## Responsibilities Chaves Co. Coming 2nd County

### Assessor Reveals the Computations Will Be Below the First- County Classifica-

Responsibilities that Chaves county has assumed as a second class county will become apparent since the property valuation computations by the tax assessor's office for 1934 at the request of the tax commission revealed that the county would be only \$10,000,000 below the corporate classification.

Those counties with valuing in excess of \$14,000,000 or over are in the first class and if the county valuation of \$2,434,867 remains at the same level it is every likelihood that the county will be reduced to the second class.

Assessor H. P. Saunders has his preliminary valuation, less the corporate valuation, was less than for 1933. Computations were made on the basis of a 12 1/2 per cent reduction in the county valuation for 1934 being 12 1/2 per cent.

It is estimated that the total county valuation for 1934 will be only \$13,237,022, which will keep the county in the second class division. Under the present salary reductions cannot be made during a term of office, therefore would have to be made January 1, 1935.

It is the fact that the county valuation is not the final figure until after the completion of the tax roll, the assessor was of opinion that there was little chance for the county to assume first class county classification.

### Men Arrested For Trefts at Carlsbad

Five men were arrested at Carlsbad Thursday and charged with petty larceny. It is alleged they had stolen a quantity of goods, practically all wearing apparel, from the Weiler Army store. A dozen aprons were stolen from the J. C. Penney Co., and a value of \$65.00 from the Carlsbad Hardware Co.

Three men arrested were Leon Martinez, Cecil Martinez, George Martinez, Pedro Marino and Manuel Chavez. Marino gave his home as Vaughn. Chavez said he lived at Clovis. The others were from Carlsbad.

## N. M. OIL ALLOWABLE LOWERED 1,400 BBL. FOR MONTH OF JULY

The state oil allowable for the month of July has been lowered by Harold Ickes, secretary of the interior and national oil administrator. A telegram from Mr. Ickes addressed to C. J. Dexter, New Mexico production chairman, fixed the July New Mexico production at 46,600 barrels, a drop of 1,400 barrels over the June allowable which is 48,000 barrels. Another meeting will be called by Mr. Dexter the first part of July to allocate the July output between the ten pools of the state.

## FOUR WELLS PUT ON PRODUCTION SOUTH EASTERN OIL AREA

### Hobbs District Gets New Location; New Well to Be Acidized; Showing in the Getty Well is Increased.

Four completions and one location are principal noteworthy developments in the southeastern oil sector the past week. Three wells and one location were made in the Hobbs district during the week. Producers finished include the West Grimes No. 3 of the Gypsy Oil Co., sec. 32-18-38, drilled to a depth of 4199 feet. On a company test the Gypsy made 17,625 barrels with an estimated flow of 9,000,000 feet of gas. The Noble Drilling Co., the second company to finish a producer in the Hobbs field, has completed its State No. 2, sec. 24-18-37, at a depth of 4171 feet for 9,736 barrels on an open flow with 12,500,000 feet of gas. A third well finished in the Hobbs field has been given an acid treatment, but no results have been announced. This being the Turner No. 2 of the Skelly Oil Co., in sec. 34-18-38, at 4203 feet. The Turner flowed at the rate of ten barrels per hour through tubing before the acid treatment was applied.

## MESSANGER TO ADD FEATURE PAGE FOR THE VALLEY FARMERS

Look for the new feature next week—an entire page that will be devoted exclusively to the farmer, his wife and children. Subjects of interest, dealing with crop situations and sheep and cattle raising, written by local authorities, will be featured each week.

## WEATHER MAY PERMIT PLANTING OF MORE ACRES NEXT YEAR

WASHINGTON—Unless both farm administration officials and the weather change, wheat and cotton farmers are going to plant quite a few million acres more for the 1935 harvest than they did for 1934.

## Apple Growers Seek to Destroy "Worms"

Apple growers in the vicinity of Roswell are seeking to eradicate the apple worm and are asking that all owners destroy those containing the pests.

## There Must Be Civic Mindedness Or Else--

To be outstanding a town or city must be civic-minded. Small town America is being accused more and more often every day of not being sufficiently public-spirited to hold its own in the keen competition with its bigger neighbors.

## STABILIZATION OF HUGE OIL INDUSTRY IS SOUGHT BY ICKES

WASHINGTON—Two major moves to stabilize the \$12,000,000 oil industry were made Saturday by Secretary Ickes.

Seeking to dam the flood of petroleum produced illegally in the vast east Texas field, Ickes, as oil administrator, approved plans by which major companies will purchase surplus gasoline held in storage by east Texas refiners in return for an agreement by the latter that they will not handle illegal crude.

## Refunding of Indebted- ness, Which Amounts to \$74,277.25, Is Only a Matter of Technicali- ties.

Refinancing plans of the Hagerman Drainage District No. 2485 are nearing completion and it will be but a short time until the First National Bank will be instructed to complete the exchange of the old bonds for the refunding bonds.

## Streamlined Train Busy Making Tour

The Zephyr, the Burlington Railroad Company's streamlined train which made railroad history when it went from Denver to Chicago in 13 hours and four minutes, is now making an extended tour of Colorado towns.

## LEAKY WELLS PLUGGED

E. B. Guess Well Plugging company have plugged approximately 24 leaky wells in the Pecos valley as the result of defective walls, endeavoring to save as much water as possible for their owners.

## HAROLD DYE LEAVES FOR LAS CRUCES TO ACCEPT PARSONAGE

Harold Dye, for five and one-half years managing editor of this paper, left early Thursday morning with his wife and family for Las Cruces where he has accepted the parsonage at the Baptist Church located in that city.

## OFFICERS ABANDON SEARCH FOR STANTON IN SACRAMENTO MTS.

Report Stanton Seen At the Reeves Hill Detour Starts Hunt, But Shifts Rapidly; Officers Say Stanton Still in Texas.

## MESILLA VALLEY PREDICTS A BUMPER CROP FOR THIS YEAR

Unusually fine crops are the prospect for the Mesilla valley this year, according to crop experts who recently completed a survey of the region, having promised a bumper cotton crop with picking to begin some time in August.

## DROUTH WORST IN HISTORY OF SOUTHWEST SAY ALL OLD TIMERS

The entire southwest, including the Pecos Valley, is suffering from the worst drouth in history, not even the old-timers being able to remember anything comparable to the present in which there hasn't been a drop of moisture for months.

As far east as Chicago and as far west as the Rocky Mountains people and animals are undergoing hardships never before experienced, in many instances reports of heat prostrations taking a toll of human life unequal to anything in the past.

## OMNIBUS COLLEGE

Some 250 students, members of the Omnibus College at Wichita, Kansas, will go through Roswell, a letter to the Chamber of Commerce says, the tour coming in two sections, one a day later than the first.

## Apple Growers Seek to Destroy "Worms"

Apple growers in the vicinity of Roswell are seeking to eradicate the apple worm and are asking that all owners destroy those containing the pests.

## There Must Be Civic Mindedness Or Else--

### GUNMAN CHARGED WITH 12 MURDERS SLAIN BY POLICE

#### Notorious Texas Killer and His Woman Companion Objects of Long Hunt.

Black Lake, La.—Clyde Barrow, notorious Texas gunman charged with 12 murders, and his cigar-smoking gunwoman companion, Bonnie Parker, were shot and killed by Texas officers near here as they disregarded a command to halt. The No. 1 desperado of the Southwest and the Parker woman were riddled with bullets as they sped along a road at 85 miles an hour.

State and federal authorities had been waging one of the most desperate man hunts in the history of the Southwest in an effort to bring Barrow to justice. Because of his black record they had to proceed warily for on other occasions the desperado had not hesitated to kill police officers in a mad dash for freedom.

The criminal record of the Barrow brothers, Clyde Champion and Marvin Ivan, began with petty thefts in Texas. Today a score or more of huge robberies are overshadowed only by the 12 murders.

Clyde Barrow was first arrested in 1926 for the theft of an automobile, but the charge was not pressed. His brother was arrested on a similar charge two years later. Both were given prison terms and both escaped.

#### Murders Dozen Men.

After a series of minor holdups the Barrows began crimes in earnest the night of April 17, 1932, at Hillsboro, Texas, by murdering John N. Bucher, a merchant, after robbing his safe. Clyde did the shooting and threatened to kill Mrs. Bucher, who ran to her husband's side.

Since that time the following killings have been attributed to Barrow and his associates:

- Eugene Moore, of Atoka, Okla., August 5, 1932; Howard Hall, of Sherman, Texas, August 11, 1932; Doyle Johnson, of Temple, Texas, December 5, 1932; Malcolm Davis, of Dallas, Texas, January 6, 1933; Harry McGinnis, of Joplin, Mo., April 13, 1933; W. Harryman, Joplin, Mo., April 13, 1933; H. D. Humphrey, Alma, Ark., June 23, 1933; Joseph Crowson, of Huntsville, Texas, January 16, 1934; E. B. Wheeler, of Grapevine, Texas, April 1, 1934; H. D. Murphy, of Grapevine, Texas, April 1, 1934; and Cal Campbell, of Commerce, Okla., April 8, 1934.

#### Girl Accompanies Him.

Shortly after killing Hall in 1932, Clyde Barrow became acquainted with Bonnie Parker, then a waitress in a cafe at Dallas, Texas.

She was then about twenty years old, the wife of a Texas convict, sweetheart of Raymond Hamilton, previous to that time Barrow's companion in crime. Descriptions of her vary. Once she was a blond, then a red head, a brunette, and again a blond.

Parker is said to be her maiden name, but beyond that little is known of her. Within the past year she had proved herself a fit mate for Barrow, for she had used a gun with serious effect on several occasions.

### Cripple Averted Two Wrecks for Railroads

Logansport, Ind.—Twice within two years, A. O. Nethercutt, sixty, crippled Jefferson township farmer, has averted a wreck on the Pennsylvania railroad.

Awakened one night recently by an unusual noise made by a freight train as it passed his home, Nethercutt, who suffers partial paralysis of his right side, investigated and found a 100-inch strip of rail broken away.

He telephoned the dispatcher, who routed the next train, a fast passenger, over another track while repairs were made.

In 1932 Nethercutt was credited with averting a wreck when he found an obstruction that had been placed on the track.

### Mother on Grand Jury That Indicts Her Son

Medina, Ohio.—A mother's courage in sitting on a jury with fourteen fellow citizens to pass preliminary judgment on her wayward son was spread upon Medina county court records. Declining to claim exemption after her name was drawn in the regular panel, Mrs. Amber Bradway sat as a member of the county grand jury, which returned a burglary indictment against her son, Clinton, and another youth, Robert Eddy. The vote on the indictment came after Prosecutor Ashley Pelton made an unsuccessful attempt to have the mother barred from the jury. Judge John D. Owen ruled he was without authority to dismiss a juror willing to serve.

#### They Shall Not Pass

Wheeling, W. Va.—William Gutman bought a bulldog. Its barks aroused him at 2 a. m. the next day. Going downstairs he found a window "jimmied." There was one footprint inside—just one. Nothing was missing. The bulldog wore what might have been a proud grin.

### Pet Bulldog Turns on Gas; Asphyxiated

Murphysboro, Ill.—Cupie, a pet bulldog of E. L. Chapman, committed suicide by taking gas here recently.

The dog, left alone in the Chapman home, apparently turned on the gas jet. When Chapman returned home he found his dog unconscious and the house filled with fumes. He called the fire department inhalator crew.

Firemen worked over the animal for an hour in an unsuccessful effort to revive it.

### LIGHTHOUSE FAMILY HAS UNIQUE RECORD

#### Members Boast of Saving More Than 50 Lives.

Dover, Del.—Capt. and Mrs. Irvin Lynch head a family of lighthouse keepers in this vicinity.

They have been in the United States lighthouse service for thirty years. Two of their sons have lighthouse houses and one of their daughters married a lighthouse keeper.

Mr. and Mrs. Lynch have saved more than fifty lives since they assumed responsibility for the Fourteen-Foot Light, seven miles east of here. They have raised nine children and fourteen grandchildren.

"The work is hard, but it is the finest in the world," Mrs. Lynch, the captain's first assistant, told interviewers.

"We have had troubles, and lots of them. But we mostly remember the pleasant things. For example, we have splendid crabbing, swimming and fishing. Any day we want to either the captain or I can go to the end of the pier and get enough fish for dinner.

"It is a clean, healthful life, always in the open. Neither my husband nor I have ever been really sick. We're both strong and happy. We live by one motto, 'Trust the Lord and help others.'"

Mrs. Lynch described their worst experience with the ocean.

"It was on a blustery day in December, 1925. Snow and hail were beating down on us as my husband and I tried to get back to the lighthouse in a small boat.

"We started to drift out to sea. The captain decided to throw the anchor overboard. He flung it over the bow, and then fell in himself.

"I pulled hard, and managed to get him back into the boat. We had a desperate time reaching home, but finally made it.

"We evened the score, however, because I fell in on another occasion and he pulled me out. But that time we were forced to walk through three miles of swamp, and when we got home they chipped the ice off me."

### Splints Give Reptile New Interest in Life

Pasadena, Calif.—A snake that can get itself run over by an automobile, have its vertebrae set and 12 stitches taken in its hide, and then contentedly eat away at a stack of hamburger, is the kind of a snake Pasadena is talking about.

The reptile, a 4-foot gopher snake, was brought to Dr. D. F. Wyatt, a veterinarian, by a motorist who had run over it in the street. Wyatt went to work, setting the vertebrae. He took 12 stitches to close a bad gash. Splints were next applied.

Satisfied with the operation, Wyatt placed a tray of hamburger in front of the snake which, without a moment's hesitation, started gulping it down. Within a month, the snake will be as good as ever, the veterinarian said.

### Texas Jackrabbit Runs Greyhounds to Death

Ablene, Texas.—A lone Texas jackrabbit escaped death in the jaws of five sleek thoroughbred greyhounds by a few seconds during a recent chase held here.

The greyhounds, owned by Rex Smith, George Scogins and Tom Moore, all of Abilene, were released to pursue the rabbit in a chase that ended just when it looked as though the rabbit was a loser.

Two hours after the race started the pursuers dropped dead in their tracks, their noses only a few feet from the zigzagging rabbit.

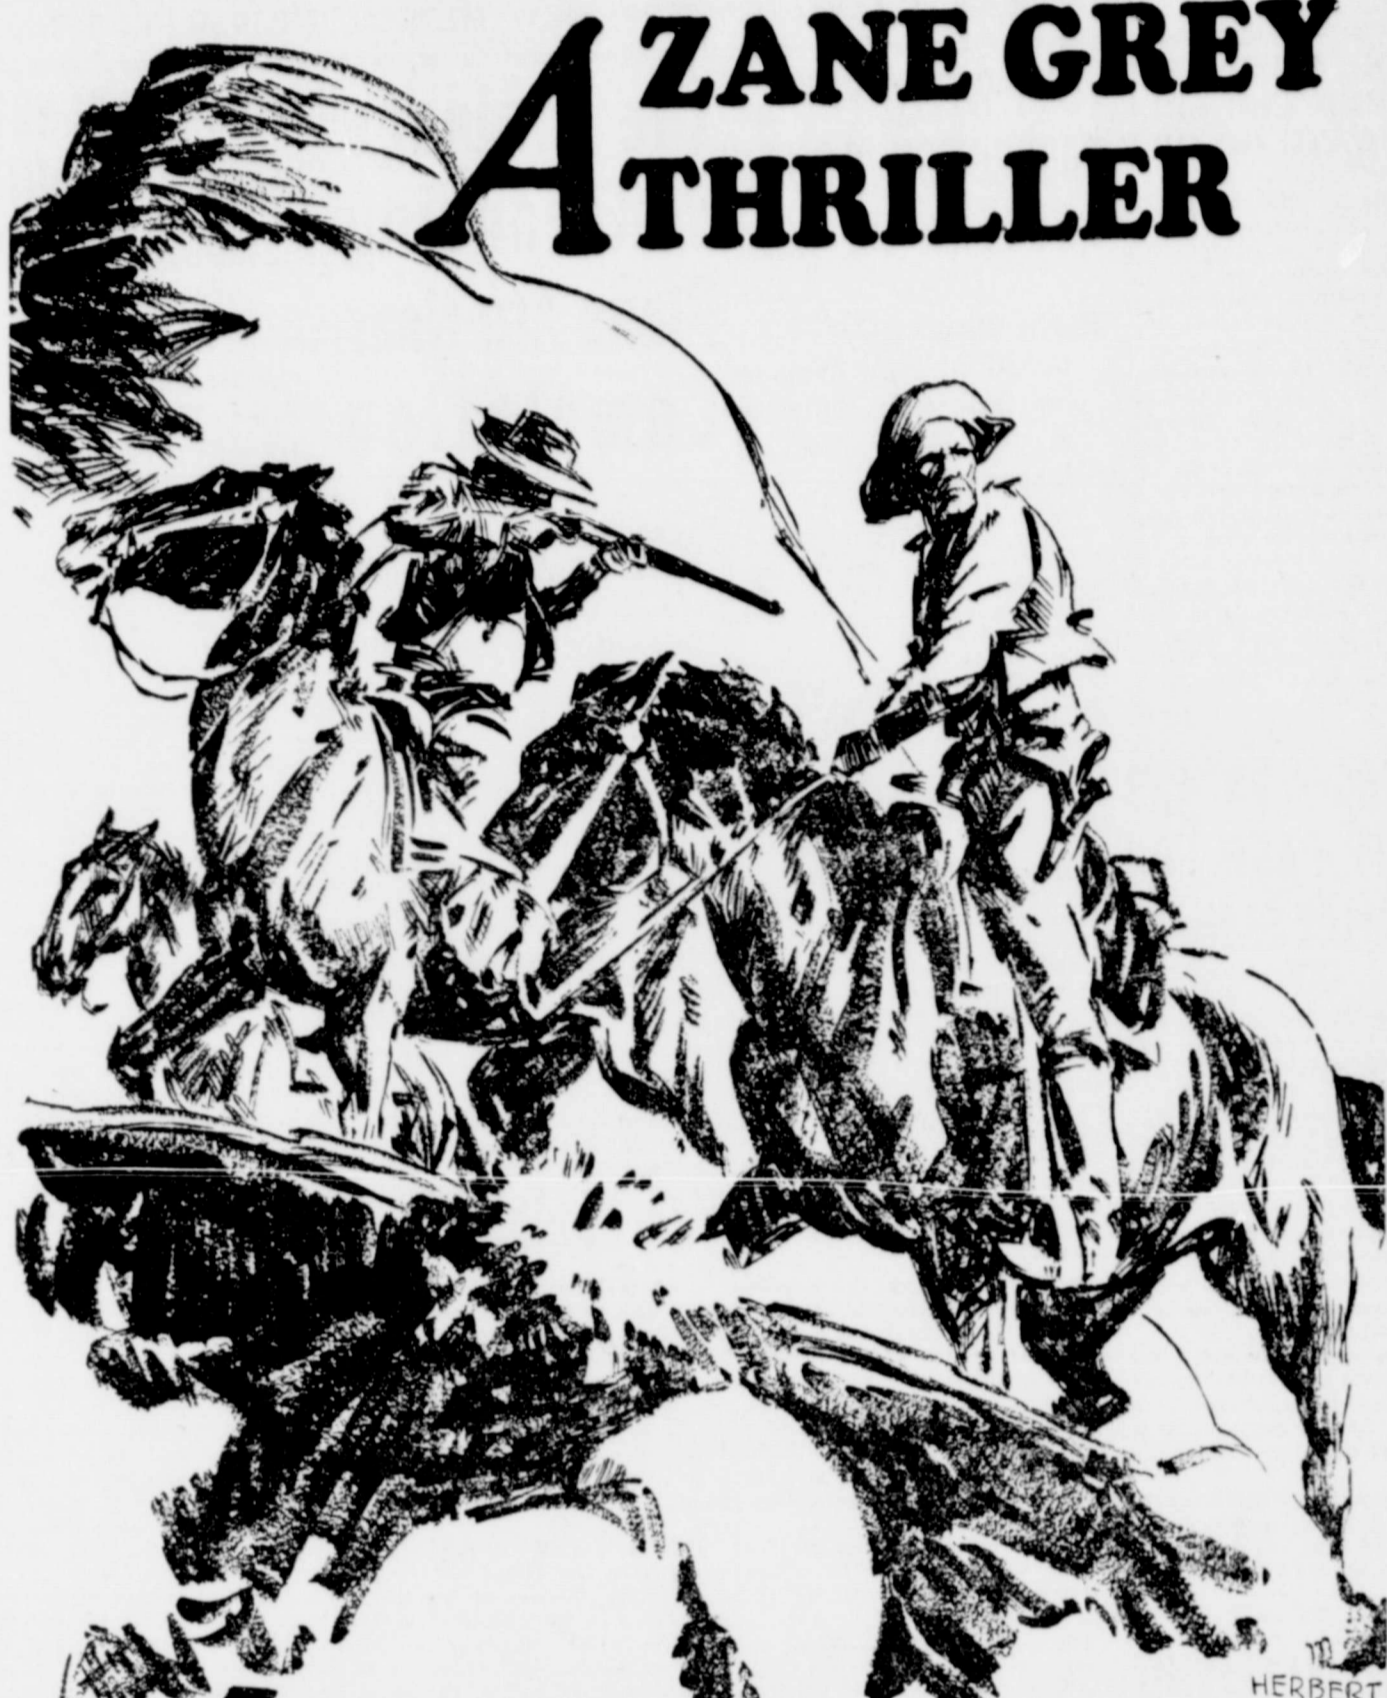

Officials said the dogs died from effects of the extreme heat and high relative humidity which prevailed during the race.

### Three-Bodied Lamb With Only One Head Is Born

Norwalk, Ohio.—A three-bodied eight-legged lamb, born on the farm of Loren Griffin near here, is making townspeople who have seen it believe they're carrying a hangover. Despite its multiple bodies, the animal has only one head. The juncture of the bodies is in the center, with the other parts radiating out in the form of a cart wheel.

#### Memorial for Trapper Trail

Jackson, Wyo.—A memorial will be erected near Jackson lake and Jackson hole for the old Trapper trail through the Piney woods and the naming of the lake and the hole.

### Three Point Two

By THAYER WALDO  
© by McClure Newspaper Syndicate  
WNU Service

THEY started up the long Morris between Horowitz and Gould. Behind them, below the upon which the house stood, a million-eyed winking vista—wood.

Suddenly Morris halted. He made a quick sidewise glance at Gould. Behind them, below the upon which the house stood, a million-eyed winking vista—wood.

Gould puffed out his breath patiently. Horowitz pointed toward the house ahead, demanding: "Look—does a guy mek phenagings wit' de sheds opp all do light on, once? Besides, ever hold of S. J. fooling a hah?"

"You're talking," Morris said, "about when his wife's What he'll do with her gone by rope for six months is some else, maybe."

As they moved on, mounting steps to the broad veranda, Gould stated with finality: "Well, however that may be, doesn't appear that he's cutting dicos this evening."

Just then the row of windows their right went dark. Morris' back as if encountering high age.

"There!" he gutturalized, "does that look like? Let's beat. Over his head Horowitz and Gould exchanged glances of amused tempt. Horowitz punched the button. Morris groaned slightly, muttered:

"Jeez, you birds got a Why, S. J.'ll probably fire all for this."

An overhead lantern lit the door opened on a tall thin low in cutaway and wing collar. "Ah, good evening, Graves," Gould. "Is Mr. Faroges at home?"

"Uh—no, sir, he's not." The ler seemed ill at ease. Last past him into the room still the med, Gould saw a tea wagon held bottles, glasses, and a looked like a plate of small ice. He stepped forward, deftly cring aside the reluctant Graves.

"Quite all right. I see you're peering him back shortly. Wait. Come along, Jake—Frank Curiosity conquered Morris' stance. He sidled around to look inside. When he saw Gould had seen, he muttered something, shook his head once, then scudded in behind the two.

"Come on—let's blow," he up "the old boy's liable to pop in minute now and catch us here!" "Catch us!" Gould's echo was explosion of scorn. "Say, he certainly rare! I thought it rather the other way around. I've decided not to leave. It's and when he comes I'll demand him as he deserves to be done. Think of his poor, trusting only two days on her way and never a suspicion that he's a leper!"

Horowitz, silent since their trance, now leaned near Gould to a perceptibly gleaming eye to claim:

"Well, I don't knowing so got dis moral leopard stuff, but I got a idea: Here's our chance pot de screws on S. J. and sure from that ve hoping to talk him into tonight—ain't it?" A thin smile creased the mouth.

"Jake, either you're smart, or good at mental telepathy. The one of the chief reasons I'm ing. A man like that should made to pay."

Gould put on his most impressive manner. "Now, see here, Frank," he commenced; "we're three decently tried men ourselves and—"

There were steps on the outside; a key scraped into lock. Norris reached up, clutched Gould's shoulder.

"Listen!" he begged in a whisper. "There he comes! Let run for it and get out the way."

Without reply, Gould jerked and dropped hastily into a chair assuming a careless pose. From the vestibule sounded clanging voices as the outer door closed. They came nearer; one masculine one not. Two figures appeared the archway, and stood silent, split second of dead silence. Gould sprang up and began to say: "Why, Mr. Faroges—really, don't know what to say—"

The woman shrank back and choked voice cried: "George!"

Body gone suddenly rigid, Gould peered strickenly through the shadows, gasped: "Edna! What in God's name! Again one instant of utter vness. Faroges had turned his to them all and stood motionless with sagging shoulders. At the rowful wall:

"See, I said you should have I couldn't tell you it was because your wife was with him, or you snacked me. But I knew it; I told me about this date when I out with her last night, and I remembered it when we saw lights go out."

# Stratosphere Balloon

Gondola for Stratosphere Flight.

ropes and valves, but without the gondola and its trappings, the balloon's weight is slightly over 5,000 pounds. When the balloon rises from the earth with all its attachments and load, it will weigh nearly eight tons.

The gondola is a huge hollow ball 8 feet 4 inches in diameter, that has been built up by welding together eight sections shaped like pieces of orange peel. The shell made of downmetal is slightly less than three-sixteenths of an inch thick. At first glance the big metal ball seems to be built of steel; and it is almost as strong as though it were. But the shell, as it stands, without its various fittings, weighs only 450 pounds. If it were made of steel, it would weigh practically a ton.

The two largest openings in the gondola, just above the "equator line," are manholes—one each for Maj. William E. Kepner and Capt. Albert W. Stevens, the "crew." The manholes are fitted with covers, which will be clamped down until air-tight by a heavy bolt, easily tightened and loosened by hand from within.

On the way down from the stratosphere, when breathable air has been reached, these manhole covers will be lifted from their hinges and thrown overhead—attached to parachutes—as ballast.

Numerous small portholes have been provided in the shell of the ball. Some are covered with glass and will serve as observation windows; in some the lenses of cameras are mounted with air-tight fittings; and in others scientific instruments have been placed.

One glass-covered port is situated in the exact top of the sphere so that Major Kepner, the balloon pilot, can look up through it and through the open bottom of the balloon appendix, and can read a large thermometer dial near the top of the bag which will tell him at all times the temperature of the hydrogen gas.

The opening in the bottom of the metal ball was reserved for a large aerial camera which will make frequent photographs of the earth, straight downward. Part way up the curved side of the gondola is another camera opening for the taking of oblique photographs.

**Shelves for Apparatus.**

A series of shelves have been provided inside the ball between upright posts and the shell; and on them will be stored the dozens of pieces of scientific apparatus, batteries, oxygen flasks, and other paraphernalia needed for 12 hours of scientific "housekeeping" in the stratosphere. Around the edge of the floor will be piled 40-pound sacks of lead dust for ballast.

The most unusual assortment of scientific instruments that has ever been brought together to fathom the secrets of the upper air—many of them provided with "electric brains" and "photographic eyes"—were built and assembled at Wright field in the huge machine shop and laboratory of the United States army air corps.

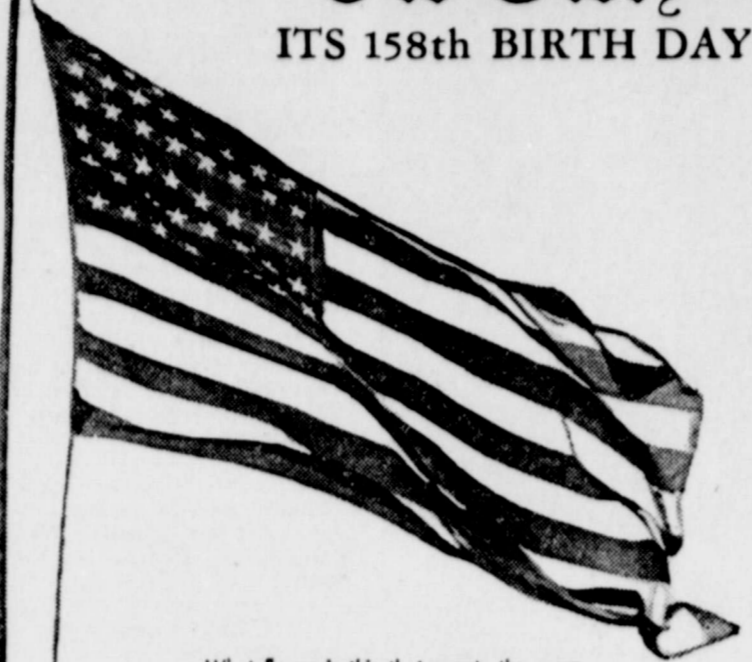

In this "pay load" of nearly a ton of apparatus lies the reason for the most ambitious stratosphere expedition yet planned.

All of the work at Dayton on the devices to gather scientific data was done under the personal supervision of Captain Stevens, famous aerial photographer and observer, who has himself designed some of the instruments.

Probably the most important instrument invented by Captain Stevens is a balloon valve of unique design. Heretofore it has been necessary to operate a valve in the top of a balloon bag by means of a rope tugged from the gondola far below. As balloons have increased in size, this type of valve has become less and less satisfactory. Captain Stevens' valve will be opened by means of a long rubber hose into which compressed gas will be admitted. When the air pressure is released, the valve closes. The principle is like that used for operating air brakes. The valve has been tested through 400 feet of rubber hose in a cold chamber whose temperature was minus 45 degrees centigrade. It worked perfectly.

# Old Glory

## ITS 158th BIRTH DAY

What flower is this that greets the morn,  
Its hues from Heaven so freshly born?  
With burning star and flaming band  
It kindles all the sunset land:  
O tell us what its name may be—  
Is this the flower of liberty?  
It is the banner of the free,  
The stately flower of liberty.  
—Oliver Wendell Holmes.

# The Fourth Recalls Wars of the Past

**T**HE Fourth of July has occupied an honored place on our calendar for a long time, and the temptation grows to regard it as a perfunctory gesture in honor of an ancient deed. Yet there was never greater need of realizing how dependent those old victories are upon present-day courage. The battle to preserve the freedom won in revolution is a battle that never ends. Independence day recalls to us with what difficulty and suffering our freedom was first obtained and of how constantly it has been endangered both by domestic and by foreign foes.

The freedom which we proclaimed on that first glorious Fourth cannot last if we do not tend it—any more than a plant can grow without water and sunlight. In domestic affairs restrictions upon personal freedom have grown to a dangerous height. In foreign fields we are

still inclined to assume that because we have a primary material interest as well as a strong moral belief in peace as a guarantor of freedom the interests and the morality of others impel them along the same path. With a modesty which would be commendable under other circumstances, many of us underestimate the importance of America to civilization and the need for a national insurance equivalent to all that we have at stake in the continued maintenance of peace.

The Fourth of July is a valuable occasion, indeed, if it carries our minds through the War of the Revolution, the Civil War and the wars or near-wars which we have had with Great Britain, France, Germany and Spain. It renews our present zeal for liberty. May it remind us that one neither gets nor keeps something for nothing in this world and that even such a priceless thing as freedom drifts away or is snatched away unless a community is constantly vigilant!—New York Herald Tribune.

### Introduced Declaration

On June 7, 1776, Richard Henry Lee introduced in the Continental Congress a resolution declaring the United Colonies to be free and independent, and dissolving all political connections with Great Britain. The resolution which was seconded by John Adams, was put aside for the time, and a committee was appointed to prepare a declaration to the same effect as the resolution. On July 2, Lee's resolution was passed, and on July 4, 1776, the Declaration of Independence prepared by Jefferson was adopted.

# LAND OF THE LOYAL FREE

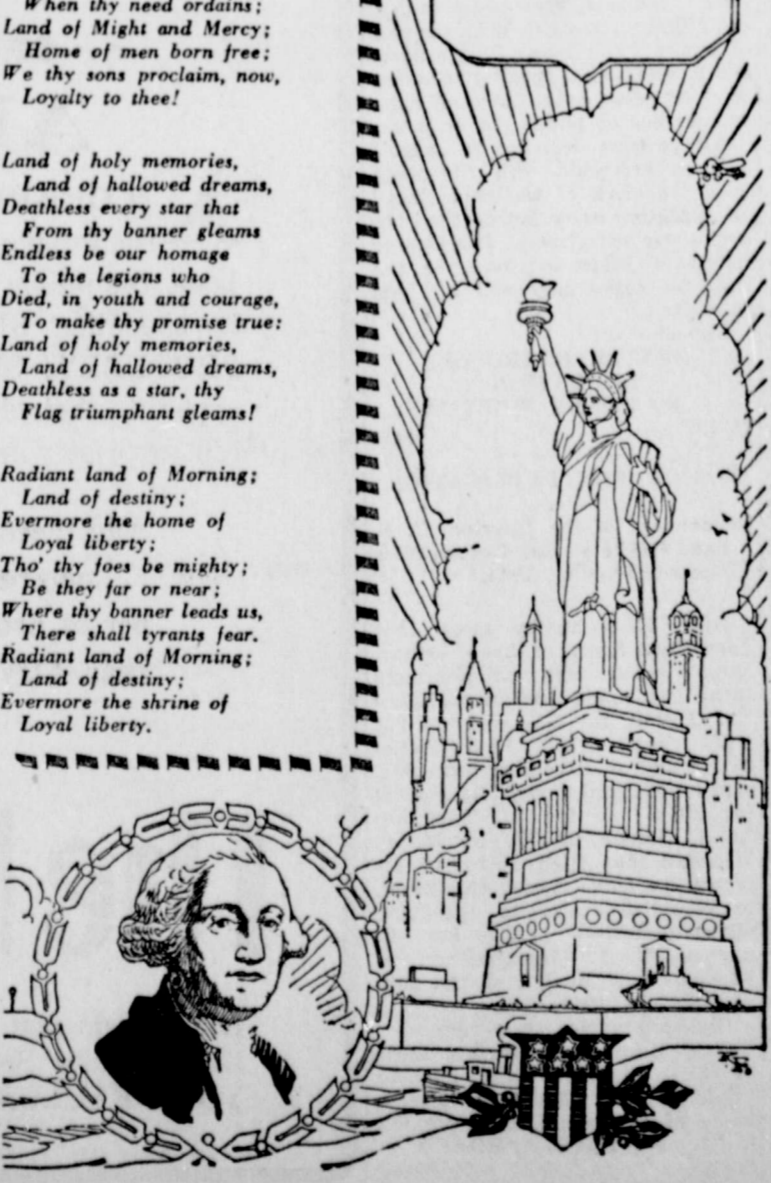

By Eva Dean in the New York Times

**LAND** of Might and Mercy;  
Home of men born free;  
Once again we pledge, now,  
Loyalty to thee:  
From thy vales and mountains,  
From thy seas and plains,  
Rally we to serve thee  
When thy need ordains;  
Land of Might and Mercy;  
Home of men born free;  
We thy sons proclaim, now,  
Loyalty to thee!

*Land of holy memories,  
Land of hallowed dreams,  
Deathless every star that  
From thy banner gleams  
Endless be our homage  
To the legions who  
Died, in youth and courage,  
To make thy promise true:  
Land of holy memories,  
Land of hallowed dreams,  
Deathless as a star, thy  
Flag triumphant gleams!*

*Radiant land of Morning;  
Land of destiny;  
Evermore the home of  
Loyal liberty:  
Thou' thy foes be mighty;  
Be they far or near;  
Where thy banner leads us,  
There shall tyrants fear.  
Radiant land of Morning;  
Land of destiny;  
Evermore the shrine of  
Loyal liberty.*

# JULY 4TH

# New Hair Fashions Are Versatile

By CHERIE NICHOLAS

**M**OST women realize or are coming to realize that as far as capitalizing personal charm and achieving a smart and distinctive appearance are concerned, there is nothing which so effectively does just that as perfect grooming. Not even a wardrobe of beautiful clothes can do for one that which a becomingly coiffed head, a cunningly arched eyebrow and a youth-giving facial can do.

In lieu of which, small wonder is it that the matter of placing one's destiny in the hands of one's favorite beautician is growing to be a fixed habit with the fair sex rather than an occasional luxury.

By the way, it is well to keep in mind in regard to the latest hair-dress that the distinguishing feature of the smartest coiffures is hair that is partly curly and partly straight. Which means that for the first time in years the girl with straight hair has a real advantage, for she can get a permanent wave and have the waves placed where she wants them instead of having them all over her head. The girl with curly hair at the top of the group illustrates the idea. Here the hair is brushed back sleek and waveless from the forehead with curls and waves developing at the back and each side. That pretty fashion of wearing flowers in the hair has been revived.

The winsome maiden wearing the fluffy-ruffle net collar, posed below in the picture, also has a part-straight and a part-curly hair-dress, and there is a suspicion of bangs surmounting her lovely brow—an adorable coiffure for youth.

Yes, we agree with you, the hair

arrangement to the left in the picture is extreme and will probably interest only the type who are seeking after something "different." We appreciate the fact that it would take some time for the conservative average woman to adjust to such a radical change from pre-war fashions as this. However, it does carry the message that the newest trend is to bring curls up higher on the head of the nape of the neck, not necessarily as high as here pictured, but striking also the coronet braid which if you haven't one grown to your head, need worry you not at all, for you can buy 'em looking as natural as your very own. And beau-catchers, that's what our granddaddies used to call them in the days of their youth, if we are not mistaken—referring to those little curly-kews over the temple and forehead.

A more conservative hairdress is presented to the left in the group. It is just such as ladies of refinement and cultured taste will covet. Not a hair is seen out of place, which is exactly what fashion demands of the new coiffures, an exquisite finesse which stands for expert grooming.

Since it is again the fashion to wear ribbons and bandeaux, we thought you might like to see the attractive way the idea has been carried out in the instance of a young modern, so we are adding it (in the circle) as a postscript. The bandeau is formed of velvet leaves which crown her pretty waves and curls in classic simplicity.

# DETACHABLE CAPES MAKE FOR VARIETY

PATTERN 9943

Detachable capes are so fascinating and so smart! This is a lovely dress for town wear, and it is adaptable to all sorts of occasions. It's especially attractive if made of a dotted print, as shown in the picture; but any of the checks, stripes or figured fabrics are nice for it. The dress is uniquely fashionable in that it combines tall slenderness with well-planned curves. The curved hip line is repeated by the curve of the yoke, collar and cape. Very becoming to everyone!

Pattern 9943 may be ordered only in sizes 12, 14, 16, 18, 20, 30, 32, 34, 36, 38 and 40. Size 16 requires 4 yards 39-inch fabric and 1/4-yard contrasting.

Send FIFTEEN CENTS in coins or stamps (coins preferred) for this pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE.

Send your order to Sewing Circle Pattern Department, 232 West Eighteenth street, New York, N. Y.

# SMILES

### LOOKING AHEAD

Doris had just lost her baby teeth and was thrilled at the prospect of getting new ones.

One day her mother saw her looking in a mirror, seriously studying the gap that was soon to be filled by her second teeth. Presently Doris turned and said:

"Mother, I hope my new teeth will be gold ones, don't you?"—Toronto Globe.

### Art Note

Visitor (to Butler who is showing him through the picture gallery)—That's a fine portrait! Is it an old master?

Butler—No, that's the old misus.—Washington Labor.

### Fed Up

Mrs. Chatters—I think, dear, I'll study another language. Which one would you suggest?

Grouchy Husband—The sign language.—Boston Transcript.

### Girls

Geography Examiner—Have you finished making up your map?

Modern Girl Student—No, I can't find my compact.

# SUMMER CLOTHES REALLY FEMINE

Clothes have become so profoundly feminine that happily one no longer feels obliged to babble about their femininity.

They are obviously created for women, not tomboys, or baby dolls. This midseason shows the mode ascending toward a perfection of balance that has not been achieved in a long time. Exaggerated wind-blown effects have been swept away, leaving pleasant ghosts of their former selves to lend movement to the silhouette. The bust is now the most important point—yes, one can say it, the high spot of the silhouette. Every couturier emphasizes it in some way, at least on frocks and blouses. All the other moot style boundaries fade into insignificance beside it.

# Black Complex Features Midsummer Collections

Lovely, wearable, feminine clothes distinguished the Paris midseason collections. Freaks and oddities were conspicuous by their absence; no bustles, no panniers, no fish-bins, nothing zoological. They follow, in the main, the natural lines of the body, and their aim is to make women attractive.

Two leading points stood out. First, the black complex. Second, the persistence of the three-quarter coat.

Many collections are so black, that you might think a gigantic inkwell had been spilled over them. Black for morning, black for afternoon, black for evening. Sometimes, for evenings, very exciting fabrics make the black gowns unusual. Cellophanes, and cires, and other curious crinkles and cloaks.

With her blacks, whites, and unusual grays, and her fabrics suggesting widow's weeds, Schiaparelli seemed to be celebrating the funeral of the depression.

# NAVY SHEER SUIT

By CHERIE NICHOLAS

This smart new and very wearable swagger suit in a heavy sheer of bemberg has a dashing wind-swept collar of white pique. A suit of this description is an asset to any and every summer wardrobe. Its three-quarter coat will pose stunningly over any one of your daytime prints and it looks ever so voguish worn with your white and pastel colored piques and linaes. Every woman will at once see the possibilities in this suit.

Rise and Fall of Insull Comparable to That of Napoleon; At One Time Considered a Financial Magician.

HEALTH COLUMN

Conducted by Dr. J. R. Earp, Director, New Mexico Bureau of Public Health.

Native Diet

More than one public health nurse has observed that the best nourished among the Spanish-American children of New Mexico are those who subsist on a purely native diet. This is not astonishing. The Spanish speaking people of the southwest have been adapting products of southwestern agriculture to their dietary needs for centuries. They have found out by the trial and error method what is good for them.

A recent news release from the office of information, U. S. Department of Agriculture, points out that tortillas are made from ground corn which has been soaked in lime water. So is assured a supply of calcium; that food element which is of all foods most frequently deficient in our American diet. Chili peppers are very rich in vitamin A. Corn and frijoles supply proteins and carbohydrate. Fat is used freely in cooking. Peppers when used fresh supply vitamin C as well as vitamin A.

No doubt there are elements in the ordinary Anglo diet which will enrich the native diet of New Mexico. Milk is perhaps the most important of these. But the native diet has values that we do well to study and dishes that we Anglos may add with profit to our menus.

MEETING OF STATE DEMOCRATIC COMMITTEE IS SET FOR JULY 9TH

The state democratic central committee will meet at Santa Fe July 9 to select a state chairman to be announced Monday by John Bingham, acting state chairman. The committee also may discuss the state convention date, if it wishes, Bingham said. Usually the committee meets in August to select the convention date. Ed Swope, now warden of the McNeil island federal prison, resigned as state chairman May 22, although news of his resignation did not become public until in June.

CAVERN WATER LINE TO BE STARTED SOON

Construction of a water line between the Carlsbad Caverns and Rattlesnake Springs, a distance of about five miles, is expected to start within the next ten days, it was announced at Carlsbad. An estimate of \$65,000 for the project includes five miles of four-inch water line and the building of a pump house.

Insull Becomes Powerful  
Ten years after landing the Chicago Edison Co. ran into difficulties and Insull, at his own recommendation, took over the presidency. It was from that moment on when he began his career as the powerful and dominating so-called utilities magnate throughout the middle west, controlling an empire as vast in its ramifications as any country.

Perhaps Insull would have weathered the storm that followed when this country entered the depression had it not been for the shaky foundation upon which he had built his enterprise, for his system of pyramiding one company on top of the other as a means of financing them became, finally, too top-heavy.

In 1932 came the crash. A receiver was appointed for the Middle West Utilities, greatest of his companies. Stocks in all the Insull companies fluctuated unbelievably. When his great holding company collapsed Insull, too, went down.

Then he fled. Everyone knows the story of his wanderings over Europe from the moment he booked first-class passage, still a free man without an indictment against him. The story of his final capture and his return to this country in disgrace is known to every school boy.

# News Review of Current Events the World Over

## Congress Quits, Having Done Most Things the President Asked—Steel Strike Postponed—Roosevelt's Daughter in Nevada, Presumably for Divorce.

By EDWARD W. PICKARD  
© by Western Newspaper Union.

AFTER several days of hectic work, pushing through the last measures labeled "must" by the administration and a host of other bills demanded by various members, the Seventy-third congress closed its second session. The measures passed during this session include some of the basic laws of the New Deal and considerable elaboration and modification of laws passed last year in addition to the regular appropriation bills and a normal amount of necessary routine legislation.

As in the first session, President Roosevelt was in full control, though the legislators displayed a more critical attitude and a tendency to give proposed legislation closer scrutiny before giving it their approval. This could not be attributed to a lessening of the President's influence or of the confidence in him, but rather to the fact that the members of congress didn't wish longer to be labeled as "yes men." On the whole Mr. Roosevelt succeeded in getting what he asked and in preventing what he did not want.

Several measures that had the backing of the administration failed of passage. These included the oil bill, ardently desired by Secretary Ickes; the pure food and drug bill, which never came to a vote; the ratification of the St. Lawrence waterway treaty; and a series of amendments amplifying and clarifying the powers of the AAA.

In its closing hours the congress spent money like water, indulging in what Congressman Britten of Chicago called "an orgy of spending such as never has been known in the history of the world during peace times." The last of the major bills disposed of were:

The deficiency appropriation bill, allotting the President more than two billion three hundred million dollars for relief and other emergency purposes.

The one billion dollar housing bill to promote the revival of the building trades and of the durable goods industries.

The Frazier bill for relief of farm mortgages.

The bill amending banking legislation.

The railway labor bill.

WILLIAM GREEN, president of the American Federation of Labor, succeeded where President Roosevelt, Administrator Johnson and all others had failed. He appeared before the delegates of the steel workers' unions at Pittsburgh and persuaded them at least to postpone their threatened strike.

The plan which he offered, and which may lead to a permanent settlement of the controversy, in brief provides:

Establishment of a three-man board by the President to adjudicate and mediate all violations of code on matters of discrimination against employees.

To insure the right of workers to organize, empowering the board to hold and supervise industrial elections for collective bargaining representatives.

All grievances or complaints would be referred to the board for final decision.

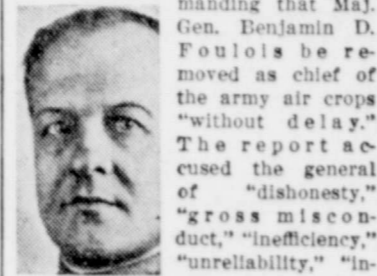

If acceptable to labor, capital, and the federal government, the strike would be called off permanently.

This was a modification of the plan offered by the administration and violently opposed by the more radical element among the delegates.

Leaders of the "rank and file" steel workers, including Earl J. Forbeck and other chiefs of local unions, were especially bitter in their attitude toward General Johnson, and were still eager for a strike, but they were outnumbered and the Green plan was adopted as a basis for further negotiations. The union leaders went to Washington for a final decision. They carried authority to call the strike if the peace plan were rejected by the government or the steel operators.

IN ITS second report to the President the national recovery review board, headed by Clarence Darrow, loosed another blast at Administrator Johnson and in effect recommended his removal as head of the NRA. The board said Johnson had given the recovery program an un-American and dictatorial tinge that handicapped it in the war on depression; that he has arbitrarily decreed life and death for industries, and that by arbitrary modifications of codes he has helped big business concerns to oppress their smaller competitors.

SECRETARY OF WAR DERN and President Roosevelt have received a unanimous report from a house investigating committee demanding that Maj. Gen. Benjamin D. Foulois be removed as chief of the army air corps "without delay."

Gen. Foulois

The report accused the general of "dishonesty," "gross misconduct," "inefficiency," "unreliability," "incompetency," and "mismanagement."

After praising the "young men" who fly army planes under Foulois' direction, the report concluded: "We find it necessary to report that we are most firmly convinced, from the evidence and records submitted, that before any substantial progress in the rebuilding of the morale and material of the army air corps can be attained, Maj. Gen. Benjamin D. Foulois must be relieved from his position as chief of the air corps."

The report referred to "certain violations and evasions of law and army regulations by, also the gross misconduct and inefficiency of," General Foulois "and other executive officers under his command." Particular exception was taken to the fact that army airplanes had been bought by negotiation instead of after competitive bidding.

Striking back at the committee for its secret hearings, Foulois challenged his accusers to a meeting in open court.

"I consider that the accusations are most unfair and unjust," he said in a statement, "and I am ready and willing at any time to meet my accusers in open court."

TERRORISTS in Cuba, who have been stirring up continual trouble for the Mendieta administration, precipitated bloody warfare in Havana by making an unprovoked attack on a parade of 35,000 members of the ABC, the island's largest secret political society. The radicals, ambushed in cross streets, opened fire with machine guns, pistols, sawed-off shotguns and rifles, mowing down scores of the marchers and many bystanders. About a dozen were killed outright. The ABC members fought valiantly with their revolvers and with clubs and stones. Later the fighting spread throughout the city, the students taking sides with the terrorists.

Col. Fulgencio Batista, chief of staff, declared martial law in Havana as soldiers, sailors, and marines struggled to stem the rioting.

Only a few hours before this furious battle, President Mendieta narrowly escaped death at the hands of the terrorists. A bomb was exploded behind his chair during a luncheon at a naval base across the bay from Havana, and he was badly wounded in the legs and arms and severely shocked. Two naval officers were killed and ten others were wounded by the blast.

ANOTHER divorce in the Roosevelt family is impending. Mrs. Anna Dall, the daughter of the President, has taken up residence in Nevada with the evident though not yet declared purpose of seeking legal separation from her husband, Curtis Dall, New York broker. The news was no surprise to friends of the family. The Dalls have not been living together for a year, Anna and their two children, "Sistie" and "Buzzie," residing in the White House.

For the six months she must remain in Nevada Mrs. Dall has selected a log cabin on the shore of Lake Tahoe, some fifteen miles from the house where her brother, Elliott, lived a year ago, when he and the former Elizabeth Donner of Philadelphia were divorced.

Neither Mr. Dall, in New York, nor anyone in the White House would say anything about the prospective divorce action. The Dalls were married June 5, 1926.

THE fourth duke of Wellington died at Ewehurst, England, on the 119th anniversary of the Battle of Waterloo in which the first duke routed Napoleon.

By virtue of the distinction granted to the "Iron Duke," the fourth duke of Wellington probably held more foreign titles than any other English nobleman. He was prince of Waterloo in Netherlands, Duke de Ciudad Rodrigo, and a grandee of the first class in Spain, and Duke de Victoria and Marquez de Torres Vedras, as well as Conde de Vimiero in Portugal.

WILLIAM LANGER, governor of North Dakota, and four of his associates, were convicted in federal court at Bismarck, of conspiracy to defraud the United States government, the case involving the alleged collection of campaign funds. They faced possible terms of two years in a penitentiary, a \$10,000 fine or both. The governor is a candidate for reelection and suspended his campaign to fight for a new trial.

A NEW kind of rejuvenation process for seeds has been evolved by the Department of Agriculture in Washington, and it promises to be of considerable benefit to the farmers. The scientists in the department found that the long or wave lengths of light, the red, orange and yellow rays, have the almost miraculous power of rousing seeds from their winter's dormant state, a sort of living death, and start them growing several months ahead of schedule.

It is believed the most immediate application of the new discovery will be in seed testing laboratories, where germination tests of seed samples are made to differentiate between good and poor seed lots.

SECRETARY OF STATE HULL sent to Great Britain another note concerning the war debt, bluntly refuting the arguments of the British government, saying it was up to the debtors to offer propositions in such cases and intimating that an arrangement for part payment in goods might be possible. However, when June 15, the day for installments, came, Uncle Sam received only \$196,538, which was the full sum due from Finland. The larger debtors all gave notice of default, and so did most of the others.

In Berlin the Reichsbank declared a six-months moratorium on its foreign obligations, these including the Dawes and Young loans. No cash transfers will be made by the bank from July 1 to December 31, 1934.

JUST what was agreed upon by Chancellor Hitler and Premier Mussolini at their spectacular meeting in Venice is as yet unknown to the world at large. However, political observers in Italy believe these were the results of the conversations between the two dictators:

Austria, despite Nazi leanings, must remain an independent nation, one of Italy's primary aims. In return Mussolini agreed to "lay off" if a Nazi were elected chancellor of Italy.

No definite agreement, although the primary object of the meeting was presumably for Mussolini to induce Germany to return to the League of Nations and the disarmament conference.

Germany will be invited to join the Italo-Austro-Hungarian economic accord, a move expected to promote peace in central Europe.

Opposition to regional blocs in favor of general co-operation.

The Italian press says that before Hitler left for Venice Foreign Commissar Maxim Litvinov of Russia proposed that Germany should join in the eastern Locarno pact that is to have the guarantee of France. The German government declined the proffer.

Returning from Venice, Chancellor Hitler, addressing the Thuringian Nazi party convention, declared that Germany wants peace and wants foreigners who criticize her to mind their own business.

"We have a tremendous job of internal reforms ahead, and we want to concentrate on it peacefully," Hitler said. "If foreign statesmen faced their own internal problems they'd find splinters in their own eyes. We want to be so strong that nobody dares to attack us."

REXFORD GUY TUGWELL'S appearance before the senate agriculture committee to be quizzed as to his fitness for the position of undersecretary of agriculture was rather farcical, even though it brought on heated encounters among the members of the committee.

The senators aired their own views freely, but learned almost nothing concerning those of Mr. Tugwell. He did tell them he believed the Constitution was flexible enough to take care of any necessary economic changes; that he was opposed to the adoption of Soviet planning by America, and that he thought his experience on his father's farm and his research qualified him for the position to which the President had appointed him. Finally the committee reported the nomination favorably, the only two opposing votes being those of "Cotton Ed" Smith of South Carolina and Henry D. Hatfield of West Virginia.

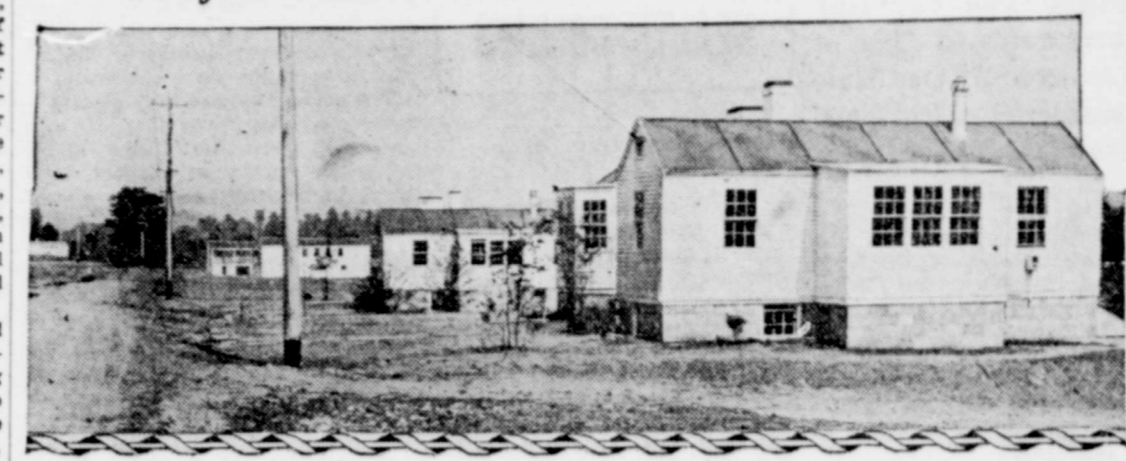

The action of the committee assures Tugwell's confirmation by the senate, but the debate on the floor was unexpectedly long and the attacks on Tugwell were outspoken.

## Celebrating First Birthday of NRA

General Johnson, with Marvin McIntyre, secretary to the President, and others at the party the administrator gave to celebrate the first birthday of NRA. The guests of honor were the 85 members of Johnson's original staff.

## Project That Is Called a Federal Laboratory

General view of the Reedsville subsistence project near Elkins, W. Va., as it appeared when Mrs. Franklin D. Roosevelt journeyed there to greet the fifty pioneer families who will occupy the fifty new homesteads. The project was started but ten months ago and has been termed the "federal laboratory."

## Here Is Miss Frontier 1934

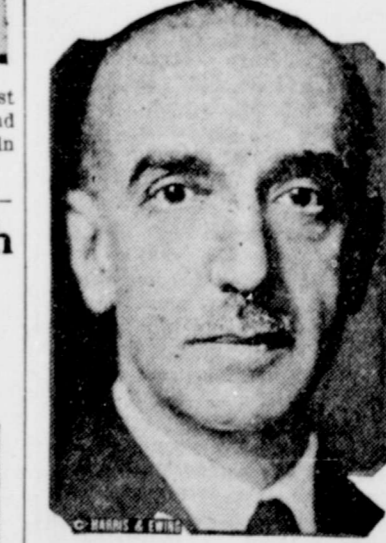

Miss Lois Crane, born on a Wyoming ranch and who has spent most of her life in the open, was selected as the most typical western girl and will reign as Miss Frontier 1934 over the Frontier Days celebration in Cheyenne beginning on July 28.

## COPPER GETS DEGREE

Among those receiving the degree of bachelor of arts at the commencement exercises of New York university was Herman Schwartzberg, a patrolman of the city police department since 1927.

## SPAIN'S NEW ENVOY

This is the new ambassador from Spain to the United States, Senor Don Luis Calderon-Martin, who has assumed his post in Washington. He was accompanied by his wife and two children.

## "Door of Unity" Unveiled at Plymouth

Bishop Daukes of Plymouth, England, unveiling and dedicating "the Door of Unity," a memorial to American naval officers who lost their lives in action against the British during the Revolutionary war. The ceremony took place at St. Andrew's church in Plymouth.

SHAMANIST MARTIN  
At 157 years the abbot of a manist temple near Bareilly, India, self buried alive at his own bidding. According to the practice of the region, life is considered fruitless unless it has been lived to usefulness has ceased. A shamanist said to have influence with the gods and to have overcome all ailments. The abbot evidently became the passion of living. Chinese language Shamanism called Hwang-kin—meaning Sect—the color of the robes of the priests.—Literary Digest

**DO YOU SUFFER FROM NEURITIS?**  
American and European Scientists Agree That Mineral Water Is Beneficial  
TRY THIS NATURAL

People spend hundreds of dollars every year going to Europe and America for a great mineral water health remedy. Many of these people were suffering untold pain from "rheumatic" aches, from neuritis, from gout, from suffering from certain stomach ailments or excess acid or sluggishness or a general rundown condition. The scientific and medical men of Europe and America show very large percentage of these gained blessed relief and these natural mineral water treatments. Today, however, you do not have to travel long distances to purchase the healthful qualities of fine mineral water. You do not need to pay the excessive cost of shipping to you in quart or gallon tainers. For Crazy Water Crystals bring to your own home the minerals of one of the world's mineral waters in crystal form, great saving in expense. To Crazy Water Crystals add nothing is added. All you add Crazy Water Crystals to drinking water and you have mineral water which has millions. If you, or any of your friends, suffer from "rheumatic" aches or if you suggest you investigate Crazy Water Crystals at once. Just one of the millions of people who have given them a full and fair trial you will realize how beneficial have been to so many sufferers. The standard size box costs \$1.50 and makes enough mineral water for several weeks treatment. Crazy Water Co., Mineral Wells, Texas.

**CRAZY WATER CRYSTALS**

## Howe About: Gay Colors Return to Favor

Lincoln  
Cause of Humiliations  
Genius

© Bell Syndicate.—WNU Service.  
By ED HOWE

ABRAHAM LINCOLN was Pres-  
ident during a critical time,  
and worried a good deal. He once  
said: "If to be the head of a—  
is as hard as what I have had to  
undergo, I could find it in my heart  
to pity Satan himself."

Still Lincoln was far better off  
than millions of his fellow citizens  
during the Civil war. Think of the  
thousands of good Union men  
starved in Libby and Andersonville  
prisons; of the hundreds of thou-  
sands who were targets for enemy  
bullets; of the millions who suf-  
fered war privations. Lincoln was  
at least occupying a public office  
paying \$50,000 a year, and lived in  
a palace provided at public ex-  
pense. Whether his judgment was  
good or bad, his salary went on,  
and all the time he was accumulat-  
ing great fame. The war hopelessly  
ruined many millions, but made  
Lincoln rich and famous.

We have heard of the poverty of  
his widow; I read the other day  
she was a rich woman when she  
died; and how little she deserved it!

I have no sympathy for the woes  
of statesmen on the public payroll.  
From 1800 to 1864 millions of Amer-  
icans had had luck that Abraham  
Lincoln might have his share of  
good luck. During his four years  
in the White House, Lincoln should  
have daily thanked the gods, in-  
stead of complaining. I had an  
uncle George, with a young wife  
and baby at home, who had hard  
luck at Pittsburgh Landing that Ab-  
raham Lincoln might get \$50,000  
a year and endless fame.

Let any man think of the great-  
est degradations and humiliations  
throughout his life, and I believe  
he must decide sex was at the bot-  
tom of most of them. It is the one  
thing we should endeavor to sub-  
due and regulate, yet it is the thing  
we regulate least, and let run wild.  
Our social system, our literature,  
encourage wildness in sex rather  
than regulation. The man bull is  
forever permitted to follow his  
lust, instead of locking him up un-  
til his services are needed. And  
instead of trying to keep him quiet,  
the objects of his following aggra-  
vate him all they can.

An envious dull man once said  
genius is insanity, and other dull  
men have made the saying famous.  
It was never true, for genius has  
always meant special ability. There  
are millions of geniuses; thousands  
climbing to distinction, hundreds  
to great distinction. I have known  
several promising candidates in  
small towns where I have lived.

Mozart attracted attention all  
over Europe as a musician when  
six years old. Before he died at  
thirty-five he had written sym-  
phonies and operas now performed  
somewhere every week in the year.  
He never sat down to display his  
genius that he was not disturbed  
by a bill collector, by the scream-  
ing of a woman in labor, a row  
with relatives, or some other in-  
cident of love affairs. Had he been  
as free to devote his time to music  
as "Reign Count" was to devote his  
time to winning races, there is no  
telling what heights Mozart might  
have easily reached. Many pam-  
pered race horses have won a quar-  
ter of a million dollars in two years.

Writing of the late Frank Harris,  
a biographer says: "He trans-  
gressed all the inflexible rules of the  
righteous. He wronged friends, be-  
trayed everyone and violated every  
decency. And yet he was one of the  
noblest men of his day. If this be  
paradox, it is also very near the  
truth. Championing the helpless and  
fighting oppression, Harris was  
magnificent; at his worst, he was  
far too close to rascality for the  
comfort of his admirers."  
This is mere literary piffle. A  
man who violated every decency,  
and betrayed every friend, could not  
have been one of the noblest men  
of his time; to say so, or think so,  
is silly.  
Half the people are creditable,  
considering the slime in which they  
originated. One-quarter are dull,  
but amenable to sound teaching,  
and have good instincts. Another  
quarter are hopeless: dead beats,  
disturbers, thieves, killers. And  
this disreputable one-quarter stir  
up nine-tenths of the trouble. As a  
plain matter of justice, those in  
the great majority are at fault be-  
cause they do not force the small  
minority to behave better. But all  
our laws are keyed to treat the dis-  
reputable gently and kindly, and  
the respectable majority harshly.

## Trend of the Times Is Finding Expression in Bright Fabrics for Furnishings of the Home; Give Opportunity for Individuality.

Things are looking brighter. And  
home embellishments are basking in  
the reflection of the expectant.  
Chintz in colorful patterns with  
white background is rushing to the  
fore and colors vivid and cheerful  
are running rampant through cre-  
tonnes. The trend of the times is  
finding expression in the home.

Porch furniture, always anxious to  
cheer, dons white and bright yellows  
this year in their most popular mood.  
In construction they are leaning to  
the comfortable rather than the  
merely picturesque. Modern adap-  
tations are in demand. It is scarce-  
ly possible that even the most con-  
servative can long withstand the in-  
vasion of newer ideas.

Furniture that a few years ago ap-  
peared bizarre, perhaps to some go-  
tesque, is today being viewed with  
kindler eyes. It is the expression of  
a new generation. The experimental  
stage has been surmounted by a fin-  
ished product pleasing to the eye if  
unusual in line and detail.

In the art museum our modernistic  
furniture vies with the exquisite  
examples of Old world masters, and  
even here one cannot pass it by with  
a mere glance.

The humble kitchen, too, is going  
places with speed. They have adopt-  
ed streamline sinks of metal, a  
soft satiny aluminum finish which  
defies tarnish and claims to do all  
the things porcelain won't. Table  
tops are also made of this alloy  
which seems particularly suited to  
this important realm.

Bathrooms have discarded that hos-  
pital aspect. Dead white is passe  
here. In fact, any one tone through-  
out is being frowned upon. There  
are some very expensive examples in

all black with silver trimming and  
all black with gold leaf motifs. But  
one simply cannot imagine singing in  
the bathtub in this setting. Tile is  
colorful and one may choose an  
adaptation from an old Italian villa  
without the slightest fear of tiring  
with constant use. The floors in al-  
most every instance are dark. That  
too, is modern. Less work for the  
housewife and a splendid idea.

As for household ornaments, use-  
ful and decorative, there is a vast  
field for choice. Even pewter, with  
which we associate quaint designs,  
is being glorified beyond expectation.  
Hand wrought with a modernistic  
tendency, it savors of an Old world  
flavor.

Candelabra in the form of grace-  
ful calla lilies, perhaps a setting of  
three on a stem with thick 2-inch  
candles forming the calli of the  
flowers. Punch bowls with dainty  
cups displaying hand-wrought han-  
dles in unique patterns. Hors  
d'oeuvres dishes, vegetable platters  
with an under compartment for hot  
water or ice as the occasion de-  
mands.

Dinner plates new in conception,  
centuries old in design. The soft  
sheen of the dull gray finish blends  
gorgeously with mahogany, looks  
well on shining linen damask, is en-  
hanced by period furniture, yet adds  
distinction to the strictly modern-  
istic.

The connoisseurs that are to be in  
the generation of our great grand-  
children may spend much time in fu-  
ture years collecting the exquisite  
specimens now coming from the stu-  
dio of a finished artist from Soviet  
Russia, it is said, and now located  
in this country.

Like an etching each piece is  
signed by the craftsman. Being  
hand-wrought adds to their loveliness  
and makes them more expensive,  
though prices are not prohibitive.  
Changing fashions have a way of rei-  
gating many beautiful things to the  
antique heap and sometimes they are  
years in discard before their beauty  
is thoroughly appreciated.

Then, there is aluminum, chrom-  
ium, antimony, all at your service in  
patterns that charm the eye and con-  
ceptions that enhance any setting.  
Hand-wrought designs are also pro-  
duced most artistically in aluminum.

We are in a period of individual-  
ity and self-expression may be in-  
dulged in with little fear of casti-  
gation. Censure for exhibiting per-  
sonal tastes today stops with the  
phrase "you are a most unusual per-  
son." And that speaks volumes. Be  
yourself in this new scheme of things.  
Whether or not the depression is defi-  
nitely over is one thought, but the  
tendency toward gaiety and confi-  
dence in one's ideas is very signifi-  
cant.—Marion Kelley, in the Phila-  
delphia Inquirer.

Year of Dryness  
Perhaps 1934 will be known in  
history as the year of the drought.  
Abnormally dry weather prevailed  
over Central Europe and in early  
June it damaged German crops to a  
minimum of 25 per cent. In England  
more than 100 rural areas were short  
of water and the rainfall for the  
year ending May 31 was the lowest  
ever recorded. The level of the  
Thames fell so much that fish were  
landlocked in many backwaters.—  
Literary Digest.

Practical Economy  
When President Solomon of Haiti  
was forced to leave the country, the  
government of Haiti felt it could not  
afford to issue new stamps, so she  
issued orders that all postage stamps  
bearing his likeness were to be af-  
fixed upside down to the envelope  
and all that were not affixed in this  
manner were to be charged double  
the rate of postage.

## Housewife's Idea Box

To Remove Cod-Liver Oil Stains  
Cod-liver oil stains are difficult to  
remove if not properly done. The  
best way to remove them is to rub  
lard into each spot. Let stand for  
five minutes. Then wash the gar-  
ment with warm water and soap  
until the stain and grease are thor-  
oughly washed out. Always remove  
the stain immediately, if possible.  
THE HOUSEWIFE.

Call for Conservation  
Every countryside proclaims the  
fact that we have, today, less con-  
trol in the field of conservation than  
in any other contact with surround-  
ing nature. We patrol the air and  
the ether, but we do not keep flith  
out of our creeks and rivers. We  
stand guard over works of art, but  
wild species representing the work  
of aeons are stolen from under our  
noses. We stamp out the diseases of  
crops and live stock, but we do not  
know what ails the grouse, or the  
ducks, or the antelope. In a certain  
sense we are learning more rapidly  
about the fires that burn in the spiral  
nebulae than those that burn in our  
forests. We aspire to build a me-  
chanical cow before we know how to  
build a fishway, or control a flood,  
or handle a woodlot so it will pro-  
duce a covey of grouse.—Aldo Leo-  
pold, Game Manager, Wisconsin Col-  
lege of Agriculture.

Why It's Popular  
Literature supplies the experience  
of life and its emotions.

# Most Amazing Proof

## OF EXTRA STRENGTH • SAFETY AND DEPENDABILITY Ever Known!

### THE NEW FIRESTONE HIGH SPEED TIRE FOR 1934

#### WORLD RECORD BROKEN

Greatest Tire Firestone Has Ever Made

IT IS almost inconceivable that human ingenuity could  
build tires that would withstand the terrific punishment of the  
500-mile grind at Indianapolis, May 30.

'Round and 'round the blistering track they streaked, hour after hour, under the blazing sun  
... the low moan of powerful motors rose to a terrific roar as they hit the straightaways at 150  
miles or better—grinding, pulling, pounding around treacherous tire-destroying curves faster than  
they ever dared before. Sliding into the turns at these terrific speeds, there was nothing to hold  
the car to the track except the tire.

Mile after mile, lap after lap, greater and greater heat and increased centrifugal force  
developed to separate the tread from the body of the tire. Every conceivable force known was  
working to tear the tires to pieces—yet Firestone High Speed Tires, with Gum-Dipped High Stretch  
Cords, withstood this most grueling test.

Thirty-three demons of speed—thirty-three cars equipped with Firestone High Speed Tires—all  
protected by Gum-Dipped High Stretch Cords—entered the Annual Speed Classic. Every tire was  
bought by the driver or owner of the car.

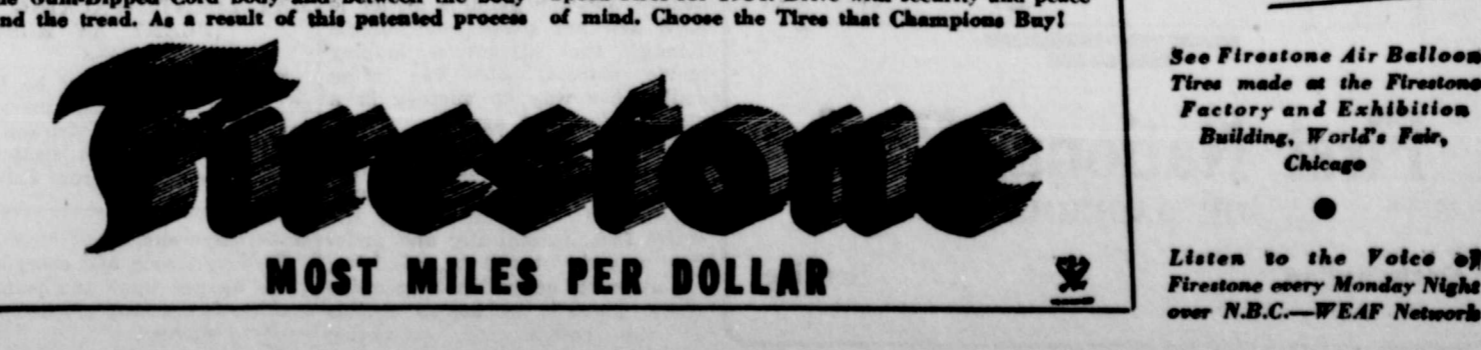

In all the heat—in all the grinding—in all the straining and pulling—not one cotton strand  
loosened—not one life was endangered by tire failure—not one car was forced out of the race by  
tire trouble. Six of the winners finished without a tire change. What a tribute to the Extra Strength  
—Safety and Durability built into Firestone High Speed Tires.

### WHAT THIS MEANS TO YOU

The amazing record of Firestone dependability at Indianapolis was made possible by the Firestone patented process of Gum-Dipping. Every fibre of every cord in every ply of the tire is saturated and coated with pure liquid rubber; there are eight extra pounds of rubber to every 100 pounds of cotton cords.

There is greater adhesion between the plies of the Gum-Dipped Cord body and between the body and the tread. As a result of this patented process of Gum-Dipping Firestone engineers have been able to build a wider tread of flatter contour, with more and tougher rubber and deeper non-skid, giving you more than 50% longer non-skid mileage.

Don't delay! Call on the Firestone Service Dealer or Service Store in your community today and equip your car with the new Firestone High Speed Tires for 1934. Drive with security and peace of mind. Choose the Tires that Champions Buy!

### Unequaled PERFORMANCE RECORDS

FIRESTONE HIGH SPEED TIRES

- ★ For fifteen consecutive years have been on the winning cars in the 500-mile Indianapolis Race.
- THIS MEANS BLOWOUT PROTECTION
- ★ For seven consecutive years have been on the winning cars in the 24-hour Pikes Peak climb where a slip meant death.
- THIS MEANS NON-SKID SAFETY AND TRACTION
- ★ For three consecutive years have been on the 131 buses of the Washington (D. C.) Railway and Electric Company covering 31,357,010 bus miles without one minute's delay due to tire trouble.
- THIS MEANS DEPENDABILITY AND ECONOMY
- ★ Were on the Neiman Motors Ford V-8 Truck that made a new coast-to-coast record of 67 hours, 45 minutes, 30 seconds actual running time.
- THIS MEANS DURANCE

#### Drouth Worst—

(Continued from page one)

leaving the smaller mountains because of the heat and the fear of forest fires. Paving, under the glare of heat and the continued pounding of wheels, is buckling and cracking in many places.

However, the fact that there will be a minimum of crops produced throughout the great middle and southwest, excepting those unaffected areas, will do much toward raising the present level of prices, experts tending that the country's recovery will not in the least be hindered by the present suffering.

The governmental purchase plan of buying drouth stricken cattle is already underway and in this county J. R. Thomas, county agent, reports that work is progressing rapidly on the condemnation plan, approximately 300 head having been killed the last few days.

Federal farm officials who up to now have been planning another cotton and wheat acreage cut for 1935 will doubtless order several more million acres for next year over that of 1934 instead, unless there is a sudden change in weather conditions.

It was brought out in the several conferences that another acreage reduction plus another drouth might place this country in a position where it would be forced to import its wheat and cotton, which would be devastating to the present farm program.

Farm members have been favorably considering the plan of building up a large reserve in wheat and cotton which would be held off the market until a crisis or unusual need for it arose here or elsewhere.

But the fact remains that even though this drouth might be considered a godsend to the farmer it is working a hardship on him and his city neighbor as well to an extent seldom, if ever, before experienced.

#### READERS ASKED TO CONTRIBUTE HOT WEATHER RECIPES

In the summer months the problem of finding good things to eat is the greatest one of all.

Housewives are usually at their wits' end this time of year when appetites are at their lowest, especially when friend husband comes home from a hard, hot day at the office in an ugly mood and demands, after several dark glances: "What's this stuff?"

Eating out of doors is one of the many ways to solve the problem of finding a cool place or combating hot weather tempers but when that is impossible, then the next best thing to do is to find some good recipe that will fairly make one's mouth water in anticipation.

The Messenger wants to help solve these summer problems for its many readers and is therefore going to publish all recipes that are turned in with the name of the person prominently displayed.

It is hoped that with this co-operation housewives can exchange ideas on summer food planning and be able eventually to turn out meals comparable to those obtained at hosteries and restaurants famous for their food.

#### Smile Your Way to Success, Say Stars

That a million-dollar smile can do more toward paving your way to success than any other thing has just been vouched for by a number of filmdom's outstanding luminaries who are all of the opinion that a smile a day will not only keep the doctor away but will also do much toward making you have what is so often called "a personality."

In Hollywood a smile is worth more than a fortune. The movie climber who smiles during adversity is the one who finally gets the casting director's attention. Take the French actor, Maurice Chevalier. His smile is his biggest asset. In fact, few persons, even his closest friends, know that he is pigeon-toed so pronounced and attractive is his smile. Dick Powell, the boy who is dancing his way into the hearts of millions of fans via the musical show route, is another member of the smile-your-way-to-success group.

Physicians are prone to agree with one another on the benefits of smiling. They claim that smiling results in an optimistic outlook on life in general. The effects on the body of a smiler have often proven so beneficial that it is recommended as a cure for some bodily aches and pains.

As for a recipe, smilers have different viewpoints regarding the correct way to smile. Artists who have long studied the human face believe that the genuine smiler is born and not made but Loretta Young, the attractive looking movie actress, who has often smiled her way to success in a picture, does not agree.

Miss Young says that one can learn to smile as easily as learning to read or write. A smile, according to her, must cover the entire face, rhythmically and artistically, and yet not be repulsive, in order to be called a genuine smile. There is nothing so terrible as the half-hearted, timid-like

(Items for either this column or the calendar must be turned in by not later than Wednesday noon)

### Social Calendar

#### FRIDAY

Girl Scouts, swim at Lake Van, Mrs. Roy Lee Hearn, lieutenant.

#### 36 PRESENT AT MEN'S CLUB LADIES NIGHT

High school gymnasium was resplendently ablaze Tuesday night when the Men's Club held its annual Ladies Night, under the direction of J. E. Wimberly, at which 36 were present, including Mr. and Mrs. J. R. Thomas of Roswell.

A dinner was served at 8:00 o'clock after which Mr. Wimberly gave a short introductory talk, followed by County Agent Thomas who spoke at length on the Revival of Old-Fashioned Recreation. Mesdames L. E. Harshey and Bert Bailey gave short talks on the appreciation of Ladies Night. The rest of the evening was spent in recreations—square-dancing, clog-dancing, etc.—directed by Mr. Thomas and assisted by Mrs. Thomas and Mrs. B. R. Utterback.

#### LADIES AID DECIDES ON SUMMER VACATION

The Presbyterian ladies met on Wednesday afternoon with Mrs. Robt. Connor, the president, Mrs. J. E. Wimberly, presiding.

At the business session, reports were read, and a motion carried to have a vacation during the months of July and August.

Delicious refreshments were served to about twelve members and one guest, Mrs. Martin.

#### MR. SERVATIUS WINS HIGH SCORE AT D. D.

The D. D. club met on Thursday evening with Mr. and Mrs. Jack Sweatt.

Mr. and Mrs. Kenneth Servatius are playing for Mr. and Mrs. Witt this summer, and Mr. Servatius was high score winner.

#### MRS. GEORGE WADE'S BIRTHDAY CELEBRATED

The Happy Dozen met on Monday afternoon with Mrs. Maggie Weir. They celebrated the birthday of Mrs. George Wade.

The afternoon was spent in embroidering butterfly quilts. Refreshments of punch and sandwiches were served to the following members: Mesdames Elmer Graham, George Wade, Bert Bailey, Fred Evans, Ernest Langenegger, the hostess and two guests, Mesdames Schlyur Smith and Pete Dorman.

#### GIRL SCOUTS PLAN OUTING FOR FRIDAY

The Girl Scouts are planning outings for Friday.

In the morning, the troop of which Miss Martea Graham is lieutenant, is having a sunrise breakfast. In the afternoon, the troop of which Mrs. Roy Lee Hearn is lieutenant, will go to Lake Van for a swim.

#### LANKFORDS LEAVE FOR VISIT

Mr. Elmer Lankford, Mr. and Mrs. Elton Lankford and daughter, Miss Delpha Lankford, and son, M. C. Owens, left Thursday for an extended visit in Nashville, Tennessee, with Mr. Lankford's father and other relatives. In returning home they will visit relatives in Sulphur Springs and McKinney, Texas.

Mrs. R. N. Thomas and two young sons, who have been staying at the Wells apartments for several weeks, left for home on Monday morning. They were accompanied by Robert West, who will take a several weeks vacation on the Thomas ranch.

Floyd and Dave McCarthy and their families accompanied their brother Frank to Hagerman after having attended their father's funeral in Deming. They remained here a short time, returning again to their homes. Frank McCarthy was accompanied as far as Las Cruces and return by Harold Dye.

#### MAY LOCATE PACKING PLANT AT ROSWELL

Packing plants may be located at Roswell and Albuquerque to care for the drouth stricken cattle shipped out of this section, according to advices from Santa Fe.

smile, says she.

However, each and everyone are quite agreed upon the point that smiling is one way of paving your road to success.

### Baseball

#### SCHEDULE FOR NEXT WEEK

June 29 Lane's Cowboys vs. High School.

July 2 Business Men vs. Farmers.

July 4 C. W. A. vs. Lane's Cowboys.

July 6 High School vs. Mill.

This ends the first half. Second half will commence the 9th when the Farmers and the High School teams meet. Winners of the two halves will meet in the final game to determine the "Hagerman's Softball Championship."

Bill Evans, manager of the Mill team, has been suspended until July 2nd by the Softball Committee of the Community Men's Club, according to Rule No. 1, which says that both competing teams must be ready for play by 8:15 o'clock and the lineup of eligible players complete or else the team manager will be held liable.

Betting on the way the Business Men vs. Lane's Cowboys vs. Mill games are going to turn out it about even in spite of the fact that Teed Devenport is losing milk-shakes regularly, having lost 20 on the Business Men the other night.

Frankie Davis' nice bit of pitching was the bright spot of the big Business Men-Mill game. If it hadn't been for the several errors at the most critical moments there doubtlessly would have been a no-hit game.

Baseball observers say the 2-0 game, favor of the Mill, was the best that has been played here this season, the first game between the two teams having been a 5-2 score, favoring the Business Men.

Wednesday night's game between the CWA and the Farmers was forfeited to the CWA team when the Farmers failed to have a complete team on the ball grounds at playing time.

#### RUIDOSO BAPTIST ASSEMBLY TO MEET

The Ruidoso Baptist Assembly will meet beginning July 15th and running through the 25th. Special speakers engaged this year are: Dr. C. C. Morris, pastor of the First Baptist church at Ada, Oklahoma, and president of Oklahoma Baptist Convention, and Dr. H. E. Dana, pastor of the First Baptist church at Ardmore, Oklahoma, formerly teacher of New Testament in Southwestern Baptist Seminary at Fort Worth. Cabins will be available ranging from ten to twenty dollars per week, and free camping ground is available. An attendance of three hundred is expected this year.

#### ROSWELL FARMER DROPS DEAD SATURDAY

J. J. Lane, 72, well known farmer of the Roswell section, dropped dead Saturday night near 10:00 o'clock in the kitchen of his farm home. Mr. Lane was apparently in good health up to the time of his death. He came to the valley in 1914.

**Enjoy Life More**

By letting electricity do the things, the tedious, disagreeable tasks, that may always seemed inseparable from our lives and our jobs.

There's an electrical servant to perform help in performing almost every job. electrical servants are not costly, they're complicated, they serve uncomplainingly after year. And the cost of operating them almost negligible.

Enjoy life more—by making a small investment in electrical appliances for the home, store, office and place of business.
