DIRECTIONS: 5 Miles East Of Dimmitt On North Side Of Road On Highen

This year farm operators see conclusive proof that use of anhydrous ammonia produces substantially bigger crops. In areas where weather prevented timely application of Nitrogen, yields are down. Where Nitrogen was used, farmers who had check plots report highest returns on their investment in Nitrogen fer-

Get ready for next year's big crop. After mile harvest, apply Dow 82 ammonia. Mile stalks and roots provide the ideal organic material to help the fertilizer work best for you. Dow's 82% Nitrogen speeds decomposition of turned-under stalks; improves soil fertility. Dow 82 resists leaching. It stays in the ground, ready for use. Spring plantings get a healthier, quicker start, develop vigorous root systems that help prevent blowing soil.
