

A & M Short Course Program Features Action

(Editor's note: At the request of County Agent E. J. Baskin, The Enterprise is running in serial form the 1933 A & M Short Course Program. It is entirely too lengthy to produce in one issue—so, let all who are interested read this series of installments on this Short Course Program. This is article No. 1.)

There will be more doing and less of listening at the A & M. College Short Course for farm and ranch folks the week of July 24th than at any of the previous 23 "farmers' " short courses held on the A and M campus. There will be more action and less sitting still, more demonstrations and fewer lectures, more initiation into the tricks of many rural trades and not so much theory, however practical that theory has been in the past. It will be, in short, and extension short course.

That describes in brief what visitors may expect when they gather at A and M late in July. Programs are more completely worked out at this stage of the preparations than they have been for several years, making it possible to give in this article a fairly complete picture of exactly what the short course offers this time.

General Scheme Explained

Before plunging into details a person should get in mind the general scheme. Chapel every morning from about 8 to 9 will pack into one hour the general inspirational and informational lectures that have previously occupied almost the entire forenoon. From 9:30 to 12 each morning are scheduled subject matter talks and discussions in a wide variety of rural fields, including home making, dairying, poultry raising, livestock production, farm crops, farm engineering and fruit and truck raising. These correspond to the afternoon programs of previous years, and are designed to aid visitors grasp the fundamentals of production and management, and to prepare them for the "doing" work of the afternoons. After lunch, and lasting until nearly supper time, visitors will engage in making things or in doing things of a practical nature such as home dairy manufacture, meat cutting and curing, tanning hides, grading cotton, making syrup, making grape juice, picking and boning chickens, learning trench silo construction, controlling pests, making rugs, dyeing lamb skins, standardization of food products, grading fruit and truck products, installing garden sub-irrigation system—to mention

only part.

In addition to this, more intensive work is offered those who wish to go into more detail in several lines. These are courses in doing things rather than courses in the academic sense. Featuring these are the tanning of hides and the making of leather products (all day every day); sorgo syrup making (every afternoon); killing, cutting and curing meat (all day every day); making grape juice (every day); cotton management, from growing to marketing (every afternoon); home manufacture of such dairy products as cheddar cheese, cottage cheese, Bulgarian buttermilk, chocolate milk, butter, American cheese, and ice cream (every afternoon). There may be others, such as hand weaving of cloth and working timber into usable wood products by means of a portable saw mill. Agents are requested to write in to headquarters indicating the courses listed above in which they wish to enroll, and also the number of local farmers and farm wives who have preferences. Those not definitely enrolling in these lines of work are privileged to stand by and absorb as much as they can by watching the others.

Varied Entertainment Promised

Nights will be given over to entertainment and visiting new buildings where various departments will furnish appropriate programs. The horse show and tournament will be staged again with the help of College departments and the U. S. Army in the stadium. The new Agri swimming pool, last word in modern swimming facilities, will be open on various schedules to visitors, particularly boys and girls.

Boys and girls will meet every morning for inspirational addresses in Guion Hall from 8 to 9. Following this the girls will go through a daily schedule of talks and demonstrations by groups; and the boys will have a special boys' session followed by talks and demonstrations at Guion Hall by specialists. Afternoons for the boys will be devoted to tours of inspection of buildings and crops and livestock, and one afternoon to the soldering of cans and buckets, tool care and sharpening, and sawing and nailing lumber.

Contests for club boys, and in the case of poultry for club girls also, will all be held on Thursday. Only team members are eligible, and one boy is eligible for only one contest. Results of all contests will be made known Friday night at the stadium.

CHILD'S HABITS CONTROL

Austin, Texas, June 14.—According to the State Department of Health a child's habits are responsible in a large measure, for their mental actions in later life. A child of five or six years may have a bad temper. He can be taught as he grows older, to exercise self control so that it will not often be manifested. It would be better for him though if he had acquired a good temper instead of a bad one.

Now is understood better than before the enduring influence of habits that begin in the earlier years of life, in the nursery, or even in the cradle. In the young child, as a result of habit, certain types of behavior become established.

Perhaps the child had learned while yet an infant, that he could get what he wanted if he cried long and loud enough. Perhaps he had learned, when a little older, that bad behavior, as tantrums, screaming, rolling on the floor or sulking brought him

Conference will be held each morning from 9:30 to 12, and the usual meetings of beekeepers and county school superintendents are scheduled.

Expenses Kept Low Again

From this sketch it will be seen that this is a short course appealing to farmers as well as farm women and boys and girls. The attendance is expected to be larger than last year because a determined effort is being made, on the basis of the program, to bring out large numbers of farmers. On Southern Pacific and Missouri Pacific Lines the charge will be one cent per mile both ways; on other lines it will be two-thirds the regular one way fare for a round trip ticket. Rooms in dormitories will be \$1.25 per week per person, and meal tickets for five days \$3.75. The camp ground has been enlarged and sewerage facilities installed.

All program subjects worked out by staff committees by May 27th are given below, with the understanding that some changes, probably of a minor character, may be made later.

(Continued next week)

what he wanted after his request had been refused or ignored. If he had this experience once you may be sure that he would repeat the action the next time the occasion arose. If he found that such actions did not bring the desired results he would not try it again.

Other behavior habits, good and bad, are acquired from imitating older children and adults. In this way many likes and dislikes, tastes and ambitions which in later years became crystallized into character habits have their beginning. Calmness and poise, as well as nervous and panicky behavior in the presence of an emergency, are nothing more than behavior habits established by imitation and made permanent by repetition. The are responsible far more than they realized for the conduct of the child in the family. In this we see a new meaning of the old adage, "As the twig is bent the tree is inclined."

UNITED STATES CIVIL SERVICE EXAMINATIONS

COLLECTOR OF COTTON STATISTICS; BUREAU OF THE CENSUS—DEPARTMENT OF COMMERCE

Applications must be on file with the U. S. Civil Service Commission at Washington, D. C. not later than June 27, 1933.

Persons who are admitted to this examination will not be admitted to any other assembled examination for which the receipt of applications closes on the date named above. The date for assembling competitors for examination will be stated on their admission cards sent them after the close of receipt of applications.

The United States Civil Service Commission announces an open competitive examination for the position named above, to be held at any of the places listed. As a result of the examination, certification will be made to fill a vacancy in this position in each of the counties named, and at the salary specified.

CITIZENSHIP AND RESIDENCE.—THIS EXAMINATION IS OPEN ONLY TO CITIZENS OF THE UNITED STATES WHO HAVE RESIDENCE, DOMICILE AND POST OFFICE ADDRESS IN ONE OF THE COUNTIES LISTED. FOREIGN-BORN APPLICANTS MUST SUBMIT WITH THEIR APPLICATIONS PROOF OF UNITED STATES CITIZENSHIP.

IN THE APPROPRIATE PLACE IN APPLICATION FORM 1 (OR APPLICATION FORM 8), APPLICANTS MUST STATE THE LENGTH OF TIME THEY HAVE RESIDED IN THE STATE AND COUNTY.

SALARY.—The salary is fixed on a piece-price basis, a specified amount being paid for each canvass made. This amount is based on the number and location of the establishments in the county canvassed. The salary is subject to a deduction of not to exceed 1 per cent during the current fiscal year as a measure of economy.

DUTIES.—To visit in person in the district to which assigned all cotton ginneries, cotton consuming establishments and cotton storages and secure reports of cotton ginned to specified dates and monthly reports of cotton consumed and held and of spindles and active spindle hours. This work requires only a few days, but must be done at stated periods and must receive prompt attention. Collections of the reports by mail, telephone, or deputy is not permitted.

EQUIPMENT.—Appointees will be required to furnish their own conveyance in making the canvass.

EXAMINATION SUBJECT.—The examination will consist of a mental test which will be rated on a basis of 100 per cent. Non-preference competitors must attain a rating of at least 70; competitors entitled to 5-point military preference a rating of at least 65, exclusive of preference credit; and competitors entitled to 10-point, or disability, preference a rating of at least 60; exclusive of preference credit; otherwise they will not be further considered for the position.

EXPERIENCE REQUIRED.—Applicants must have had, within the past five years, at least two year's experience in growing or ginning cotton or manufacturing cotton goods. In view of the fact that the duties require personal contact and cooperation in the district, applications will not be accepted from persons who, during the year next preceding the closing date for receipt of applications, have been engaged in any capacity in the ownership or operation of a cotton gin, cotton mill, or cotton oil mill, or in the business of buying and selling cotton or cotton seed.

AGE.—Applicants must have

reached their twenty-first but not their sixtieth birthday on the date of the close of receipt of applications. This age limit does not apply to persons granted preference because of military or naval service, except that such applicants must not have reached their seventieth birthday.

PHYSICAL ABILITY.—Applicants must be in good health, free from serious physical defects, and physically capable of performing the duties of the position. In view of the benefits granted employees under employees' compensation legislation, persons selected may be required to pass a physical examination given by a Federal medical officer before entering on duty. Failure to pass physical examination will prevent appointment, and to avoid possible expense and disappointment, applicants should consult their family physician and have remediable defects corrected.

CERTIFICATION.—In filling vacancies in this position certification will be made of the highest names on the register of residents of the county where the vacancy exists.

PHOTOGRAPHS.—Applicants must submit to the examiner on the day of the examination their photographs, taken within two years, securely pasted in the space provided on the admission cards sent them after their applications are filed. Proofs or group photographs will not be accepted. Photographs will not be returned to applicants.

FINGERPRINTS.—Fingerprints will be taken of all persons appointed as a result of

this examination.

APPLICATIONS.—Application Form 1 (or Application Form 8) is required for this examination. This form, properly executed, must be on file with the U. S. Civil Service Commission, Washington, D. C., not later than the date specified above. **THE EXACT TITLE OF THE EXAMINATION AS GIVEN AT THE HEAD OF THIS ANNOUNCEMENT SHOULD BE STATED IN THE APPLICATION FORM.**

Applicants who wish to claim veteran preference must file Preference Form 14 (blue), properly executed, and accompanied by the documentary proof required. **VETERAN PREFERENCE WILL NOT BE GRANTED UNLESS DOCUMENTARY PROOF IS SUBMITTED.**

These forms may be obtained from the following (the title of the examination desired should be stated): The U. S. Civil Service Commission, Washington, D. C.; the U. S. Civil Service District Manager, Customhouse, New Orleans, La.; Post Office, Atlanta, Ga.; Cincinnati, Ohio; Chicago, Ill.; San Francisco, Cal.; Old Customhouse, St. Louis Mo.; Assistant U. S. Civil Service District Manager in Charge, Post Office, Denver, Colorado.

Issued June 7, 1933.

Editor's note: The place for holding the above examination for Coke county is San Angelo. The annual salary for the above position in Coke county is \$165.

F-ks, don't fail to can your garden and orchard products—the Coke County Live-at-Home Fair is less than two months away.

LOW PRICE CARS VS. CHEAP CARS

We do not build a low-price car: the cost to us of building our car is pretty high.

But we do sell a high quality car at a low price.

Almost every new Ford V-8 car we have built so far this year, has cost more to manufacture than its selling price was. As you buy them at only \$490 to \$610, we have to depend on increasing volume to make up the difference.

The reason for this is simple:—a manufacturer who gives good value must expect to lose money on the first cars he sells because he cannot charge all his costs to the people who are first to buy.

But with the purchaser it is different — he cannot afford to lose anything on a car. It must give him full value from the first, and keep on giving him full value for years.

Two things make possible our combination of low prices and high cost quality:

1. Volume Production

2. Taking only one profit

First, we set our price at what would be fair to the public on the basis of economies we enjoy in volume production. Then, in order to justify and maintain our low price we must get volume sales.

Thus it comes that a car which is really high-cost to make, is also low-cost to buy.

There is a difference between a cheap car and a low-priced high quality car.

Ford prices are always fixed at a point which makes it profitable for a customer to buy.

Good and lasting business must produce profit to the buyer as well as to the seller. And of the two, the buyer's profit must be, comparatively, the larger one.

It pays us to sell the Ford V-8 because it pays you to buy it.

Henry Ford

BARBECUE AT THE DOUBLE HEART RANCH

The Enterprise is requested by Ollie Cox, owner of the Double Heart ranch, ten miles south of Sweetwater, to announce that the annual barbecue, roping and dance will be held there June 22.

In the afternoon there will be roping and the usual rodeo stunts, with a barbecue supper at sunset and dancing from 9 to 2 o'clock.

Ed Dixon and T. F. Sims are recorded among "the faithful" on our subscription rolls since last report. Thanks to both of you, gentlemen.

CARD OF THANKS

We wish to thank our many friends of the Norton community for the loving kindness and sympathy shown us during the illness and death of our beloved wife and mother, and also for the beautiful floral offerings which helped to comfort our broken hearts. May God bless each and everyone who assisted us in any way.

Monday, June 19th

Instead of Wednesday, June 21st.

**ILLNESS IN HIS FAMILY PREVENTED
HIM FROM COMING LAST WEEK.**

County Agent's Column

In the past five years a new plant has made its appearance in the pastures in the Green Mountain community that has been called to the attention of this office. It has gradually spread over quite a portion of the pastures on several ranches. This plant has been identified as **WOOLLY GROUNDSELS**. It has been common to the Big Bend country for years and has gradually spread eastward, and is now known to be as far east as Runnels county. It is toxic to cattle, sheep, goats and horses. However unless the range is heavily overstocked and the usual weeds and grasses are nearly destroyed it will probably have no bad effects. If ranges are overstocked and the range becomes short then death losses

may be looked for.

Overstocking is the most serious menace we have in the ranching industry. By constantly overstocking and thereby permitting poisonous weeds and plants to gain wide foothold, we place ourselves in a very dangerous position. The rapid spread of the bitterweed, and therefore its heavy losses in the past few years, we have made possible by killing out the grasses and weeds that are essential to our ranching, and giving the bitterweed a foothold.

Walter Keenean reports that the poison grain used on ground squirrels has certainly done the work.

Don't forget the Feeder Day at the Simpson & Russell Ranch, Robert Lee, on Friday, June 23.

SILVERWARE LOST

In a personal letter to The Enterprise editor Mrs. W. L. Hayley of Norton said the following, which we take the liberty to print and to make the additional reference to the editor's wife relative to the same thing: "We had a great day at Oak Creek, at the Arkansawyers' Reunion. But I lost 2 good silver tablespoons also some saucers and pie plates. The latter doesn't matter, but if anyone brings in the spoons I surely would like to have them."

Let everyone who reads this, who was at the Arkansawyers' Reunion make inquiry among his neighbors for the above silverware.

Likewise the Mrs. editor lost two silver knives and a fork she would very much like to get back. They are of patrician design. Both these ladies will be very grateful if this silverware is returned. They were taken, or got into some other lady's lunch basket unintentionally, or else were dropped on the ground at lunch. Any information will be appreciated.

Mrs. W. P. Hearrell and her daughter, Mrs. Henry Todd and children, from Dallas are out for a camping outing on the Colorado river.

Curtis Keeney of Carlton was a guest this week of his mother, Mrs. Tom Keeney, and other relatives.

DABNEY MOTOR COMPANY LAUNCHING OUT AGAIN

In this issue of The Enterprise is an ad of the Dabney Motor Company of Sweetwater, Ford Sales & Service.

In the days when business was flourishing this big, progressive automobile establishment advertised quite freely in the columns of The Enterprise, thus reaching the Blackwell-Bronte country. They enjoyed quite a large business from this section then. But when the depression struck, like all others, they were compelled to curtail operating expenses.

But, now, with the prospect of a revival in business the Dabney Motor Company are launching out again.

Mr. C. E. Matson, an experienced and thoroughly trained auto mechanic, has been secured who has taken charge of the service department of the Dabney Motor Company. The service department is equipped both as to plant and men who know auto mechanics to service a car of any make in a way that it will really mean service.

Read the ad elsewhere and if you need car service you can't beat Dabney Motor Company of Sweetwater as the place at which to have it done. The bunch of pleasing fellows in the business family of this big and popular auto house are always so accommodating that when one visits there and goes away, he is glad he went.

Mr. and Mrs. Robert Knierim are visiting Mr. and Mrs. Wade Rees at Center point this week. Mrs. Rees is the daughter of Mr. and Mrs. Knierim.

Mayor R. J. Epperson returned home Tuesday from a trip that took him to Ft. Worth, Dallas and other points. Mr. Epperson visited relatives at Ames in Coryell county. H. W. Epperson, father of Mr. Epperson, returned with his son and will visit here for a time.
