Why am I here? What shall I do with my life? Where am I going? This young man is at the threshold of his adult life and needs the answer to some serious questions. Perhaps you find yourself pausing to take stock of your life and groping for direction. The Church of the Living God tells the truth about man's life, death, and destiny. The truths learned there will set you free to live a more abundant, meaningful, and creative life. "And ye shall know the truth and the truth shall make you free." John 8:32.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

## Horne Retires From Teaching

Friends of Mr. and Mrs. L. A. (Lokey) Horne hosted a going away and retirement party for them May 27 at the Farmer School, 12 miles northeast of Lorenzo.

Mr. Horne is the brother of Mrs. Ernest Marshall of Bronte and Mrs. Horne is the daughter of the late Mr. and Mrs. Doc Mackey of Norton.

Mr. and Mrs. Horne have taught in the Lorenzo School district for 13 years; five of them in Lorenzo Public Schools and eight in the Farmer Rural School. Before that he taught 17 years at Big Four, a rural school north of Crosbyton, and Mrs. Horne taught 12 years there. He has taught a total of 31 years in Crosby County and has a total teaching career of 48 years that covers Mitchell, Swisher, Runnels, Concho, and Coke, as well as Crosby County.

Mrs. Horne, with a total of 29 years teaching experience, took time from her career to raise two children, Kerry Wayne, and Mrs. Bill (Cathy) King, both of Fort Worth.

Mr. Horne began his teaching career in Bronte coming here in September, 1919 and taught one year. After that he taught in Concho and Runnels Counties, then he and his wife, the former Beryl Mackey, came back to Bronte in 1926 and taught here until June, 1928. He was scout leader for a large troop here at that time and some former members of his troop still live here. He says "he still enjoys coming back here and visiting with 'his boys'."

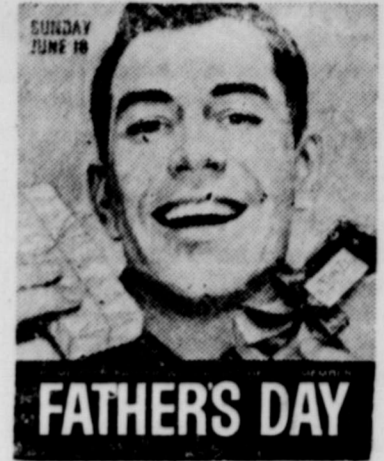

Upon retirement, they were presented a gold certificate and teacher's retirement pins from the school; elementary school teachers gave them a gift of luggage and Horne's fifth grade class presented him with a money tree.

Mrs. C. J. Henry, long time Blackwell resident, has moved to Bronte, and will make her home in the southeast part of town. Mrs. Henry is a sister of Mrs. Iva Richards and Floyd Fancher.

**Polyester Fabric Care**

Avlen, Dacron, Encron, Fortrel, I.R.C., Kodel and Vycron all need the same washday care.

All of these fiber tradenames have the same generic, or family, name—polyester. Only the family "polyester" is required by law to appear on the garment label. The use of the tradename on the label is optional.

Learn to know the characteristics of the family. Polyester has excellent wet and dry wrinkle resistance, shape retention, durability and easy washing. They are resistant to sunlight and weather. Polyesters are not affected by moths, mildew, or bacteria.

Polyester fabrics can be shaped by heat and retain that shape without shrinking or sagging. Heat-set pleats and creases last through many washings.

Polyesters have superior wash-and-wear performance but oily stains are difficult to remove. However, oily stains can be removed from cuffs and collars by rubbing a paste made from soap or detergent into the fabric before washing. Occasional lint pick-up can be reduced by using an anti-static agent in the final rinse.

After repeated washings, white polyesters used to tend to look dingy and yellow, but a new research development has overcome this drawback. New types of polyester have outstanding whiteness plus life of the garment whiteness retention. The new snow white polyesters are now being used in most white apparel items automatically. Advertisements and hangtags will usually stress lasting whiteness for these items and make them easy to identify.

Wash polyester fabrics in moderately warm water using a light agitation action in the washer. Drip-dry or spin in a cool dryer. Hang and straighten the garment, seams and collar. Keep the label that comes with the garment and refer to it before laundering.
