Our WASHINGTON Letter

Bureau Change May Tax Livestock Owner Unfairly . . .

No ranchman or farmer I know wants to avoid paying his just share of taxes. But income tax-paying livestock owners are facing an unfair charge right now as a result of a change in the Bureau of Internal Revenue rules on figuring income. If the policy change is applied generally, the percentage of stockmen affected will be high, because income tax brackets have been lowered to take in nearly everyone.

In the past, stock owners had been allowed to place fair values on their stock and to set up different bases which would show the true income realized from sale of animals, wool, etc., but which would not class as income or loss of income the year-to-year changes in the value of breeding animals. Breeding animals were part of his capital, as was his land. He kept land and breeding animals and sold their increase, and paid tax on that increase.

New instructions are out to the agents to collect additional income taxes for 1941 and 1942 on the difference between the stockman's inventory values and the average values estimated by the Department of Agriculture. Thus the owner might be assessed an additional tax on the difference between the \$40 per head he set on his cows and the \$55 which a bureau calculated was an average value then for Texas cows of that type.

Tax Should Be Paid On Realized Income . . .

I have protested to the Commissioner of Internal Revenue because this policy, arbitrarily applied, obviously can be discriminatory and bring about many injustices.

The livestock owner may have to pay taxes on an income he didn't realize. And the basic principle of the whole income tax law is founded on the proposition that tax is not applied upon income until income actually is realized.

To hold otherwise would be as if an owner of a city business building was called on to pay taxes upon the increase in value of that building, in addition to paying tax on his rental income on the building.

Some buildings in defense cities have risen 50 percent in value. Some livestock is up 50 percent. When either one is sold, in some tax should be based on the higher sale income.

All the stockmen and farmers ask is that their income taxes be based on realized income, and that they not be penalized for a theoretical increase in paper value stock—which they didn't sell or even consider selling.

Wool Given New Break Over Synthetic Textiles . . .

The WPB last week eased up its restrictions on the use of wool. It doubled the allotment of wool going into civilian uses. (Continued on last page)

Kills 4-Foot Rattler in His Poultry House

E. E. Nichols, manager of the Allen laundry, is not only a good laundry manager, but he is also "pizen" to rattlesnakes—and especially if the rattler is invading the "sa red precincts" of his poultry house.

Mr. Nichols, desiring to do all possible to whip Hitler, started early in the year, to raising a few chickens. His flock is getting just big enough to be tempting to a man with "tendencies for fryers." The chickens also it seems "tempted" a rattlesnake.

Monday morning Mr Nichols went out to his poultry house to look at his prized possessions. He found a 4-foot rattlesnake, which had already "helped" itself to two of the promising fryers.irate at his losses, and feeling that he was facing a "fifth columnist," Mr. Nichols fell upon the rattler and soon sent him to "the land of Nod."

Warning: Parents, be careful about your children playing out in the open—the snakes are roving now and are apt to be found anywhere.

SOLDIERS VISIT EDITOR

Friday of last week, while the editor was busy as the proverbial bee, with a typesetting machine that was out of commission, a young man in uniform walked into our office, and said: "Well, you are hard at it aren't you?" The editor replied: "Yes—who are you?"

"My name is Walter Reid. I am at Camp Barkeley. I have been to San Angelo and am returning to camp. We stopped to get food and I just had to run in to see you."

"You're one of 'em, then—a printer," we said.

Answering affirmatively, we asked him from whence he hailed. He told us that he was from Topeka, Kansas. "The home of ol' Arthur Capper," we added.

"Yes," he said, "my ideal of a newspaper man," and made further complimentary references as to Capper, Topeka and Kansas.

"You have a good shop," he said. Then, we gave him a great, big smile and said, "Thank you—but that's about all we've got."

The visitor asked for a copy of our publication which we gave him. Then, he said, "I must go. I just wanted to 'drop in' and meet you and get a fresh 'whiff' of good ol' printer's ink." He told us goodbye, and went out "intoxicated" with the "aroma" of the printer's ink, almost like a Mexican with a fresh smoke of marijuana.

We returned to our job of adjusting our typesetting machine. Directly two soldiers entered the office door. One was our former visitor. He said, "I just read your writeup of your old friend, Ira Green who used to be your carrier boy at San Angelo. I like your paper so well, I just want to subscribe for it and he threw the "kold kash" on our desk. "I like your style—your paper is fine for the size of the town." We blushed like a girl the first time her kid sweetheart told her that he loved her.

Our visitor was Corporal Walter Reid, Service Co., 357th Infantry, Camp Barkeley. His comrade was one of the men of his squad, Pvt. E. O. Mundell, Axtel, Nebraska.

Call again, you "Hitler Ha-

Gerald Allen is Injured by a Fall from Swing

An injury that came near proving fatal happened to Gerald Allen, son of Mrs. O. E. Allen, Sunday afternoon late. A group of young people were at Legion park and were swinging in one of the swings.

Somehow, Gerald slipped and fell out of the swing. His wrist was broken and he suffered from a severe head injury. He was not thought to be so serious till Monday morning. He was carried to a San Angelo hospital where he suffered great agony until Wednesday at which time he got partial relief. He was returned home Thursday, but his condition yet is serious.

Jimmie Gideon in Home Motor Co. Repair Department

Jimmie Gideon, a "home boy," is now with the Home Motor Company. Mr. Gideon has charge of the repair department of his company.

"Jimmie," as all his friends call him, is well known in western Runnels county and this part of Coke county. He is the son of Mr. and Mrs. R. N. Gideon, whose home is in the Oak Creek community. Jimmie was born at Wilmeth and grew up in that section of Runnels county.

Mr. Gideon is an excellent auto mechanic and general repair man. He has been engaged at his trade all his life. He not only repairs all makes of cars but also tractors and other farm machinery. He is a hard worker, conscientious in his dealings and always pleasing and in a happy mood.

Mr. Gideon has an announcement in this issue of The Enterprise, inviting his friends and all others to call on him at his new place of business.

Measuring of Crops Must be Made By July 1, 1943.

Due to the need for conserving travel and man power and to insure that farmers will receive proper credit for acreages planted to various crops and credit for production practices carried out in 1943, the responsibility of reporting performances this year is being placed on the farm operator, Christine G. Roach, County AAA Administrative Officer, announced this week.

The crop that must be measured in Coke County is Cotton. Mrs. Roach said. If an entire permanent field is planted to cotton, it will not be necessary to make any measurements for that field. The acreage planted to grain sorghum, peanuts, dried beans and soybeans may be estimated.

Every Coke county farmer is urged to report his measured and estimated acreages to the Coke County A. C. Office prior to July 1, 1943.

Mrs. Drue Cumbie from Portales, New Mexico is visiting Mrs. R. M. Cumbie and others of the Cumbie families.

ters"—for, you're always "as welcome as the flowers in May."

Coke 4-H Club Boys Have Chuck-Wagon Dinner

Bronte and Tennyson 4-H Clubs were entertained at the Arrott ranch, Friday evening, June 11 with a chuck-wagon dinner. Le Drew Arrott, president of the Bronte 4-H Club and his father, C. E. Arrott, president of Coke County Livestock Association and Adult leader of the Bronte Club, were masters-of-ceremonies.

About 6:30 o'clock in the afternoon, members and some parents began coming into the grove where the meeting was held. Games were played by the youngsters while others prepared the chuck-wagon meal. After dinner a fine business meeting of the joint clubs was held.

Quite a lot of interest is being shown by the parents of these boys and girls in getting their children started on a constructive agricultural demonstration.

MRS. MATTIE BELLE KEYES HAS POSITION WITH L. P. RAY

Mrs. Mattie Belle Keyes is now with L. P. Ray, the well known jeweler of San Angelo. Mrs. Keyes has a place as bookkeeper and assistant manager of this popular jewelry establishment. Mrs. Keyes cordially invites her friends and all the people of Bronteland to visit her at her place of business.

Mrs. Cova Collier from Abilene, returned home Wednesday after a few days visit with her mother, Mrs. R. M. Cumbie.

Joe D. Rawlings Takes Battle Course at Fort Knox

To The Enterprise: Fort Knox, Kentucky.—A new contingent of selectees arrived here this week for three months of rigorous training in the Armored Force Replacement Training Center.

Among the new trainees is Joe D. Rawlings, son of Mr. and Mrs. A. N. Rawlings, of Bronte, Texas. Topping off 13 weeks of orientation, specialized study and physical hardening will be a full week on the Battle Training course, where the men undergo maneuvers with live ammunition. Bullets whizzing 30 inches above the ground, exploding land mines and hand-to-hand combat are among features of the course.

First six weeks are devoted to organization of the Army and the Armored Force, insignia of rank, military courtesy and discipline, care of clothing and equipment, and other fundamental subjects.

During this period the men are classified according to their knowledge and ability, so that in the second half of their basic training they are assigned to specialize in light tanks, medium tanks, scouting and atrolling, mortars, anti-tank guns, machine guns, assault guns, reconnaissance or other phases of Armored Force fighting.

The training center is commanded by Maj. Gen. Charles L. Scott.

St. Sgt. A. J. McDaniel, Jr., returned Monday, to his post at Garden City, Kansas, after spending a 15 day furlough at home.

Claude Hallmark who has been at Milan, Illinois has been transferred to Mineral Wells. Claude was here first of the week on a furlough. He said it was good to get back into Texas.

PNEUMONIA EPIDEMIC
PREVAILS IN TEXAS;
FOLLOWS INFLUENZA

Austin, Texas, June 14, 1943.—The unusually high incidence of pneumonia in Texas at this time, being over twice that of the seven year median is undoubtedly one of the dangerous and disabling sequelae of the current epidemic of influenza according to Dr. Geo. W. Cox, State Health Officer.

"Pneumonia is a killing disease and a contagious one," Dr. Cox warns. "It's definitely transmitted from one person to another in the same manner as other contagious diseases. The pneumonia patient should be isolated. It is definitely transmitted from one person to another in the same manner as other contagious diseases. The pneumonia patient should be isolated with the exception of the attendant, and all paper tissues used for receiving nose and throat discharges should be immediately burned."

Dr. Cox advises all persons sus-

pecting the presence of influenza to place themselves immediately under the care of the family physician and abide implicitly by his instructions. Bed rest, liquid diet and proper nursing will play a major part in the safe recovery of the influenza patient.

"Pneumonia is the most frequent complication resulting from influenza and is certainly one of the most dangerous. The death rate in pneumonia remains high in spite of medical efforts to control it and when it follows so debilitating a disease as influenza, the patient naturally has less resistance and vitality with which to combat it."

Feminine Vacation
Apparel Featured
At Franklin's

Yes, these are vacation days—days not only necessary for the well-being of those who have toiled many months without cessation from their tasks—but, they are the gladdest and happiest days, perhaps, of the whole year.

But the last thought above must be modified—vacation days are glad days, with favorable environments and the things essential to comfort and relaxation. Especially is this true as to women. A woman cannot have a delightful vacation unless her vacation apparel wardrobe is properly supplied. This means much.

The above being true, Franklin's, one of the leading stores in San Angelo, gave recognition to the fact and, therefore, is featuring women's vacation apparel. Franklin's is an exclusive woman's department store. And in keeping with that fact, the store is managed by a woman. Mrs. Lila Lilly is the capable and pleasing manager of this woman's apparel shop and hence it is easy to appreciate that she knows women, their needs, their tastes and preferences—therefore, when a lady buys at Franklin's she has the benefit of displays of women's apparel that were carefully selected by a woman from the wholesale stocks of the country.

Franklin's has an announcement in this issue of The Enter-

War Work
of a Santa Fe Wheat Car

This statement explains why many Santa Fe box cars, built to move wheat during harvest season, are many miles away doing other war jobs.

★ This year an estimated 75,000,000 bushels of wheat must be moved by the Santa Fe from the wheat states it serves.

It will take about 50,000 carloads to handle Santa Fe's big share of this vital job!

To move wheat and other grains, Santa Fe has specially built weatherproof box cars—but today, many of these cars are far from the wheat belt. Where are they? What are they doing? The map above will give you an idea—it shows the movement of a wheat car for the past four months.

A Wheat Car Gets Around

Starting at Hutchinson, Kansas, with a load of flour for Boston, this wheat car has been kept rolling with vital war cargoes, including Army shoes, Army clothing, aluminum, lumber, machinery, and has just delivered a warload at San Francisco... far from

the wheat belt where it is needed now!

In four months this car has covered 1,459 miles on Santa Fe rails, and 9,749 miles on the other railroads. No rest for a war worker these days, but a fellow sure gets around!

Every Car in Action

Every Santa Fe box car, as well as box cars of all other railroads, is in action today. Some of these cars are too far away to be able to return to the wheat belt in time for use.

But guided by the wise direction of the Association of American Railroads, the Office of Defense Transportation, and the Interstate Commerce Commission's Bureau of Service, plus the friendly cooperation of the Army and Navy and war freight shippers, Santa Fe is making every effort to secure as many cars as can be spared from war movements to handle this year's wheat harvest.

AAA PENALTY LIFTED

Farmers were given additional encouragement to plan for maximum production when the \$15 per acre penalty for failure to meet 90 percent of their war crop goals was lifted.

Since incentive payments have been withdrawn from several crops, many Texas farmers felt that the penalty also should be withdrawn. B. F. Vance, Administrative Officer of the AAA declared. He said that in his opinion farmers still would meet the war crop goals they had pledged on individual farm plan sheets.

Principal War Crops on which the \$15 deduction formerly applied are grain sorghums, soybeans for beans, peanuts for all purposes, flax, Irish potatoes, sweet potatoes, and dry edible beans.

LISTEN, FOLKS!!

County Poultrymen Urged to New Goal In Egg Production

Task for Coke County Hens is 12 Per Cent Greater; Most Farms Have Larger Laying Flocks, but Labor and Feed Problems

Coke County poultrymen are asked by the government to produce approximately 556,000 dozen eggs this year, 12 per cent more than in 1942, as their share in the Food for Victory program, the National Poultry Defense Committee estimated today.

This county goal, which is based on the percentage increase suggested for Texas by the U. S. Department of Agriculture, can be reached if adequate supplies of labor and feed are available, declared Committee Chairman Hobart Creighton.

"Poultry farmers are now working harder than ever in all-out war production," Creighton said, "continuing the fine job they did in this county last year by producing approximately 497,000 dozen eggs to help supply civilian, military and lend-lease needs. Also, two developments during last year have resulted in larger laying flocks on most farms today:

"First, egg prices as shown by purchases of the A & P Tea Company, one of the larger buyers which paid \$800,900 in Texas last year for 2,522,040 dozen, were so favorable that farmers saved an unusually large proportion of potential layers. Second, conditions in 1942 were good for raising pullets, as Fall weather was generally mild and the average hatching date was early.

"Those factors point to increased egg production," Creighton explained, "if an improvement can be made in the farm skilled labor situation and if farmers can get enough protein feeds. There are critical shortages of protein ingredients because imports have been cut so drastically. Even soybean oil meal is not being processed fast enough to meet demands. These are major problems facing the industry."

Texas poultrymen, who produced a total of 233,916,000 dozen eggs in 1942, are asked for 262,671,000 dozen this year as their share of the national egg goal of 4,780,000,000 dozen.

OUR LETTER—

(Continued from page one)

indicating that the "wool shortage" bugaboo—which was giving all the breaks to the synthetic textiles—was disappearing. Hereafter, mill facilities and mill manpower will be the factors controlling the consumption of wool.

Until now, despite the billion pounds of domestic and imported wools in this country, manufacturers were forced to use heavy proportions of reprocessed wools and synthetic fibres. This scarcity theory and practice created buying rans. Rationing was threatened.

With military needs assured, in American and Allied stock piles, the home front should get more wool.

It didn't make sense to order a manufacturer to make a suit half wool and half rayon when we had more than enough wool to permit him to turn out all the 100 per cent wool suits he could make.
