

THE BRONTE ENTERPRISE

VOL. 25.

BRONTE, COKE COUNTY, TEXAS, FRIDAY, MARCH 19, 1943.

NUMBER 11.

5th Annual Coke County FFA Fat Stock Show, Wed., March 24

Many 4-H and FFA Coke County Boys As Exhibitors will Show Calves, Sheep, and Hogs; War Stamps Given as Awards

Things in the circles of the 4-H Club boys of Coke County and the FFA boys of the Robert Lee and Bronte schools, are going at a lively clip just at this time. The unusual activity is due to the fact that Wednesday of next week, March, March 24, the Fifth Annual Coke County Livestock Show, in which many of

year, however, in order to expedite the growth of livestock in Coke county, to aid the war effort, the leaders in the show have planned to have the exhibits in classes as to commercial value. There will be only two classes of animals as to individuals. They will be feeders and

PROF. GEO. TAYLOR
Superintendent of the Robert Lee schools. If we remember correctly this is Prof. Taylor's sixth year with the Robert Lee schools—anyhow, he is directing the schools under his direction in a most satisfactory way to the patrons of the school.

B. K. KIRK
Superintendent of the Bronte schools. Prof. Kirk is ending his second year with the schools, and has been elected to succeed himself for another year. The work of the schools is running smoothly under his direction.

the three above groups are entries as exhibitors will be held. The big stock event of Coke county will be held this year at Bronte. By agreement the show alternates annually between Robert Lee and Bronte. Last year the show was at Robert Lee. Hence this year it comes to Bronte.

Awards Different This Year
The program as to exhibits and awards will be different this year to that of former years. Heretofore the awards have been on an individual basis of the animals exhibited, and each

D. B. Collinsworth
Vocational Agriculture Instructor in the Robert Lee school. This is Prof. Collinsworth's first year at Robert Lee but he is successfully leading the boys in the school under his tutelage and there is quite an interest in livestock and farm work in his department.

TRAVIS B. HICKS
Coke County Agriculture Agent. Mr. Hicks entered upon his duties only a few months ago, but already he has his kirk in hand and is doing a good work for the livestock and farming interests of the county. He has led the 4-H club boys of the county in their projects for the the Livestock Show.

animal was judged in a class to self on its own merits. This

the judging and carried to Fort

W. A. HICKMAN GETS RANK OF CORPORAL AT ARMY AIR SCHOOL

Bronte Enterprise, Bronte, Texas.
Big Spring, Texas. (Special)—According to a report from Lt. Col. David Wade, commandant of the Army Air Forces Bombardier School here, Plc. W. A. Hickman, son of Mr. and Mrs. Robert Hickman, a member of the 815th Bomb. Tng. Sqdn. has been promoted to the grade of Corporal. He is one of the boys who keep em flying night and day out at Big Spring, one of the world's largest training schools for bombardiers.

Worth, where on Thursday they will sell according to the grades given them at the Bronte show. Four trucks have been provided to carry the animals to Fort Worth.

Boys to Fort Worth
The boys who make winnings in any class at the Coke County show will also go to Fort Worth for the sales of their animals, Thursday. A truck has been arranged. Accident liability insurance coverage has been arranged so that if any boy should happen to an accident he will be fully protected. The boys will spend Wednesday night at Stephenville, where they will be housed in the gym at John Tarleton College. Each boy must have with him two blankets or quilts, so that he will be amply provided with cover.

New Leaders in Charge
This year finds new men in charge of the Coke County Livestock Show. They are Travis B. Hicks, Coke County Agriculture Agent, D. B. Collinsworth, Vocational agriculture instructor in the Robert Lee school and O. A. Faith, vocational agriculture instructor in the Bronte school. All three gentlemen are native West Texans and "speak the language of West Texans."

War Stamps as Awards
Each winner in any class will receive war stamps as awards, according to the winnings he makes—this is a fine, patriotic gesture and will be helpful in teaching the importance of patriotism and a united support of the war program.

Stock Association Sponsor
The Coke County Livestock Association, which is an organization composed of outstanding stockmen in the county, sponsors the Coke County FFA Stock Show. They have been behind the movement from its incipency and are solidly behind it now. C. W. Arrott, president of the Livestock Association, is pushing all the time for the annual shows.

Some of the progressive business concerns and individuals of Bronte and Robert Lee, and other nearby towns, who have a mutual interest in the livestock industry in West Texas are making this edition of The Enterprise devoted to the show, possible by additional advertising for which we thank them.

Attend the Show
Let everybody come to the show and give it encouragement for, sure as we are writing this, nothing is more important now to the good of all than an increase of stock-raising and farm products—our destiny depends on it.

Large List of Exhibitors
There is the largest list of exhibitors this year of any year (Continued on page three)

HOMEMAKING NEWS Mary E. Steele Instructor

The following information is taken from the bulletin, "The A B C's of Eating for Health," prepared by The Home Economics Institute, Westinghouse Electric & Manufacturing Co.:

I. Four Easy Cooking Rules to Retain Vitamins:

1. Use little or no water—as a guide use the minimum amount of water that will cook the food without sticking. By avoiding excessive amounts of cooking liquid, the dissolving and loss of water, soluble vitamins are held to a minimum.

2. Start Fast—Cook Quickly—total cooking time is greatly reduced by bringing the foods to a cooking temperature quickly. This protects vitamins in foods by keeping to a minimum the time they are exposed to water, heat and air.

3. Avoid Violent Boiling—after the food comes to a steam, reduce the heat to the lowest temperature required to maintain the steaming. Avoid violent boiling.

4. Cook in Covered Utensils—cook in covered utensils without stirring—stirring puts extra air in food and air destroys certain vitamins.

II. Take Care When Getting The Vegetables Ready.

1. Do—wash leafy vegetables, such as spinach, thoroughly just before cooking. Add no water—the amount of moisture that clings to the leaves is sufficient.

2. Do—Start frozen foods cooking while still frozen. Vitamin C may be lost during thawing.

3. Do—Use green vegetables as soon as convenient after buying. They lose vitamin A and C rapidly if kept at room temperature.

4. Do—Pare potatoes and other root vegetables as thinly as possible. Valuable nutrients are near the skin.

5. Do—Cut carrots and other long vegetables lengthwise. Their cells are long and less of the nutrient qualities will escape in the cooking water.

6. Do—Add dressing immediately after cutting vegetables and fruits for salad. The dressing helps prevent vitamin destruction by air.

7. Don't—Use soda in cooking green vegetables. It is alkaline and helps destroy vitamins.

8. Don't—Prepare fruit juice, or chop fruits or vegetables for salad cooking until just before using. The more cut surface exposed to air, the greater the loss of Vitamins A and C.

9. Don't—Handle vegetables more than necessary. Bruising causes rapid loss of vitamin.

10. Don't—shell peas or lima beans until ready to cook them. They retain their vitamin C much better in the pods.

11. Don't—Soak vegetables or salad greens in water for any considerable length of time. It dissolves the vitamin.

12. Don't—Let vegetables stand at room temperature after they arrive. Wash them right away and store in the dehydrator of your refrigerator. It protects vitamin.

HER NAME IN "CAROLYN"

Born to Rev. and Mrs. Roy Stuckey of Tennyson a fine baby girl, March 2, 1943—and her name is "Carolyn." Miss Car-

Rev. Roy Stuckey Becomes Baptist Pastor at Norton

Rev. Roy Stuckey of Tennyson has been called to the pastorate of the Baptist church of Norton and accepted the work.

Rev. Stuckey moved on to the field this week and will fill the pulpit as pastor for the first time Sunday morning. The friends of Rev. and Mrs. Stuckey are pleased that they are to remain in this part of West Texas.

Rev. Stuckey is a capable and popular young minister and is successful in his work. Mrs. Stuckey is also widely known in the Bronte-Tennyson section of country, and all know her as capable in church work.

Mr. and Mrs. Jack Caudle of Hale Center were guests of Mr. and Mrs. T. C. Price first of the week. Mr. Caudle took time to "drop in," shake hands and "slip us a dollar" on his subscription. Mr. Caudle has been a reader of The Enterprise since the paper was established. When he and family moved to Hale Center years ago to make their home, Mr. Caudle had the paper to follow and has read it through all the years. Their old-time friends are always glad to see Mr. and Mrs. Caudle.

EDITOR'S OLD FRIEND CALLS

Wednesday morning, the office doors of The Enterprise opened, and in walked two, large, stalwart, physically-perfect men, of the athlete type. Both men had guns "swingin' at their sides" that looked big enough for cannon to the editor. We wondered: "Is it a holdup?" But, both men looked too intelligent to choose an editor on whom to perpetrate a holdup job—for, the joke would be on the holdup men in such an instance.

At once, one of them said, "You don't know me—this is Eldon Wade." Well!—then the editor "came to himself," and "memory went gleaming in the silent fields of the past." For, the editor has known the Wades many years. Eldon is the son of L. F. Wade at Jayton, who is, and has been editor of the Jayton Chronicle most of this century. The Wades are a family of newspaper men. At one time, back in the 20s, Eldon gave the editor "a lift" in our printshop at Turkev, while we were in business there.

The other gentleman was A. Bodemann. Both these "boys" are in the U. S. Border Patrol. They have recently been given the San Angelo area. Their work is chiefly in the immigration department. They came out to get acquainted in Bronte and to know "the lay of the land" in this part of their territory. Come again, "boys"—for, we sure were glad to see you again, Weldon.

Weldon tipped the beam at 7 pounds and fourteen ounces. The Enterprise makes apologies to Miss Carolyn for this delay in announcing her advent into this big, old world—but, then, she is an "independence" (March 2) girl, she will not care. Here is hoping for her, in the fulfillment of the dreams of parents and grandparents for her.

We Are For Coke County

Therefore, we are for The
COKE COUNTY LIVESTOCK SHOW.

And we are happy with all concerned in the
Fine Prospects for the
1943 SHOW

May it be all that the leaders and directors and
Exhibitors have planned for it.

It will aid in feeding our Coke County
boys in the service.

McNeil Wylie

County Judge Coke County

**APRIL 1ST CLOSING DATE
FOR TAKING 1943 COTTON
CROP INSURANCE**

Cotton can promise more and make less and make more than any other crop. R. B. Allen, chairman, Coke County AAA committee, said this week in urging farmers to protect this year's crop.

Designed to give farmers a cash income when crops are destroyed by unavoidable hazards, cotton crop insurance was offered for the first time in the nation last year.

Applications on the 1943 crop are being taken in the county AAA office, as well as being written in each community by the community committeemen. All producers desiring to insure their cotton crop must do so before the closing date, April 1, 1943.

"Fire insurance doesn't mean a fire and neither does cotton insurance mean a crop failure, but it will certainly keep the farmers from hitting the bottom when losses occur," said Mr. Allen.

He explained that premiums on farms which show high losses during the past years would be higher than on farms showing small losses.

Protection is assured cotton farmers against loss from all unavoidable hazards, such as drought, boll weevil and other insects, frost, flood, plant disease, storm, wind and hail.

"Uncle Wint" Pruitt was in town Wednesday after a spell of illness which caused him to have to spend a time in a Winters hospital. The many friends of this "fine, old southern gentleman" are always glad to see him.

George Baker has our thanks for advancing his subscription figures.

Mrs. J. L. Keeney becomes a paid-in-advance subscriber to

The Enterprise. Thanks, Mrs. Keeney.

DYSENTERY, INFECTIOUS; ON INCREASE. AT THIS TIME IN TEXAS

Austin, Texas, March 18.—Commenting on the unusually high incidence of dysentery in Texas at the present time, Dr. Geo. W. Cox, State Health Officer, described dysentery as being an infectious disease characterized by diarrhea, pain in the abdomen, and toxemia. It is caused by a specific bacteria or germ. These germs cause inflammation of the lining of the intestinal tract which produces pain throughout the abdomen and the discharge of many loose stools that frequently contain blood and mucous. Toxemia results from absorption of the poisonous substances produced by the germs.

"The germs gain entrance to the body through the mouth," Dr. Cox said, "and then make their way to the intestines in the same manner in which food does. When they reach the intestines they find conditions favorable to their growth, and there they establish themselves at the expense of the person infected and produce their harmful effects."

Dr. Cox warned that dysentery affects young children more often and more seriously than adults, frequently resulting fatally; however, he said, it may occur at any age. It is usually more prevalent during the summer season, and the great number are unusual for spring.

"The germ is always expelled in cases now being reported with the excreta of persons sick

with dysentery and may continue to be expelled for some time

after the patient recovers from the diseases. These persons who still discharge the germs after they recover are called carriers, and they occur more frequently

in this disease than in the majority of other infectious diseases.

sanitary measures are more urgently needed now than ever before if we control the potential possibilities of epidemic dysentery in this State.

"Food protection and adequate
