Election Called On Separating Sheriff - Tax Collector's Office

Coke County tax paying voters will have an opportunity to say whether or not they shall have separate offices for a sheriff and tax assessor-collector.

Under the present setup the sheriff is ex-officio tax assessor and collector. However, a recent legislative enactment makes it possible for counties under 10,000 population to divide the offices by a majority vote.

The Commissioners Court in session Monday passed an order to submit the proposition on a separate ballot at the Nov. 4 general election. Their action followed the filing of petitions requesting the vote signed by more than 100 persons. Commissioners had the right to call for a vote on the matter without a petition.

Judge Jeff Dean says steps will be taken at once to prepare proper notices of the forthcoming

vote. Since the question will be submitted at the general election there will be little extra expense involved.

Other counties with small population but having large tax valuations have previously taken steps to separate the two offices.

The Commissioners Court wishes to make it plain that if the people vote to set up separate offices for the sheriff and tax department, there will be no appointment. Paul Good would continue as sheriff and tax assessor-collector for the remainder of his term which expires the end of 1960.

However, both a sheriff and tax assessor-collector would be elected two years from now, with their terms to begin Jan. 1, 1961.

The law states that only qualified voters who render property for taxation will be eligible to vote on the issue.

Bronte Gin Now Ready for Cotton

J. D. Luttrell is announcing in this issue of the Enterprise that he has opened the Bronte Gin this year to take care of the cotton in this area. Luttrell said the crop would be short due to the small acreage, but that he hated not to be open to accommodate his customers.

Up to noon Thursday the local gin had processed 14 bales of cotton. Mrs. Luttrell said, "They're coming in awful slow."

The Bronte Gin is the only one operating in Coke County this year, as the gin at Robert Lee is not being opened this season.

SCHOOL BOARD MEETS

Trustees of the Bronte School met in a special session Monday night. Purpose of the meeting was to discuss the proposed school budget and other problems connected with beginning the new term of school.

Regular monthly meeting of the school board was scheduled for last night (Thursday).

AD-LIB-BEN

Not many men understand women, and the few who do know enough to keep quiet. — Charles Ruffing

Ran across this definition of success in the Electric Times, publication of the West Texas Utilities Co. at Abilene:

What is Success?

It is being able to carry money without spending; being able to bear an injustice without retaliating; being able to do one's duty even when one is not watched; being able to keep on the job until it is finished; and being able to accept criticism without letting it whip you.

This is to advise that during the next few months (and maybe longer) the Enterprise office will be closed on Saturday afternoons. We manage to summumb to the football fever about this time every year and really enjoy watching the televised Saturday afternoon games. We tried two or three years ago to just close every Saturday afternoon, football season or not, but it just didn't seem to work out that way. Maybe it will this time.

Bronte Fire Dept. Is Re-Organized At Monday Meet

Reorganization of the Bronte Volunteer Department took a big step last Monday night as seventeen men met with Fire Chief Martin Lee. The meeting was held at the County Park.

Overall, there have been 20 men to sign up for the department but many more are still needed to give the department the required number for a recognized fire department. A total of 25 men is needed with an average of 18 men per meeting before Bronte will have a recognized department.

In a business meeting, Brady Mills was elected to serve as president for the newly organized group. Other officers include Joe Simpson, vice president; Bill Alexander, secretary-reporter; Nealy Mackey, treasurer; Bill Luckett, first assistant fire chief; T. D. Joplin, second assistant fire chief; Continued on Back Page

Longhorns Open Football Season Tonight Against Eden Bulldogs

By Bill Alexander

Football for the 1958 season gets underway for the Bronte Longhorns tonight as the local lads travel to Eden to do battle with the Bulldogs. Kickoff time has been slated at 8 o'clock.

Rivalry between these two teams only goes back to 1956, but the spirit between these squads will be running high. The Longhorns have defeated the Bulldogs in both outings, having taken a 20-6 victory in 1956 and a 7-6 win in 1957.

Revenge will be in sight for the Bulldogs as both teams take the field for the contest. Remembering the loss suffered last year, the Bulldogs will be working extra hard to avenge the loss. A lot of people think that the Bulldogs were dealt injustice last year as the Longhorns downed them by way of default. The Longhorns on-

ly score was late in the third period while trailing 6-0. On a fourth down play, the Longhorns passed into the end zone where pass interference was ruled against the Bulldogs and the Bronte lads were given a touchdown and the victory.

The Longhorns will be fielding a larger team than that of last year while the Bulldogs have only a few lettermen returning from their squad of 1957. A top notch game is in store for all of those wishing to travel to Eden.

Support the Longhorns

Crowds at the football games have been slowly getting smaller each year for home games as well as road games. If the people of

Bronte want to see the Longhorns have a winning team, than they will have to do their part.

When a player looks into a bunch of empty grandstands, he feels that no one cares whether they win or lose and often times the player will develop that same

Ticket Prices Raised in 6-B

Bronte school authorities announced this week that admission prices to football games in the District will be increased slightly this year. Single adult tickets will be \$1.00, while student tickets will sell for 50c.

Season tickets for all home games are on sale at the school with prices running \$4.25 for adults and \$2.00 for children. Season tickets will admit the holder to five home games.

The increase in prices was set for the entire District 6-B and will prevail this season at all games played at schools which are members.

Missionary from Bolivia to Speak To Methodist Men

Rev. LeGrand Smith, Sr., for many years a Methodist missionary to Bolivia, will speak at the Methodist Church in Bronte at 8 p. m. next Tuesday, Sept. 16. Rev. Smith will be a guest of the Methodist men's organization.

Methodist men and their wives will have a dove dinner at 7 p. m. before Rev. Smith's speech, as their first meeting of the fall season. All Methodist men are invited to attend the supper and remain to hear Rev. Smith.

Rev. Smith will speak in the sanctuary of the church at 8 and the general public is cordially invited. He has spent about thirty years of service in the missionary field in Bolivia and is well equipped to give a true report of conditions in that South American country.

Smith is traveling in the Southwest Texas Conference of the Methodist Church under the auspices of the Conference Missionary Program. A spokesman for the Methodist Men said "we are indeed privileged to have him visit us in Bronte."

Funeral Held At Midland for Frank S. Flood

Funeral services were held Wednesday in Midland for Frank S. Flood, 65, former Bronte resident. He died Tuesday morning in a Big Spring hospital following a lengthy illness.

Mr. Flood had made his home in Bronte the past few years with his sister, Mrs. Eva Keeney. Prior to moving here he had lived in Midland County and in Idaho. He operated a farm seven miles south of Midland from 1904 until 1930. He was a member of the Baptist church.

Burial was in Fairview Cemetery under direction of Ellis Funeral Home of Midland.

Survivors include four sisters, Mrs. Lora Flood Robertson ofocatello, Idaho. Mrs. Ida Trammell of Monahans, Mrs. Eva Keeney of Bronte and Mrs. Virginia Baugh of Oakland, Calif.

City Council Allows School Cheaper Water

In a meeting of the Bronte City Council last Thursday night, the group voted to sell water to the Bronte School at a rate lower than is usually charged. The cheap water is to be used only to water the football field on which grass has been started. The reduced price, which is 20c per thousand on excess of 4,000 gallons, will be in effect for 45 days.

The turf on the football field has just about died this summer and school officials are anxious to get it back in shape.

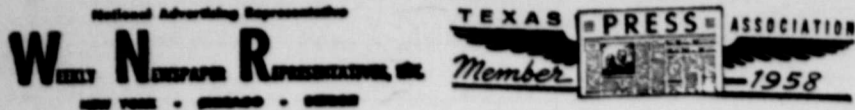

In other business transacted by the council, meeting night for the city's governing body was changed from the first Friday night of each month to the first Thursday night of each month. Change will be effective during football season.

The council set a price of \$60 as its offer to E. M. Hall for a channel easement on five lots which he owns in the north part of Bronte. The city has to secure the easement as part of its obligation in furnishing right of way for rebuilding U. S. Highway 277. The lots are located in the creek, near the bridge in the north part of town. Hall had not accepted the offer Thursday, Mrs. Helen Kirkland, city secretary, said.

Considerable discussion was held regarding placing water meters at all churches and parsonages in Bronte, so that they can be charged for water used above the 4,000 gallon minimum. It has always been the practice here to charge churches and ministers' home the minimum rate, with no charge for excess water used. The council decided to postpone action on this question until the next meeting.

UNCLE HUIE from HOG CREEK says

DEAR MISTER EDITOR:

It looks like it pays a feller to keep hisself good and ignorant these days. I see by the papers this morning where a feller held up a hotel lobby in New York, got \$6 from the owner, \$14 from the clerk, and \$178 from the bellhop.

And I noted on the bulletin board at the post office not long ago where the Government wanted a chemist and a street sweeper fer fer the grounds at the Pentagon Building. The chemist gits \$3700 a year and the sweeper gits \$4500. It shore makes ignorance look mighty attractive. All the sweeper needs is a broom and a strong back, and all the chemist needs is to go to school fer 20 years and pay the banker back when he gits a job.

And I see by another paper where there's 200,000 school teachers in this country that averages less than \$300 a month, and in the same paper there is a ad wanting pipe-fitters fer \$900 a month, counting Sunday and overtime.

And take the politicians, fer

instant. It's downright sad to see a college president beg a bunch of politicians fer money to educate their own children. And he has to beg 'em in words of one syllable so's they can understand what he's talking about. All a politician needs is four hats, no education. He needs one to throw in the ring, one to pull rabbits out of, one to talk through, and one to keep the peckerwoods from making holes in his wooden head. Education? I'm glad I ain't got none. I hope the Lord keeps me good and ignorant so's I'll have a chance to make me some money one of these days.

I see by the papers where all them big columnists is taking a vacation. Winchell and some of them installs "guest" columnists in their place to take off, but I can't find nobody to measure up to my fine literary style and profound thinking, so I reckon I won't git no vacation this year. I tried to git my neighbor to "guest" it fer me fer a spell but he says the pay is too low fer him to strain his mind on the subject, and his daughter — who

Conservation reserve participants planted many species of grass this year in the Coke Soil Conservation district with varying degrees of results. Sorghum Alum was the predominant row planted grass and in most cases good stands were established. In some cases, however, Sorghum Alum came up to a good stand and died back due either to soil condition or lack of moisture at a critical time. Research information shows Sorghum Alum to be a weak short lived perennial grass which can be expected to live from three to four years provided it is cultivated and winters are not ad-

verse. Land owners and operators who are considering a permanent pasture grass should give more thought to planting native species which are naturally adapted to this area and which do not require extensive cultivation. These native species can be planted in rows or as mixtures in drilled cover.

Mrs. George Thomas, whose farm is north of Bronte, has a drilled planting of native grasses which is showing good growth following recent rains. T. E. Tidwell, who farms southeast of Robert Lee, has row plantings of switch grass and sorghum alum up to a good stand. Other than sorghum alum, blue panic was the predominant row planted grass planted this year. Frank Percifull has a good stand of Blue Panic up in rows on his place south of Robert Lee. Success in establishing grasses under the conservation reserve program in the district was generally good, however weed competition and lack of summer rains attributed to some failures. Approximately 34% of all the cultivated land in Coke County was in the conservation reserve this

year.

A new specie of quail has recently been introduced into the State by the Fish and Game Commission. The specie is called the Japanese King Quail, sometimes referred to as Oriental or Rice quail of Stubble quail. They are native of Japan and Australia and are unusually hardy.

They are a little smaller than the Bob White. The young birds grow twice as fast as the Bob White and are less excitable. They also seem to like confinement. They start laying around six to eight weeks of age and seem to lay continuously. The eggs hatch in 16 to 17 days, depending on incubation. They are especially adapted to taking care of themselves. Of interest to the sportsman: They will use pastureland that Bob White will not stay on at all. They will stand well for the same dog that points the Bob White. The Japanese quail is a good flyer, and though they do not go in co-veys, there will be as many as sixty pair to an acre of land when well established. The number recommended for release in a place is fifty birds. They nest twice a

SPOKEN WORDS HAVE A WAY OF BECOMING DISTORTED

If you've ever tried to track down a rumor, or unscramble a piece of gossip, you know how elusive is the spoken word! Or maybe you've noticed that you can't quite recall that funny quip by your favorite radio or TV comedian, yet you have no trouble quoting a joke you've read. It's a natural thing with all of us. That's why newspaper advertising gets such good results. It's there to read — in black and white (color too if you want it) and to refer back to, at your leisure.

Press Box Chatter

By **BILL ALEXANDER**
A preview of two of the teams of District 6-B was set forth last Thursday night as the Bronte Longhorns and the Robert Lee Steers held a scrimmage session at Robert Lee. Neither team looked any too great, but both teams showed signs of having a good season.

Running from the split T, the Longhorns looked very impressive. Using Albert Grace, Alonzo Robbins, Reyes Olivias, and Dee Arrott as mainstays in the backfield, they were very aggressive with their ground attack. The big line seemed to outman the smaller Steer forward wall. If inexperience doesn't overtake Bronte this year, fans from here can look forward to a good season for the Longhorns.

District 6-B competition last week saw Hermleigh down Class

A Coahoma, Trent maul Aspermont, Roscoe of Class A defeat Loraine, and Eldorado edged Rocksprings.

This week, Bronte will be going against Eden, Robert Lee tangles to Grandfalls, Eldorado does battle with Sonora, Trent plays Knox City, and Hermleigh takes on Aspermont.

Predictions for last week went the wrong way with only two right and three wrong. Trent seemed to be the biggest surprise to everyone including myself and about a half dozen other sports writers over the West Texas area. Here goes again this week with hopes of better luck:

BRONTE downs Eden Sweetwater B by Robert Lee
Trent defeats Knox City
Hermleigh romps Aspermont
Sonora drops Eldorado
Loraine halts Grandfalls
San Angelo takes Colorado City
Stamford by Ballinger
Tyler JC over SAC Rams
Abilene by San Antonio Jefferson
Sweetwater edges Breckenridge

Mrs. Beulah Tubbs spent last weekend with her mother, Mrs. C. C. Smith. The two attended a barbecue at the home of Mr. and Mrs. Jack Herring in Ballinger Saturday night.

County Agents News Column

By **Ray Sims**
Jr. Assistant Extension Agent

I will attempt to pinch hit for Sterling Lindsey, County Agent, for this weeks column. Mr. Lindsey has been on vacation the past week and plans to be back at work Monday, Sept. 8.

As everyone knows the rats and mice have been a big problem this summer, and most likely will be a bigger headache this fall unless some control measures are taken.

When the weather becomes cooler, the rats and mice start migrating to a more comfortable, well protected area, which accounts for increasing numbers of these rodents in houses and buildings. Coke County 4-H Clubs are

planning a county-wide rat and mice drive in the near future. Club members will sell rat bait at four stations throughout the county.

The stations and other arrangements will be published in next weeks paper.

It is nice to have James Coffman, associate agent, back in the office after being gone the past two weeks. James has been on two weeks active duty with the army reserve at Fort Polk, Louisiana.

4-H club boys have finished their record books and have submitted them for district competition. The records will be judged September 10, at San Angelo. Those competing are as follows: Jerry Jameson, James Bird Pentecost, Gaylon Pitcock, Bobbie Rae Blaylock, Dewayne Dee Arrott, Kenneth and Robert Wink, and Bill Rankin Roach.

Campaign Against Mice and Rats Launched by Coke County 4-H Clubs

Coke County 4-H Clubs, in cooperation with the Texas Rodent Control Service, have launched a campaign to control mice and rats that are plaguing the county. During the next two weeks, the clubs will have bait available. It is prepared by the Rodent Control Service to curb heavy infestations and a possible heavy build up of the predators. Similar campaigns are being conducted in other counties.

Four stations have been established where orders for bait can be made. Either dry or a water mix bait may be ordered at Odom's Cafe, Silver; Baker's Grocery, Robert Lee; Lee's Feed Store, Bronte and Green's Grocery, Tennyson.

The bait will be available two weeks, Sept. 12-26. Deliveries will be made on Sept. 15, 18, 22, 25 and 29. Bait will be delivered on the first delivery date following the order.

Two kinds of bait will be offered. The dry bait contains furmarin, an anticoagulant as the killing agent.

Anticoagulant baits are very effective, but must be eaten daily or at regular intervals for five to seven days. The bait must be kept out at least a week and preferably longer to work effectively. One or two pounds normally is ample for household use while five to ten pounds is needed for a farmstead with several buildings. These baits are relatively safe to use around pets and children. They can be harmful to pets or people, but must be consumed in large amounts to be harmful.

Water mix baits come in packets that make one quart of bait when mixed with water. It is sometimes more effective than dry baits around granaries, barns, or stored feeds where there is loose grain. Using both wet and dry bait in such areas is usually effective.

A good method for baiting is to put one-half the bait in small containers such as jar lids or cut off cans or paper bags with a small hole in them. The bait should be placed along rat paths such as rafters, baseboards or behind boxes. Bait should be checked daily to see that it is available for at least a week or longer as

other rats and mice will migrate in.

As cool weather approaches, the rodents will migrate to shelter and feeding areas. Now is the best time to begin offsetting damage that could be done by a winter influx of the pests.

All farm and ranch operators are invited to participate in the control campaign. The more operators cooperating, the more effective the program will be.

Soil Bank Signup Outlined by ASC

A step-by-step description of how a farmer can put all or part of his land in the 1959 Conservation Reserve of the Soil Bank was given here today by Clarence E. Arrott, Chairman of the Coke County Agricultural Stabilization and Conservation Committee.

He emphasized that the first and most important step is for a farmer to ask the County ASC Committee to establish maximum annual payment rates for his farm. Payment rates will not be established for a farm unless requested by the farmer. At the same time, the farmer should furnish the Committee with information on acreage and yields for his farm and give an estimate of the value of his land. This information is needed before the rates can be established for their farms. The deadline for farmers to request that rates be established for their farms is Sept. 26, 1958.

On the basis of the information supplied by the farmer and other records, the County office will establish maximum annual rates of payment for the farm and will send the farmer an application form for placing land in the program. The application form will show the rates established for the farm.

The farmer then decides how much cropland he wants to put in the Conservation Reserve, how long he wants his contract to run, and the rate of annual payment at which he will offer his land. He enters this information on the application form. The application must be returned to the County ASC Committee on or before Oct. 17, 1958, the deadline for filing application.

In connection with the filling out of this application, Chairman Arrott pointed out that a farmer may offer to put land in the Conservation Reserve at less than the maximum annual payment rate established for his farm. He stressed that this could be particularly important since priority in accepting applications will be given to farmers who make the best offers. Thus, the farmer who offers land at less than the maximum rate set for his farm will be more certain of having his application accepted.

Contracts will be offered to farmers after the deadline for returning applications to the County ASC Committee. Before a contract is concluded, someone from the County ASC office will visit the farm and examine it for eligibility and measurement of acreage. Where only part of the cropland of a farm is offered for the reserve, the land will be examined to determine if it is substantially as productive as the average of all cropland on the farm. Then Mr. Arrott said, the contact is ready for the signature of the farmer and the approval of the County ASC Committee.

Any farmer can participate in the Conservation Reserve who has cropland which is regularly used for cultivated crops or tame hay.
