attacks committed on each other by two sent both to the hospital.

Julio Heredia was treated at the Harbor Emergency for a badly lacerated ear. He said George Rogas had bitten it. Rogas was treated for a knife wound on the thigh, which he said Heredia made. They had been drinking, police reported.

FEDERAL GAME EXPERTS

Federal game experts last week completed a survey of the Guadalupe mountain section in southern Eddy county. The survey was conducted by M. E. Musgrave, game specialist of the forest service and R. D. Morris, range examiner. These men pronounce the Guadalupe sections one of the best refuges for mountain sheep in this section of the country. Recommendations were made to rid this area of lions and eagles, the

natural enemy of mountain sheep, since in no section of the country are mountain sheep plentiful.

One of the most interesting things the experts found is that both deer and antelope eat juniper at all times of the year and a deer killed in the Guadalupe forest contained some 75 per cent juniper berries and twigs. The stomach contents was given to the State College at Las Cruces. By selecting stomachs of animals on the different ranges at the various seasons of the year,

these experts soon hope to tell what kind of a range is best suited for

The girl, lonely and was leaning against the hostess took pity "My dear," she said just like an old Rembrandt. "Well," was the retort, "look any too darned self!"—Exchange.

CAPITOL SNAPS

By Fred Holmes,
Our Washington Correspondent

Nearly three score house members who were defeated last November have an opportunity to abolish the "lame-duck" sessions of congress. This is the session which convenes in December after the November elections and continues until March 4. Defeated congressmen retain their seats in it under the present law. The opportunity will come when the house takes up the Gifford resolution proposing a change by constitutional amendment. The votes of those re-elected and voluntarily retiring will figure largely as the determining factor in the contro- versy that has raged for years. How- ever, the votes of defeated members will not be negligible.

Undesirable aliens will be deported from the United States and a few immigrants will be admitted for two years if pending legislation is enacted at this session. The administra- tion drive to rid the country of un- desirable aliens has advanced a step. President Hoover received a bill to deport aliens convicted of smuggling narcotics, which passed congress last week. His approval is expected. Favorable action on the Chief Execu- tive's request for \$500,000 to employ 245 patrolmen to accelerate deporta- tion of undesirables has been indicat- ed by the house appropriations com- mittee.

Chairman Legge of the farm board is to go back to his old job in March. Selling harvest machines is much easier than selling harvests. He will be missed. His stormy bluntness and frankness must have earned a sort of liking for him even among the enemies he has made. He has done the best he could for the farmers. They are not grateful. They won't take his advice to reduce their acreage. After all, that is per- haps the chief fruit of his labors. It could be had, one would think, for less than \$400,000,000; and \$100,000,000 more is about to be dumped into the pot. But that is an unjust way of putting it. This is the price which the United States has chosen to pay for a certain amount of ex- perience.

Directing their fire at John J. Raskob, chairman of the democratic national committee, and Jouett Shouse, head of the executive com- mittee, southern democrats, led by Senators Sheppard of Texas and Morrison of North Carolina, in a sharp debate on prohibition in the senate served notice on the leaders of their party that they would com- bat any attempt of the wets to domi- nate the national convention in 1932. When the two-hour skirmish was over the senate, without a roll call, adopted a resolution by Senator Ty- dings, wet democrat, of Maryland, requesting the Wickersham commit- tee to give to the senate all testi- mony it had taken concerning pro- hibition, except that received under the pledge of secrecy and all the reports of its investigation of pro- hibition. The only comment on the resolution was a statement by Sena- tor Borah that he favored it.

A third member of the federal farm board, is was learned definitely, is quitting in the near future. C. C. Teague, commissioner for fruits and vegetables, who had indicated he ex- pected to retire, announced he would resign from the board, effective June 1, and return to his private business in California. He is manager of the California Fruit Growers and Wal- nut Growers Co-operatives and is himself a fruit grower on a large scale. His decision follows announce- ments the last few days by Alexand- er Legge, of Chicago, chairman of the board, and Sam R. McKelvie, of Nebraska, member for grains, that they would leave their Federal posts March 4 and June 14, respectively. Legge is expected to go back to the presidency of the International Har- vester Company with its \$100,000 salary, and McKelvie to the active direction of his farm publications.

The passage of the bonus bill by overwhelming majorities surprises no one. It is merely another indica- tion of what a determined and well organized minority always can do in American politics when no equally efficient group is in opposition. Un- less such an opposition group is formed, the only course for those opposed to payments to veterans is to retreat inch by inch, making the retreat as slow as possible and op- posing every gain by the veterans'

EGGS OF GREAT VALUE IN DIET

An estimate of the value of eggs in the diet is based on two sets of facts according to the bureau of home economics of the U. S. Department of Agriculture. These are facts regarding their nutritive im- portance, and facts concerned with their adaptability to cookery pro- cesses. The extent of their use depends partly on such values, partly on their flavor and partly on their cost.

The physical properties of eggs make them useful in giving lightness and bulk to such cooked products as sponge cakes, meringues, omelets and certain desserts, and in giving the characteristic consistency to mayon- naise.

From the standpoint of nutrition, the egg is really two foods instead of one. The white part of the egg is almost a pure watery solution of certain proteins of high biological value for body-building and main- tenance. The yolk, on the other hand, contains many well-recognized food substances. It furnishes concentra- ted fuel for the body, contain pro- tein of fine quality and has an un- usually rich store of the minerals and vitamins necessary for growth and development, and for the main- tenance of health and vigor. Every 100-calorie portion of egg is about three and one-half times as rich in protein, twice as rich in calcium, three times as rich in phosphorus, and four times as rich in iron as we believe the average 100-calorie por- tion of food for the adult need be. Moreover, these nutrients are in forms especially adapted for con- version into bodily tissues—a fact which makes the food value of the egg much greater than mere enu- meration of these nutrients would indicate. The egg yolk is also rich in the fat soluble vitamins.

An egg a day for children over two years old is suggested for the formation of good red blood. For younger children smaller amounts of the yolk may be given with bene- fit.

V. B. MAY, Register.

organizations. That they will con- tinue to gain, if their organization remains as efficient as it now is, is hard to doubt. The present diffuse and unorganized opposition can only effect the rate at which the gains are made.

Senator Cole Blease, of South Car- olina, who failed to make the grade for re-nomination last year, has quit the capitol cold, without waiting for the expiration of his term. There is something odd and inconsistent about this departure of the verbose states- man who breezed into Washington six years ago. Apparently his col- leagues did not have a chance to bid him farewell. He disappeared quick- ly, even mysteriously, and with only a card on his office door to fur- nish a clue to the fact that he had gone home. That was unlike Mr. Blease, but perhaps he wished to spare his colleagues the pain of any public leave-taking. However this may be, nothing in the senatorial career of the gentleman from South Carolina becomes him more than the manner of his departure.

Senator Vandenberg has made a concise argument in favor of the bonus legislation in which he en- deavors to show that the bill passed by the house extends only a relative- ly small new privilege to the veter- ans and imposes only a moderate burden upon the treasury. The whole argument rests on a guess. The bill makes the government liable for a billion dollars. Senator Vandenberg thinks it will have to provide only \$430,000,000 in cash. Nobody can know for certain.

BIG WELL ON OASIS RANCH

One of the largest artesian wells in the southwest was brought in Thursday on the Oasis ranch, 12 miles southeast of Roswell.

The well was officially gauged at 9,225 gallons a minute, or 553,500 gallons an hour. It is estimated that the output a day would reach 13,294,000 gallons. The well, which will be used for irrigation purposes, is 840 feet deep and is producing water of the highest quality.

The former record well was drilled

on the Oasis ranch several years ago and came in with an initial flow of 6,600 gallons a minute from a depth of 780 feet.

The present well throws a stream of water 50 feet into the air from a six inch nipple attached to a 12¼ inch casing.

Hebrew Money

The monetary system of the He- brews was based upon the Babylonian system of weights. The ratio of the value of gold to silver was 1:18 1-8 and prevailed over all western Asia.

Fireplace Cheer--

Without Fireplace Troubles

With a Natural Gas Radiant Heater you have warm glowing heat by turn- ing a valve and striking a match. These heaters can be installed in a fireplace, or simply set against a wall. You have no wood to carry in, no messing with ashes, no smoke or soot . . . just heat as clean as the sun's rays. Your appliance dealer will show you radiant heaters at a wide range of prices.

IMMENSE BELLS IN RUSSIA AND CHINA

Russia possesses the largest church bell in the world.

Some authorities declare that this bell, known as the Czar bell, when cast in the days of Boris Godunoff weighed 135 tons. Others claim it weighed 198 tons. Its size can be imagined if one considers the statement by H. M. Grove in a book on Moscow that the bell itself has done service as a chapel.

Grove recounts that the bell was recast in the middle of the Seventeenth century and raised into its belfry. It had only been there two years when fire destroyed the belfry and the bell crashed to the ground and was broken. There it lay until 1735 when Empress Anna ordered it to be recast on the spot.

Two years later the scaffold for raising the bell caught fire, the bell became almost red hot, and the tremendous amount of water used to extinguish the fire cracked the bell and a large piece fell out. It was then left on the ground until 1836 when Emperor Nicholas I had it raised and placed on a granite pedestal where, for a long time, it was used as a chapel, the broken side serving as the door.

According to reference books the world's largest bell ever actually in use is also in Russia. It is said to weigh 128 tons—nearly two and a half times the weight of the next largest bell, in Peking.

How to Press Flowers to Get Best Results

Before mounting flowers they should be thoroughly pressed and dried. This may be accomplished by placing them between absorbent paper, such as blotting, covering each layer with another sheet of paper and placing some heavy books on top to press them well. Ironing with a hot iron hastens the drying but spoils the color and is not advised. The blotting paper must be changed every day until the flowers are dry. Flowers may also be preserved for a time by dipping them in candle wax or paraffin. The wax should be melted, not too hot, and the flowers dipped for a moment. The petals are covered with a thin film of wax which is transparent and prevents withering. If properly done the flowers will last about two months, preserving the scent also.

WHY

There Can Be Months Without a Full Moon.

Moonless month is the name popularly given to a month in which no full moon falls, says an article in Pathfinder Magazine. Under our present calendar February is the only month that is shorter than the lunar cycle and consequently it is the only month which can have fewer than four moon phases. The missing phase, however, need not necessarily be the full moon, but may be any one of the four. Likewise five phases of the moon occasionally fall in the other months.

The average time from one full moon to another is 29½ days, and the time from one phase to another varies from less than seven days to more than eight. About every six years February has only three moon phases; it is, of course, without a full moon much less frequently. In 1866 February had no full moon, while the preceding January and the following March had two full moons each.

This remarkable sequence, astronomers estimated, will not occur again for 2,500,000 years. February was without a full moon in 1885 and 1915, and from approximate computations made by the Naval observatory there will be no full moon in February 1934 and 1961. Februaries without new moons or either of the other two phases occur at about the same intervals, but, of course, in different years.

Why Moon Is Kept From Obeying Law of Gravity

Two forces, working in opposite directions, neutralize each other and determine the orbit of the moon. Like any other moving body the moon tends to follow a straight flight path. If the gravitational pull of the earth were suddenly annihilated the moon would move away on a straight line tangent to its flight path at the instant of release. The earth is continuously pulling the moon in from this tangent path which it tries to follow. If the speed of the moon were reduced it would move in closer to the earth. Mere motion of an object does not overcome gravity. For instance a bullet fired from a horizontal gun will start to fall immediately and will fall at precisely the same rate as another bullet of the same size and weight dropped from the hand at the same elevation. But the force which moves the moon is working against gravity and it depends on speed.—Pathfinder Magazine.

Why Drive Nails Into Trees

A query which comes to my desk asking what to do for pear trees which blossom and do not mature fruit and where the color of leaves is dull, calls to mind that years ago when a small boy my father sent me to the garden to drive some nails into one of the pear trees there to meet the same condition, and it proved successful.

Those nails as they rusted supplied the iron which was deficient in the soil. I am reminded of this in reading that one of our scientists advises putting iron salts in holes bored into pear trees where the leaves are dull in color and the trees show lack of vitality.

This has been the practice for generations in Europe. Bring a fruit tree into healthy condition and it will produce fruit provided the blossoms are fertilized.—Portland Press-Herald.

Why Sunset Is Brilliant

The Naval observatory says sunset colors are caused by the excess of rays of long wave-length, red and orange chiefly, which pass more readily over the long path through the dense lower strata of the atmosphere, which must be traversed at sunset, than the short wave-length blue and violet rays, which are obstructed not only by the atmosphere, but also by dust particles and impurities suspended in it. The finest sunset colors are produced when there is the greatest amount of dust and impurities in the air through which the sunlight passes. No sunsets are perfectly colorless.

Why Insect Pests Flourish

Whence came our present insect pests? Most of them came from foreign countries. And they come here without their natural enemies. In this way the balance is disturbed, wholly in favor of the insect. An insect in his home land is often so harmless and obscure that his presence is not even noted. This is because his natural enemies keep him in his place. But transplant this little bug to America, give him plenty of rich food and no enemies, and he will show what the biological laws of reproduction mean.

Airplane Saves Life of Strangling Baby

Alameda, Calif.—A two-mile-a-minute airplane flight from Reno to the San Francisco bay airrome here was credited with saving the life of two-year-old Henry Baker.

The boy swallowed a button while playing at the Reno home of his parents, Mr. and Mrs. Herman Baker. To prevent strangulation, doctors said an immediate operation was necessary. When the plane, piloted by Frank Cochran, landed here, the boy was taken to Lane hospital, where the operation was successful.

H. MILLER TRANSFERRED TO THE PEOPLES MERC. GROCERY AT CARLSBAD

Harold Miller and family left this morning for Carlsbad where Mr. Miller will be manager of the grocery department of the Peoples' Mercantile Co., store.

Hagerman residents are very sorry to lose these splendid citizens, who have contributed much to the upbuilding of the community. Harold Miller has lived in Hagerman during his entire life, and has been active since manhood in various civic and social capacities.

He has served faithfully as a member of the Masonic lodge, has acted as troop committeeman of the Hagerman Boy Scout Troop, and has served on the school and town boards. At present, Mr. Miller is secretary of the school board. During the early part of his life, he worked in the grocery store operated by his father, the late Robert Miller. Of late years, he has been manager of the grocery department of the local Peoples' Mercantile Co., Store.

Carlsbad gains an efficient and conscientious citizen in Mr. Miller and worthy residents in the family.

HORSES FOR SOAP

Dane Holliday and "Tuffy" Welch delivered 100 head of range horses to the El Paso Soap factory last week.—Current Argus.

Mother: "Darling, that is the old church in which Daddy and I were married."

Small Son: "Who took care of me that day, Mother?"

Grandma—"Doesn't the little boy swear terribly?"

Grandson—"Yes'm, he sure does. He doesn't put any expression in it at all.—Knok County, (Ill.) Bulletin.

McGinty: "I've a terrible corn on the bottom of my foot."

Pat: "That's a fine place to have it. Nobody can step on it, but you."

"I surely like to take nice experienced girls home."

"Why, I'm no experienced girl."

"No, and you ain't home yet."

College Man: "Pardon me, this must be the wrong berth."

Miss Hasbeen (sighing): "How you boys do jump at conclusions."

LOCALS

The building next door to The Messenger office owned by W. E. Bowen is being remodeled and re-roofed. W. F. Waldrop is doing the work.

Mr. and Mrs. John E. Hall and little daughter, Jeanne, of Carrizozo, were Hagerman visitors over the week end. Mr. Hall is a brother to Rev. Bryan Hall.

Arthur Robinson, who has been in California for six months, returned the last of the week. Robinson reports conditions in California as being very bad.

Mr. and Mrs. Ralph Taylor, of Goose Creek, Texas, visited in the R. Jennings home the latter part of the week. Miss Jennie Falkner, of Dexter accompanied them to their home.

Mr. and Mrs. John Campbell, Mr. and Mrs. R. G. Campbell and family and F. B. Campbell of Lake Arthur, who have been in Cisco, Texas three weeks at the bedside of Grandmother Campbell, returned Tuesday afternoon. Mrs. Campbell is very low.

Basil Barnett, of State College accompanied Mr. and Mrs. Cecil Barnett to El Paso, Monday where he expected to undergo an operation for the removal of a rifle bullet from his knee. The bullet had been embedded in the flesh for several years.

S. E. Hamill reports that his business at Roswell is very good. In fact, he was one business man in Roswell that we met Tuesday who was pleased with business conditions in his locality. We are glad that Hamill is getting along well and hope that he gets rich.

Mr. and Mrs. C. H. Barnett and son, Norman, of El Paso, visited in Hagerman Sunday with the Barnett and Bowen families. Cecil is now employed by the American Telephone Company and has his headquarters at El Paso. He was formerly a teacher in Hagerman high school.

"Poor old Bill! 'E's so short sighted 'e's workin' himself to death."

"What's 'is short sight got to do with it?"

"Well, 'e can't see when the boss ain't lookin' so 'e 'as to keep shovelin' all the time."
