Possibility of State Not Sharing in Federal Housing Program May **Cause Governor To Call** Special Session.

SANTA FE-The possibility New Mexico's inability to share in the \$526,000,000 federal low cost housing program may influence Gov. Clyde Tingley to summon a special session of the legislature arose yesterday.

"We don't want to lose any money that's coming to New Mexico and we're going to get our share if it's humanly possible and doesn't cost too much," the Governor told newsmen on his return from a two weeks vacation.

His statement followed a previous assertion that he had not reached any decision on a proposal already put 40,000 five inch bass a direct primary law. to summon the lawmakers to enact

Federal officials recently served hink the dam now, the lake is less enteen other states could not participate in the funds until they enacted enabling laws.

A measure designed to give the state the necessary co-operating authority failed to win aproval of the 1937 regular session.

Governor Tingley met with brief 'no comment" queries on his reaction to Senator Dennis Chavez's statement in Farmington that the senator did not believe "this is the time directly after the recent special election compaign to think out impartially the grave problems connected with giving New Mexico a workable primary law."

The governor proposed a special ession to enact a primary the day following the special election in of district court in Chaves county, ingly myriad of microphones, un- The Total Rainfall Here Measures ingly against five proposed constitutional amendments, one lifting the two term limitation on state officials.

SYNOPSIS

Preparing to close her summer home Preparing to close her summer home ind spend the winter in France with a great-aunt, Anne Vincent, a middle-aged widow, accedes to the pleas of her adopted daughter Rachel, twenty and pretty, that she tell her about her real mother. Anne, an unselfish, understand-ing soul, finds the task difficult. Rachel learns that her real mother was beautiful eighteen-year-old Elinor Malloy, de-serted by her young husband, before Rachel's birth. He was killed in the Rachel's birth. He was killed in the World war. In desperate financial straits, Elinor had agreed to Rachel's adoption at birth by Anrie, whose own baby had died. Elinor subsequently had married Peter Cayne, a wealthy New York busi-ness man, and had a son. To soften the story for Rachel, Anne omits telling her that her mother had been callous and selfish. Rachel goes fishing with Bob Eddis, a local boy who runs a library and does wood carving. She refuses his Eddis, a local boy who runs a library and does wood carving. She refuses his plea to stay in Rockboro and marry him instead of going to New York to look for a job. Anne decides that it is time for Rachel to learn more self-dependence. Rachel makes arrange-ment to stay in New York with "Duk" ments to stay in New York with "Pink keen, vivacious girl absorbed in her ob Anne leaves provision for Rachel's inances in case of need and leaves for Europe, Rachel, bent on seeing her real mother, looks up Elinor Cayne's num-ber. Rachel learns the Caynes are not yet in town. Pink takes Rachel to dinner at Tom and Rhoda Steele's where she meets Oliver Land, a shabby genteel tions. He agrees to introduce her to the head of an agency. Rachel is not entirely happy with Pink Matthews. Her desire to see Elinor Cayne increases. Through Oliver Land she meets Louis Vinco, is hired as a photographer's model and succeeds on her first assignment posing for furniture advertising. Oliver makes her feel her indebtedness to him.

CHAPTER V-Continued

Rachel knew better. Oliver hung around because she liked him and he liked her, very much; yet it was not as simple as that, Oliver was not a simple person. He might like her-very much-but he might also be willing to take that commission, though he never admitted it outright. Rachel didn't feel that she could offer money to him; if she did and he toek it, it would change everything. Men shouldn't take money from women like that. Then Rachel would wonder what difference it made, it was all right to help a friend in trouble; what difference did it make whether the friend was a man or a girl? But something always balked her when she tried to speak to Oliver about money, she didn't quite trust his want, it seemed, though she hated herself for suspecting it, a bit too histrionic

"Everything seems to be going nowhere, nothing happens that makes sense," she thought unhappily. "I might as well have stayed in Rockboro with Bob Eddis. I've

Curt caught her arm as they "Let's stop in here, then. This place you're writing a book." has good muffins and nice deepcushioned chairs and they have real India tea, which should always be drunk, Miss Vincent, without any worm fixings-no sugar, cream, lemon or

whatnot." "Oh, I must have a tiny pinch of whatnot!" said Rachel; and then, "I don't know what makes me so but they're swell, nevertheless."

It was early, there were few peo ple in the tearoom. The tea and with other attractions, though," Ra- wash them when I come in," she muffins were delicious and at first chel maintained. "I must go on managed to say. Curt and Rachel ate in the pleasant greedy silence of hunger. But at going to get dinner tonight. Thanks his second muffin Curt paused and ever so much for the tea. It's been spoke. "I'm awfully glad you came fun." She was surprised that she out with me. It was kind. I was was speaking the truth, the half afraid to ask you, really, for fear hour with Curt Elton had reduced you'd turn me down.

"Well," said Rachel, reflectively, culties into an easier perspective. "it's the first time I've been out with one of Vinco's young men-" Curt stopped her with a shout. limes and avocadoes, and as Pink "Hey, lay off, I'm not one of Vinwas late she had dinner almost co's young men, God forbid. O'Mahoney alongside the President's car and Mrs. Roosevelt emerged, shook his hand and asked after Mrs. O'Mahoney.

The senator then entered the private car and he and Mr. Roosevelt shook hands and said "Hello," but the atmosphere was decidedly chilling; he took leave of the party at Casper, Wyo., after accompanying the President and his group on a drive about that city.

The Chief Executive spent two days in Yellowstone National park, and then went on to Boise, Idaho; Japan exists.'

to attack the Russian embassy in Nanking with planes disguised as Japanese aircraft, for the purpose of involving the Soviet government in the Sino-Japanese conflict. With the equivalent of "Oh, yeah?", Russia retorted with a stern warning that it would hold Japan responsible for any bombing of the embassy, intentional or accidental. The Soviet officials said they considered the reported plot a "pure prevarication showing the intention of some Jap anese military powers to bombard the Soviet embassy intentionally and then try to escape responsibility."

With callous brutality Japan continued the air raids on Nanking. Canton and other large Chinese cities, the bombs slaughtering thou sands of helpless civilians. The ut ter contempt for protests of western nations shown by Japan seemed warranted by the failure to insist on respect for the nine-power treaty guaranteeing the territorial integrity of China. For this failure Generalissimo Chiang Kai-shek blames

especially the United States. "This war." said he, "will last as long as Japanese aggression lasts in

China. The League of Nations adopted a resolution severely condemning Japan for the aerial bombardment of defenseless Chinese cities, and Tokyo, indignant, charged the league of acting without verifying the facts. To the protests of five great powers, previously filed, the Japanese government replied with the assertion that the bombing of Nanking was "necessary for our

purpose. The British public is becoming increasingly aroused against Japan and there is a general demand for a boycott of Japanese goods. The government has permitted an air-

craft company to take a big order for fighting planes that will soon be shipped to China, and they may be manned by independent British pilots.

Yarnell's Policy Wins

A DMIRAL HARRY YARNELL was decidedly opposed to the policy of Washington to withdraw American warships from Chinese waters in the face of danger. His protests have been considered by the general board of the Navy department and his program approved. Consequently our naval vessels will remain there to protect our nationals "as long as the present controversy between China a

Convected heat-the kind given off | by open fires and hot air furnaces -produces warmth by heating the air. On the other hand, it was found that radiant heat consists of rays which warm the body without necessarily having much effect on the surrounding air.

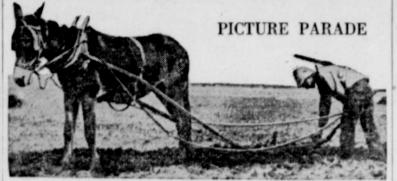

As the result of this research, and investigations by scientists connected with other industrial concerns, engineers have found the answer to widely-varying problems in heating brought about by changed conditions of modern living. They have conquered the difficulties of installing 65 miles of steam conduits beneath the swarming arteries of traf-

in rooms to ripen, with the temperfic in New York to pipe warmth ature carefully regulated between 56 from central heating plants to 2,000 and 70 degrees. By controlling the office and residence buildings. On temperature of the ripening rooms, the opposite end of the scale is marketers can delay or hasten the the successful installation of a sepripening process and so adjust the arate heating system in a bird supply of bananas to reach consumers in a steady stream. This brought on the problem of air-conditioning the bird house, and a complete ventilating and steam heating system was installed, with steam heat pipes enclosed in the walls. Managers of the nation's transcontinental airways, faced with the difficulties of passenger comfort on ing industry from 1935 to 1936, fire winter flights, took their problem to heating engineers, who have developed a unique system for warming the huge passenger planes that now roar across the sky trails. As the result of scientific research and experiments, cross-country planes this winter will be warmed by "flying steam heat," designed to maintain a temperature in the cabins of at least 70 degrees even during the coldest weather. The flying heaters, which weigh only 140 pounds, produce enough steam to heat a five-room house on the ground. Using only eight quarts of water, the miniature boilers are heated by exhaust gases from the engines, and the temperature is regulated either by thermostats, or by controls in the pilot's compartment. Provision is made for a complete change of air in the transport planes every four minutes, so that the atmosphere does not become "stuf-

Ready at any moment to defend the strip which he is trying to convert to fertility is the Jewish settler of the Jesreel valley.

FIVE or six million Jews, uprooted by dictatorships and tossed about by economic storms, may have to depend upon the development of the Holy Land, under British mandate, as a solution to their difficulties. But they face the hostility of the Arabs living there, whose economic and religious interests conflict with theirs.

In North Palestine the Jews fence themselves in armed settlements as a protection against marauding Arab bands, while they try to work the poor land. With Britain anxious to get rid of her mandate, and with enemies in nearly every corner of the world, these "people without a country" are in a sorry plight.

The life is not an easy one, by any means. Backbreaking labor is not made any more bearable by con-

can of the Moody Bible Instit of Chicago. © Western Newspaper Union.

Lesson for October 17 CHRISTIAN SPEECH AND

CONDUCT LESSON TEXT-James, Chapter 3. GOLDEN TEXT-Let no corrupt com-nunication proceed out of your mouth.-Ephesians 4:29 PRIMARY TOPIC-The Words I Say.

JUNIOR TOPIC-A Bridle on the INTERMEDIATE AND SENIOR TOP-YOUNG PEOPLE AND ADULT TOP-C-Christian Words and Works.

Christian speech and conduct may well be studied in the book of James, for he stresses the importance of works as demonstrating faith. There are two common errors-one is to attempt to be justified by good works apart from faith in the Lord Jesus Christ-the other is to talk about believing in him and then fail to live in accordance with one's profession. Some have assumed that James fell into the former error, urging works as a substitute for faith, but an intelligent reading of his epistle clearly ndicates that he is in no sense contradicting the Scripture doctrine of justification by faith, but is showing that professed faith which does not result in Christian living is in reality a dead and useless thing. I. Christian Talk (vv. 1-12).

As he enters upon his searching and convicting discussion of the tongue and its misuse the writer distinguishes between

1. Two kinds of talkers (vv. 1.2). a. "Teachers" (v 1.) who have a peculiar responsibility because they stand as the representatives of God at the sacred desk. It is not a place to be sought after, and the man who fills it at God's call needs divine grace and direction that he may speak the truth.

"We all" (v. 2). The speech of every one of us counts either for or against God, even though we may not fill the teacher's chair or stand in the pulpit.

2. A single danger (vv. 3-12). All of us have the one danger-lack of "tongue-control." Developing that thought the text first points out that a. Powerful things need control (vv. 3-5). The horse is a wild and useless animal without the directing and restraining bit. A ship without a rudder will be lost. A tongue needs direction and control, for while a little thing, it is tremen-

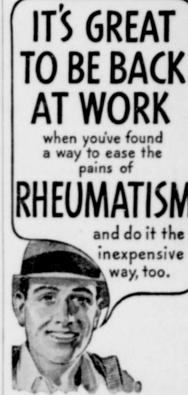

dously powerful. b. An uncontrolled tongue is dangerous ((vv. 6-8). How vivid is the imagery of the words before us. A fire spreading and destroying, an untamed animal running wild in all its fury, a deadly poison eating away the life-such is the uncon-

trolled tongue. out be it all on the side of manli We recognize

A Motto

DUT this motto up in your office and look at it every morning: "Where can I improve my business today?"

I know a man who adopted this motto early in life, and it has been a perpetual inspiration to him. You can see the effects of it upon everything he does. He is always trying to improve on his best. The result is that he has developed more of his ability than any other man I know. There are no fag-ends or half-finished, slipshod jobs about him. Completeness is his trade mark. Nothing else seems to trouble him more than a poor day's work or a bad job .- O. S. M.

You can pay as high as you want for remedies claimed to relieve the pain of Rheumatism, Neuritis, Sciatica, etc. But the medicine so many doctors generally approve— the one used by thousands of families daily — is Bayer Aspirin — 15¢ a dozen tablets — about 1¢ apiece

Simply take 2 Bayer Aspirin tablets with a half glass of water. Repeat, if necessary, according to directions

Usually this will ease such pain in a remarkably short time. For quick relief from such pain

which exhausts you and keeps you awake at night - ask for genuine Bayer Aspirin

Your Best Do the best, the best you know-

Thawing Out Iron Ore.

fy.'

Before the take-off of each flight, and before the exhaust from the engines has had a chance to start the steam heater in operation, the interiors of the huge planes are warmed by special mobile heating units. maintained at the airports. These units, mounted on small trucks, pump warmed air into the cabins, thus bringing the temperature to

the desired level before passengers enter the ship. Not only is human comfort in the

wintertime dependent on scientific developments, but the business life of the nation as well, for industrial schedules must be maintained despite weather conditions. Here again, research experts in one industry came to the rescue of another when engineers of the B. F. Goodrich company solved a stubborn problem at the root of all industry by making it possible to ship iron ore in zero weather from the Great Lakes district.

On the shores of Lake Superior, where snow and ice close in while the big ore boats are still running, carloads of wet iron ore freeze into solid chunks before they can be unloaded. To meet this emergency, the engineers devised a hose of specially compounded rubber through

fortable during the winter, while reducing fire hazards to the lowest possible point. The extent to which this is being accomplished can be easily seen from the fact that while the volume of business increased 34 per cent in the automatic heat-

ming.

winter.

losses increased only 11.9 per cent.

heating engineers have also had the

then ripened in specially construct-

ed heating rooms. Bananas are put

Fire Losses Decrease.

According to statistics compiled by the authoritative Heating and Ventilating magazine, the volume of business in the automatic heating industry has jumped more than 20 per cent in the past five years. In 1932, it is estimated that the sale of automatic heating equipment amounted to only \$41,711,000. By 1936 this figure had increased to \$108,990,000.

Meanwhile, fire losses in the United States in 1936 totaled \$263,259,746, according to estimates of the National Board of Fire Underwriters, showing a decrease of 34 per cent from the 1932 figure of \$400,859,000, Nevertheless, there are still enough defective chimneys and flues left in the country so that it is estimated that about \$10,000,000 worth of property will go up in smoke this coming winter, and a similar amount will be lost because of imperfect stoves, furnaces and boilers.

As scientists attack this problem, as well as others, there is a hint that the future might see great changes not only in the type of heaters used, but in the kind of fuel, for recent experiments point to a time when we may get all or most of our heat from the sun.

Dr. C. G. Abbot, head of the Smithsonian Institution, has recently developed a solar heater that is the most efficient yet produced. Utilizing the hot rays of the sun, reflected by a bright metal sheet, he has succeeded in heating a black settler, who immediately set up a signal. From her position in a high

ture at which it can be used for turning water into steam. Experts declare that solar rays available for heat are at least 1,000 times as powerful as all the coal, oil and hydro-electric power now used. Although the conversion of sun rays into heat is still too costly to compete with the cheaper and better known fuels, scientists say the day may come when these are all exhausted, and when we will turn to the sun for heat and power, and the business of keeping warm will literally be done with mirrors.

Men and women take turns in guard duty behind the barbed-wire fence which protects the settlers from the raiding Arabs. A woman sentry is pictured here. Note her studious appearance, determined look and mannish military dress.

Are Coming.

chosen for their power to destroy pour forth from the press, over the footlights, from man to man and literally "set on fire the course of nature" (v. 6). c. An uncontrolled tongue is inconsistent (vv. 9-12). Again the figure is striking. The fountain which

pours forth fresh pure water to sustain life does not at the same time bring forth the bitter brackish water. Fig trees do not bear olives, vines do not bear figs. Nature is

consistent and dependable. But the tongue-ah, that is another matter! How sadly do we confess our failure, for here do we "offend all" (v. 2). We bless God. and defile and destroy man, with the same lips. "These things ought not so to be" (v. 10). May God give us grace and strength that they may not be so.

II. Christian Walk (vv. 13-18). The word "conversation" in v. 13 is an English word which now means "talk" but which formerly meant "manner of living."

1. Words and works must agree (vv. 13,14). It is only right that those who speak of following Christ should prove it in their manner of living. Talk may be smooth and broad in its claims, but the demonstration of its reality and honesty is in the daily walk. This calls for wisdom which is divine-earthly wisdom will not suffice.

2. Earthly wisdom is false (vv. 15.16). There is a wisdom apart from God. Men of the world are brilliant and able, but scrutinize their wisdom and you will find that it is "sensual"-that is, of the senses-or natural as distinguished from spiritual. All too often it is downright "devilish" (v. 16).

3. True wisdom is from above (vv. 17.18). Undefiled, unselfish, uncompromising, but not quarrelsome or stubborn, impartial and sincereand "full of mercy and good fruits" -such is God's wisdom for the Christian's life.

Letter of Light

The great comprehensive truths written in letters of living light on every page of our history are hese: Human happiness has no pertect security but freedom; freedom none but virtue; virtue none but knowledge; and neither freedom nor virtue has any vigor of immortal hope, except in the principles of Christian faith, and in the sanctions of the Christian religion.

things. We see how vile and care- ness, courage and kindness. less speech debases man, how words

A VALUABLE CROP

While adult farmers are struggling with the problem of production and marketing, a splendid new "crop" of the future is growing up. More than a million boys and girls are enrolled in 4-H clubs and F. F. A. organizations. In the se associations, they are learning the practical lessons in successful agriculture. On a not distant tomorrow, they will be operating the nation's farms, organizing and running the nation's farm marketing cooperatives and working out the problems of the day.

The fact that organization of farm youth has now reached it's 11:00 a. n highest point in history is indicative of a bright agricultural future. Middleton, director. The training and information these young farmers receive in their 7:30 p.m. clubs will prove invaluable.

Probabilities Never Wrong

The quotation from Aristotle to the effect that probabilities are never wrong is a translation of the Greek which is practically as follows: "In regard to the confirmation of evidence and the law of probabilities, when a man has no witnesses he can say that the decision should be given in accordance with probabilities and that this is the meaning of the oath according to the best of one's judgment. For probabilities cannot be bribed to deceive and neither can they be convicted of bearing false witness."

Most Desperate Blood Feud

The most desperate blood feud in the history of the West was the Tewksbury-Graham feud which raged in Gila county, Arizona, from

1887 to 1892. It started with a dispute over stolen cattle and quickly involved all the men and boys in three big families and a number of their friends, the battles at times having twenty men on a side. With one exception, every man who took an active part in it was killed in these five years .-- Collier's Weekly.

Paper-Making

Paper is made from various plant fibers, obtained by disintegrating wood, jute, bamboo, hemp and alfa grasses of Spain and North America. In the early days of the industry, paper was made almost invariably from one of the discarded textile fabrics, particularly cotton and linen, technically called "rags," and including worn-out garments, cuttings and waste from looms.

One of Oldest Cities

Benares, "by the still-flowing Gan-ges," is said to be one of the oldest cities in the world. Abode of sanctity and resort of religious teachers and philosophers. It is the center for thousands of pilgrims from all parts of India. Down on the Ganges river-front are the famous ghats, especially the Manikarnika Ghat with its sacred pool.

Sighing and Yawning

Sighing and yawning are emotion al forms of inspiration, the latter associated with stretching move ments of jaws and limbs. They appear to be efforts of the nervous system to correct, by an extra deep inspiration, the venosity of the blood due to inactivity produced by ennut or grief.

Goddess of the Rainbow In the classical mythology, Iris is the goddess of the rainbow. She is the swift-footed messenger of Zeus and Hera, in the Illad. Iris was the daughter of Electra and the attendant of Juno. It was her duty to cut the thread which detained expiring souls

Ships' Butchers Pet Nurses Since the earliest days of ocean travel, passengers' pets have been placed in charge of the butcher, a custom that has inspired considerable wisecracking among passengers generally, and no little misgiving on the part of the owner of Deta

Major Den-ins E. Nolan, retired, as head of the Department of Foreign, State and Municipal Participation, will him-self make representation to the gov-ernors and legislatures of the various states.

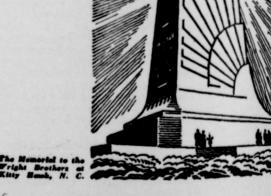

Meanwhile, under the direction of Harvey D. Gibson, President of the Manufacturers Trust Company, and Richard Whitney, former president of the New York Stock Exchange, the prominent figures in the financial capital conducted a 28-day campaign 'r sell \$27,829,500 in debenture bonds of the Fair to finance the construc-

tion period. Every confidence is being expressed that the Fair not only will "pay its way." but that it will bring a biliion dollars more of revenue into Greater New York and stimulate American industry in general to an extent many fold that amount.

The total cost of producing New York's Fair, including collateral improvements, is set at \$125,000,000. Statisticians estimate that the attendance will total more than 50,000,-000 persons.

The City of N w York, the State of New York, and the Government of the United States, according to expectations, will account for \$35,000,-000 of the total expenditures and thus lend an official backing never before achieved.

LEGION AID

Gay Motifs for Tea Towels Historic Hoaxes By ELMO SCOTT WATSON © Western Newspaper Unio

The Sourdough Hotel YOU'VE ever been to Alaska you probably thought it was a good joke on your friends to write letter to them on the stationery of the Sourdough hotel, and you

chuckled to yourself when you visualized them puzzling over some of the statements on the letterhead. The Sourdough hotel is located at 1333 Icicle avenue and among the house rules are these: towels changed weekly; spiked shoes must be removed at night; anyone troubled with nightmare will find a halter on the bedpost; don't worry about paying your bill-the house is

supported by its foundation. This hotel was the creation of a young newspaper man named E. J. tifs-luscious cross stitched fruits White who went to Alaska during the gold rush of 1898. The primitive living conditions in the boom camp of Dawson appealed to his sense of humor so he had printed several

The gold seekers, seeing in this a chance to play a joke on the folks back home, eagerly bought his stationery at \$2 a dozen sheets. White's clever foolery landed him a job on the Klondike Nugget and started him on the career which has made the name of "Stroller" White famous. He's still a newspaper man, publisher of the Juneau Stroller's Weekly, and tourists in Alaska are still writing letters back home on other races, and have enkindled the stationery of the Sourdough hotel.

"Enigmatical Prophesies"

THEN purchasers of "Poor W Richard's Almanac" for the year 1736 opened their copies of that household necessity, some of them, no doubt, were considerably alarmed when they read in it certain "enigmatical prophecies." For "Poor Richard" (otherwise known as Benjamin Franklin) solemnly predicted that during the coming year many of America's greatest cities would soon be under water, that a certain power with which the country was not at war would take great numbers of vessels fully laden out of the seaports of the country, and that an army of musketeers would land in this country to annoy the inhabitants. Furthermore he promised to reveal in the next issue of his "almanack" the proof of these statements if his

So they had to wait patiently for a whole year to learn the answers to these enigmas. But, true to "Poor Richard's" promise, the 1737 issue of the almanac did contain the answers.

Gridders Register a Big Kick for Harvard

A few of the members of Harvard's 1937 football squad pictured during a recent workout at Cambridge, Mass., as they registered a mighty kick in unison for their alma mater. Left to right are: Francis F. Foley, Francis A. Harding. Robert M. Burnett. Torbert H. MacDonald, William J. Clothier, Vernon Struck and Charles Houghton.

The water which had covered the great cities was that of the sea and the rivers, raised by the sun in the form of vapor, then descending upon the cities as rain. The power with which the country was not at war was the wind which did indeed "take great numbers of vessels fully laden out of the seaports of the country."

As for the army of musketeers which would land to annoy this country's inhabitants, they were mosquitoes. For "everyone knows they are fish before they fly, being bred in the water; and therefore may properly be said to land before they become generally troublesome.'

"Exaltation," nee "Yes, We Have No Bananas" WHEN Mrs. Sara Smith exhib-

ited one of her paintings at Claremont, Calif., and the art crit-Mrs. Malcolm Douglas of Seattle, Wash., who was elected president ics dismissed it from consideration of the Women's Auxiliary of the as being "distinctly of the old American Legion at its recent conschool," her husband, Paul Jordan vention in New York. She succeeded Smith, an author and minister who Mrs. Oscar W. Hahn of Lincoln, considered his wife an accomplished

painter, resolved to get back at those supercilious "experts." Several months later an art exhibit in Boston included four paintints by "Pavel Jerdanovitch," who was called the "supreme master of the disumbrationist school of painting." They were named "Aspira tion," "Adoration," "Exaltation" and "Illumination." In the cata logue was this statement by their painter. "To those that realize that real art depicts not what we see. but what we feel, hear and smell, these soul-revealing creations will be sources of ecstatic, moronic rapture.'

The ultra-modernist critics looked at his paintings, nodded sagely and uttered many laudatory comments "the rise of a new star in the art firmament." Critics in New York and Chicago, where the paintings were later exhibited, agreed with them, until .

"Pavel Jerdanovitch" was re vealed as Paul Jordan Smith of California who said that he had borrowed some of his wife's canvases and "just slopped on a lot of paint." For instance, "Exaltation," the most famous of the four, had been called "Yes, We Have No Bananas," and had been used as a fire screen in his home. Smith had produced these ultra-impressionistic pictures he said, "without the slightest knowledge of painting, just to prove that most art critics don't know what they're talking about."

FARMERS everywhere know that the Firestone Ground Grip Tire out-per all other tractor tires. They know its outstanding performance is due to the fame Firestone Ground Grip tread and no other tire can match its performance beca this tread is PATENTED. They know also that no other tire can give them so may important money-saving advantages.

GREATER TRACTION - Takes a deeper and broader bite into the soil and h positive self-cleaning action.

GREATER STRENGTH to resist the strain of heavy pulling is provided becau every fiber of every cord is saturated with liquid rubber by the patented Firesto

Gum-Dipping process. Two extra layers of Gum-Dipped cords under the tread bind the tread and cord body so solidly together that we guarantee the tread will not separate from the cord body.

GREATER SAVINGS—Saves 25% in time and up to 50% in fuel over steellugged wheels. Low-cost Firestone cutdown wheel program permits using one set of tires on several different implements.

GREATER DRAWBAR PULL enables this amazing tire to do more work in a given time.

Only genuine Firestone Ground Grip Tires can give you such performance! See this amazing tire today at your nearest Firestone Implement Dealer, Tire Dealer or Firestone Auto Supply & Service Store.

For greatest economy and performance SPECIFY Firestone **Ground Grip Tires on all** new tractor and wheeled farm implements.

It was just a question of where it hit the truck-and enough to wear them, see the new qualms about that, too

neck; casual felts soft of brim and with tall picturesque pointed crowns; and so the recital might continue ad finitum.

Generally speaking the emphasis is on extraordinarily high crowns although many flattering shapes with lower crowns are advocated. There are many interesting felt sailors for those who prefer lower crowns.

To prove that you are entirely You can see by the model illustrated below to the left the way the new crowns go high and somewhat so becoming and fit that you packed pointed. The hat is typical of the new sports trend. It is a gray oxford felt with stitched velvet band. The youthful skull cap to the right

above is a great favorite among college girls. The backward trend here featured in this bit of a black felt bonnet is decidedly a this-season vogue. So is the very tall crown effect.

Spirituals Born

in Earliest Slave Era or negro spirituals are ngs of a suppressed peounder the yoke of the e system. The Gulf states were the worst offendsongs reflect the condipoor people who lived ng through the whole se natural, untutored ves a writer in the erald, one is struck by expectation of a life to by the sense of a personwith the Deity. There of the future life. The

The best of these spirituals were born in the earliest slave era, when religious meetings were forbidden, and the slaves stole away to meetings that were full of danger. Their religion was not a rigid ethical system, but an emotional affair, that burst out in spontaneous song, born of a simple child-like faith in a personal Father, with whom they could have direct communication.

Like all traditional airs, they varied to some extent each time they were sung, though the pentatonic mode of musical form was adhered to. At a later period (1870), there is for quality-high materials. Many appeared a band of "Jubilee Singbudgets are limited are preferring ers," who attempted to "improve" ntury negro was posithese old songs. They harmonized to invest in the best of materials, sang, "I know de Lord them and brought them "up-to- secure a simple and reliable patands on me," but his was less certain and sang. Tant to be a Christian." date," which robbed them of that tern, and "make their own" dresses personal character and charm and suits. The suit pictured is a simple style that is easy to make at which distinguished the spiritual.

feather on your hat" is fashion's latest decree. All signs point to spectacular feather trims. The hat that concludes this group is a sophisticated little affair modeled after the quaint tiny shapes that flourished in the eighties. © Western Newspaper Union

By CHERIE NICHOLAS

Fashion decrees that the blouse become the opulent note in the costume for fall and winter. Some of the materials are as elegant as looms ever produced. There are brocades in Chinese colorings shot with glints of metal. These make handsome jacket blouses fastened with cuff-link studs, glittering jewel buttons or buttons covered with selffabric.

There is a new fringe weave which is very interesting. It makes up smartly in blouses, boleros and fitted tunics.

Less formal blouses are made of a new satin that has a hammered or rippled effect.

Sealskin Collar and Muff

Sets Show Style Elegance The sealskin collar which adorned

dignified shoulders along about the Gay Nineties had nothing on the 1937 fur collar in the way of elegant style. In fact the modernized version is little different from the old, and, like its old-fashioned counterpart, it adds a ball-shaped muff.

Sealskin collar and muff sets are displayed by the furriers as interesting novelties. Some of them have the cape-like cut, familiar in the old days-the smaller cape standing up around the ears and the larger one covering the shoulders.

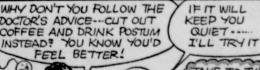

Ankle Length

Ardanse of Paris makes a cock tail dress that is neither street nor evening length, but comes just to the ankle. Its material is light blue heavy corded lace with touches of white. The dress has a white crepe top and a small bolero of the lace.

Costume Accessories

Reptile belts and other costume accessories contribute a striking note to autumn dresses and suits.

BANKERS DO SAY "YES"

Despite the idea many people have that bankers are "cold, hard-shelled, mercenary individuals" whose one aim in life is to refuse a loan, banking as a business is built on the demand for loans.

Bankers are just as anxious to make a loan to a good customer as the customer is to borrow the money. Bank credit is the life-blood of every community, and "bankers do say 'yes'" when the need for the loan is genuine and the ability to repay justifies the risk. Your banker must remember however, that it is your money he is loaning, not his own.
