VOLUME THIRTY-THREE

HAGERMAN, CHAVES COUNTY, NEW MEXICO, THURSDAY, FEBRUARY 8, 1934

NUMBER 6

THOUSANDS INJURED RIOTS IN FRANCE FASCISM RAMPANT

PARIS, France—Scores were killed—including two Americans—in a renewed outburst of rioting in the heart of Paris last night when laid waste blocks of the streets.

Fascism and guerrilla warfare left the Boulevard des Capucines strewn with glass from shattered shop windows and lighted the fires of burning blocks. Champs Elysees, the Rue de la Paix and streets leading to the presidential palace all bore marks of the insurrectionary disorders.

President Daladier stepped out as a result of Tuesday's fighting, and President Daladier immediately called a 24-hour general strike in honor of the 70-year-old Gaston Doumergue to save the precarious situation.

The French labor federation, the CGT, granted at the turn of events a 24-hour general strike on Monday in protest against the "space of fascism."

Jobs Tuesday night seemed a resentment over the government's alleged part in the Stavisky scandal and economic local and social stress, but the observed disorders yesterday were inspired by contempt for officers' gunfire which was Tuesday night took a toll of 200 lives.

Communists went on a rampage near the American section was led by the Place de L'Etoile, where A. Heddinger's unknown soldier lies, a cut electric and telephone lines.

Rioting continued after the fall in widely separated sections of the capital. The heaviest fighting occurred in the presidential palace and wide boulevards around the opera house.

Meanwhile, there were threats of grave disorders by the forces. Socialists announced they planned in a huge demonstration against "fascist threat to liberty." They demanded the resignation of the Daladier government as a desertion and a surrender to reactionaries.

They sought communist support in the general strike Monday and asked the confederation to announce the date of that manifestation. Fear was expressed that the government would be overthrown.

BOY SCOUTS

Boy Scouts met at the Scout camp last night and had a round games and instruction in Scout work. They have planned a hike next Saturday. Albert Ridgley taking an active interest in the job and is helping in its work.

Friends of Mr. and Mrs. Fred Clark of Aspermont, Texas, will be interested to read the announcement that a son was born them January 28th. Mrs. Clark will be remembered as Miss Ernest Langeneger and Fred is another to John Clark.

BANKHEAD BILL IS SENT TO WHITE HOUSE

WASHINGTON—Officials of the farm administration have sent to the White House a proposed amendment to the farm act which, if adopted, would in effect allow the administration to license producers—a rigid form of compulsion. Coincidentally, the senate agriculture committee Tuesday took another step toward compulsion by agreeing to report the Bankhead cotton bill after amending to place a tax of 12 cents a hundred on cotton ginned this year in excess of 9,000,000 bales.

The proposed amendment to the farm act would allow the farm administration to enter directly into marketing agreements with producers. If these facts are to be made effective, the administration would have to be given authority to bind non-cooperators to observe their terms.

The amendment, however, if the amending power is included in it, would give the farm administration a weapon it could use if non-cooperators threatened to wreck one of their major voluntary reduction plans.

The feeling that those farmers who refused to sign a cotton production control agreement would increase acreage and defeat attempts to reduce the surplus of the staple was one of the reasons for the Bankhead bill.

NEW MAN ON I. C. C.

Walter M. W. Splawn, former president of the University of Texas, who was nominated by President Roosevelt to be a member of the Interstate Commerce commission, to fill the vacancy created when the term of Ezra Brainerd expired.

THE OIL OUTLOOK IS VERY PROMISING

Oil activity in southeastern New Mexico continues to be more or less routine, but with a more optimistic spirit prevailing among the operators. Prospects of major production in the Jal area in southeastern Lea county will likely make necessary a revision of the state's allowable which is now 41,200 barrels daily. Operators are hopeful that conditions will improve sufficiently to justify a raise in the allowable. C. J. Dexter, chairman of the New Mexico production committee, said yesterday a meeting with Frank Wesley, land commissioner; E. H. Wells, state geologist, and the various producers in Eddy and Lea counties would be called here probably the latter part of the month.

Two new locations were announced the past week, both in Eddy county. These include: Pecos Valley Gas Co., No. 2 Mesa State, NW sec. 4-19-28, and Van Welch, Jr., No. 2 State, NW sec. 22-17-28.

Activity in Eddy county includes the Burch No. 5 of the Grayburg Oil Co., SWNE sec. 19-17-30, re-cementing ten inch casing at 483 feet. Compton Oil Co., State No. 6, sec. 15-16-23, shut down at 952 feet. Spearow et al, McIntyre No. 1, sec. 35-23-25, straight reaming to 2812 feet. Spearow et al, McClelland No. 1, sec. 22-22-23, cemented 8 1/4 inch casing at 2207 feet. The well has drilled to a total depth of 4865 feet.

In Lea county, E. B. Guess et al, sec. 12-25-36, in the Jal district has cemented 4 1/4 inch casing at 3337 feet. In the same area, Barnsdall Oil Corp., Forest No. 1, sec. 24-25-36, is moving in. The Humble Oil and Refining Co., Lindley No. 4-A, sec. 24-25-36, shut down at 3010 feet to run casing to 2890 feet. Noble Drilling Co., State No. 1, sec. 24-18-37, is rigging rotary. Texas Company, Lee No. 1, sec. 14-20-34, is shut down at 50 feet. Texas Company, State A-4, sec. 2-21-33, drilling below 3660 feet. Texas Company, Lynch No. B-2, sec. 27-20-34, drilling below 1600 feet. Texas Company, Moberly No. 2, sec. 8-26-37, is drilling below 1400 feet.

The Texas Company is deepening one of its earlier wells, the Shepherd B-2, sec. 5-26-27. The test is flowing 140 barrels of oil with about 75 barrels of water from 3268-78 feet. Drilling is under way below 3335.

THE FEDERAL CROP LOANS AVAILABLE TO FARMERS SOON

The federal crop loans will soon be available to farmers of this district, G. V. Clayton, field inspector, announced here yesterday. The Jones bill now pending before congress provides the sum of \$35,000,000 for loans this year, which in addition to the loan repayments will give the fund more money than was available last year. Mr. Clayton, who has recently returned from the northern part of the state, states that loan repayments in northern New Mexico are profusing at a satisfactory rate. Farmers in that section are just beginning to realize an income from last year's crop. About a half million pounds of beans are still in storage.

The percentage of loan repayments over the state now averages about seventy-five per cent.

FARM LOAN LIMIT IS RAISED FROM \$5,000 TO \$7,500

Dr. A. D. Crile of Roswell, correspondent for the Federal Land Bank at Wichita, received word Tuesday afternoon that the limit on the amount of federal farm loans under the emergency act for the Pecos valley had been raised from \$5,000 to \$7,500 per person.

Ten applications from the valley for federal farm loans have been approved subject to abstract showing title to the property. The amount of these ten applications total about \$35,000 he said. These applications were in the first group of appraisals made by Mr. Guy, appraiser for the Federal Land Bank. He has since made appraisals on another group of farms on which applications for loans were filed. Twenty-six appraisals have been made in all.

CLEAR OF THE TRESPASSING CHARGE

Three Cottonwood residents, I. H. Burgess, Glenn O'Bannon and Monroe Howard, who were charged with trespassing on posted property during the deer hunting season by Oliver Lee, deputy game warden, came clear of the charge last week at Alamogordo before Judge N. C. Frenger in the Otero district court. In the case tried without a jury, Judge Frenger ruled that no person had the right to post lands belonging to the public domain, to the state, lands in receivership or where lands were under contract, it was understood here.

The three men who were hunting in the Oliver Lee pasture last fall were arrested by Lee and taken to Alamogordo and arraigned before the justice of the peace court, where they were found guilty as charged.

PIECE OF PRESIDENT'S BIRTHDAY CAKE COMES TO HAGERMAN

Mrs. A. M. Hedges received a piece of President Roosevelt's birthday cake from her grandson, Charles Walden, who is a page in the White House.

Charles said that the president called the boys together, shook hands with them and gave each a piece of the fruit cake which had been used at his party.

Mrs. Hedges brought the editor a piece of the cake and it was almost as good as the editor's wife will make once in a blue moon, when she gets the inspiration.

DOW APPOINTED

Robert C. Dow, Lovington attorney and former democratic nominee for governor, has accepted a position in Washington as an attorney for a labor board, according to word reaching here.

GENERAL NEWS BRIEFS

College Cut Restored

WASHINGTON—Representative White, democrat, Idaho, said Sunday that the 25 per cent cut in the appropriations for land grant colleges and experimental and extension work would be rescinded.

The cut recommended in the budget presented to congress by the president for 1935 amounted to \$3,984,524 and was taken from the college fund, experimental stations, and the cooperative extension work in agriculture and home economics. The usual appropriation was \$15,618,096 while the amount proposed for 1935 was \$11,633,572.

The sums regularly allotted under appropriations from congress and the total amounts used in western states for the land grant colleges, experimental stations and cooperative extensions follow:

Colorado, total fund \$187,344.70; federal allotment \$124,062.17; New Mexico, total fund \$154,757.88; federal allotment \$91,394.94.

State Deposit Insurance High WASHINGTON—More than one third of the nation's \$42,460,253,890 bank deposits are guaranteed by the deposit insurance corporation.

E. G. Bennett, corporation director, Saturday gave the exact amount of insured deposits at \$15,345,832,955, or 36.1 per cent of total deposits.

These deposits, he said, were held in 13,454 insured banks and extended to \$4,250,240 deposits.

Maine led other states in the ratio of insured to total deposits with 62 per cent. New Mexico was second with 60.7.

In New Mexico 66,020 deposits are insured for a total of \$13,497,375.

E. V. Sweatt of Malaga was a visitor here Tuesday on business and visiting with friends.

A GHOST!

A ghost has made his appearance in the town of Hagerman.

A group of boys working at the morgue yesterday morning were startled at moans and wails coming, apparently from within the building.

In terror, they ran for neighbors to help put to flight the spook.

Investigation disclosed that a tom cat had managed somehow to get his tail caught in a manner that was bringing him misery that he found it necessary to summon help. But the boys were so frightened that the poor old cat would have died of old age before they became able to assist him.

CANTRELL IS BOUND OVER TO ACTION OF THE FEDERAL COURT

Perry Cantrell, Artesia resident, plead guilty Friday of using the mails to extort \$250.00 from E. A. Paton, Artesia oil man, after Cantrell was faced with H. M. Land, postal inspector of Clovis. Cantrell was trapped here on the night of January 31st, when he went to the Baptist church lawn to get \$250.00 planted there in answer to his demand on threat of Mr. Paton's life and of kidnapping his twelve-year-old daughter, Mary. Cantrell is alleged to have previously confessed to Sheriff Walter McDonald that he wrote the two notes to Paton because of hunger. Cantrell is also said to have confessed he alone was responsible for the two threatening notes, one found on the Paton back porch and one sent through the mail.

Cantrell was bound over to the action of the Federal grand jury under a \$4,000 bond, which he failed to make. He was lodged in the Eddy county jail at Carlsbad after his arraignment before S. W. Gilbert of Artesia at Carlsbad. This case will likely come before the federal court at Albuquerque, the date of the case has not been set.

While Cantrell has said he alone was responsible for the two notes and officers at Carlsbad have intimated they will investigate no further, some of those in close touch with the case in Artesia have expressed a belief that Cantrell had help in his extortion efforts.

Cantrell is being held under the federal act, passed in July, 1932, after the Lindbergh kidnaping which provides a maximum penalty of a \$5,000 fine and twenty years imprisonment. He will likely be tried some time this month, according to S. W. Gilbert, United States Commissioner.

BIG BASKETBALL GAME SCHEDULED FOR TUESDAY

Hagerman Independents, so far undefeated this season, will meet the Chicago Collegians, a strong eastern team which has performed in the valley already this year, on the Hagerman floor next Tuesday night at eight o'clock.

Last Thursday night the locals defeated Amoret's Fender Fixers in Roswell for the second time and established an enviable reputation for fast, hard players. Score on that game was 38-27.

CAVERN TRAVEL HEAVY

Cavern travel during the past January was the heaviest on record for any January with a total of 1,864 visitors from forty-one states and seven foreign countries. The nearest corresponding period was in January 1932 when 1,775 people went thru the caverns.

PROMOTER IS HELD

Philip H. Philbin, California promoter who made a \$600,000 "killing" in the stock of the Atlas Tack corporation just before it collapsed on December 16, was arrested in New York by order of Deputy Attorney General Ambrose V. McCall, in charge of the state's investigation, when Philbin failed to account for checks totaling \$404,000 which passed through his hands.

TULAROSA COWBOY HELD FOR MURDER

Injuries received when he was ridden down by the horse of an allegedly crazed cowboy he was attempting to arrest Sunday afternoon caused the death of Deputy Sheriff James F. Haynes of Tularosa.

Witnesses said the cowboy, Jim King, about 20, who lives about 12 miles east of Tularosa, attempted to ride down several women on Main street. It was then that Haynes attempted to arrest him.

Knocked to the ground and trampled, Haynes suffered concussion of the brain. He was carried into a hotel, and died there about an hour afterward. A physician was attending him.

Night Marshal Robert Scoggins was called and captured the rider with the help of volunteers. King was either drunk or doped, witnesses declared. He had to be overpowered and handcuffed.

Feeling ran high after the deputy died and King was removed to the county jail at Alamogordo as a precaution.

Haynes was a veteran peace officer in Otero county. He has served as town marshal of Tularosa. He was 68 years old, and a widower, but had several grown children, among them James Haynes, Jr., foreman of the Hereford ranch at Three Rivers, and Mrs. John Carroll of Alamogordo. Sheriff W. A. Danley placed King in a separate cell at Alamogordo.

CEMETERY ASSOCIATION

The Cemetery Association met at the home of Mrs. Jim Williamson Thursday afternoon at which time plans were made for replacing the evergreen trees which were destroyed by last year's freeze.

The association has decided to replace the trees with red cedar. Anyone interested in helping the Cemetery Association place these trees is asked to notify the secretary. If everyone would plant trees on his own lot, it would help distribute the burden more evenly.

DROUGHT SERIOUS IN MANY PARTS OF THE STATE AT PRESENT

A drought condition has arisen spread over the larger part of New Mexico and is becoming serious in the southern counties, it was disclosed at Albuquerque Wednesday by E. L. Hardy, federal meteorologist.

The unusually mild winter and accompanying lack of precipitation has already dried some wells and supplies of stock water in some parts of the state, especially in the southern part, Hardy said.

Eastern counties are also beginning to suffer and abnormal precipitation will be necessary to restore ranges where cattle now are wintering.

The period including November, December and January has been the driest for some years all over the state, said Hardy, and the great shortage of snowfall may break a record. Data on the condition is being prepared by the weather bureau.

One year ago today, February 8th, was the coldest weather experienced by the Hagerman section when the thermometer dropped to 35 below zero.

THREE OUT OF TOWN SPEAKERS ADDRESS MEN'S CLUB TUESDAY

The Hagerman Men's Club held one of its most successful meetings of the year last Tuesday night in the domestic arts room of the high school, with the girls in Miss Peggy Harrison's domestic arts class serving.

After the luncheon, Miss Frances Welborne played a piano number, and Mrs. Ramon Welborne played "Through the Canebrokes" on the violin.

Guests included Ross Malone, president of the Roswell Chamber of Commerce, Claude Simpson, secretary of the Roswell Chamber of Commerce, Judge F. L. Mehliop and Mr. Thompson of Dexter, and Messrs. E. C. Jackson and W. A. Hamilton of Lake Arthur.

Claude Simpson addressed the club on the subject of "Sheep Feeding." He stated that livestock feeding began in the valley before the World war, but that high prices for alfalfa handicapped its growth until recent years. This year there were fed between Roswell and Artesia, 35,000 lambs. Bought at an average price of about \$3, these lambs will sell on the markets at about seven dollars each, or will keep in the Pecos valley about \$140,000 which would be lost to us if it were not for this feeding program. He also said that the Santa Fe railroad was running a through train beginning this Thursday which will provide quick connections with the markets.

Judge Mehliop spoke for ten minutes on "Community Cooperation." He stated that before communities could properly cooperate with each other, they must cooperate within themselves. He pointed out that cooperation is the oldest form of human endeavor, dating back to the time when families cooperated into tribes, and these merged into nations. He said that Hagerman and Dexter were already growing closer together—one bank, one alfalfa growers association, one irrigation system, and even one graveyard. Further cooperation between Pecos valley communities is needed and is forthcoming because of the added enlightenment of the residents of all sections to this necessity.

E. C. Jackson of Lake Arthur, for thirty years a real estate dealer there, was given the comprehensive subject, "Selling the Pecos Valley to the World," and gave a very forceful address on the theme thus suggested. He related that in all these thirty years, he had never seen a failure, and that we had "good land, plenty of water, good people, and fine churches and schools." He praised Dr. A. D. Crile for his work for the water conservancy program. Mr. Jackson emphasized the fact that we must be honest in our endeavor to sell the Pecos valley to prospective residents.

Other speakers were J. E. Wimberly and Rev. James A. Hedges. Thirty-four men attended this meeting.

Misses Nora Clemons, Grace Paddock, Mrs. Louis Heick and L. R. Burck accompanied the Junior class to Artesia last Monday night where they attended a picture show. All report an excellent time.

REED SAYS LOOK BEFORE SHOOTING

J. A. Reed of the Cottonwood, who operates the A. J. Basel farm, is convinced the only place to shoot a high power rifle is in the hills. Last week he decided to try out a new 30-40 high power rifle given him as a Christmas present. A big hawk sat perched high up in a tree. Reed took two shots and in a short time heard from one of the shots. A mile and three quarters northwest of where he stood Ed Nelson on his Malone farm sat putting on his irrigation boots. One ball from the rifle pierced an inch boxing plank in the wall of the building in which Nelson sat. Passing through the wall it went through Nelson's jumper and top shirt, hitting a rib just over his heart, it glanced off and hit a stove.

Nelson was able to laugh about the incident a few minutes after it occurred, but it was some time later before Reed could see any humor in the stray shot.

Prof. E. A. White, who has been confined to his bed for several days with a broken vertebrae, is improving and will be able to be out next week, it is thought.

HAROLD DYE, Managing Editor

TRIGGERMANIACS

As you ride down the highway, occasionally notice the road signs put up at the expense of the state highway department to safeguard life. Every one of them is full of holes. What made them? They were made by morons firing at them with revolvers and pistols as they drove by.

At the risk of the lives of every man, woman or child on the highway, in order to gratify an insane desire to "do something different" these triggermaniacs think it smart to shoot at everything they see.

They cannot possibly tell when they accidentally hit the sign because the car has gone by so fast that they have not had a chance to check up on their marksmanship. It is also impossible to check up on such offenders, and how the menace will ever be curbed will be a problem for the state motor patrol to solve, with the help of public-spirited citizens.

OUR WATER WORKS

Citizens of Hagerman must keep in mind that within two months we must vote a bond issue on a city water works.

Our present system has reached its limit of endurance, and has already become a menace to public health and life. If we do not take advantage of the opportunity to secure government backing and RFC money at small interest, the town of Hagerman will "blow up."

Now is our chance to safeguard the future of our community and it seems that any citizen who has thought the matter through should be in favor of securing such funds, and of voting such bonds.

OUT OF SCHOOL

There are a great many children in this community who are still out of school. Various reasons are offered by their parents, the most prevalent being, financial. If there is any parent in this community who has a child without sufficient clothing to attend school, that parent should immediately get in touch with the welfare committee or almost any citizen who would be willing to help correct that situation.

There is no logical reason in this day of public enlightenment that any child should be denied the privileges of a common school education.

SCOUT NEWS

While the Silver Jubilee of Scouting in America will be held on February 8, 1935, we are now at the beginning of the twenty-fifth year of scouting.

All who are interested in developing the boys through scouting are happy to look back over the accomplishments of the past twenty-four years and to note the progress made.

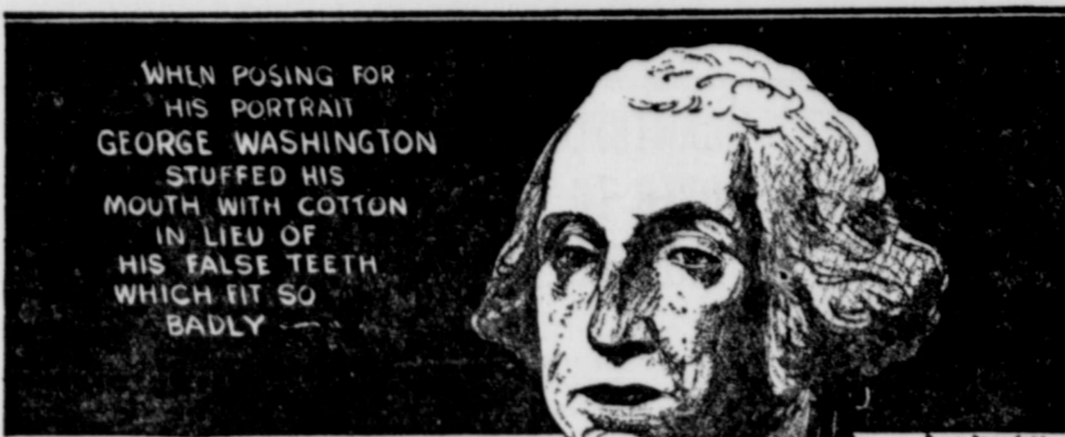

On February 8, 1910, the Boy Scouts of America was launched through incorporation in Washington, D. C. Later, it was chartered by congress, being one of only four organizations so honored. So it is particularly fitting and timely that a call for a celebration at this time comes from our capitol and that the honorary president of the organization, the president of the United States, should have a part on the celebration.

Every community in the nation may have a part in this celebration. Last year there were 1,300,000 Boy Scouts and men who were identified with the scout movement in America. In this year of jubilee it is hoped that there will be a phenomenal increase in interest and membership.

Next Saturday, February 10, at 10:00 a. m. (our time) President Roosevelt will broadcast a message to Scouts all over the nation, the nature of which he is keeping secret, but it is understood that he contemplates asking Boy Scouts to perform some definite duties in regard to some of his national policies, during Scout week, February 8 to 14. The broadcast will be over the N. B. C. and Columbia networks.

The 1933 Russian wheat crop is officially estimated at 1,019,000,000 bushels, an increase of 37 per cent over the 1932 crop.

Odd—but TRUE

Wish Gen. Johnson would put an NRA code on my baby so she couldn't cry more than eight hours every night.

Not long ago we read of the explanation of why suicide is much more prevalent among whites than among negroes as explained by a negro who said, "When a white man sits down and goes to thinking over his troubles he gets despondent. When a negro sits down he goes to sleep."

Most all of us out in the west ought to know how to make cowboy coffee. If you don't the following recipe given by a visiting cowboy in New York to a New York restaurant proprietor will help: "Stir three cups of coffee in a gallon of water. Boil two hours and drop in horse shoe. If the horse shoe sinks the coffee aint done."

Not all of these medical operations may be necessary, but they may be customary.

The birth control idea does not bother us because we've already been born.

We'll agree with the fellow who

said there are more nudists today than ever before. The plain fact is we are all nudists with a few clothes on.

Ever heard about the sudden changes in temperature that occur in Texas. One day a fellow threw a snow ball at a policeman and they treated the policeman for a scald.

Is the hen or the hen's owner a Bolshevik when she scratches up the neighbor's garden?

A would-be columnist that we'd like to sock says poets are born—that's the trouble.

A little boy gazing at the new baby in the family: "I suppose she's all right, what there is of her; but I sure would rather have a police pup."

Heard in the meat market: "The last meat you sent up to my house was stale."

"Is that so? It must have been like the bill you owe us."

Jim King knows a Scotch cowpuncher who wears only one spur. He figures that if one side of the horse moves, the other side is bound to go along.

Wife—"The couple next door seem very devoted. He kisses her every time they meet. Why don't you do that?"

Husband—"I don't know her well enough yet."

CARBON PAPER—The Messenger

ABOUT WILD HORSES

In the summer wild horses go to drink around ten o'clock each morning. When within half a mile of the spring, or water hole, they fall into single file, with a selected leader, and go down one of their trails in a long string, but always very cautiously, for a wild horse has inherited from his prehistoric ancestors the fear of what may lurk for him at his drinking places. While drinking some are always on guard. They never all drink at the same time. To protect themselves from flies they often roll in the mud and let it dry on their bodies, but this is not generally practiced among them. When quenching his thirst the wild horse will take a few swallows of water, then fling up his head and look about him to see if anything is trying to creep up and spring on him. When done drinking, he usually whirrs, as if under great nervous tension, and dashes away like a thunderbolt. Wild horses do not always go to the same spring to drink. This is sort of an innate precaution observed by many wild animals. Having drunk their fill they usually stand, or lie near the waterhole till about four in the afternoon when they move away to their feeding grounds, and do not drink again till noon of the next day.—"Our Dumb Animals."

We have heard the most intellectual brain has the most wrinkles. On the other hand look at the poor prune.

LEGAL ADVERTISEMENTS

040218
NOTICE FOR PUBLICATION

Department of the Interior, U. S. Land Office at Las Cruces, New Mexico, January 3, 1934.

NOTICE is hereby given that Leonard G. Cooper, of Box 3, Hart, Texas, who, on June 4th, 1929, made Homestead Entry No. 040218, for W 1/2, W 1/2 E 1/2, E 1/2 NE 1/4, Section 14, Township 15 S., Range 23 E., N. M. P. Meridian, has filed notice of intention to make three year proof, to establish claim to the land above described, before Dan C. Savage, U. S. Commissioner, at Roswell, New Mexico, on the 15th day of February, 1934.

Claimant names as witnesses: George Payne, of Lake Arthur, New Mexico.
N. Maples, Hubert Combs, J. E. Cooper, these of Roswell, New Mexico.

V. B. MAY, Register.

THE RURAL SCHOOLS TO GET FEDERAL AID

Rural schools and schools in communities of less than 5,000 population, will be kept open in New Mexico for normal terms through financial aid from the federal government.

Notice was received in Santa Fe Friday by telegram from Washington that funds had been allotted New Mexico for schools where communities and rural districts no longer were able to pay teachers. The money is for current pay only—does not include back pay, does not include any money for janitorial services, equipment or maintenance.

The department of education in response to an inquiry from Washington wired that four counties at least were unable to keep schools open in February and nearly half the counties not after February. The four were Taos, Rio Arriba, Union and Sandoval. For these a sum of \$40,000 was asked for teacher pay that the schools might remain open. This sum, it was understood, is on its way from Washington.

Pope and Cardinal

There have been about 200 Italian popes, also 15 French, 14 Greek, 8 Syrian, 6 German, 5 Spanish, 2 Austrian and 1 each of Swiss, Portuguese, English and Dutch nationality. All of the popes since 1501 have been Italians. The College of Cardinals, when complete, is made up of 70 members, of whom 6 are Cardinal-Bishops, 50 Cardinal-Priests and 14 Cardinal-Deacons. The Cardinals are appointed or created by the pope. The pope is elected by the conclave of cardinals.—Detroit News.

Questions and Answers

What's the heaviest substance known? Lead? No, osmium. What's the hardest? The diamond? Yes. The most ductile? Gold. What's the hottest temperature we can produce. About 5,800 degrees Centigrade. What's the coldest? About 272 degrees below zero Centigrade. What's the most costly substance? Radium, at more than \$2,000,000 an ounce. All according to Dr. B. S. Hopkins, in National Farm Journal.

English Setter Fine Pal

Among the setters, the English, perhaps, is the most popular. It is a gentleman's dog, a born aristocrat and a fine companion. It is at its best when afield and displays flashes of uncanny intelligence that makes its owner swear it is the smartest bird dog in the world. It is seldom that you find a dog with the appealing, sympathetic eyes possessed by the English setter.

Amount of Radium in World

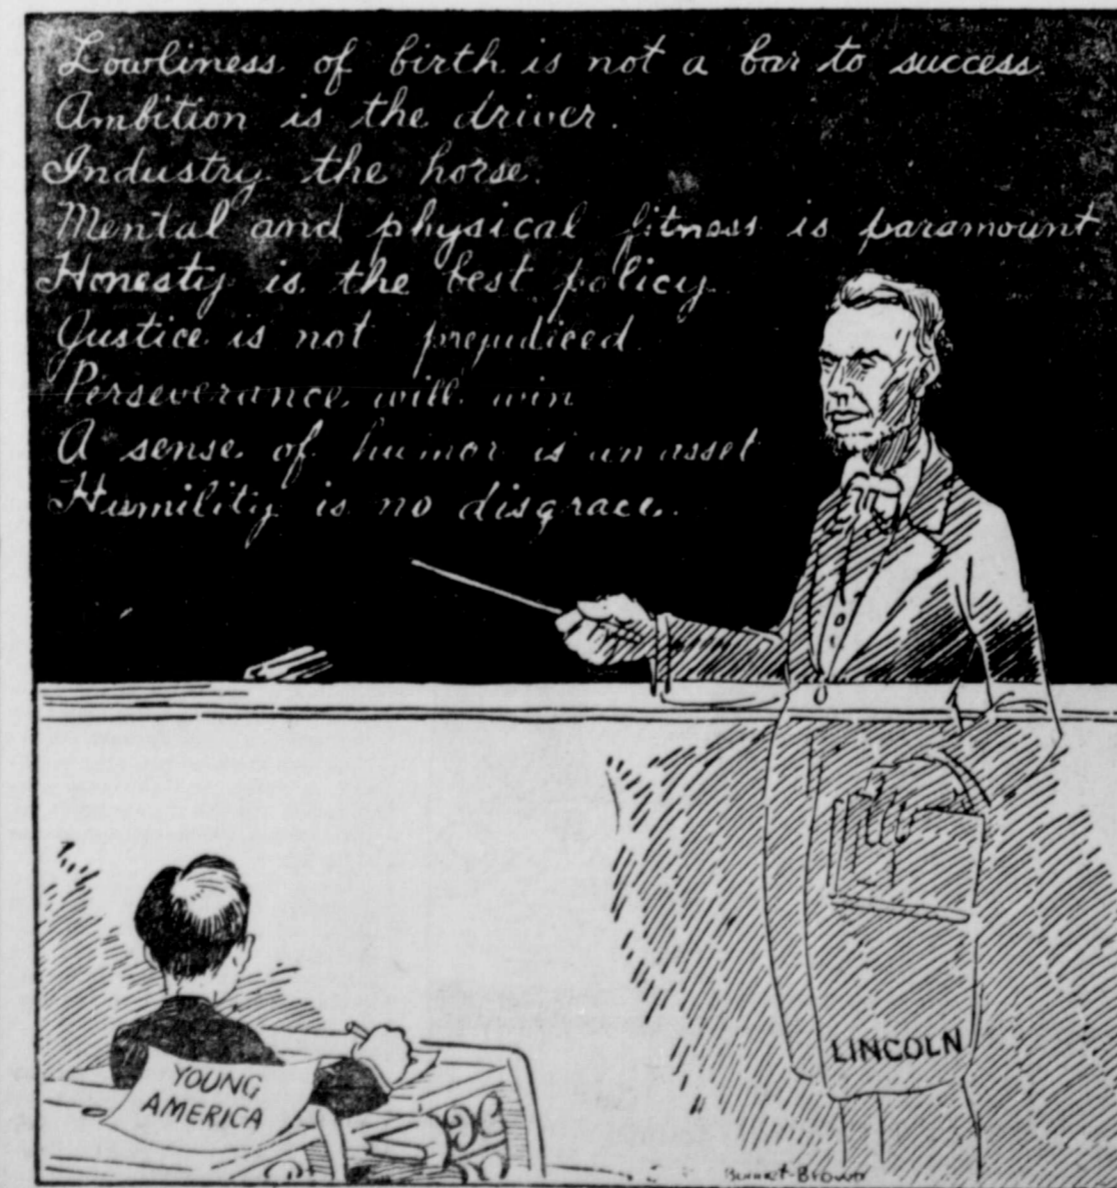

There is about one and one-quarter pounds of radium in the world. About 2,800 grains have been produced in the United States and most of the remainder has come from the Belgian Congo. Czechoslovakia ranks third as a producer and smaller quantities have come from Portugal, Russia and England.

Not So Bad--After All

BROTHER OF MISS LOULA DENHAM DIES FRIDAY AT FORT WORTH, TEXAS

Miss Loula Denham returned to Hagerman Monday night from her home in Lubbock and from Ft. Worth, where she was called by the illness and death of her brother, Robert N. Denham.

Mr. Denham was in a Fort Worth hospital suffering with pneumonia, and died Friday. He was 38 years of age, left a widow and four boys, Robert, Royce, Edwin and Richard. Other survivors are: Mr. and Mrs. F. W. Denham of Lubbock, Texas, his parents, three brothers, Horace E. of Lubbock, Clifford of Amarillo, and Claude Denham of Ozona, two sisters, Mrs. Ray Paulk of Encino, N. M., and Miss Loula Denham of Hagerman.

Mr. Denham was a member of the Baptist church and a Mason. Since 1926 he has been connected with the Fort Worth and Denver Railroad at Fort Worth.

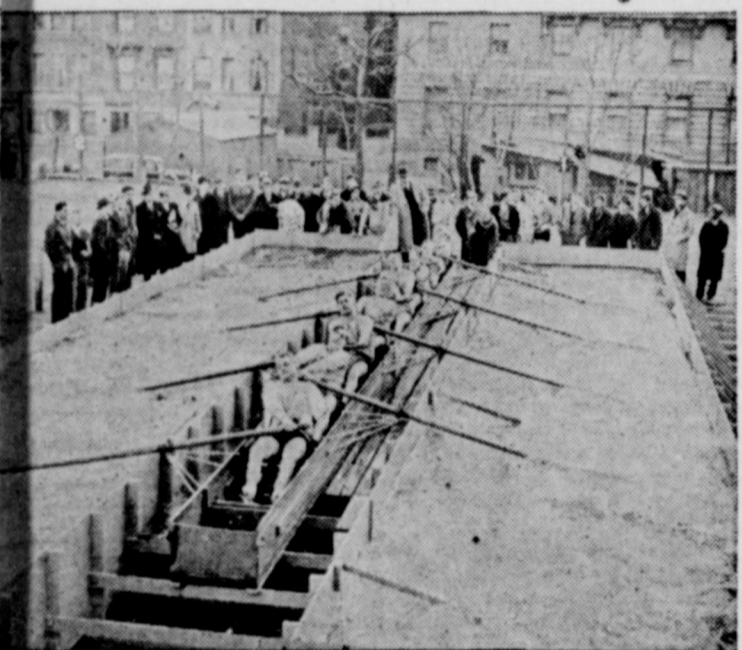

A double tragedy descended upon the Denham family and was especially felt by the father, who lost his mother in St. Louis, also this week. She has been in a hospital there for several months, and he has been at her side.

The citizens of this community extend their sympathies to Miss Loula Denham in her two-fold bereavement.

The Chinese cotton crop for 1933 is estimated at 2,500,000 bales, compared with 1,261,000 bales in 1932.

The Home Store for Home People

Columbia Oarsmen in Outdoor Tank

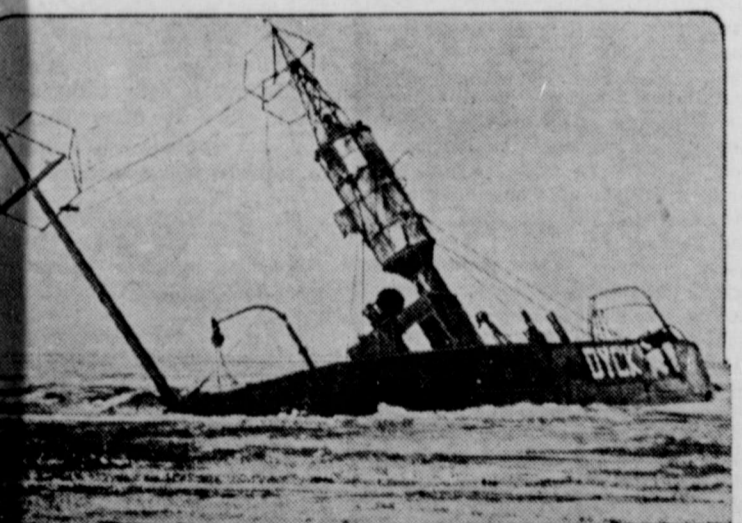

An outdoor rowing tank, designed by the late head coach Richard London, has been officially added to Columbia university's rowing equipment. The tank, made of wood and canvas, accommodates one eight-oared crew. It is believed that it will add to the ability of the Lions' oarsmen when they take to actual shells on the Harlem river later in the spring.

Melbourne's Shrine of Remembrance

This is the magnificent and imposing Shrine of Remembrance erected in Melbourne, Australia, as a tribute to the war dead of the nation "down under."

Scottish Lightship Founders

During a terrific winter storm on the coasts of Great Britain the lightship Dyck broke from her moorings off Gravelines with a crew of seven and foundered on the rocks of Dunkirk. Only three of the sailors were rescued.

Making Fire Motorway in Yosemite

U.S. men converting an old logging railroad into a fire motorway in Yosemite National park. These new roads, built with public works funds, will not only facilitate moving forest fire fighters, but will serve as fire breaks in these bushy cut-over lands.

17,500,000,000 FT. OF GOOD TIMBER IN STATE OF N. MEX.

New Mexico has approximately 17,500,000,000 feet of merchantable timber--9,700,000,000 in national forests and 7,800,000,000 on lands owned by the state and individuals.

The area in national forests in New Mexico is about 8,500,000 acres, distributed as follows:

Carson forest, headquarters Taos, 1,000,000 acres; Datil forest, headquarters Magdalena, 3,000,000 acres; Gila forest, headquarters Silver City, 1,000,000 acres; Manzano forest, headquarters Albuquerque, 700,000 acres; Lincoln forest, headquarters Alamogordo, 1,250,000 acres; Santa Fe forest, headquarters Santa Fe, 1,400,000 acres; Coronado forest, headquarters Tucson, 150,000 acres.

New Mexico has had as many as 100 sawmills in operation at one time, with annual cuttings of 125,000,000 feet. There are many large forests of pine and other timber which have not been touched.

It is estimated that New Mexico has enough timber for its own use to last a century. After that what a tree-denuded, "Chinese-ed" New Mexico? No, not a thing ever again to be feared in the Sunshine State, while under its blue skies dwell descendants of the young knights of the citizens conservation corps, to tell the story of the worth of the work performed by their sires. Conservation of its forests means conservation of its timber. The life of this great commonwealth depends upon its water sheds--sources of irrigation that preserved properly, will quicken its fertile soils and make them produce in rich abundance.--The Earth, Topeka.

ARMY HERO HOME FINDS WIFE WED

Vienna.--It took Joseph Melrer, sergeant in the Austrian Eighty-fourth infantry, fifteen years to get home after the war.

He walked into the Vienna police headquarters, snapped to salute and reported his return, the last Viennese prisoner of war.

A week before the armistice was signed, Sergeant Melrer, while on outpost duty, was buried by a sudden explosion. He was dug out senseless by French sappers and carried to one of their dressing stations, where it was found that he had lost power of speech and memory.

After eighteen months in French hospitals he finally found himself in a Moroccan military cantonment. There he began slowly to recover the power of speech. He was dismissed half cured after several months.

He worked for a time as a helper in a French munitions plant. Later, he says, he was back in Tunis working as a master mechanic. In the meantime he had learned French perfectly and was quite satisfied with his job.

In Melrer's twisted account there appears to have been an interim when he was a fireman in the crematory at Sidi Bel Abes. Then he got a job as fireman on a freighter bound for Singapore.

It was there in February, 1932, that his memory came back to him naturally and without the usual attendant strain.

Stranded and without a cent, he finally reached Constantinople. From there he walked to Vienna.

Melrer's wife is now married to another man. His children refused to recognize him--shabby, stuttering, old--their war-hero father. His friends have moved away. His job is gone.

He is no longer a man without a country, but he finds little happiness in it.

Smilin' Charlie Says

"It's alright t' be proud of one's ancestors--but if th' stock is good it shouldn't be necessary t' mention th' fact!"

THE DISTRICT COURT DOCKET IS SET FOR THE MARCH TERM

Three men were bound over to the action of the Eddy county district court at Carlsbad last week when Judge J. B. McGhee arraigned the defendants on the criminal docket. R. D. Reece, former Carlsbad bar tender, who was arrested for placing slot machines over the south part of the county, was released on a \$500.00 bond and bound over for trial on March 17th. Two Malaga residents, W. M. Walters, Malaga restaurant owner, and a man by the name of Cates, who operates a filling station at Malaga, were also bound over on a similar charge, that of having a slot machine in their possession and ordered to await trial March 17th under a \$500.00 bond.

Three men were sentenced to the state penitentiary Thursday by Judge McGhee. They are Richard Mann, sentenced to serve from one to two years on a bad check charge; Demetrio Gonzales, sentenced to serve from one year to 18 months for stealing a girl's coat; and Castalo Gutierrez, sentenced to serve from one year to 18 months on a charge of shoplifting.

The jury was drawn for the forthcoming March term of court which opens at Carlsbad March 12. The jury is to be subpoenaed to appear March 14. The docket for the term was set by Judge McGhee.

MAKING OWNERSHIP MAP

T. S. Cox, artesian well inspector, is completing an ownership map of all artesian wells in Eddy county, he said Tuesday. All wells in Eddy county have been inspected by Mr. Cox.

There have been no major changes in outlines of the oceans and continents since earliest times, says the Smithsonian institution.

HOPE COUPLE LICENSED TO WED

Marriage license was issued Tuesday at Carlsbad to James Raymond Thompson and Miss Luzzetta Wood, both of Hope.

INDUSTRIES FAVOR A BUSINESS TAX

A tax not to exceed four per cent which must be passed on to the consumer by every business and service in New Mexico was endorsed at a meeting in Santa Fe Monday of industry leaders and educational officers at the state capital. The tax is called a "business" tax in title, but was referred to always as a sales tax. Ninety-six per cent of the proceeds go to the common school fund, the other four per cent for administration of the proposed act.

Meeting the objection of some that such a sales tax would strike only the poor man, the meeting was advised a companion bill, an income tax, was proposed which would come in after the first \$2,000 or so with a heavy rate of assessment. This way, Kenneth Balcomb of Albuquerque explained, the tax would be equalized.

Several features of the bill were pointed to by George F. Speechly, manager of the Telephone Company of New Mexico, as unworkable and needing changes. "We pay 37 per cent of the taxes," he said, referring to utilities, "and we are not trying to escape any taxation, but we should have a measure that is workable."

The bill would make the merchant a collection agent for the state, and he must pass the tax on to the consumer. Announcing or advertising or claiming he is absorbing the tax would be in violation of the act and would bring a penalty on him.

Birthstone Origin Is Traced to 4000 B. C.

Recent findings of historians lead science to believe the custom of designating birthstones according to the month in which a person was born had its origin 6,000 years ago. Their beginnings are traced to certain Egyptian hieroglyphics linked with ancient beliefs in magic. The story of their origin is traced back to about 4000 B. C., according to an article in the Field Museum News. In that period the high priest of Memphis wore a breastplate made up of twelve small objects representing Egyptian hieroglyphics. The custom was adopted later by ancient Hebrews who had been prisoners in Egypt. They made similar breastplates for Aaron, their own high priest. The Hebrew version was composed of twelve large gems, each representing one of the tribes of Israel.

As time went on the twelve stones, originally associated with the twelve tribes of Israel, became associated with the twelve angles of Paradise; the twelve foundations of heaven, the twelve apostles, and finally the twelve months of the year. From the last developed the birthstone idea.

Wearing of birthstones originated in Poland some time during the Seventeenth or Eighteenth century. Birthstones for the various months are: January, garnet; February, amethyst; March, bloodstone or aquamarine; April, diamond; May, emerald; June, pearl; July, ruby; August, sardonyx or peridot; September, sapphire; October, opal; November, topaz, and December, turquoise.

MARKETS

N. Y. COTTON

Table with columns: (March Option), Open, Close. Rows for February 1 through 8.

Amendments proposed to the Bankhead cotton control bill caused a sharp advance on Tuesday morning which did not hold all the gains.

Continued repatriation of the dollar is having a far reaching effect and further speculative activity appears likely in the course of time.

Political developments will enter into the cotton control situation and that, too, will have far-reaching effects of much importance.

We do not advise holding cotton at present levels, since future crop months are now selling around 12.50.

COURT DENIES REHEARING ON SEVERANCE TAX CASE

SANTA FE—The state supreme court Friday denied a motion for a rehearing in the crude petroleum severance tax case.

Bee Figures Largely in Passages of Scripture

The strange liking of bees for skeletons no doubt gave rise to the opinion of the poet, Virgil, in the fourth of his Georgics or country poems, that bees were produced from dead bodies of animals!

Their Promised Land was described to the early Israelites as a "land flowing with milk and honey," because of the numbers of swarms of bees which stored honey in its rocks and hillside, and the luxuriance of its pasturage for milk animals, such as cows, ewes, goats, sheeps, etc.

It is thought that Isaiah 7:18 and Zechariah 10:8, "I will hiss for the bee that is in the land of Assyria," has reference to the peculiar hissing whistle with which to this day orientals in Bible lands strive to attract swarming bees and induce them to settle, as people do today by ringing bells and clanging pans.

House Committee That Has Important Duties

The committee on ways and means in the house of representatives is the most powerful and important of all the standing committees of congress.

Astronomy's Importance

Does anyone still ask—what are the uses of astronomy? As one instance, American scientists with their telescopes provided the means of combating the Zeppelins, had the World war lasted a few months longer.

HEALTH COLUMN

Conducted by Dr. J. R. Earp, Director, New Mexico Bureau of Public Health.

Botulism

The recent death of four persons in one family at Springer from botulism reminds us of this ever present danger of home canned foods—when they are not properly canned.

The bacillus botulinus is found in the soil and infects foods—usually vegetable foods—that have been in contact with the soil.

The spores of the bacillus which are found in the soil are very tough germs. They may be destroyed by five and one half hours boiling at 212 degrees F.

Never taste canned food to see if it is spoiled. The taste may kill you.

Food poisoning is suspected do not throw away the suspected food. Keep it for analysis.

Although boiling will not kill the germ, it will destroy the poison which the germ has made.

The symptoms of botulism are vomiting, dizziness, muscular weakness, blurred vision, inability to swallow.

GOATS CAUSE UNDULANT FEVER

Blood tests from 16 per cent of a herd of goats indicated the presence of germs which cause undulant fever in humans.

Puckett obtained blood from 25 goats on a ranch in the Pinon section several weeks ago and sent it to Meyer for testing.

Work will continue in seeking a prevention or cure for the disease as it affects humans.

TWO BURN TO DEATH

Two Fort Worth, Texas, ladies, one a second cousin to E. B. Bullock of Artesia, burned to death in Fort Worth last Thursday night.

The Rev. J. Sam Barcus of Sulphur Springs, Texas, well known to many local people, conducted the funeral services for Mrs. Williams and assisted in conducting services for Mrs. Booth.

C. N. and E. O. Moore sold three cars of fat lambs at the Morris feed pens Monday morning which topped the 1934 market.

WOMAN'S CLUB

The Woman's Club met Friday, February 2, with Mrs. McCarthy and Mrs. Jack Casabonne at the home of Mrs. Casabonne.

After a brief business session, with Mrs. Harry Cowan, the president, in charge, the meeting was turned over to Mrs. C. O. Holloway as leader.

The subject of the roll call was "That Old Sweetheart of Mine" and the responses were received with much hilarity.

Mrs. George Wilcox of Dexter gave a very interesting talk regarding her trip to Forest Lawn Cemetery in Los Angeles.

An unusually large crowd was in attendance. Twenty-four members and guests were served salad wafers and coffee by the hostess.

L. C. CLUB

The L. C. Club met with Mrs. J. W. Campbell last Thursday and the president-hostess opened the meeting with the reading of the 13th Psalm.

Since this was the birthday of Mrs. Sanders, and she was one of the oldest members of the club, the other ladies presented her with a lovely birthday gift.

Some interesting contests were held during the afternoon which were won by Mrs. Jim McNamara and Mrs. J. W. Wiggins.

Dainty refreshments were served at the close of the meeting to the following members: Mmes. Boyce, M. D. Menoud, E. D. Menoud, Jacobs, Sanders, Gooftwin, Wiggins, Basulin, Ehret, Hedges, Gehman, Holloway, Evans, McNamara and Campbell, and the following visitors: Mrs. Ernest Langegger, Misses LaVergne Campbell and Lucy McIntosh.

The next meeting will be with Mrs. Wiggins on February 13th.

TO DISPOSE OF DISEASED CATTLE

ALBUQUERQUE—Advise has just come from Washington that range, feeder and dairy cattlemen, after a two-day session, have unanimously recommended a plan for disposing of all diseased cattle and eliminating such further number of cows as will remedy the present situation.

The action of this trio of livestock groups largely follow the attitude and recommendations made by the Committee of Five of the American National Livestock Association.

Wedding announcements, printed or engraved.—The Messenger.
