

DANGERS OF PROSPERITY

By auto and plane we are swiftly whirled,
And the distance is shortened around the world.
The modern means of travel today
Makes nations akin although far away.
Since science, art, all lines of trade
Have forged ahead, much progress made.
The tendency is to ride the wave
Of prosperous age and not to save.
THE FIRST NATIONAL BANK believes this is wrong.
Play safe and save as you go along.

Tender Janes

Bring delightful eating and good nutrition to your table with a basketful of tender Janes, tiny leaf-shaped sweet rolls.

Tender Janes are another of the excellent puffs and sweet rolls you can make from a beaten batter which requires no kneading. The main ingredient in the batter is enriched flour, which makes these rolls a good source of essential B-vitamins and iron.

These rectangular rolls will be as light and tender as their name if batter is beaten thoroughly. Allow time for batter to double, then stir down and drop by spoonfuls into greased pans. Tiny iron molds, two by three inches, were used to make the tender Janes pictured. If you do not have similar molds, bake batter in muffin pans. The rolls will be equally delightful.

The topping for these sweet rolls is as easy as the batter. To make icing, combine two cups sifted confectioners' sugar, two table-spoons hot milk, two teaspoons butter or margarine, and one-fourth teaspoon vanilla extract, and mix until creamy smooth. Spread on warm rolls, then sprinkle with chopped walnuts.

Tender Janes are excellent for breakfast, but try them at lunch-noon, too, along with an omelet, stewed dried fruit, and milk.

TENDER JANES

| | |
|------------------------------------|---|
| 1 package yeast, compressed or dry | 1/2 cup shortening |
| 1/2 cup lukewarm water | 2 eggs |
| 1 cup milk | 3/4 cups sifted enriched flour (about) |
| 1/2 cup sugar | 1/2 teaspoon vanilla extract (if desired) |
| 1 teaspoon salt | Confectioners' sugar icing |

Soften yeast in lukewarm water. Scald milk and add sugar, salt and shortening. Cool to lukewarm. Add one cup flour and beat well. Add softened yeast, eggs and vanilla extract. Beat well. Add remaining flour to make a thick batter. Beat thoroughly until smooth. Cover and let rise until doubled (about one hour). When light, stir down. Spread evenly into greased rectangular iron molds (two by three inches) or muffin pans, preferably rectangular. Let rise until doubled (about 45 minutes). Bake in moderate oven (375 degrees F.) about 25 minutes. Brush with confectioners' sugar icing and sprinkle with walnuts.

Makes about two dozen three-inch loaves, or three dozen two-inch puffs.

DON'T GO BY — BRONTE — COME BUY

In Tribute to the American Doctor for services rendered

Who shall measure devotion or put a price on sacrifice?

Who shall assess the long war against the power of Death?

Or set a sum upon the gift of life?

There is a service beyond the measure of a fee.

A cause above remuneration.

An ideal for which there is no price.

This is the service . . . the cause . . . the ideal . . . of the American Doctor.

How shall we reckon it, and by what formulae?

How much for the laughter of a little child rescued out of crisis?

What's the cost of discouragement?

Who can pay for a sleepless night?

Name the price of a cure.

There is no algebra for it, no scribble of figures, no proper value,

For this is service as large as life, and as manifold.

It is a soldier crying in agony on a thousand battlefields.

It is the terrible word, "Why?" under the surgeon's probe.

It is the end of pain.

It is hope.

It is the lonely, unending quest for knowledge,

It is the fight against ignorance, sloth, superstition,

It is the dumb, unspeakable joy in the eyes of a parent,

It is the rock of grief,

It is cold rain and pounding storm and bone weariness and the new-born babe gasping its first breath in the grey dawn.

It is all this, and the quiet glory of the job done.

Dedicated to service—in the name of Mercy —And the common Brotherhood of Man.

GRASS PLANTERS AVAILABLE TO COOPERATORS

District cooperators planning to use the grass planters owned by members of the board of supervisors of the Coke County Soil Conservation district should make plans to use them as they are routed to the various groups. With some 60 cooperators planning to use the three planters they must be routed with a minimum loss of time so each cooperator will have an opportunity to use one, C. N. Webb, chairman of the board of supervisors, has announced.

Moisture penetration tests made in the vicinity of Robert Lee after a total of three inches of rainfall showed the benefit received from good cover grass on the rangeland. A test made on bare ground showed only four inches of moisture penetration, with fair cover of grass, moisture penetrated twelve inches and on the ground with a good cover of grass, moisture penetrated 26 inches.

The soil under a good cover of grass was observed to be loose and there was enough litter on the ground to break the impact of the raindrops and prevented the top inch of the soil from sealing over.

Mrs. Louis Conradt of Hylton. They are both graduates of Blackwell high school.

Billy Thomason was in a San Angelo hospital last weekend for medical treatment.

Mrs. Buddy Kirkland has been ill this week. She has been undergoing treatment in a Winters hospital.

I don't like to be quoted until I'm sure of my facts, but it seems to me that I was a baby once myself. With that reassuring thought in mind, I hardly batted an eyelash when my next-door neighbor called me in for emergency baby-sitting. It turned out that the regularly employed sitter had been delayed and I was merely required to preside until the expert arrived.

Everything proceeded merrily and untroubled, including a professional-looking changeover. There came feeding time — and a helpless me was saved by the bell; Betty reported for duty.

Calm as you please, she opened the refrigerator and, sure enough, there were bottles lined up containing the full day's feeding. While baby was joyfully having his mid-morning snack I learned some modern nursing facts from Betty who really was an expert as the daughter of a pediatrician. She had introduced my neighbor to the Evenflo nurser and I had a practical demonstration of why it was a favorite with babies, mothers, and doctors. Betty pointed out the two pin-hole air valves on the nipple which automatically let air into the bottle as food is withdrawn. As air comes in through the valves, it relieves vacuum that collapses ordinary nipples. By that simple device, a constant, normal air pressure is maintained and baby doesn't have to fight to get his food. He finishes his meal without exhaustion, colic, or indigestion. Feeding is quicker and baby has a happier, healthier time of it.

Betty went on to add that she found another reason mothers liked the Evenflo nurser because it formed a complete unit of nipple, bottle, and cap. I must have looked blank because she explained that the all-in-one feature eliminated fussing with separate bottles, separate nipples for traveling or storing. The filled bottle is capped and sealed sanarily with the sterile nipple enclosed and the unit ready for refrigeration or baby's travel use.

But I not only learned feeding techniques and information... I've got Betty's name and phone number... just in case!

COLLEGE BOOSTERS HERE FRIDAY

A western musical show featuring Tommy Edwards and his band will be in Bronte around 3:30 p.m. today, Friday, April 21, to publicize the Fourth annual Hardin-Simmons university interscollegiate rodeo which will be held in Abilene April 27, 28 and 29. The band will be accompanied by a host of students in a caravan of cars and trucks.

There will be a short western jamboree on the main street. The group will also visit Robert Lee, Ballinger, Winters and Tuscola on that day.

**Radio Bestows Another Honor on
"The Greatest Story Ever Told"**

Another honor was added to the most honored radio program, "The Greatest Story Ever Told," when the readers of Radio and Television Mirror Magazine voted this program as their favorite religious program.

Above, R. S. Wilson, vice president of Goodyear, receives award from Miss Doris McFerran, editor of Radio Mirror, while J. K. Hough, advertising manager (center) looks on.

Heard over the ABC network Sundays at 5:30, EST, "The Greatest Story Ever Told" is now in its fourth year. It broke all radio precedent in having no commercial, though it is sponsored by The Goodyear Tire & Rubber Company, and in keeping actors, directors, musicians, and all concerned completely anonymous so that the true spirit of the dramatizations would not be affected. As a result, it has received just about every award and commendation that radio offers and many other special awards.

Robt. Lee, UCRA Approve Contract

Plans for repaying the \$84,000 cost of the Mountain Creek reservoir project by the city of Robert Lee were approved by the Upper Colorado River Authority Tuesday at a meeting in Robert Lee. The approved plans call for the liquidation of the project cost, with no interest charge, over a 20-year period, with a maximum rate of \$350 per month beginning when the reservoir is put in use. A ten-year optional term is allowed under the plan.

The UCRA directors, headed by Chairman L. T. Youngblood of Bronte, inspected the construction following the meeting. The embankment is expected to be finished in 30 days.

The city of Robert Lee recently voted to issue \$60,000 in bonds of its

own to finance the water pumping and treatment plants, new mains and other improvements to the present water system.

The UCRA also agreed to limit maintenance and repairs charges to \$1,000 a year. Thus, Robert Lee would ordinarily have no maintenance costs and in case of major repair, the UCRA would stand the cost above the \$1,000 maximum.

Other business on the agenda of the UCRA were reports that the city of Sweetwater expects to take bids May 25 on the Oak Creek dam construction project and that conferences are continuing with up-river cities on the proposed multi-million dollar dam project above Robert Lee. Bureau of Reclamation engineers and the West Texas Chamber of Commerce have recommended this project to meet the water supply needs of these cities for many years.
