SERVICES SUNDAY.

Rev. John Mullen Will Occupy Pulpit at Christian Church.

Rev. John Mullen of San Angelo, evangelist of the Christian churches for the Brownwood district, will preach at the Christian church next Sunday at both morning and evening services.

Rev. Mullen is one of the strongest preachers in their section of the state. He was formerly pastor of the church at San Angelo, resigning there several months ago to accept the

pastorate of a large church in Illinois. After a few months spent with the congregation in Illinois he decided to return to Texas, and at the earnest solicitation of the district board accepted the position of district evangelist.

A cordial invitation is extended the general public to attend both the services Sunday. Members of the local congregation are urged to be present.

VISITS BROWNWOOD.

Members of City Council Inspect Street Work.

Mayor A. C. Baze, Aldermen H. P. Roddie, A. W. Tipton, L. A. Williams and N. T. Cook, City Attorney Sam McCollum, City Marshal J. M. Anderson and the editor of The Standard formed a party which made a trip to Brownwood Wednesday, the officials going over for the purpose of inspecting the street work being done there and to get first-hand information as to the best methods of handling the work, while the editor went along to serve as a ballast for the other members of the party.

The trip was made in the cars of Mayor Baze and Alderman Roddie, and the start was made from Brady at 7:40. Four cases of tire trouble experienced by Mr. Baze's car caused a delay of about two hours, and it was about 12:10 before Brownwood was reached. The roads were in excellent condition over the entire route, the heavy sand beds of the Colorado river bottoms being well packed by rains a few days previous, and barring the time lost on account of tire trouble, the trip was made in good time.

Crops all along the route were the best ever seen in this section of the state. The best cot-

ton seen on the trip is that between Rochelle and Mercury, where the crop will easily average half a bale to the acre, and many fields will make at least a bale per acre. In some of the fields plants are to be seen on which there are blooms, squares, green and open bolls, and the plants still growing. Much of the feed crop remains to be harvested, many fields of maize and kaffir corn never having been touched at all since the last cultivation. The corn acreage in the section traversed is considerably larger this year than any previous years and the yield is undoubtedly the best produced in the history of the county. Nearly every stalk contains two well developed ears, and three to the stalk is not uncommon. A nubbin this year is going to be a curiosity with the farmers of Brown and McCulloch.

Brown county's roads are not in quite as good condition as are those of this county, the recent rains having washed them very badly in many places, but with very little expenditure of time and money in filling the chug holes, the roads could be made the equal of those of most any section of the state. For the most part they have been well graded, and for a distance of about six miles this side of Brownwood a first-class macadam road has been built.

On arrival at Brownwood din-

ner was enjoyed at the Palace cafe, after which the city hall was visited. Here the party was taken in charge by Mayor J. R. Looney and Aldermen Fred S. Abney and P. L. Howlett, who conducted the visitors over the city for an inspection of the street paving work being done there.

Brownwood is justly proud of

her streets. She can boast of as many miles of macadamized and paved thoroughfares as any city in the state of like size, while many cities of Texas with larger population are far behind her in this respect. A great deal of this work has been done under the administration of Mayor Looney, who is an enthusiast on

HEALTH PAST FIFTY
Careful diet is of utmost importance to men and women past fifty years of age; it keeps up their strength, and the oil-food in Scott's Emulsion is a nourishing food, a curative medicine and a sustaining tonic to regulate the functions.
It contains the medicinal fats of pure cod liver oil and science proves that they furnish twice as much energy as other foods—then too, it creates pure blood, sharpens the appetite, relieves rheumatism, strengthens the body and alleviates the ailments due to declining years.
Scott's is free from wines, alcohol or harmful drugs. Beware of substitutes.

SEVERE PUNISHMENT

Of Mrs. Chappell, of Five Years' Standing, Relieved by Cardui.

Mt. Airy, N. C.—Mrs. Sarah M. Chappell of this town, says: "I suffered for five years with womanly troubles, also stomach troubles, and my punishment was more than any one could tell."

I tried most every kind of medicine, but none did me any good.

I read one day about Cardui, the woman's tonic, and I decided to try it. I had not taken but about six bottles until I was almost cured. It did me more good than all the other medicines I had tried, put together.

My friends began asking me why I looked so well, and I told them about Cardui. Several are now taking it.

Do you, lady reader, suffer from any of the ailments due to womanly trouble, such as headache, backache, aches, sleeplessness, and that everlastingly tired feeling?

If so, let us urge you to give Cardui a trial. We feel confident it will help you, just as it has a million other women in the past half century.

Begin taking Cardui to-day. You won't regret it. All druggists.

Picking Up the Loose Business

Building up a business is largely a matter of picking up the loose trade.

Every business man has a certain amount of trade that is assured. He hopes to build up his business, however, by serving the occasional customer well, and adding him to his permanent list.

The telephone furnishes one of the easiest and surest means of getting and holding the occasional customer.

The WEST TEXAS TELEPHONE subscribers in your vicinity represent an enormous buying power, and you should make it convenient for them to deal with you by having adequate telephone facilities in your place of business.

This is only one of the almost countless uses of the telephone.

VISITS BROWNWOOD.

(Continued from Page 1.)

good roads and good streets, and the work he has accomplished along this line has served to advertise Brownwood far and wide as a city of paved streets. The plan of street paving employed is a most admirable one, and by the method used much more improving can be done than in any other way, and still work a hardship on no one. The first paving was started several years ago, the plan adopted being for the property owners on the streets to bear a third each and the city a third. Shortly after the completion of the first block, citizens in other sections of the city realizing the increased value of their property as well as the pleasure derived from the improvements, got up petitions to the city council calling for the paving of other streets. The work has been carried on in this way until all the principal thoroughfares have been paved, as well as a number of side streets. At this time the city is more than a year behind on work agreed to be done in this way.

One beauty about the work that is being done is its permanency. The street to be paved is first gone over with a machine which digs up the earth and thus forms a soft base for the crushed rock which furnishes the foundation. The crushed rock is spread on this soft earth to a depth of five or six inches and then thoroughly rolled. After it is well packed this is covered with the screenings from the rock crusher and again is rolled. All crevices are filled with these screenings, thus making a surface as smooth as a floor, and the surface is then covered with crude oil and allowed to dry thoroughly before being opened to traffic. This oil serves a double purpose—making the street practically water proof, as well as eliminating the dust.

The average cost of paving under this plan is about 75 cents per running foot to the property owner. Of course in some instances where an unusual amount of grading is necessary the cost will sometimes exceed this amount, the experience of the Brownwood officials, however, showing that this sum is about the average.

After touring all sections of the city where paving was being done, the party left for home at 4:10 making the return trip without mishap, and arriving here at 7:35.

If there was a man in the party who was not a good roads or good streets enthusiast before going to Brownwood he was thoroughly converted by the trip, and the city officials who were members of the party are very anxious to try out the plan

here, and will, in the very near future, take the first steps in this direction.

The excursionists are very grateful to the Brownwood officials for the courtesies shown them during their short stay in the city.

The editor paid the Daily Bulletin a visit while the officials were touring the city. The Bulletin has a well equipped plant, housed in their own two story and basement building at the corner of Brown and Lee streets, right in the heart of the business section of the city. Every member of the Bulletin force, from managing editor to galley boy, was busily engaged in his particular part of the work of making the Daily Bulletin, but not too busy to extend a welcome to the visitor. We were made to feel at home and were shown special courtesies by H. F. Mayes, editor and business manager; Jim White, city editor, and Messrs. Dula, Schermer, Bonser and Poole of the mechanical department.

The Farm Home.

"Every farmer who owns his farm ought to have running water in his kitchen and a bath room in his house, and those who do not own them should have these necessities supplied by the owners," said Mr. A. C. Ebie, a business man of Dallas in talking recently to his neighbors in a farming community near Canton, Ohio, the occasion being the Ebie reunion, when about 300 relatives and connections of the family came together, and his remarks apply to conditions in Texas as well as in Ohio.

"A reason why young people leave the farm as soon as they are able is that they are very much less happy than they might be if a little consideration on the part of the parents were shown them. The reason so many farm wives are old and worn out before their time is that they do so much work every day that a little study and less expense on the part of their husbands would make unnecessary. It is surprising how much additional pleasure and comfort

can be gained at little or no cost, and what a wonderful difference it makes in a home and in the memories of that home. The farmer in reasonable circumstances buys sulky plows and improved farm machinery of all kinds, and generally lives in a house that is absolutely devoid of comfort. A farmer of my acquaintance has running water piped into his barn for his horses and cattle, while his wife has to carry what she uses in cooking and washing from a spring an eighth of a mile distant. It is only reasonable and natural that the boys and girls as they grow up get away from conditions such as these, and go to where they can live more easily and comfortably. The living conditions on the farms must be made better as a necessary part of making farming itself better."

While Mr. Ebie was visiting back home, he aroused much interest and discussion by screening the porches and windows in a farm house he owns there. He did the work himself, at an outlay of several dollars for the wire cloth and two days of time. His neighbors could easily have done the same thing, but like so many of our farmers never thought of it, and considered the disease-bearing flies and the discomfort as being all a day's work. In the same way, the farmer who owns his home could spare the few dollars and the two days to make the home better for the women and children to live in, and could even spare the money necessary for a windmill and water system that would save his wife two thousand pounds of lifting every day, especially as the piped water for the livestock would save him enough time in a year to pay for the whole plant.—Texas Industrial Congress.

(S. J. R. NO. 22.)

Senate Joint Resolution
To amend Section 7 of Article XI of the Constitution of the State of Texas authorizing the counties bordering on the Gulf of Mexico to build sea-walls by adding Section 7a, so as to authorize such counties to build sea-walls and designate sea-wall reclamation districts for the protection of life and property from storm overflow, and to build or condemn land for sea-wall and reclamation districts, the county to have State's title to the roads and bay shore line to low tide within the districts, and the right to issue district bonds for acquiring and developing the district and building the sea-walls, and when district is developed as townsite to sell such portions of the land as not reserved for public use by the county.

Be it resolved by the Legislature of the State of Texas:
That the following amendment to the Constitution of the State of Texas be proposed to the voters of the State of Texas for their adoption in accordance with law, and that the Constitution of the State of Texas be amended so as to add Section 7a of Article XI, and that Section 7a of Article XI shall read as follows, to wit:

Section 7a. Where protection of life, health, property or the sea-wall, any county bordering on the Gulf of Mexico may acquire title to the land for said sea-wall or sea-wall reclamation district as designated by the county Commissioners' court by purchase or condemnation of all the land desired for sea-wall and land for the sea-wall reclamation district from the sea-wall to bay shore line boundary of the property abutting on the bay, and the State hereby cedes to the county, for such district, for reclamation and general uses of the district, the title to bay shore lands in the district between the property tide line boundary and the low tide line of the bay shore, and any land in the reclamation district that may have been retained by the Republic of (or) the State for roads when the lands adjacent were platted and sold, and the county is given the right to dredge in the bay or gulf for fill for the district, and right to sell the land when reclaimed and laid off as townsite or otherwise, and where condemnation is used to acquire the land the proceedings to be as under the Statutes for condemnation for railroads, provided that the condemnation shall vest the title in fee in the county, and county may issue bonds or other evidence of district indebtedness for acquiring the property, building the sea-wall, reclamation developments and all incident thereto as expenses of seawall and reclamation district, with lien on land and such terms and conditions as county, through its commissioners' court may deem best, and the county commissioners' court shall appoint two persons who are owners of land within the district, and who desire to sell for reclamation and buy back from the county when reclaimed, who, with the county judge as chairman, shall continue a sea-wall reclamation district commission, whose compensation shall be fixed by the court, and this commission has power to make all rules and regulations for acquiring the land of district sea-wall building, reclaiming and platting land of district, issuing bonds or other evidence of indebtedness for same, subject, however, to all such rules, regulations and acts of the commission being authorized and approved and ratified by county commissioners' court. The district must bear all expenses of sea-wall and purchase of the land and expense of filing (filling) same and other expenses, and the same shall not in any way involve the county or be a basis for a tax by the county on general lands of the county unless authorized by a vote of two-thirds of the property taxpayers of the county voting at a special election thereof. It is further provided that any owner of land in a proposed district may subscribe and pay for the district commission, when organized, as the pro rata of his land of the expense of the wall, reclamation, platting as town lots on a basis as such area of land is to be the whole land of the reclamation district and sea-wall, and at any time before the completion of the district may surrender the bonds and receive from the county a bond title for his land in town lots, less streets and alleys deducted therefrom, for which on surrender deed may be demanded from the county after the district is walled, filled and platted into streets, alleys and lots, and bonds so bought shall so provide. It is further provided that no district shall be formally designated by the county commissioners' court until owners of at least one-half of the proposed area of district petition thereof and subscribe out for bonds for repurchase from the county as herein provided. This amendment may be acted on without delay of legislation in aid thereof or legislative action may be had in furtherance thereof if desired by the county acting through its commissioners' court.

Be it further resolved by the Legislature of the State of Texas:
That the foregoing proposed amendment to the Constitution shall be submitted to the qualified voters of the State of Texas for their ratification and adoption at an election to be held throughout the State on the second Tuesday in November A. D. 1914, and at such election those favoring the ratification and adoption of said amendment shall have written or printed on their ballots: "For the amendment to Article XI, Section 7a, of the Constitution providing for authorizing counties bordering on the Gulf of Mexico to build sea-walls;" and those opposing the adoption and ratification of said amendment shall have written or printed on their ballots, "Against the amendment

What Do You Think of This?
9 sections, 12 miles of Alpine, all fenced, good ranch house, 3 good tanks. This is one of the best ranches in Brewster county. Price \$2.50 per acre. Bonus. This is school land, there being \$1.40 due the state, 34 years at 3 per cent interest. Easy terms.

Summer Constipation Dangerous.
Constipation in summer time is more dangerous than in the fall, winter or spring. The food you eat is often contaminated and is more likely to ferment in your stomach. Then you are apt to drink much cold water during the hot weather, thus injuring your stomach. Colic, fever, ptomaine poisoning and other ills are natural results. Po-Do-Lax will keep you well, as it increases the bile, the natural laxative, which rids the bowels of the congested poisonous waste. Po-Do-Lax will make you feel better. Pleasant and effective. Does Prohibition Fulfill Its Promises?

Thinking people of every religious creed and political belief should give earnest heed to the expressions of opinion from eminent divines, educators, editors, governors, judges, legislators, and others prominent in every walk of life, who have publicly voiced their sentiments concerning prohibition in words similar to these:

"Prohibition drives underground the mischief which it seeks to cure, making it more difficult to deal with the evil and impossible to regulate the trade." Bishop Hall, Vermont.

"Prohibition has been disastrous to the cause of temperance." Bishop Clark, Rhode Island.

These men are sincere and conscientious. They deplore drunkenness and cry against it as a great evil. Who, indeed, does not? Yet they know from observation and experience, that prohibition does not put a check upon intemperance but that, on the contrary, it gives rise to evils even greater than intemperance itself.
