MRS. J. L. KING DIES Mrs. James Luther King passed

to get better but on Thursday she suddenly grew worse and Mr. King and Clarence left immediately for Ravenna, arriving there only a few minutes before she passed away.

Funeral services were held on Monday afternoon at the Ravenna Baptist Church, with the pastor of the church, the Rev. Moss, officiating. Interment was made in the Fairview Cemetery at Ravenna.

All of the three children were present at the time of her death except three, who were unable to go on account of illness.

Henry Alice Cappleman was born June 3, 1869 at Lannius, Texas. She was married Nov. 26, 1885 to James Luther King and to this union was born 14 children, seven of whom survive. Soon after marriage, they united with the Baptist church and remained in that faith

Most of her life was lived in Texas. Seventeen years ago the family moved to New Mexico.

Surviving with Mr. King are seven children: Mrs. R. W. Streety, Clarence King, Mrs. O. J. Atwood the Jal area. The well and Rufus King, all of Hamerman; 370 barrels of oil a day at Mrs. S. C. Christensen of Magdalena; L. J. King of Dallas, Oregon,

Mr. and Mrs. Bill Burck and Mr. and Mrs. Birdwell of Roswell were visiting relatives and friends

In Memory of Flanders Fields

What is Poppy Day?-Poppy Day is observed throughout the United States by wearing memorial poppies in honor of the World War dead. It will be observed this year on May 28, the Saturday before Memorial Day.

What is the Memorial Poppy? The memorial poppy is a replica of the poppies which grew on the battlefields of France and Belgium during the World War.

Why was the poppy chosen as the memorial flower?-The poppy was chosen as the memorial flower for the World War dead because it grew where they fell, the

one touch of beauty in the desolate battle areas. Who makes the Memorial Poppy?-Memorial poppies are made by disabled World War veterans working in government hospitals and in convalescent workrooms maintained by the American Legion Auxiliary.

Who distributes the Memorial Poppy?-Women of the American Legion Auxiliary, working as unpaid volunteers, dis-tribute the poppies throughout the United States.

What is done with the money contributed for the poppies? -Every penny is used to support the work of the American Legion and Auxiliary for the welfare of the disabled veterans, their families and the families of the dead.

Who wears the Memorial Poppy-Every American who wishes to honor the war dead and the war's living victims.

TEXAN DIES The passing of Jim Wheat marks

the passing of one of West Texas' most colorful figures. Two sons, Jim and Woodrow, and one daughter, Mrs. Bob Moorhead, all of Mentone, survive. His

wife died about seven years ago. An irrigation expert, Mr. Wheat formerly lived in Grandfalls. In 1920 he went to Loving County and established the town of Mentone, purchasing 7,000 acres of flat land. When he announced his

intention of drilling for oil on the lang, geologists were amused. There was no oil under the land, they said. But Mr. Wheat went ahead and discovered oil. He saw the field develop into one of the most important in this section of the state.

The death of Jim Wheat Monday marked the passing of one of West Texas' best known pioneers. Determined, rugged, plain spoken and resourceful, Mr. Wheat was a colorful figure. He was responsible for the Wheat oil pool in Loving County and for much of the development of the county.

When this writer was connected with the old Mentone Monitor, we first met Jim Wheat. He bought the first newspaper we ever sold. from that time until just before his fatal illness we enjoyed his friendship.

Jim Wheat has helped many a man in recent years but his good deeds were seldom told — The Ward County News.

WILLIAM MACLEOD RAINE'S

To Ride the River With

SYNOPSIS

Ruth Chiswick of L C ranch, obsessed by fear of danger to her outspoken and bullheaded father, Lee, from a band of lawless rustlers headed by Sherm Howard, decides to save him by eloping with young Lou Howard, Sherm's son, and comes to the town of Tail Holt to meet him. While in Yell Sanger's store, a crook-nosed stranger enters, sizes up the situation, and when a drunken cowboy. Jim Pender, rides in and starts shooting, protects Ruth, while Lou Howard hides. Disgusted with Lou's cowardice, Ruth calls off the elopement, and sends the stranger for her father at the gambling house across the street. There the the stranger for her father at the gambling house across the street. There the stranger, calling himself Jeff Gray, meets Morgan Norris, a killer, Curly Connor, Kansas, Mile High, Sid Hunt, and other rustlers, and Sherm Howard. Lee Chiswick enters, with his foeman, Dan Brand, and tells Sherm Howard of his orders to shoot rustlers at sight. Jeff Gray returns to Ruth and coldly reassures her of her father's safety. At supper, Ruth introduces Jeff to her father and Brand, and in Sanger's store later she speaks cordially to Curly Connor.

CHAPTER II-Continued

Curly spoke in a friendly way to her father and then to her. Morgan Norris scowled. He had been talking as they entered, but his words had apparently dried up. After paying for the sack of tobacco Sanger handed him, he walked past Ruth out of the store. It seemed to her get." there was an insolent defiance in the slight swagger with which he said. "No use making a fuss. I'm moved.

On his way out Curly stopped for another word with Ruth. He considered her the prettiest girl within a day's ride, and he was quite will ing to make the most of their rath er slight acquaintance.

Lee Chiswick passed them with some bundles in his hands.

"I'm putting these in the saddlebags," the cattleman said gruffly. 'Yes, Father, I'll be right out,' Ruth answered. She knew he was annoyed at her for falling into talk with Curly Connor, a wild young fellow reputed to be hand in glove with the rustlers.

"We're starting," Chiswick growled over his shoulder.

The cattleman walked across the road to the hitch-rack and began putting packages in the saddlebags of his mount. Through the deepening dusk he saw Dan Brand coming down the street leading Ruth's chestnut mare. Morgan Norris leaned against a doorpost at the entrance to the Golden Nugget.

The foreman fastened the chestnut with a slip-knot. "Got to get me some eatin' tobacco," he said, and bowlegged across the road to the store.

As Brand passed the two young people, he gave Ruth a curious wn at the corral where she had left her horse, he had learned a bit of news.

"All set to go?" Ruth asked him. "Soon as I get my chewing." Curly was speaking to the girl in · low voice. She shook her head,

"No Mr. Connor. I'm sure I am flattered. But you know Father

don't think he would make you welcome at the L C if you rode out there.' "Not even if I dropped in kinda

by chance?" Ruth laughed. "Young men who

drop in by chance don't fool him any more." They followed Brand out of the

store. Night was sweeping down over the valley. The first evening stars were pricking out. Above the door of a saloon farther down the street a lantern had been lit.

Men drifted in and out of gamno longer in sight. He had disappeared into the Golden Nugget. Mile High and his friend Sid moved with trailing spurs to their cow-

Someone invited them to come back and have another drink. "No, sir, we're hitting the trail," Mile High called back.

From the alley beside the Golden Nugget a flash split the darkness. The blast of a gun sounded-twice.

Lee Chiswick caught at the pommel of his saddle, at the same time dragging a revolver into sight. Ruth ran forward and slipped an arm around his waist.

"Get back, girl!" he shouted with an oath

A man came swiftly, weapon in a faint trickle of smoke drifted. The mighty fast." man was Jeff Gray.

Ruth clung to her father, her body between him and the runner. "Don't you dare!" she cried wild

ly. "You murderer!" Gray stopped abruptly, and thrust

his gun back into the holster. "You don't think . . ." he began.
"Lemme go, you little fool," Chis-

into the night.

CHAPTER III

In an incredibly short time after the firing had ceased a crowd of chance. milling men surrounded the Chiswicks. All the color had washed out of

Ruth's face. Her arm still supported the wounded cattleman. "Someone get a doctor," begged.

"No doc in town," Mile High answered. "I'll ride to Tough Nut for one if you like. Miss." Lee drew a hand across the back

of his neck and looked at the stain.

'Creased me," he said. "Must have knocked me dizzy with the shock. No more than skin deep." From the outskirt of the press Morgan Norris asked a question.

'Who did it?' "That sorreltop stranger," answered Curly. "Open out a way, boys, and let Mr. Chiswick through. Better get him into the Golden Nug-

"I'll go into Sanger's," Chiswick

If there is another murderer wants to get me, here is his

> At the edge of the village, Chiswick pulled up, thanked Curly, and sent the young man back. A quarter of a mile farther on he took a hill trail.

"It's five miles farther home this way, Father," Ruth said. "And a rough trail for night travel. With your wound-

"I keep telling you I haven't any wound," he exclaimed. "We're going this way because it's safer. They'll think we will travel by the main road. If a trap has been laid, we'll miss it."

"Something in that," Brand agreed. "I don't reckon anybody is laying for us, but no need to take a chance.'

A crowing cock was proclaiming the advent of dawn when they reached the L C ranch.

Ruth poured her father another cup of coffee. He took it absentmindedly, his eyes on a paper in his hand. "Reckon I better put the date in,"

he said aloud, to himself. The paper was a bill of sale. It "This is to certify I have this day

sold to Barclay Broderick one hundred and eighty (180) yearling heifers branded L C, Lazy D, and J-M, and I guarantee peaceable possession of same. Lee Chiswick." His daughter watched him, waiting for a favorable moment. It was the second morning after their re-

turn to the ranch, and she had made up her mind to confess now. She was nervous, for she was not at all sure what he might do. This was had she been such a fool? "Something to tell you, Father,"

With a pencil he wrote the date on the bill of sale. "That ought to e about the thing." He looked up.

Small gleaming teeth, strong and even, bit into her upper lip. "Can we go into your office?" she asked. He finished the coffee. Ruth followed him. In the movement of her fluent body was a fine animal vigor. She shut the door of the lit-

Ruth swallowed a lump in her to Tail Holt I didn't know you had gone there, Father," she began. "Didn't?" Chiswick's eyes came

Sardines Characterized as Hobos of the Sea; They Travel Long Distances

the sardine has been characterized by the California State Fisheries laboratory as being a veritable hobo of the sea, writes a San Francisco United Press correspondent.

Its wanderings, in fact, are so great that the fish threatens to involve international complications with Japan, Mexico and possibly other countries.

The system which the state lab oratory employed has been to catch sardines, tag them and then keep records of where they eventually were caught again.

This has been made necessary by the controversy of whether the California sardines or whether the various sections of the seas harbor

Lesson for May 29 MAINTAINING PERSONAL EFFICIENCY

LESSON TEXT—Dan. 1:8-16, 19, 29; I Cor. 9:24-27.
GOLDEN TEXT—Every man that striveth for the mastery is temperate in all things. I Cor. 9:25.
PRIMARY TOPIC—How Daniel Pleased God.
JUNIOR TOPIC—Ten Times Strong.
INTERMEDIATE AND SEMIOR TOPIC—In Training for the Game of Life.

YOUNG PEOPLE AND ADULT TOPIC—Liquor's Effect Upon Working

Personal efficiency is a subject which is receiving much attention in our day. There has never been so much accurate and usable information as we now have regarding diet, exercise, and medical care The mind as well as the body has come in for attention and scores of books are available on the development and full use of the posers of personality. Some of these are trash, but others are helpful. Business is co-operating with the school and the home in giving boys and girls the opportunity to grow up to be useful and happy members of society. The church adds its inportant contribution, although se must confess that it is far from what it might be by the grace and power

Having done all these things for the good of the people, we then largely destroy their value by permitting the use and sale of intericants which destroy personal dficiency and dull moral perception. I. A Sound Mind in a Sound Bely

(Dan. 1:8-16, 19, 20). Daniel and his three Hebrew conpanions had been brought to Babychosen to enter the royal school for future service at the court Every however, included not only mest which was unclean to the Jew but wine, which Daniel knew to be to desirable. It took holy boldness to ask to be excused from that which the king had prescribed, but Daniel was blessed not only with courage.

The experience of Daniel and his brethren is not just an incident eagerly grasped at by "blue-nosedreformers" to prevent their neighbors from "enjoying" intoxicating lique. rapidity of muscular action of all absolutely taboo with such responsible workers as railroad engineers. Cake Recipe Contest?

First Prize \$25.00—Five Second Prizes of \$10.00 Each and Ten Third Prizes of \$5.00 Each

HAVE you submitted a recipe in the big Cake Recipe Contest now being conducted through this newspaper by C. Houston Goudiss, author of our "WHAT TO EAT AND WHY" series?

If not, take time today to write out your favorite cake recipe, and send it to him, attaching the coupon below.

There are no restrictions as to the type of recipe that may be submitted. A simple loaf cake has an equal chance with an elaborate layer cake, provided it's good! So send along the recipe for that cake which never fails to delight your family and friends.

You'll agree that this is one of the easiest contests you ever entered. No letter to write; nothing to buy. You won't have long to wait, either,

to know the outcome of the contest. For all recipes must be postmarked not later than May 31, 1938, and prize winners will be announced as soon as possible thereafter.

Prize winning recipes, together with those receiving honorable mention from the judges, will be printed in a booklet to be distributed nationally.

The winning cakes will be selected by experienced home economists on the staff of the Experimental Kitchen Laboratory maintained by C. Houston Goudiss in New York City.

Enter your recipe in this contest today. Mail recipe and coupon, properly filled out with your full name, address, town, state, and the trade name of the shortening, baking powder and flour used in your recipe to C. Houston a new place. Wher Goudiss, 6 East 39th Street, New York first, keep it there.

Spirit of Pioneering Flavored Early from North Platte to Omaha. The ship reached Omaha at midnight and Knight was told the hop to Chi-**Development of America's Fastest** Postal Transportation; New York-Washington Route Was First

By JOSEPH W. LaBINE

The scene was Mineola, N. Y. The date, sometime between September 23 and 30, 1911. An excited postmaster lifted his eyes to the heavens and saw mail pouches plummet toward him from the cockpit of an early model army

That was the start of air mail, a national institution which currently observes its twentieth birthday anniversary. Officially, air mail dates back to May 15, 1918, when the first scheduled flight was made between New York and Washington under postoffice department supervision. But in 1911 the intrepid Earle Ovington made history by carrying about 37,000 pieces of mail from Nassau boulevard airport, Long Island, to Mineola, where he dropped the pouches and flew back home.

In 1911-and even in 1918-it was considered an impractical stunt. Today, in 1938, giant silver airliners glide to every corner of the nation day and night, carrying the written word of man to distant destinations in incredibly fast time. Last year 760,000,000 letters were flown by a service

which has become an all-imidentified with the game-Knight flyportant factor in American business and industry.

Such an institution would bring joy to the heart of a man named John Wise. Mr. Wise rose from his seat in congress back in 1843 to propose legislation regarding the carriage of mail by aircraft. But Mr. Wise might also have aged prematurely had he realized the setbacks confronting aviation and air mail before it reached its 1938 stage of de-

For air mail has not been a smooth and successful venture. It has weathered storms far more severe than those of a wintry Rocky mountain night at 10,000 feet. It has seen the flush of premature success, as in 1926 when a pound of mail brought the carrier \$3.00 for 1,000 miles transportation. And it has seen the depths of February, 1933, when the postoffice department cancelled all contracts because a few major companies had swallowed the little fellows.

War Speeded Air Mail.

The World war sped adoption of air mail because aircraft had been used so successfully in France. In the beginning the postoffice department had complete supervision over the work and army fliers in army planes handled the transpor-But late in 1918 the post office department dropped its army affiliation and bought its own planes.

As in 1938, the economic rule governing air mail expansion in 1918 is that such service becomes a necessary utility when it operates between points farther apart than a night's journey by train. With that in mind the postoffice department began planning a transcontinental route from Atlantic to Pacific. This job was flavored with the pioneering spirit of America's first transcontinental railroad or her coast-tocoast telephone and telegraph sys-

The route was composed of four distinct sections. The first, flown May 15, 1919, was between Cleveland and Chicago. The second was established July 1, 1919, between Cleveland and New York. On the anniversary of the first section, May opened between Chicago and Omaha. And the following September 8 the fourth section between Omaha

and San Francisco was inaugurated. It sounds simple and matter-offact, but many a grim faced pioneer pilot acquired the lines of age cago was canceled because of bad weather. Even the next pilot had left the airport.

Trouble Over Iowa City.

Knight, realizing the flight's im-Chicago, a route he had never be-fore flown, and under difficult robe. Private operators prospered in 1926 when the rate of pay for air mail was changed to a poundage basis on a fixed rate not exceeding \$3.00 a pound for the first 1,000

aviator's costume of 15 years ago, shortly after his epochal night flight from Omaha to Chicago. Knight, now retired from active flying, is with United Airlines in Chicago.

tation. For several years the post- | miles. Immediately began an agoffice department conducted experiments in night flying with radio, radio beams and airway lights. On July 1, 1924, the first scheduled night flight was successfully completed. but as early as 1921 a day-night flight was made across the continent to demonstrate its practicabili-

ty to congress. Behind this venture was Otto Praeger, former assistant postmaster general who pioneered the expansion of aviation. Praeger felt a day-night flight would win congress over to the value of a progressive view on air mail. At 4:30 a. m., 15, 1920, the third division was February 22, 1921, an eastbound plane left San Francisco loaded with mail that landed in New York city at 4:50 p. m. the following day.

It was on the central portion of this flight that Jack Knight ran into such trouble as had seldom plagued an air mail pilot, but he came during that short span of years. through with flying colors to give Such famous pioneers as Jack day-night flying a good name. > > TURBULENT LIFE

The life of Poe is more turbulent than any story that he wrote. Scores of biographers have attempted to reveal something of the spirit of this lonely and passionate man. Although Poe died in his fortieth year, he left literary criticism that is excellent, and short stories and poems that are unexcelled for sheer artistry.

Later biographers have stated that Poe's reputation was worse than Poe. His difficulties at the University of Virginia and at West Point, and his being disinherited by his foster father gave him a name for recklessness when he was very young which the events of his later life did nothing to offset.

Poe lived from 1809 until 1849, attaining a literary fame in Europe as well as in America.

C. Houston Goudiss Noted Food Authority

Describes the Need for

IRON and COPPER

Shows How You Can Help to Avoid Anemia by Including These Blood-Building Minerals in the Diet

By C. HOUSTON GOUDISS

OF ALL the nutrition problems that challenge the home-maker, none is more important than supplying her family's need for iron. This mineral is sometimes described as the supreme element in nutrition because it is an essential constituent of the blood.

How Blood Is Constructed

If you should examine a drop of blood under the microscope, you would observe that it is composed of red cells and white cells. In normal blood there are about 25 million times a million red blood corpuscles, owing their color to the iron-

bearing carry oxygen to all the body tissues, and remove the carbon dioxide formed during the combustion of body

A reduction in the amount of hemoglobin in the blood may cause shortness of breath,

quickened respiration and an accelerated heart action. Lack of appetite, weakness, and a slowing of all vital functions may also result from the diminished supply of oxygen to the tissues.

Lack of Iron May Lead to Anemia In many young people the blood does not function normally, though frequently parents are unaware that anything is wrong. You may scold them for being lazy, for lacking interest in their work, or never heeding the things you tell them, when the real trouble is due to iron starvation which, if long continued, may lead to anemia.

The person who has a tendency toward anemia usually tires easily and lacks pep; complains of cold hands and feet; worries over trifles, and may have a complexion that is anything but rosy.

he felt—he could not move. Lying deficient diet is that it deprives The great danger of an ironthe body of its chief defense quality of the blood is poor, one becomes an easy prey to infection. oner looked about him for some Moreover, if a serious illness ocweapon. Only his arm was free curs, lowered resistance makes it

Two Forms of Anemia

Anemia may be due to loss of Again a noise, this one sounded blood, deficient blood formation, like steam. Looking upward, he saw or to increased blood destruction

Primary anemia is usually power to make red blood cells. Secondary or nutritional anemia may result from loss of blood in an accident, or it may follow a long, infectious illness. For any infection lowers the iron reserve in the body. But the most common cause is a diet lacking in

Including a List of Foods Rich in Iron, Copper

R EADERS are invited to write for a free bulletin containing a list of foods rich in iron and a list of those rich in copper. Also included are sample menus showing how to plan a balanced diet containing adequate amounts of foods rich in these blood-building minerals. Send your request-a post card will do-to C. Houston Goudiss, 6 East 39th Street, New York City.

odent contains Irium!

sufficient iron over a long period

How Much Iron?

It is believed that about 10 per cent of the total hemoglobin in adults is destroyed daily. And for this reason iron-rich foods must be included in the diet every day.

Investigators have found it difficult to determine the exact iron requirement, but according to the latest estimates, from 12 to 15 milligrams a day will not only provide adequately for bodily requirements, but will allow a rea-

Women Need More Than Men Women require more iron than men, in proportion to the body weight, to make good the losses that occur during the menses. Expectant mothers need a generous amount of iron, not only to provide for their own needs and for the normal development of the fetus, but to create a reserve supply in the baby's body which will last through the period of lacta-

The percentage of iron in the baby's body is about three times that of the adult. Nature has wisely designed this reserve to make up for the low iron content of milk which constitutes the chief food during the first six months of life. Nutrition authorities believe, however, that better health results when an iron-rich food, such as egg-yolk, is introduced very early into the diet. This helps to prevent the slight anemia which was formerly regarded as unimportant, but which is now recognized as making the baby more susceptible to infection and re-

Children's Requirement High

tarding growth.

It is desirable to keep the iron childhood, for it has been discovered that better health results when a surplus is aflowed above the daily requirement. But there is a very special need for iron in girls from the beginning of adolescence through the eighteenth year.

Iron-Rich Foods

To maintain top health and prevent the possibility of nutritional anemia, the homemaker must learn to meet the daily iron requirement of her family and not leave this vital matter to chance.

Iron-rich foods include egg yolk, liver, molasses, dried beans and peas, whole grain cereals, lean meat and green leafy vegetables. While milk has only a small amount of iron, experiments show that its iron is readily absorbed and is utilized to good advantage. Eggs are such an excellent

source of iron that one egg yields about one-tenth of the standard requirement. Lean meat furnishes a considerable amount, but liver is so much richer that it should be eaten frequently. Dried beans are inexpensive and when baked with molasses become a good source of iron.

It is a pity that parsley is so often used only as a garnish, because it has a higher iron content than most green leafy vegetables. Though potatoes contain only a moderate amount of iron, they are usually consumed in sufficient quantities to make them a significant source.

Copper Also Necessary Investigation has demonstrated that adequate iron alone is not enough to prevent nutritional aneOverweight?

Safely . Surely . Comfort

mia, for the body cannot iron into blood pigment at copper is also present. The in order to obtain the full be fits of iron, the diet must consufficient copper. HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

> "Monster From the Swamps". By FLOYD GIBBONS Famous Headline Hunter

HELLO EVERYBODY:

Well, sir, if I seem to be continually harping on the over to Speedwell's after business fact that adventures are things you meet up with most fre- and it may take me some time quently at home, you can put it down to the fact that I am there." continually being reminded of it. Just the other day, while look for you when I see you dear. looking through a sheaf of letters I came to a story by a Until he had driven five miles woman who had an adventure on a farm. Well-of course, Merrick thought nothing of his there's nothing unusual in that. The funny part of it was wife nor her slight flush nor her that the farm was in this country, and the adventure was words. Now, however, they reof a sort you'd only expect to run into in the jungles of should she want to know just how Africa or South America, or to read about in some account late he would be? What was she of the grim battles between men and animals that the an- going to do with the time? Why cient Romans used to stage in their gladiatorial arenas.

The woman is Lottie Hawco-Mrs. John Hawco, of New York city. And the animal she fought with was a wild boar. I'll bet a lot of peopleincluding me-didn't know there were wild boars in this country. But there are, as any South Carolina farmer can tell you. How they got here is an interesting story.

You see, the ordinary barnyard breed of pig is nothing in the world but a descendant of the wild boars you read about in tales of old-time Merrie England. Those boars were tamed and fattened and domesticated until, over the space of six or eight hundred years they became the fat, lazy, gluttonous animals you see in hog pens the country over.

How Pigs Get Wild and Dangerous.

But a pig will stay fat, and tame, and lazy only so long as he's kept In captivity and stuffed with chop suey from that well known galva-ONTESTS are a great American summer institution. The above old nized iron can out on the back porch. Once he gets loose and goes back to the woods again and has to rustle for his own food-well-then he gets thin and tough and rangy. His tusks grow out, and in a generation or twm he becomes a boariagain-just as wild and as dangerous an animal as ever he was when he roamed the marshes and forests of old England in the days of Robin Hood.v

There are plenty of those backsliding wild hogs in the back country South Carolina, and the farmers hunt them down and round them up because they destroy the nests of the wild turkeys in the neighborhood.

The Boar Viciously Attacked Lottie's Mother.

And that brings us to Lottie Howco who, on February 16, 1931, was visiting with her mother and her sister, Inez, on a farm near Osborn, S. C. where a wild boar hunt was in progress.

A bunch of men from the neighborhood had been out all day, combing the marshes with packs of dogs, roping boars and herding themalive-into a big high-sided farm wagon. They had just returned home with six or seven boars-big, vicious fellows, waisthigh to a man and weighing three or four hundred pounds-animals that could break a their huge, crunching jaws and which frequency embowel the fierce dogs that hunted them with one sweeping blow of their long, protruding tusks.

The men backed the wagon up to a strong enclosure and were untying the boars one by one and cautiously prodding them into the pen. Lottie, her mother and sister were standing nejr by, watching the proceedings-and then-suddenly-a terrible thing happened.

Attack by a Savage Boar.

The men had unloosed the largest boar and were prodding it toward rs always get their pictures in the paper, as does young the pen when it turned, squeezed between the wagon and the enclosure, Baker (above) who won a balloon-busting contest. He's a shoe and rushed out into the open, gnashing its great teeth and foaming at boy. Below are first and second place winners of a barrel rolling the mouth. It headed straight for Lottie's mother, who was standing nearest the pen, and before she could turn to run, it was on her, throwing her in a heap to the ground, biting at her savagely.

It was the most terrible sight Lottie ever beheld in her life. Charlie, the foreman, stood with his mouth agape, too surprised for a moment to even move. Sister Inez, paralyzed with fright, clapped her hands over her ears and began to scream. Lottie herself was numb with terror, and for precious seconds—seconds that seemed like a lifetime—she stood rooted to the spot. All the rest of the men were on the other side of the pen, or on the wagon, too far away to reach the spot in time to do any good,

Then, all of a sudden, Lottie came to life. She can't explain what happened, but it seemed as if a spring inside her had suddenly been released. She sprang forward, threw herself on the snarling, screaming, rolling jumble of woman and beast, singled out the boar and began beating and mauling and scratching it with insane frenzy.

Surprised Him, So He Fled.

The boar could have killed Lottie with one thrust of its sharp, pointed tusk. Lottie's mother had been saved from death thus far only by her long skirts and thick clothing. But taken by surprise, the boar couldn't quite figure out this wild new menace that came beating and kicking at his flanks-tearing and scratching at his eyes. It was a thing of fury. It didn't seem one whit afraid of the boar. And an animal will often reason that if you are not afraid of him, then he must have good cause

This one did just that. Snarling and grunting, he turned to flee from this inexplicable new attack. He got about three steps, and then he found himself tangled up in the ropes of the men who, by this time, had come around from the other side of the pen to deal with him.

The next thing Lottie knew, she was back on the porch of the farm house with her mother, looking over herself for injuries. She doesn't even remember helping her mother to the porch, and to this day she can't figure out how she came out of that fight without a scratch on her

Barratry in Shipping

Barratry in shipping and navigation includes every wrongful act committed by the master or crew to the prejudice of the shipowner. The master must have deliberately violated his duty to his employer and acted against his better judgment, says Tit-Bits Magazine. Deviating from the ship's course to engage in smuggling is barratry. No act of negligence, inadvertence, or mistake amounts to barratry.

Name Percival Is Greek The name Percival is of Greek origin and means "courteous." Sir Perceval was a knight of King Arthur's round table. Percival Lowell (1855-1916) Boston astronomer, vrote books and made important discoveries in astronomy, also established the Lowell observatory.

Cheerfulness Has Dual Value Cheerfulness has a dual value in life. First, it helps you-then it helps you to help others-and it on spreading out into the great throng of humanity, stirring the hearts of men as the gentle breeze stirs the leaves of the forest-returning to you in its endless course and all the while making the heavy load lighter and the dark road brighter for all.

Oldest Lighthouse in America

The oldest lighthouse in America is Boston light station. Built ir 1716, it was knocked down during the Revolution, rebuilt in 1783. It was then 69 feet high, lit by four whale oil lamps. The tower, 90 fee: high, contains the original stones, it use more than 222 years, plus addi-

R. W. Cumpsten, president pre-O. E. Moore, one of the Pecos Valley's most successful stock feeders, spoke on the sub-ject of "Cattle Feeding." Mr. Moore's speech was timely and to the point. Among many important things he brought out were the facts: (1)-Eventually we must get away from our cotton farming on account of cotton's soil-depleting qualities; (2)-He further emphasized the fact that our high cost of production makes it necessary for the farmers to keep at a high point of production of the soil cultivated; (3)-One of the limiting factors is the amount of water available. Along with this he said soils with high percentages of manures produced with less water than soils without natural fertilizers. Hence the importance of turning to fertilizers producing program and away from soil deplet-

ing crops.

In addition to above general principles, Mr. Moore brought out the fact that we are fortunately located, having goo dfeeder stock both east and west of us. Other states on the stock feeding business have to ship feeders to the corn belt and to market with a larger shrinkage than we have on our fat stock on the way to market. Another important statement was the breed of our sheep-most-ly Rambouillett, according to state college experiments, are as good

If he was in a bank, he'd be the Chairman of the Board, 'Cause he knows jus' what bankers oughter do; = He'd be a better doctor than the smartes' in the land; The preachers would be pikers, too! But, gee, There ain't a thing about our car that he can understand,

My dad could manage all the schools and colleges jus' right,

So he depends on Mother, or on met

An' publish all the magazines an' books. He knows how women oughter dress fer mornin', noon or night, An' what each one should do t' help her looks!

My dad knows more than any other man, without a doubt-(If you could hear him talk, you'd soon agree!) But when he parks the car somewhere an' wants t' get it out,

Other things working to our ad- iels, Jack Yates and Garner Ma- Bauslin. Wilfred McCormick, S. Omar Bar-
