A Heart To Heart Talk About Feet

How are you, today-and your feet? In good shape for the warm weather? No unsightly corns or bunions? No swelling or excessive perspiring? No flat-foot or broken-down arch?

You can't be comfortable if you have any of these ailments. Your feet might just as well be a couple of stumps or crutches. And no need for it, either. Come to us and let us remedy your trouble with a Scholl Foot Appliance. A remedy for every deformity. Remember that!

Oh, yes! Those new Spring Oxfords. Just a look at them. Ask us-we're always on the job.

False Economy

Perhaps you use an alum baking powder because you think it is cheaper and therefore more economical. But is it?

Leading food experts and medical authorities have for years declared that alum baking powders are not safe to be used. The chief European nations prohibit them altogether.

Can it be truthfully said that an article of food so generally condemned is economical at any price?

Dr. Price's Cream Baking Powder, which is made from cream of tartar, adds only healthful qualities to the food.

The difference in cost of a pan of biscuits or of a cake made with Dr. Price's Cream Baking Powder as compared with cheap alum or phosphate of lime powders is about one cent, which is surely too small an amount to warrant the risk.

ing me feel smaller. I have played The odds were four to two, and with a sudden rally to the support of their chief plotter, the other conspirators rushed the figure that stood throtthing his victim. But Samson South was in his element. The dammed-up wrath that had been smoldering during these last days was having a tempestuous outlet. He had found men who, in a gentlemen's club to which he had come as a guest, sought to use him as a catspaw and murderer. As they assaulted him, en masse, he seized a chair, and swung it flaillike about his head. For a few moments, there was a crashing of glass and china, and a clatter of furniture and a chaos of struggle. Samson South stood for a moment panting in a scene of wreckage and disorder. The table was littered with shivered glasses and decanters and chinaware. The furniture was scattered and overturned. Farbish was weakly leaning to one side in the seat to which he had made his way. The men who had gone down under the heavy blows of the chair lay quietly where they had fallen. Wilfred Horton stood waiting. The whole affair had transpired with such eelerity and speed that he had hardly understood it, and had taken no part. But, as he met the gaze of the disordered figure across the wreckage of a dinner-table, he realized that now, with the preliminaries settled, he who had struck Samson in the face must give satisfaction for the blow. Horton was sober, as cold sober as though he had jumped into ice-water, and though he was not in the least afraid, he was mortified, and, had apology at such a time been possible, would have made it. He knew that he had misjudged his man: he saw the outlines of the plot as plainly as Samson had seen them, though more tardily.

CHAPTER XII.

The second year of a new order brings fewer radical changes than the first. Samson's work began to forge out of the ranks of the ordinary and to show symptoms of a quality which would some day give it distinction. Heretofore his instructors had held him rigidly to the limitations of black and white, but now they took off the bonds and permitted him the colorful delight of attempting to express himself from the palette. It was like permitting a natural poet to leave prose

One day Adrienne looked up from a sheaf of his very creditable landscape studies to inquire suddenly:

She shook her head, and in her eyes danced a light of subtle coquetry. "There are things I have tried to do, and failed," she told him.

His eyes showed surprise.

"Perhaps," he apologized, "I am dense, and you may have to tell me bluntly what I am to do. But you know that you have only to tell me." For a moment she said nothing, then shook her head again.

"Issue your orders," he insisted. "I am waiting to obey."

She hesitated again, then said, slowly: "Have your hair cut. It's the one

uncivilized thing about you." For an instant Samson's face hard-

"No," he said; "I don't care to do that." "Oh, very well!" she laughed lightly. 'In that event, of course, you shouldn't do it." But her smile faded, and after

a moment he explained: "You see, it wouldn't do."

"What do you mean?"

"I mean that I've got to keep something as it was to remind me of a prior claim on my life.'

For an instant the girl's face clouded and grew deeply troubled.

"You don't mean," she asked, with an outburst of interest more vehement than she had meant to show, or realized she was showing-"you don't mean that you still adhere to ideas of the vendetta?" Then she broke off

Could it be that Samson meant to tell Adrienne Lescott what had transpired? Was he, after all, the braggart who boasted of his fights? CHAPTER XII.

The second year of a new order "Leave them where they are," said brings fewer radical changes than the first. Samson's work began to forge out of the ranks of the ordinary and to show symptoms of a quality which "I don't know," said the other, curtwould some day give it distinction. Heretofore his instructors had held him rigidly to the limitations of black and white, but now they took off the bonds and permitted him the colorful delight of attempting to express himself from the palette. It was like permitting a natural poet to leave prose this much-if I've been ignorant of and play with prosody.

One day Adrienne looked up from a New York ways and my ignorance has sheaf of his very creditable landscape studies to inquire suddenly:

She nodded gravely "George Lescott brought me up here "Hasn't it occurred to you," she and befriended me. But she, too, meant to have "l'arnin" -as much of it as was necessary to satisty the lover who might never come. And yet, the "fotched-on" teachers at the "college" thought her the most voraciously ambitious pupil they had ever had, so unflaggingly did she toil, and the most remarkably acquisitive. so fast did she learn. She shook her head, and in her eyes danced a light of subtle coquetry. "There are things I have tried to lo, and failed," she told him.

His eyes showed surprise. "Perhaps," he apologized, "I am dense, and you may have to tell me bluntly what I am to do. But you

know that you have only to tell me." For a moment she said nothing, then shook her head again. "Issue your orders," he insisted. "I am waiting to obey."

She hesitated again, then said, slowly: "Have your hair cut. It's the one

with a sudden rally to the support of their chief plotter, the other conspirators rushed the figure that stood throttling his victim. But Samson South was in his element. The dammed-up wrath that had been smoldering during these last days was having a tempestuous outlet. He had found men who, in a gentlemen's club to which he had come as a guest, sought to use him as a catspaw and murderer.

As they assaulted him, en masse, he seized a chair, and swung it flaillike about his head. For a few moments, there was a crashing of glass and china, and a clatter of furniture and a chaos of struggle.

Samson South stood for a moment panting in a scene of wreckage and disorder. The table was littered with shivered glasses and decanters and chinaware. The furniture was scattered and overturned. Farbish was weakly leaning to one side in the seat to which he had made his way. The men who had gone down under the heavy blows of the chair lay quietly where they had fallen.

Wilfred Horton stood waiting. The whole affair had transpired with such eelerity and speed that he had hardly understood it, and had taken no part. But, as he met the gaze of the disordered figure across the wreckage of a dinner-table, he realized that now, with the preliminaries settled, he who had struck Samson in the face must give satisfaction for the blow. Horton was sober, as cold sober as though he had jumped into ice-water, and though he was not in the least afraid, he was mortified, and, had apology at such a time been possible, would have made it. He knew that he had misjudged his man; he saw the outlines of the plot as plainly as Samson had seen them, though more tardily.

Samson's toe touched the pistol which had dropped from Farbish's hand and he contemptuously kicked it to one side. He came back to his place.

"Now, Mr. Horton," he said to the man who stood looking about with a dazed expression. "if you're still of the same mind. I can accomodate you. You lied when you said I was a savage-though just now it sort of looks like I was, and"-he paused, then added-"and I'm ready either to fight or shake hands. Either way suits me.'

For the moment, Horton did not speak, and Samson slowly went on: "But, whether we fight or not, you've

The booth was in the same room, and, as Horton waited, he recognized the number for which Samson was calling. Wilfred's face once more flushed with the old prejudice. Could it be that Samson meant to tell Adrienne Lescott what had transpired? Was he, after all, the braggart who boasted of his fights? And, if not, was it Samson's custom to call her up every evening for a good-night message? He turned and went into the hall, but, after a few minutes, returned

Woman's Health **Requires** Care

Women are so constituted as to be peculiarly susceptible to consti-pation, and their general health depends in large measure on careful regulation and correction of this tendency. Their delicate organisms rebel at the violence of cathartic and purgative remedies, which, while they may afford temporary relief, shock the system and seriously disturb the functional organs A mild laxative is far preferable and, if properly compounded, much more effective.

The combination of simple laxative herbs with pepsin sold in drug stores under the name of Dr. Caldwell's Syrup Pepsin, is ideal for women's use. A free trial bot-tle can be obtained by writing to Dr. W. B. Caldwell, 452 Washington St., Monticello, Ills.
