Visit the store of quality and Mr. Kirk takes the greatest pride in his show window, and the brightly illuminated spot attracts the gaze of hundreds of admiring passersby each night. In his display this week Mr. Kirk has fairly outdone all previous efforts, the unusually attractive display of haberdashery being set off to even greater advantage by the pleasing background of holly wreaths and poinsetta decorations, while Old Santa himself smiles a glad welcome and invitation into the store. The window is daily attracting the attention of the shoppers and is the cause of many complimentary remarks.

CATARRH OF THE PHARYNX.

Clearing out your throat every day, all day. That is what you have been doing for months. Possibly years. A little mucus covers the pharynx.

If you were to go to a doctor he would tell you that you have phar-yngitis. If you were to look into your own throat you would find just back of the soft palate a red, lumpy, granular appearance of the back part of the throat. Pharyngitis the doctors call it.

Perhaps he would call it, folicular pharyngitis. It causes you constant annoyance. You are always making slight disturbances when seated in an audience. 'Can't hold your throat still. Stringy mucus bothers you. Worse in the morning.

A-hem! A-hem! A-hem! That is the way you are going nearly all day. Sometimes in the night when you wake up. . . . d ought to gargle your throat with sait water every morning. Cold sait water. That clears out the throat perfectly and makes it ready for treatment.

Peruna is the treatment. Begin. with a teaspoonful before each meal and at bedtime. Try it for a week. You will be convinced. Of course, Peruna will not entirely relieve you in a week. That is too much to expect of any remedy. But it will benefit you so much you will be con-vinced. Yes, it will. It has done

this many times. Folicular pharyngitis. Big words. /.lmost as bad as the disease. But if you take Peruna for one month regularly, you may forget that you ever had such a disease. Then you will have a perfect right to forget the big

words too.

People who object to liquid medicines can now obtain Peruna Tablets.

A Public School Teacher Who Gives Credits for Home Work.

In the November Woman's Home Companion appear accounts of several public schools in the United States where great progress is being made. One of the stories told is the An overcoat or a rain coat for story of a Wisconsin public school teacher who gives his pupils school credits for home work. Following is an account of this teacher and his plan:

"There is a country school in Manitowoc County, Wis., where the teacher, Mr. H. E. ers at this date so they can be prepared against pests and vegetable diseases. The warning given by the agricultural department at Washington is concerning imported Irish potatoes. In view of the fact that several tons of potatoes have been imported and scattered over the country infected with the disease known as "powdery scab," et every farmer ask for homegrown seed. I am glad to note that the government has taken steps to restrict further importations. However, it is a good thing to be careful.

Again in our farm journals ou perhaps have noticed special advertisements for two new bean s. Highly extravagant claims are made for them and already many farmers have bought, or rather I should have said "bitten." One of these great () varieties is called the Shanon' bean. It is nothing more than the old-fashioned asparagus or yard arm bean. Almost all of you know that. The other has the high sounding title of the "Giant Stock Pod." Great claims are made for it. We find that Uncle Sam has found this fraud and it has come under the ban. This bean is nothing else than the jackbean and is only valuable for some

een or window shade, as no d of stock will relish it. It is not good for either man or beast. The question arises, why does the department allow such frauds? Well, that is easily answered. Some one must make complaint and then these parties demand the proof of their guilt. But the warning can be given and save many dollars and much annoyance.

The coming season promises to be a fruitful one. The greatest care should now be given to seed. The weather has been very bad for preserving seeds of all kinds. Do not forget this warning. Any sort of seed exresed in the least to such weather as we have had for the last month and may continue to have will suffer much loss. Many thousands will decay so that by planting time they will not germinate. You will see that there will be an unusual demand for good seed the coming spring. Many thousands of bushels of corn and thousands of tons of cotton seed have been lost over our state by reason of the great Toods. Millions of acres will we to be seeded from other tions of the country. So, to e money, time and good seed, that good care that may cessary for good condition.

Again in our farm journals ou perhaps have noticed special advertisements for two new bean Highly extravagant claims are made for them and already many farmers have bought, or rather I should have said "bitten." One of these great (1) varieties is called the Shanon" bean. It is nothing more than the old-fashioned asparagus or yard arm bean. Almost all of you know that. The other has the high sounding title of the "Giant Stock Pod." Great claims are made for it. We find that Uncle Sam has found this fraud and it has come under the ban. This bean is nothing else than the jackbean and is only valuable for some

een or window shade, as no d of stock will relish it. It s not good for either man or beast. The question arises, why does the department allow such frauds? Well, that is easilv answered. Some one must make complaint and then these parties demand the proof of their guilt. But the warning can be given and save many dollars and much annoyance.

The coming season promises to be a fruitful one. The greatest care should now be given to seed. The weather has been very bad for preserving seeds of all kinds. Do not forget this warning. Any sort of seed exwised in the least to such last month and may continue to have will suffer much loss. Many thousands will decay so that by planting time they will not germinate. You will see that there will be an unusual demand for good seed the coming spring. Many thousands of bushels of corn and thousands of tons of cotton seed have been lost over our state by reason of the great loods. Millions of acres will ave to be seeded from other tions of the country. So, to money, time and good seed, that good care that may cessary for good condition.
