HER HONOR

THE MAYOR 5-REEL COMEDY DRAMA

A sparkling comedy drama of Cupid in politics—from the Broadway stage success. The story tells how the first woman Mayor of a middle Western town sets out to de stroy the corrupt forces that had undermined the town government and how, at the same time, she settled her own private problems, including the one great problem that is every woman's. The theme of a woman in politics is handled in an entirely nov-el way in "Her Honor the Mayor." Don't miss it.

6-REEL DRAMA It is a tense, human and infinitely appealing story of a woman confronted with one life's greatest dilemas. Neta Maxon, daughter of hardy, somewhat grasping parents. Never until circumstances led her out into the world of wealth, knowing the ways of men, came to a point in her life wher she must herself make a great decision. It presents one of the most perplexing, and at the same time most human, vital problems a woman is called pon to face; the question of whether or not to reveal to the man she is to marry an incident of her youth which may rob her of him.

Aristotle made a collection of proverbs; nor did he count that he was doing herein aught unworthy of his great reputation; however, some of his adversaries may have made this a charge against him. He is said to have been the first who did so, though many others have fol lowed in the same path. Freaks of Nature.

A cat that barked like a dog, re cently exhibited at Boston, tops the list of numerous freaks discovered in this country. Recently, says the Detroit Free Press, a giant glow worm, 41/2 inches long, was found in the Santa Cruz mountains. When placed in the dark a gorgeous effect was produced by the luminous rings circling its body. Mammoth fruit is of frequent occurrence, but in Southstake, Bath, England, a shocking case of plant over-eating was discovered. It resulted in seven daisies growing on one stalk. This freak, scientists said. was caused by fesciation, which means over-eating. White blackbirds, eanaries, linnets and sparrows have been seen and exhibited. The ocean, too, gives its share of curious freaks. A double-sided flounder, with both sides alike, duplicate fins and a misplaced eye, was caught some months

The swamp and wet lands of the United States are equivalent to three fourths of the area of France. Much of the swamp land, however, is wet only after heavy rains and usually bears heavy vegetation.
