A BIG TASK.

Big Force Laying Pipe to Bumguardner's.

The 8,200 feet of 4-inch pipe ordered by the city last week arrived Monday afternoon at 3 o'clock, and four teams were put to work at once distributing it along the ditch dug from the compress to the Bumguardner hole of water, where the city will get its supply of water.

The water company has a force of twelve or fifteen men at work connecting up the pipe and hope to be able to have the water in the mains by tonight. The work has been going on uninterruptedly since the pipe arrived, both day and night, and every effort is being made to get the water to the consumers at the earliest possible moment.

The task presents no small difficulties. The pipe, which came in on a flat car, was so hot from the sun's rays as to very near take the skin off the hand when laid upon it, which coupled with the heat of the day, made the work progress slowly at best. At midnight the conditions were hardly more favorable, for while the pipe could be handled much better, yet it was impossible to secure adequate light to make very rapid progress, and it requires no little skill and patience to connect up the lengths.

The Standard feels sure that the extraordinary efforts of the water company to keep their customers supplied with water is worthy of the greatest commendation.

Tim Landrum was here from Fife Monday, and Tim says all the reports about big rains and good crops out his way are away off. Tim says they won't make 350 pounds to the acre there.

Frank Watters is in receipt of advice from C. B. Watters that he is in Chicago inspecting the markets. Mr. and Mrs. C. B. Watters left New Orleans a month and a half ago via steamship to New York. From there they went to Battle Creek, Mich., where both have spent some time taking treatment at the sanitarium. Mrs. Watters did not accompany her husband to Chicago, but remained at the sanitarium.

Making Up the Estimates.

Engineer F. A. Gayle reports all the field work on the roads in Road Precinct No. 1 completed, and says he is now making up the estimates. This will require about three weeks' time, before he will be ready to submit his figures to the Commissioners Court. He will then be ready to take up the work of grading and getting the roads in shape.

OIL'S THE THING.

It used to be that sprinkling the streets with water was the only method used in an endeavor to keep the dust down, and, without exception, it has proven more or less a failure. True, it does help for the time being, but long before the sprinkler is ready to make the rounds again the dust devils are filling the air with trash and disease, and the merchants are kept busy dusting their shelves and goods and counters.

Most every city of any importance has discarded the old method of sprinkling the streets with water in favor of the oil method, and the results are gratifying. Not only has it been found cheaper in the long run, but it is more effective. The following quoted from the San Antonio Express gives some pertinent facts on the subject:

"There is one thing that will keep down the dust and that is a coating of oil. Sprinkling with water will lay the dust for a little while, but it serves only a temporary purpose, and unless the water carts are kept almost constantly in operation the dust will not stay put down. The oil settles it, and the sprinkling with oil only needs to be done every two or three months. Some of these days San Antonio may conclude that it is cheaper to sprinkle with oil than it is to have the dust."

And the Dallas News comments as follows:

"Sprinkling with water in times like this is equivalent to throwing good water away. Also good money. The oil treatment is the only one that settles the dust. It is cheaper in the long run, too. Such slight objections as there are to oil sprinkling are negligible in comparison with its vast benefits. Without oil on their busiest streets, life would be almost insupportable in some of the leading cities of the Southwest this very day. There is no common enemy to the health and comfort of householders quite as annoying as dust. Mud is bad, but mud is only naughty as compared to the gross sinfulness of dust. Besides its primary usefulness thus employed, oil also protects the streets from being ground into powder and blown away. It is antiseptic and holds the germs down. Oil is better for a dusty landscape than mint for a julep—which is going some."

WHO FROW'D DAT BRICK? Just 419 years ago today Columbus sailed from Spain to discover Menard county and other sections of America. He made the people there believe that he was hunting a better road to India, but he had of course heard of the San Saba river and the rich lands in the valley of Menard.—Menard Messenger.

The last we heard of Mr. Columbus he was dead and poor Menard remains undiscovered.—San Saba Star.

Hully gee, but those Menardville folks are a stony-hearted, close-fisted, hard-up bunch. The Messenger man says they even failed to fall for a lightning rod and county right graft.

The town is the heart of a community, the country the body. Roads are the arteries by which they live. Good roads mean good circulation and good health.

Ill fares the town, to hastening ills a prey, where teams turn out to go some better way.

If you want to know if good roads are a good thing, ask a horse.

WOOL RATE.

Twenty-Nine per Cent on Raw Wool.

Washington, Aug. 11.—The wool bill as agreed upon will be reported to the Senate tomorrow by Senator La Follette and to the House by Representative Underwood. As the House has the paper bearing upon the bill, that body will have to act first.

The bill was so amended as to require that the proposed law shall take effect October 1, instead of January 1. The conferees hope to have the report adopted in both houses tomorrow and the bill started on its course to the White House, where the President is expected to veto it.

After fixing 29 per cent as the ad valorem duty on raw wool, and changing the wool classification so as to conform to the language of the house bill, the agreement on the other features became a matter of detail.

The change of classification has the effect of fixing a flat duty on all wool, and while it reduces the rates on ordinary wools from 35 per cent, as provided in the Senate bill, and increases those of the House bill from 20 per cent, it also increases the rates on carpet wool from 10 per cent, as provided in the Senate bill, to 29 per cent, fixed by the conferees.

In most respects the duties the house bill and reduced were increased over the rates of the house bill and reduced below those of the senate bill to make them correspond with the raw wool rate, but in some instances they were made higher than those of either measure.

A rate of 29 per cent on noils and wastes was agreed to, while a rate of 34 per cent was determined upon for combed wool and tops, including roving and roping and of 39 per cent on yarns.

There was a compromise in the matter of classification on cloths, dress goods, clothing, webbings, blankets and flannels. In the house bill these subjects were covered in five paragraphs, whereas Mr. La Follette, in the bill adopted by the Senate, embraced all in one paragraph.

As the subject will be covered in the conference report, blankets and flannels will be treated in one paragraph with a rate of 30 per cent, the house rate, while the other articles are made dutiable at the rate of 49 per cent, an increase over the house rate of from 4 to 14 per cent and a reduction from the senate bill of 6 per cent.

A similar compromise was effected on carpets, resulting in making three classes instead of one in the senate bill and nine in the house bill. Class One of today's compromise includes the most expensive grades and the rate is fixed at 50 per cent.

FIRST BALES.

San Saba's first bale was ginned by Farmers' Union gin, Aug. 8th, and was raised by J. E. Besent on the Jas. T. McConnell farm, north of town, and was sold to A. J. Gatlin at 13½ cents. The bale weighed 505, and was ginned from 1524. A premium of \$10.50 was given to Mr. Besent.—San Saba Star.

Mason's first bale of cotton for 1911 was ginned Monday by Will Ellebracht for John Stark, an energetic young farmer living about 2½ miles east of Mason. There were 1450 pounds of seed cotton, and it turned out a bale of 522 pounds, and was sold to E. Lemberg & Bro. for 11½ cents a pound. A premium of \$24 was also given him, making the bale bring him \$84.03. This is about as early as a bale was ever brought to Mason, one having been brought in on the same date twenty-five years ago.—Mason News.

The first bale of cotton sold in Coleman county this year was disposed of at Santa Anna on Tuesday of last week; it was sold at 14 cents per pound, weighed 445 pounds and, with a premium given by the business men of the town, brought a total of \$94.30, which was just \$10.50 less than the second bale in the county sold for in Coleman Friday.—Coleman News.

GOLDTHWAITE KILLING.

Ed Speed Killed by Jim Slack Monday Night.

On Monday night at about midnight the officers were called by Jim Slack, who lives just across the bayou, informing them that he had shot a man and was holding another whom he caught in his corn patch. The officers made haste and went out in Walter Fairman's car, and soon reached the scene of the murder, where they found a man dead. The man killed had been farming near Lometa, but the drouth had burned up his corn and the grasshoppers had eaten up his cotton, and he and his family were out looking for work. He passed through Goldthwaite Monday and a few of our big hearted men gave him money so that he could buy a few supplies for his family, as they had nothing. He was told of work down on the river and started that way, but was met by someone who told him the party was not at home and turned back toward Goldthwaite and night overtook him at Slack crossing, where he camped. His children cried for something to eat and he went into the field to hunt a watermelon, so his wife claims, when he was shot down. The corpse was brought to town and taken to the undertaking parlor of Henry Martin, where it was prepared for burial.

Jim Slack came in and gave himself up to the officers and telephoned to District Attorney Early, who wired back to place him under a \$7,500 bond to await the examining trial which was set for Monday.

Mr. Speed was about 30 years old, formerly lived in Smithville. He has a step-father still living, and Mrs. Speed's mother lives there. The good people of our town made up a purse for the widow and children, as she absolutely had nothing.

The deceased was laid to rest in the I. O. O. F. cemetery Tuesday afternoon at about 6:30, Rev. Jim Weems conducting the funeral services.—Goldthwaite Rustler.

Start a Revolution.

The Mexicans in the Griffith camp endeavored to pull off a revolutionary stunt Sunday, after imbibing freely of Menardville mescal, and wound up the war in a free-for-all fight. Jailer Fuller, who had been scouting about in the neighborhood, arrested five of the belligerents in the name of the United States of America, and landed them in jail. Four of the five paid their fines Monday, while the fifth was released on bond.

Sheriff Wall Monday arrested Cy Bostic on the London road on the charge of stealing a pistol from his employer, W. M. Bryan, who lives on the Davis ranch. The prisoner is also wanted by the sheriff of San Saba county, having escaped from the road gang there while working out a fine.

J. T. Bowers was in town Monday trading.

Mr. and Mrs. Allen Macy, of Ontario, Cal., are the guests of his brother, O. S. Macy, and family, having arrived Sunday. They will visit here about ten days.

A Tracklaying Feat.

The Santa Fe gang of tracklayers accomplished an unusual feat Saturday a week ago in the laying of 12,000 feet of steel, from the Frisco crossing west. This is equivalent to nearly two and a quarter miles of track in a day. The gang did not quite connect with the main line, however, and it took Sunday morning to complete the work. The reason for the rush was that the Santa Fe wanted to have everything in readiness for its first excursion train to San Saba the following Tuesday.

Nice Shower This Afternoon. This afternoon about 4 o'clock a heavy shower fell in the city, lasting probably fifteen or twenty minutes. The rain was accompanied by some light hail, and cooled the atmosphere off considerably.

Statement Regarding Per Diem.

The resignation of Mayor Conley, which was announced in the Friday issue of The Standard, and his communication to the citizens published in that issue, has created considerable interest in the matter.

The Standard feels that the citizens of Brady are entitled to all the information obtainable in the premises, and in accordance therewith, called upon City Secretary-Treasurer Richardson for a statement, which he gave as follows:

"At the first regular meeting of the City Council in January of this year, the per diem for the Aldermen to be elected at the coming April election was set at \$3.00 'per meeting.' Alderman Reagan made this motion and was asked if this meant both regular and special meetings, to which he replied that that was the intention of the motion; that the water bond issue was coming on and would require considerable attention at the hands of the City Council, and that he thought it was worth just as much to attend a special as a regular session. The motion was passed after he made this statement. He stated further that he thought that \$10 per month would be nearer what the salaries should be made, and that so far as he was concerned he was willing to set it at that.

"It might also be said that the Council cannot set their own salaries. This must be done by the retiring Council and the same cannot be changed during the term of office for which they were elected.

"Mayor Conley, as he says, was not present at this meeting, having been called out of the city on a matter of business.

"During the months of April and May, of this year, after the new Aldermen had been installed, five special and four regular meetings were held. At the first meeting in June I was instructed to draw warrants for the per diem of all Aldermen, and in doing so, drew them for the three new Aldermen under the provisions of the order made at the meeting in January, and for the two hold-over members and the Mayor, in accordance with an order made several years ago, when the per diem was set at \$2.00 for each regular meeting attended.

"When I delivered the warrants to Messrs. Abney, Anderson and McKnight for \$27.00 each, they each returned a check, made payable to the order of the City Treasurer for \$15.00, so they have actually drawn nothing for special sessions of the Council.

"Since that time there have been no special meetings.

"Mr. Conley says that the Secretary left out the word 'regular' in recording the motion, but as he was not present at the meeting, and Mr. Reagan, who made the motion, says that it was his intention that the new Aldermen receive pay for both special and regular sessions, I don't see that I am at fault in the matter."

When the Old Wagon Breaks

Come in and get one of our line of Studebakers—the kind that stands up. If you have much hauling to do a Studebaker will pay for itself in a few months by saving you time and trouble and the expense of constant repairs.

You Know the Studebaker Wagon

For more than fifty years its reputation has grown better every year. This reputation is due to the good quality that has always been a part of the Studebaker Wagons. Each part is made from the lumber that is best fitted for that part. New England black birch makes the best hubs—the Studebaker hubs are made of it. Butt cut, second growth black hickory is the best for axles—Studebaker axles are made of it. Selected white oak is best for spokes and running gears—that is what is used in the Studebaker Wagon. The Studebaker Wagon

Is Perfect in Every Detail

That is why we sell it. Come in and let us talk it over. We have some interesting wagon books for every one.

As soon as the survey is completed to Fredericksburg, which will be within a couple of weeks, the surveyors will run a line to Mason by way of Voca, as that town is very anxious for the road and have made overtures to the railroad people and to the Mason committee, and it is within the range of possibility that the road will be built into Mason via Voca. It is known that the committee favors the route by Camp San Saba, but the people of Voca are said to be willing to do more in the way of right-of-way and bonus than the people of the other route. The outcome is awaited with interest.

Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer \$100.00 Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, O. Aunt Sarah Davis and Mrs Fisher Dead.
(Delayed from Last Week.)
Voca, Texas, Aug. 8.
Editor Brady Standard:

There was an ice cream supper at Mr. Will Clemmings Saturday night and also a dance at Mr. Palvado's.
Saturday morning the sad news reached us of the death of Aunt Sarah Davis. She was sitting by the bedside of a sick relative and suddenly turned sick and died in less than ten minutes. Aunt Sarah was the wife of Joe Davis, an old man who had made his home here for over fifty years. She was born in Missouri in 1838, and was married to Joe Davis in Tarrant county July 19, 1857. She had been a member of the Church of Christ for twenty-eight years, and was 73 years old.
Mildred S. Fisher, born in Crawford county, Ark., Oct. 17, 1839 and was married to George Fisher in Williamson county on Sept. 6, 1858. Moved from Bell county to McCulloch county in August, 1902. She was the last one of her family, her father, mother, brothers and sisters having gone on before. Although she was not a member of any church, she was always ready with a helping hand to anyone in need. The greater part of her life was spent in helping and nursing the sick, being a good nurse and one that never tired. She said in her last days that she wished she had lived a more Christian life by uniting with some church and trying to do God's will and it was her desire to be baptised, but she was not able, but God knew her desires. She said she felt that God had forgiven her sins and there was a happy home awaiting her in heaven, where she would be free from all pain and sorrow. They had no children of their own, but dren. She was 72 years old.
