THE SENSIBLE SIX

\$940 DELIVERED

Why Oakland Model 34 is the Sensible Six

Look at the Oakland Six from any angle, study it as a complete machine, or as a thing of many separate units-whatever your viewpoint, this car appeals to your common sense. It satisfies your desire for good investment, for power, comfort, and performance, for attractive lines and distinctive style—and it does all this at a cost which good judgment tells you is a sensible price.

The new Oakland model is Sensible because it is a Six. It has the flexibility and power linked with simplicity of construction and economy of operation which users of cars have found to be best obtained in this type of motor.

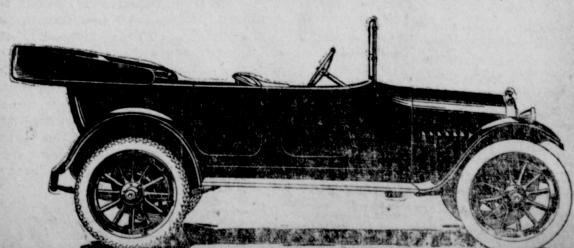

It is sensible because it has a high speed, overhead valve motor. High speed motor means economy, flexibility and power at the speeds you use most. Valve-in-head construction means greatest efficiency of fuel, and in the Sensible Six it means accessibility of valves and cylinders.

It is sensible because it is a light weight car. The Sensible Six weighs 2150 pounds. yet it is a big, powerful, casy riding car, strongly and rigidly built throughout. This in-

sures economy of tires and fuel. It is sensible because of its low cost of operation. The Oakland Six will consistently give its owners from 18 to 25 miles of travel to every gallon of fuel. Because the tires are bigger than needed for weight of the car, tire mileage is much above the average.

Lastly, it is sensible because if its price. Considering all the above mentioned features and superiorities of the Oakland Six, its price is extremely reasonable. At \$940.00 it represents the very limit of motor car value, because it gives more power, more body room, bigger tires, and more built-in service than other cars of its type and price.

M. B. L., whose directors see the beginning of great possibilities for this county and this section by reason of Grant's foresight. To strengthen the Drives Out Malaria, Builds Up System PLOWS, MIDDLE BUSTERS, local organization, and in order that all communities enroute may help in completing the work on the highway, Good Roads asociations have been organized all along the line.

Lohn's response was enthusiastic. Following Mr. Grant's address Dr. J. P. Barton gave a strong endorsement of the good roads movement, and suggested the organization of a Good Roads club. This received hearty endorsement of N. J. Huie and Will Roberts, and Prof. W. W. Joyce added the finishing touch in a brief and clever talk upon the value of good roads to a community. The result was that Mr. Joyce was elected president of the Lohn Good Roads elub and W. F. Roberts, Jr., secretary-treasurer. A committee of five was named by Mr. Joyce to solicit membership and contributions in order that Lohn may assist in the work yet to be done by Mr. Grant. The new highway maps show the Southwest Trail routed through Mc-Culloch county, but other sections are desirous of securing this highway and will make every effort to do so. To keep the highway as at present routed, Mr. Grant must see to the completion of all connections as now outlined; must get every community through which the trail passes as enthusiastic over the proposition as are those alive to the importance of this route. This work will require much

time and effort, as well as expense. By earnest co-operation all this can be aucomplished, and Lohn, through her new Good Roads club has pledged article at our risk. If you don't like
