Chaves County Cotton Quota Receives Increase

Recent Figures

In a report from county agent Tom Reid today, Chaves County has received a favorable increase in the 1938 cotton quota. Mr. Reid stated that the original acreage of 17,384 has been increased to 24,832, which lacks only 542 acres of the original request by Chaves county farmers in their efforts in getting the quota raised.

A base will be figured either on the fifty-forty or thirty-three per cent plan, so that the farmer may be given the most acreage on his total tilled acres. The present set-up or plan, fig-

ured at twelve cents per pound will give an increase of \$350,000.00. The Chaves county agricultural planning board includes W. A. Losey, who returned this week from conference at Las Cruces rela tive to this program.

Ask Removal of Tax Exemptions

predicted that during the twelve months an increase of 3,000 fishing licenses would be recorded including 2,000 resident and 1,000 non-resident.

Total license revenue for the last year was \$154,057.50 compared with \$130,816.80 during the previous period, the report showed. Of this amount, .678 percent came from resident sportsmen and

.322 percent from non-residents. The total number of licenses of all kinds sold, fishing and hunting, was 49,408 compared with 42,414 during the previous year.

ENTRIES IN THE

Chaves County Cotton Quota Receives Increase

Recent Figures

In a report from county agent Tom Reid today, Chaves County has received a favorable increase in the 1938 cotton quota. Mr. Reid stated that the original acreage of 17,384 has been increased to 24,832, which lacks only 542 acres of the original request by Chaves county farmers in their efforts in getting the quota raised.

A base will be figured either on the fifty-forty or thirty-three per cent plan, so that the farmer may be given the most acreage on his total tilled acres.

The present set-up or plan, figured at twelve cents per pound will give an increase of \$350,000.00. The Chaves county agricultural planning board includes W. A. Lo-sey, who returned this week from a conference at Las Cruces rela tive to this program.

afternoon.

BLACK FEATHER

By HAROLD TITUS

CHAPTER XI-Continued

The bow boatman, yonder, cried out in alarm, lifting his paddle high, and went overboard to escape this

The lurch caught Rickman off balance as he lunged forward and grasped a gun lying on packs before him. He cursed sharply, tried to hold the weapon and clutch for the rail at once; the rifle slid into the water with a splash and the man in the stern dived from his seat for sanctuary.

Shaw's gun full on his enemy's

"You are not going on, Rickman," he said evenly. "It's the end of your march! The ma'm'selle proceeds, unpursued!"

The other's eyes were busy, now down, unarmed?" he asked and the feeling hands grapple for him . . taunt was stinging.

"The end of your march . . . in all things!"

"In cold blood . . . and three to The taunt struck home. He could

see Shaw's mouth settle. He moved a hand, then significantly to ward the knife at his belt. "For long I've wished this," he

muttered. "But . . man to man, without odds!"

"Man to man! you beg for that now, eh? You, a snake, begging for such? Well, I'll demonstrate to you what decent folk will do, how far decent men will go . . . with

The muzzle dropped, he squeezed the trigger. Water splashed and the flattening ball ripped crunching through the skin of Rickman's cance below the water line.

Silence a moment. He could hear the water gurgling about the other's feet. Lower settled the canoe under Rickman. It lurched and listed; it went awash and the trader, abandoning effort to keep it righted, vaulted to the lake, supporting himself with a hand on the gun-

"Sa!" cried Rodney. "You men," -to Jacques - "ashore with you! He has no supporters; I'll have none. He's asked for it, at last! I'll take no advantage . . . Ashore,

They went over the side, frightened, and swam slowly for the free hand of each gripping the knife reeds away from which he was hand of the other. drifting in the breeze, faces over sort of terror.

and seizing a paddle, face dark with fury, drove forward. Two forced against the side of the canoe. strokes, three. He dropped the paddle, half rising to lunge and pounce upon his adversary.

had been written down for him. He | could not breathe, could not wrig- the job. waited that pulse beat until Shaw should be poised for his leap and then, cat-like, he shot out a great shoved it, twisting it and Shaw, fingers would not permit. upset by the joggling, sprawled with

Grinning, then, Rickman, supporting himself with a hand on the canoe bow, saw the other break the surface, saw him turn and strike out, swimming for him, heard his rattle of rage through the teeth set on the knife blade.

"Ha!" he cried, swinging the canoe mightily. "Ha, Shaw! Plans go

The stern swept toward the swimmer, blocking his way as Rickman drew himself to the far side, leering over at Shaw, now lifting a hand

Rodney breathed rapidly. The excitement, the unexpected plunge, the cutck effort to close, had taken toll on his strength. He began working himself hand-across-hand along the canoe to be at Rickman. But, even as he went, Rickman moved on the opposite side, keeping more than an arm's length between them, laughing, laughing . . .

"Dunce!" he cried. "Dunce! The other end to, I'd have drilled you, Shaw! I'd have drilled while you whimpered for fair fight! But now . . . Will you wait for me, or will

you come?' Shaw swore hoarsely and started working his way around the canoe, but on ahead went Rickman, laughing until, winded, his pursuer

rested again. "Our trader loses his wit?" Rickman jeered. "Our trader forgets that inland nothing is banned. He plays the gentleman and . . . per-

ishes, eh? One of Rodney's legs cramped and he grimaced in pain. He was breathing through open lips, now, failing to recover strength in this snatch of a rest period.

Minutes counted; seconds, even, were precious . . . Slowly Shaw them. worked himself along the canoe as Rickman jeered. The man was confident, expecting, and with good reason, to see Shaw relax his grip at any moment, helpless through ready, as Jacques leaped out.
weakness even to keep his nostrils "Shaw!"

face, directly opposite one another.

Shaw drew his knees upward until they touched the canoe bottom. He spread his feet wide, he shot them forward, he brought his heels together.

Almost before his legs gripped Rickman he saw surprise and chagrin sweep the man's face. He hooked his own elbows over the rail. He crossed his feet and jerked his legs inward with all the might left in them, with all the steel and courage in his heart. Rickman For a moment they held so, cursed sharply, once, a curse that had begun with contempt and ended with fearful surprise. He had not reckoned strength like this.

The man let go the canoe with his knife and stabbed downward to cut the legs dragging at him. His other hand could not hold him safe. that a second had elapsed and the In a trice he was under water, dihammer not fallen. He laughed dry- rection of the slashing blade going "So, you would shoot a man wrong, dragged beneath the canoe,

"Enough!" he gasped. ". . . turn

back . . . my oath The words carried to Rodney's understanding through the roaring and pound in his ears. They were sweet, they gave him more than desperate determination to go on. He gripped the tighter with his legs on that thigh, drove his head the harder into Rickman's gullet; began to work on that right hand, drawing it in, forcing it to yield, holding it from driving his way, bending it down and backward to wrench the shoulder until the fingers would flex.

"Enough!" His own right was free, now, and Rickman was sinking beneath him as the hold on the canoe was broken. Shaw went under himself, but still held that thigh close, driving the chest down with his head, pull

ing that arm up from behind. He slid his knife against ribs holding it there, seeking for purchase to drive it home and then Rickman, with a last floundering move, rolled him over, there in the green, suffocating depths. But as he turned, his back pressed the blade point. It held an instant, grit-

ted on bone and plunged . . With a quiver Rickman went limp. His arm flexed, his body twitched . . . And then Rodney was rising, rising slowly, almost lazily,

commencing to swim indifferently as in a dream . Jacques was staring hard at him. "It is done, master," he said. "One

LINGERIE BLOUSE IN STELLAR ROLE

By CHERIE NICHOLAS

This is a suit season and a suit season means that the blouse is called upon to play a stellar role. A fashion of utmost importance is the revival of the exquisitely fine and daintily feminine sheer handmade lingerie blouse. We have not worn these charming blouses for seasons and seasons past to any extent but this spring they are the last word in chic. The finely pintucked batiste type is an outstanding favorite. In fact there is almost sure to be a showing of pin tucks somewhere about the blouse, be it lace-trimmed or not. Sprightly jabots are showing their frilly cascades between jackets from openings and even with the conservative tweeds these dainty blouses are correct as the feminine touch is a fashion "must" this season.

Best Dressed Brides Will Be Arrayed in Lace Gowns

The very best dressed brides this spring will most likely walk down the aisle in lace-maybe in their grandmothers' lace dresses or in the new 1938 laces that are so enchanting. Every bride, whether she be married in church or in the garden or just "quietly," can have lace bridal dress fit for a queen, and this may mean the cobwebby Chantilly laces, or the angel skin patterns, or the sheer lace with cord outlines. The church bride, in a truly romantic manner, may wear a gown hinting of an earlier era made up of row on row of narrow lace with quaint puffed sleeves and square neck.

Daytime Styles Daytime coats with elbow-length sleeves, short bolero jackets and smart zipper fastenings are popular.

News Review of Current Events

Because a federal statute prohibits taking of a foreign vote in the United States or its territorial waters, the crew of the German liner Hansa voted on the question of Austrian "anschluss" with Germany while the ship was in mid-ocean en route to New York. Here is the scene in the public room of the liner during the balloting. Seated is Purser Karl Zeplein, who registered the voters. Of the crew, 330 voted "jah"; six voted "nein," and one vote was voided.

Lend and Spend Plan

CONGRESS was asked by President Roosevelt to authorize the

spending and lending of a grand total of seven billion dollars in a special message in hich he set forth his new program for recovery and relief. Ignoring the

expressions of various leaders in opposition to such vast expenditures, Mr. Roosevelt said: "Our capacity is limited only by our

needed is the will. "The time has come to bring that will into action with every driving force at our command. And I am determined to do my share."

gether.

The President declared that the will to co-operate places "on all of us the duty of self-restraint," and that "there can be no dictatorship by an individual, or by a group in this nation save through division fostered by hate. Such division here must never be."

Three groups of measures were roposed. The first involves mainy additional appropriations for the coming fiscal year, as follows:

One billion two hundred and fifty lion dollars for the Works Progress administration; \$175,000,000 for the Farm Security administration; \$75,000,000 for the National Youth administration; \$50,000,000 for the Civilian Conservation corps, and the \$1,500,000 already made available to the Reconstruction Corporation for lending to business enterprises.

In a second group of measures Mr. Roosevelt asked:

Three hundred million dollars for immediate expansion of the housing and slum-clearance work of the United States Housing authority; \$1,450,000,000 for public works loans and grants; an additional \$100,000,-000 for public roads; an additional \$37,000,000 for flood control and reclamation projects already authorized and an additional \$25,000,000 for federal buildings.

A third group listed by the Chief Executive referred to private cred-It involved desterilization of \$1,400,000,000 of gold and a reduction by the Federal Reserve board of member bank reserve requirements which would add another \$750,000,000 to the credit resources of the nation's banks. With these actions Mr. Roosevelt coupled a simplification of Security commission regulations to expedite smallbusiness financing.

Congressmen Vexed

WHILE committees of the senate and house were still trying to reconcile the widely differing

versions of the tax bill passed by the two houses, President Roosevelt sent to the chairmen a long letter urging retention of the tax undistributed profits, which had been eliminated by the senate. Many

members of congress thought the Chief Executive Sen. Harrison was intimating that he would veto the bill if this feature were omitted. That would leave in effect the pres-

ent law carrying a severe tax which

the causes of the prevailing business depression. The intervention by Mr. Roosevelt at this time and in this manner was considered unprecedented and aroused many expressions of to a proposal that he be the Demo-amazement and indignation, especially among the senate conferees. Senator Pat Harrison, their leader

finance committee, obviously displeased, said:

"The President is entitled to his views. Of course, he accords to every one else the same right to "The views expressed in his letter

do not coincide with the sentiment expressed by the overwhelming majority of the senate. My views are well known and need not be repeated again in detail. "The senate conferees will insist

in conference on the amendments adopted in the senate.

Blum was thrown out because he asked broad powers to rule by decree, but the parliament acceded to a similar demand by Daladier, and then adjourned until May 1. leaving Daladier with practically dictatorial powers to deal with the nation's financial and economic problems.

The new premier started immediately on efforts to end the wave of strikes, which were really based on political motives. First he obtained a settlement of the strikes in the nationalized aviation factories, offering a pay increase in exchange for longer hours. He then promulgated by decree a law making a secret ballot obligatory in every factory where conflicts arise. If a majority of the workers decide for a strike, they must evacuate the factory, which then would be "neutralized" pending arbitration. If, however, the strike is rejected by a majority, the armed forces of the nation will be at the disposal of the employers to keep the plant operating.

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

> "Ice Age in the Bronx" By FLOYD GIBBONS Famous Headline Hunter

HELLO EVERYBODY:

For a long time I've been telling the cockeyed world that you don't have to go places to find adventure. I remember once saying that you could get more thrills just by sticking around your own home town than you could by signing up with Admiral Byrd for one of his exploring trips to the South pole.

And now, here comes John Standmann of the Bronx to tell me I was right about that South pole business. Admiral Byrd went down into the Antarctic to study the ice age, but Jack Standmann stayed home and

studied another ice age-in the Bronx.

The Admiral loaded up a boat, signed on a crew, and sailed away toward the South pole, but Jack just put on his coat and a pair of gloves and, in ten minutes, found a spot that was just as cold as anything the Byrd expedition was able to dig up in a year's stay way down there at the bottom of the world. It was in June, 1932, which is a doggone strange time for a man to

go Arctic adventuring in the Bronx. Jack was working in an ice-cream factory and that more or less explains everything. The plant was a new one, and a lot of new-fangled machinery had been installed in it. One of the machines was the big steel conveyor that carried packaged ice-cream into the freezing chamber. That machine was the special bane of Jack's existence. The freezing chamber was a long tunnel where the temperature ran around 40 below zero. Moisture used to gather in there and turn into ice. During a week's time, enough of it used to collect so that there was danger of it stopping the machinery. Then, Jack found himself facing a job he didn't like very well.

Working in Forty Below Zero.

The job was to crawl inside the freezing tunnel and hack and chip out all the ice. It was a chore that took every bit of two hours, but it had to be done a little at a time, for no man could stand that 40 below zero an animated charm. Completely temperature for more than 20 minutes at a stretch. It couldn't be done protects your dresses from spat-

Jack Was Pulled Out of the Freezing Tunnel.

while the plant was operating. It had to be done after closing time. The result was that Jack had to work overtime, and spend most of the evening

On this particular day, the plant had been working overtime itself. The minute the machinery stopped running Jack put on a lot of heavy clothes, slipped his hands into a pair of thick warm gloves, and crawled about 30 feet along the belt conveyor into that freezing tunnel. He worked as fast as he could, but he had been in there only about a quarter of an hour when his clothes were frozen so stiff that he could hardly move about and his gloves were so hard and brittle that he could scarcely use his

He had just about decided to crawl back and thaw out when suddenly he heard the door of the tunnel open, saw the lights go out, and then heard the door slam shut again.

Locked in the Tunnel to Die.

It was cold enough in that tunnel, but Jack suddenly went colder. He Bell patterns are well planned, knew all too well the meaning of that slamming door. The light switch accurately cut and easy to follow. was just inside it. The watchman, not realizing that anybody was in Each pattern includes a sew-chart there, had turned out the lights and locked the tunnel door. Even with which enables even a beginner to the door open, Jack couldn't have groped his way out of the tunnel along cut and make her own clothes. the perplexing maze of conveyor belts. He had been abandoned in that freezing hole-to die.

Jack started to yell-he yelled until he was hoarse. But it was like 211 W. Wacker Dr., Chicago, Ill. servatives. Most significant of his seven in a vacuum. The walls of the tunnel were insulated and sound price of patterns, 15 cents (in lections is Georges proof. He began to crawl along the tunnel, his clothes freezing to the coins) each. steel at every foot of the way. His gloves were as stiff as boards. The cold was penetrating to the very marrow of his bones. Pretty soon he would begin to get sleepy-and then-

Nearly Crazed With Horror.

It wasn't a pleasant subject, but Jack couldn't help thinking about it. Would they find him dead in the morning? Another idea struck him -a gristly, ghastly thought. When morning came, they would start the conveyor, and his stiff, dead body would be ground to pieces by the cogs of the great steel belt. Out of that machine, built to deliver the fixings for parties and the makings for kids' ice-cream cones, would come a sickening mass of frozen and lacerated flesh-flesh that had once been Jack

A prey to thoughts like that, Jack almost went crazy. "It's hard to explain the horror of freezing to death in a pitch dark tunnel," he says. "In my frenzy I imagined I had been in there for hours. I knew I'd be as stiff as my own gloves long before morning. But suddenly it occurred to me that I might try knocking on the wall."

Jack didn't have much hope that that would work. The walls were too thick. But at one point-a place where a cold storage compartment adjoined the tunnel, the wall was not insulated at all. And at that point he started hammering with all his strength. Would anyone go into that compartment? Would anyone hear his frantic signal?

Jack pounded for a long time. His body and face were numb, and his flailing arms were the only parts of him that had any feeling left in them, when suddenly, the lights went on. Someone yelled to him, and Jack doesn't remember whether he answered or not. But presently he felt himself being lifted out of the tunnel and carried out into the warm

Well sir, if anybody in the Byrd expedition had any adventure as thrilling or as nearly fatal as that, I haven't heard of it. Copyright .- WNU Service.

How Do You Wear Your Hat? If the hat is worn straight on the head, the wearer is steady and reliable. If worn slightly to the right that person is confident and sure of himself. And if worn with an overemphasized right tilt, states an authority, the person is conceited. An elevator is a rise-descend machine; extreme left tilt denotes the ladykiller type.

Church Has Facade of Coral Coral entirely covers the outside of a church at Mahe, an island beinated, and the governor appears longing to France in the Indian the party in his state. His co-boss beauty and in the distance, when State's Attorney Thomas J. the sun is shining, is a luminous red.

> Iron in Human Body The body of a full-grown person in normal health contains less than one-tenth of an ounce of iron, the greater part of which is concen-trated in the blood.

Use of Chinese Characters Many Chinese characters or words, when translated into English, describe objects with a picturesque clarity. As examples, says Collier's Weekly, soda water is angry water; a razor is a scrape-face knife: an a railroad engine is a fire cart, and a match is a self-come light.

New, Pretty Fashions Bloom in the Spring

AND you can make them for yourself with the greatest of ease! Send for the patterns right off-even if you haven't done much sewing, they're quick and easy to follow. Each is accompanied by a complete and detailed sew chart that answers your every question.

Gay and Perky Apron. It's exactly right to call this pretty apron a "fashion," because it fits as well as a dress and has

ters and spots. Make it of linen, gingham or percale and trim it with bright braid.

Dress With Bolero.

This charming dress has details that belong in the very forefront of fashion—you see them in the most expensive models. The shirring at the waistline, the flare of the skirt, the wide shoulders, with puff sleeves, the whole effect of swing and gayety, make it smartest of the smart! In silk print, flat crepe, taffeta or (for summer wear) linen or sheer silk, this dress will be lovely. Be sure to wear a flower at the neckline, too.

The Patterns.

1479 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 1% yards of 35-inch material, with 5 yards of bias banding or braid to trim.

1478 is designed for sizes 14, 16, 18, 20, 40 and 42. Size 16 requires 4% yards of 39-inch material for the dress and 1% yards of 39-inch material for the jacket.

IS THE HOME IN JEOPARDY?

Is the much prized, age old sanctuary called Home crumbling to decay, and is there danger of it crashing on the rocks of the modern social and economics realities?

Critics would have us believe that such a hazard exists. Their fear is: That the present day irresponsibility of the institution of marriage is one of the greatest hazards, "only a place to sleep and eat," so they say of the place called home; with no incentive for a m closer binding of family ties; thus a weakening of the pivot of civilization. They would have us be lieve that the present day social life, and the disregard of the foundation of life, which originated in a God and a religion is the cause of these irresponsibilities.

Granted, that all may be true, we're not denying it. We do know that in the nineteen hundred centuries, the world has revolved a good many times, and each revolution has brought a change in world conditions.

Man has been so busy attempting to meet these changing conditions, that there may have been times when he has slighted the perspective of home; but it surely was unintentional.

Since the beginning of time, it has been the desire of the human soul for a place or a retreat, to which one may slip away from the p. m. din of a noisy world, and we do not believe all the complex evils of the fast revolutions will alter to

a great extent thos einate desires. Mrs. F. E. Lewis of Dexter has contributed a poem, that speaks such beautiful thoughts of that retreat.

Home A mansion with gleaming polished

Or lowly cot with blooming rose be-

A place where peace and love abide And gloom, the golden sunbeams

A blushing bride with light and hastening feet Or childish voices shrill with joy,

you smile to greet. A low thatched roof or haughty towering wall That holds the heart, kingdoms

fall. The dwelling place of laughter light, or welling tears

And hallowed memories mellowed by the departed years; With sheltering walls that seem to hold the shield

And draw our loves who've wandered far afield.

Home, a symbol to guard with blood and steel A melting pot, with faith and hope

it's yield. A refuge and sanctuary of the soul Your kingdom that gifts of life

-Mrs. F. E. Lewis.

> ETHEL W. McKINSTRY Managing Editor

IS THE HOME IN JEOPARDY?

Is the much prized, age old sanctuary called Home crumbling to decay, and is there danger of it crashing on the rocks of the modern social and economics realities?

Critics would have us believe that such a hazard exists. Their fear is: That the present day irresponsibility of the institution of marriage is one of the greatest hazards, "only a place to sleep and eat," so they say of the place called home; with no incentive for a m. closer binding of family ties; thus a weakening of the pivot of civilization. They would have us believe that the present day social life, and the disregard of the foundation of life, which originated in a God and a religion is the cause

of these irresponsibilities. Granted, that all may be true, we're not denying it. We do know that in the nineteen hundred centuries, the world has revolved a good many times, and each revolution has brought a change in world conditions.

Man has been so busy attempting to meet these changing conditions, that there may have been times when he has slighted the perspective of home; but it surely was

unintentional. Since the beginning of time, it has been the desire of the human soul for a place or a retreat, to which one may stip away from the p. m din of a noisy world, and we do not believe all the complex evils of the fast revolutions will alter to

a great extent thos einate desires. Mrs. F. E. Lewis of Dexter has contributed a poem, that speaks such beautiful thoughts of that re-

Home A mansion with gleaming polished

Or lowly cot with blooming rose beside the door;

A place where peace and love abide And gloom, the golden sunbeams

A blushing bride with light and

hastening feet Or childish voices shrill with joy, you smile to greet. A low thatched roof or haughty

towering wall That holds the heart, kingdoms fall

The dwelling place of laughter light, or welling tears And hallowed memories mellowed curly auburn haired young lady by the departed years;

With sheltering walls that seem to hold the shield And draw our loves who've wan-

dered far afield.

Home, a symbol to guard with blood and steel

A melting pot, with faith and hope it's yield.

A refuge and sanctuary of the soul -Mrs. F. E. Lewis.

-WHAT WOULD **GRANDPA SAY?**

Grandchildren of American Millionaires Run Away With Titled Europeans, Taking Money With Them!

By JOSEPH W. LaBINE

Last December Countess Barbara Haugwitz Reventlow walked into a United States court at New York and renounced her citizenship. A few days later employees walked out of the F. W. Woolworth stores her grandfather founded, carrying signs which read:

"We like the United States, but want more pay . . . Babs with our money runs away!'

Meanwhile Uncle Sam's bookkeepers in Washington discovered that the former Barbara Hutton was depriving John Public of \$30,000,000 in estate taxes. And citizens generally became aware that their nation places no restriction on export of American capital.

Unlike Frank Woolworth and Char-

ley Manville, old John D. lived to

witness the formation of "foreign

alliances" by his grandchildren. He

congratulations from the oil mag-

nate when she married Max Oser,

a Swiss riding master. But in 1929

been revealed, but she did get

\$4,000,000 from her mother and is

heiress to a huge share of the Mc-

Cormick fortune, which has been

estimated between \$70,000,000 and

\$211,000,000.

The late Frank Woolworth, who once went barefoot because he could afford no shoes, would probably snort at his granddaughter's behavior . these past few years. On each of her two titled husbands she Bessie Rockefeller, is now a citizen has settled \$1,000,000 in cold of Chile.

cash. The first was Prince Alexis Mdivani, who also demanded \$350,000 a year when she divorced him in 1935. The current choice, once-impov- Mathilde McCormick received no erished Count Haugwitz Reventlow, is more conservative with his money Frank Woolworth is not the Beach, his Florida home, and the

only self-made American who | wound was healed. would snort. Another is the How much money Mrs. Oser relate Charley Manville, a Milwaukee tailor and Black Hills gold prospector who made millions from roofing and asbestos.

Only a few weeks after Countess Barbara renounced her citizenship, Mrs. Lorraine Manville Dresselhuys of Holland returned to New York for a brief visit, just long enough to take a similar step. The former Lorraine Manville is old Charley's granddaughter, and a sister of the notorious Tommy Manville whose blonde wives get him in the headlines periodically. And her cousin, the former Estelle Manville, is married to Count Folke Bernadotte of Sweden.

It's an Old Habit.

But Lorraine Manville and Barbara Hutton are not the first rich Americans to renounce their citizenship. It's a habit of social aspirants that dates back to the nineties, when Anna Gould, headstrong daughter of old Jay Gould and heir to \$18,000,000 of his railroad holdings, automatically renounced her citizenship to marry Count Boni de Castellane in Paris. The count spent \$3,000,000 in

American gold in five years and Anna divorced him. But a short time later her brother, Frank Jay Gould, formally abandoned his native flag for France.

Probably the most famous ex-Americans are the Astors, descendants of the German butcher's son who left New York for the great Northwest and made a fortune in fur trade. The Astors began going British in 1899 when William Waldorf Astor shipped for London and took his money with him. A few years later came his sons, Waldorf and John Jacob. The former married romantic Nancy Langhorne of Virginia in 1903, necessitating her renunciation of American citizenship. Today she is Lady Astor, a member of parliament!

It was in 1916 that old William Waldorf Astor went through an imposing ceremony that made him a baron, a title he'd been coveting for years. It meant that approximately \$50,000,000 in New York land was controlled by a member of the English aristocracy.

John D.'s Grandchildren.

The late John D. Rockefeller was another self-made American magnate whose grandchildren married foreigners, Mrs. Max Oser, a Swiss citizen, received millions by way of her mother, Mrs. Edith Rocke-Leller McCormick. Margaret Strong

ABOVE: The late Frank W. Woolworth, who made the dime store millions now being taken abroad by his granddaughter, the former Barbara Hutton. LEFT: Barbara, herself, now the Countess Haugwitz Reventlow, shown with her husband on a recent visit to New York.

Mrs. Margaret Strong de Cuevas was John D. Rockefeller's favorite grandchild and she received \$25,-000,000 in his will. This was because Mrs. de Cuevas' mother, Bessie, was not living at the time old Rockefeller bestowed large sums on each of his children. In addition to this huge sum, Mrs. de Cuevas received more than \$2,000,000 from her grandfather in 1919, and \$100,when her grandmother died.

Married "Poorest Duke."

The list of Americans abroad is guite a bit longer. Close on the heels of William Waldorf Astor was Helena Zimmerman, daughter of the late Eugene Zimmerman, Cincinnati railroad magnate. She married the duke of Manchester in Paris in 1900. Known as the "poorest duke in England," he shared her \$15,000,000 until she divorced him in 1931 to marry the earl of Kintore.

Mrs. Harry Symes Lehr, a native of Philadelphia, formally renounced her citizenship by marry-ing Lord Decies of London. Two months ago she informally repeated her renunciation by boasting in London that she would not live in New York on a bet.

did not approve at first, because Through all the romantic episodes of Huttons, Astors, Whitneys and Manvilles, the American government has sat stolidly, watching money pour swiftly into pockets across the sea.

> The only satisfactory explanation of this exodus of the wealthy is that of social aspiration. Some maintain they live abroad to spare themselves from American taxes. The truth is that most European nations make greater assessments than the United States. Others claim they have flown to Europe to avoid publicity. In the former Barbara Hutton's case this may be true, but an equally wealthy and comely American girl-Doris Duke Cromwell-lives in her native land quite happily.

As for John Public, he doesn't care where the Manvilles, Huttons or Astors live. But he does like to see American dollars stay in Amercan pockets.

® Western Newspaper Union,

LEFT: Old Charley Manville, the Milwaukee tailor who made millions with roofing and asbestos, and whose two granddaughters now live LOW: Mrs. Lorraine Manville Dresselhuys, one of the granddaughters, shown with her Dutch husband and her daughter Lorraine, by her first husband, Clarence Gould. -THE BOOK SHELF

In Prison Cell Told by Byron

By ELIZABETH C. JAMES

ORD BYRON'S "The Prisoner of Chillon" is a story of dungeons and chains, of cruelty and death. Beside Lake Leman in Switzerland stands a castle that once saw the imprisonment and death of the last members of a noble family. The dungeon of this castle was so deep that the water of the lake seeped through the walls and formed little pools on the prison floor. Sunlight never came into the dark prison, there was only one window and that was high and small. Through it

came light during a short part of the day, but the sunshine never came through, and the distorted light gave a wan and ghostly appearance to the interior of the deep dungeon.

Into this prison were placed three brothers. They were the last members alive of their honorable family. There had been seven in the beginning.

but the father had been burned at the stake, two brothers had died on the field of battle and their mother had died of a broken heart.

Elizabeth

Placed so that they could not see each other, each man was chained to a rock pillar. Now the three of them languished in their chains which were so fastened that their the most deadly disease, and bodies were soon indelibly scarred.

One Brother Dies.

After a time the voice of the second brother, the active, out-of-door one, grew more and more despondent; he spoke more softly and less often. Then he did not speak at all. When the keeper came to bring their water and prison food, he found this brother dead.

The two remaining brothers, the oldest and the youngest sons of the family, talked with each other of the battles and the insurrection that had brought them to this prison. But one day the youngest of the family did not answer to his broth-

LORD BYRON A PLAYBOY

Two handicaps attended George Gordon, Lord Byron: his family environment and his own vanity. Gordon grew up without training, for his mother, being deserted by her willful husband, the rowdy Captain Byron, declined into melancholia so overwhelming that at times her mind seemed doomed. The parents left the boy to grow up alone.

Byron's natural pride was enhanced by his unexpected inheritance of the estate and title, for which there had been two heirs ahead of him. His attractiveness combined with his lack of principle kept him in mix-ups with women all his life.

His marriage to a lovely woman of England went happily for only a short time. Soon after their daughter was born, Lady Byron left her husband, never to return to him. She steadfastly refused to give any reason for this, but London soon heard of his behavior in a scandal. He was ostracized, and fled to Italy.

Until the end of his life, Byron lived on the continent.

er's voice. There was only quietness in the dungeon, broken by the hysterical cries of the eldest son shrieking to his brother to stay with

him. But he had died. Terror, Then Calm.

For a time he was stunned with abroad with foreign husbands. BE- grief; he lost track of time or place. He was not conscious of anything except vague oblivions. Then gradually his senses returned to remind him that he was alone in the prison cell. When the keepers came and found that he had burst his chains they did not consider that it was worthwhile to chain him fast again, so they left him free to walk about the dungeon.

Then he wanted to see the world again, and he made steps up the side of the uneven rock wall until he could clutch the ledge of the window and pull himself up to look out through the little opening, Across the waters of Lake Leman and opposite the castle, he saw in the distance an island, green and bright in the summer sun.

Freedom Meaningless.

Then one day he was set free. Someone came to the castle and made negotiations. After a time a keeper opened the heavy barred door and told him that he could now go free.

The prisoner stood alone on the shore of the lake. Where could he go? He had no one in the world to whom he could return. Every kinsman had been killed, there was no friend left who would welcome He was still as much alone as if he were yet chained to his pillar in the dungeon.

Lord Byron wrote his poem, "The Prisoner of Chillon," from a true story. There was a prisoner, one Francois Bonivard, kept for four years in the dungeon of the Castle

of Chillon, near Lake Geneva. © Bell Syndicate.—WNU Service.

'Living Death' What to Eat and Why

C. Houston Goudiss Discusses LAXATIVE FOODS ★

Nationally Known Authority on Food Shows How Right Diet Can Help You to Avoid Health Hazards of Faulty Elimination

By C. HOUSTON GOUDISS

THOUSANDS of men, women and children are alive today because we have learned how to prevent many types of the digestive system is a worked, none of its force. infections and how to cure diseases which once caused un-

We have reason to be proud daily diet sufficient laxative foods, of the achievements of science that is, those rich in fiber or celin fighting disease and lengthening the span of life. But we should be ashamed of the fact work, plant foods are our chief that hundreds of thousands of insource of cellulose or bulk, and dividuals are not getting the most therefore, our greatest aid in proout of life-indeed they are not moting normal elimination. Vegerealizing half their potentialities tables and fruits are sworn foes because improper eating and of constipation, and unrefined cefaulty habits of hygiene cause reals are also extremely valuable. them to suffer from that great evil of civilization-constipation.

EVILS OF CONSTIPATION Someone has called constipation

while this may seem like an extreme statement, it becomes justifiable bran. when one realizes the untold misery and wretchedness that may result when food residues remain to stagnate and putrefy in the

Constipation muddies the complexion, dulls the eye and befogs the brain. It causes a general feeling of discomfort and fullness in the abdomen, lack of appetite, bad breath, coated tongue, a feeling of lassitude and a tendency to be-

come easily fatigued. By weakening resistance, it opens the way to numberless diseases. Serious complications, such as irritation of the appendix, may occur as a result of the friction of hard masses of waste against the delicate walls of the intestine. Piles have frequently been laid at he door of faulty elimination. Do you wonder that I consider

prompt, regular elimination the eystone of good health. Its importance is readily under-

esses by which food is digested and absorbed.

FATE OF FOOD IN THE BODY

From the mouth, food passes by minute, hair-like tubes which ly beneficial. ine the intestinal walls. These tubes converge into the blood vessels and lymphatics which transport nourishment to all parts of the body.

Undigested residues pass into he large intestine or colon, where hey are normally moved along by a series of muscular contracions known as peristalsis, and finally evacuated

The amount of the evacuation varies in bulk with the amount of ndigestible roughage contained in he food. When there is insufficient bulk to promote normal peristalsis, waste accumulates and we have the condition known as constipation with all its resulting evils. Bacteria prey upon the stagnating material, producing oisons which may be absorbed

There is not the slightest excuse or allowing this condition to develop. For the misery and wretchedness of constipation may easily be avoided by including in the

SUNDAY International | SCHOOL

Lesson for May 1 FOLLOWING VISION WITH SERVICE

LESSON TEXT—Mark 9:14-29.
GOLDEN TEXT—All things are pos-ible to him that believeth.—Mark 9:23.
PRIMARY TOPIC—When Only Jesus Could Help.
JUNIOR TOPIC—At the Foot of the

INTERMEDIATE AND SENIOR TOPIC—Living Up to Our Knowledge of Christ. YOUNG PEOPLE AND ADULT TOPIC—Following Vision with Service.

One of the lessons that seems hard to learn and to keep constantly effective in the life of a Christian is that mountain-top experiences of spiritual uplift are not an end in themselves but a preparation for service. All too often we come to regard such times of peculiar blessing, whether in the privacy of our own room, or in the great conference of Christian workers, as something which should glow warmly in our own hearts, making us glad in others. One might just as well hope to feed the physical body constantly without any work or exercise and keep in good health, as to feed the soul on good things, do nothing for God or fellow-man, and still avoid

ly apprehended this truth. Evan. and then rolling them. gelism was the matter chiefly in selves to go out and evangelize. God help us to do it! Jesus rightly characterized the

ing scribes, a distracted father, a four and then draw two more. demon-possessed boy, and defeated disciples." called forth the rebuke of Jesus "is revealed in different phases. There were the scribes, willful and perwomen shots in the country, Miss sistent unbelief; there was the Eleanor Lum of Beaver college, father, unwilling unbelief; there Jenkintown, Pa., carried off the Na- was the boy, irresponsible unbelief;

> mosphere" (Morgan). As we look at that depressing pic- A Time for Anger ture of long ago, let us consider ourselves lest we also be tempted to "limit God" by our faithlessness. The most casual reader of Scripture cannot help but see that God seeks out and honors faith, and as we begin to study God's Word with care we realize that the fundamental of all fundamentals is really to believe God. Some Christian men and wommony for God by fully believing Him old rye with them. and His Word, but many of those who profess to follow Him actually make Him appear ridiculous before the world because their unbelief makes Him out to be a "small" God instead of the infinite, eternal,

II. The All-Powerful Saviour (vv.

The keynote of our first division might well have been the sad words 'they could not' in verse 18. But now the Son of God has come and the new keynote is the inspiring words of verse 23, "all things are possible to him that believeth." There is no problem too difficult for our Lord; there is no sorrow too deep for His comfort; there is no challenging opportunity too great for His enabling power.

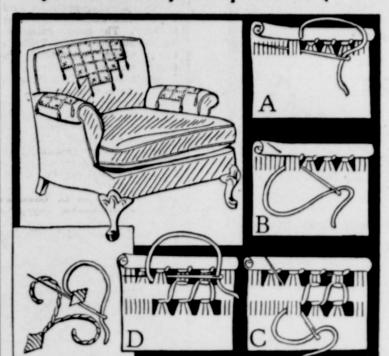

A distressing fact that emerges as one becomes acquainted with Christian work and workers is that the work of God is being hindered by men and women who deny their testimony by their destructive works. One wonders if much of it might not be stopped "dead in its tracks" if the ones against whom the attacks are directed were first to see that their own life is blameless before God and then trust Him to meet the issue. He is able. Read Isaiah 54:17, and if you are a true "servant of the Lord' claim your "heritage.

III. Prayer the Connecting Link

The disciples in chagrin at their inability to deal with the difficulty of the demon-possessed boy, having witnessed the power of Christ in delivering him, begin now to realize that evidently even though unconscious of it, they had come into the powerless position of unbelief.

What a solemn warning there is for us in the experience of these followers of the Lord. Like the termites who destroy the very life and strength of wood-and yet leave it apparently whole, only to crumble in dust when it is put under the pressure of daily use-there are spiritually destructive influences which all but unconsciously destroy the virile strength of the Christian. Prayerlessness is the most effective weapon of Satan at this point. Without prayer there is no power. Real problems are not successfully met nor are opportunities grasped "but by prayer."
