LETTERS TO THE EDITOR

Dear Ben:

As one who has edited newspapers and mingled with newspaper people and who for two and a half years worked with you and Libby, I would like to write for the record this word in regard to her.

Libby Oglesby was rated high among career newspaper people in Texas—not only as her husband's helper, which she certainly was, but also as a newspaper person in her own right.

She knew the weekly newspaper from the front door to the back. In true newspaper tradition, she could sit all day at the linotype machine, or pick up a pencil, take notes, write copy, keep books.

Libby did all this in such an unassuming way that I doubt if nearly everyone who knew her really knew the extent of her ability in this field, for which she had prepared herself and in which she rated high among the career newspaper people of Texas.

The loss is not only yours and Bronte's, but is also one that the whole newspaper fraternity will feel most keenly. This testimony I hope will be published in The Enterprise, for I know it to be the sentiments of the large number of newspaper people who knew her.

With personal sympathy, our prayers and best wishes,

Ulmer Bird

Men's Team To Play Aug 10

The men's baseball team, made up of men from Bronte and Blackwell, will play a team from Wall at the local ball park Thursday, Aug. 10, at 8 p.m.

A spokesman for the team said they and members of the Bronte Yankees Little League team will appreciate a good crowd for the game. Little Leaguers are interested in selling the rest of the merchandise they have in the concession stand, and invite everyone to come and patronize them.

Work began this week on the paving repair project for streets in Robert Lee and Bronte, as well as paved roads in rural areas which are maintained by the county.

Price Construction of Big Spring and Snyder was successful bidder on the project with a low bid of \$112,018.

Work on sealcoating the streets started Monday at Bronte and it is expected that Price employees will soon be working in other parts of the county, as well.

The contractor has 80 days to complete the work, but he told county commissioners that he would probably need only 40 to 50 days. In addition to sealcoating streets and roads, several blocks of new paving are included in the contract.

The paving project was financed with a \$200,000 bond issue approved by voters of the county on Feb. 26. Columbian Securities Corp. bought the bonds, which are to be retired in 10 years.

Also included in the project were four new bridges in the county, which have already been completed.

The bond vote was called when it became apparent that much of the county paving was in need of repair. The paving projects in Coke County were begun in 1954 and only piecemeal repair work has been done since that time. Consequently, voters approved the bond issue to finance the work on all the streets.

Bryan Concrete Co. of Robert Lee will supply most of the material needed for the work.

Ben Oglesby, publisher of The Enterprise, said that large number of subscribers have taken advantage of the special rates and he invited those who haven't to do so Friday and Saturday.

Screwworm Cases On Increase

By Sterling Lindsey

The screwworm population in Texas seems to be competing with the heat for records. Ordinarily, the hot dry period of the year brings a reduction in screwworm activity. This has not been true to date.

For the second week in a row, Coke County had more than 20 confirmed cases. A total of 22 cases were confirmed last week, coming from throughout the county. The county total for the year is up to 81 cases and changing daily. We are receiving some sterile fly drops, but complete control is not expected this year until cold weather arrives.

We received the following statement from the screwworm control center last week explaining the total screwworm picture:

"In order to release sufficient numbers of sterile flies in some

areas of the southwest which are considered critical to the success of the screwworm eradication program, there are other areas where screwworms now exist that will not receive sterile fly releases. The critical areas are considered to be east and southeast Texas due to the threat posed to the southeast United States, and southern Texas where screwworms could continue to be a problem through the winter months.

The first areas of the southwest where sterile fly releases have been discontinued are the northern two-thirds of Oklahoma and all of the Texas Panhandle and extreme northwest Texas. As additional sterile flies are needed in the critical areas, sterile fly releases will be discontinued over other areas to the north where cold weather will eventually kill out screwworms this winter."

Austin — Gov. Preston Smith is threatening a special legislative session on insurance reform.

In a statewide, televised speech, he announced he will ask the Legislature to abolish the paid, three-member State Insurance Board, which he charges is company dominated.

Angered by Senate rejection July of his longtime friend, Larry Teaver, to the Board, Smith blamed the defeat on the

"powerful insurance lobby." His recommendations to "completely reorganize and reform the regulation of the insurance industry, will be delivered to a special session this year or to the next regular session in January.

Reaction to his speech, the Governor said, will determine whether he goes through with the special session call. He feels reorganization of the Board can be achieved only in a limited special session, but he isn't sure whether the public yet supports reform strongly enough to insure action.

Dallas Sen. Oscar Mauzy, a leader in the move to reject Teaver, challenged Smith to follow through and call the session immediately. He said he opposed Teaver, not because he was a consumer advocate on the Board, but for "lack of character and ability."

Smith in his tv speech announced 19 vetoes of items totaling \$6.35 million from the 1973 appropriations bill.

\$200 MILLION TAX NEED SEEN — The House Revenue and Taxation Committee received advice the Legislature may be looking at a \$200 million money shortage for the next biennium when it reports next year.

James McGrew, Texas Research League director, told the Committee spending from general revenue and other key state funds will jump \$700 million over the present level next biennium. But he figured an additional \$375 to \$400 million in revenue is anticipated from present "growth" taxes, and a \$100 million federal welfare windfall is foreseeable.

The Committee also was reminded repeatedly of the likely effect of a federal court decision (now on appeal) holding the present method of financing public schools by ad valorem taxation unconstitutional. And a University of Texas official suggested property, income and sales taxes are all necessary to get "maximum equity" in the tax system.

Governor Smith strongly disagreed with McGrew's forecast and said there is a strong possibility no new taxes at all will be need-

ed next year.

COURTS SPEAK — The Supreme Court reconsidered and agreed to hear arguments next October in a controversy in which the wife of a Wichita Falls doctor was granted a divorce settlement which included a \$40,000 community property right in his medical practice.

In other cases, the High Court concluded:

* A city can cut off water service for failure of residents to pay a garbage collection fee.

* Lower court rulings should be left standing which assessed a Houston doctor \$134,150 in damages for failure to exercise proper diligence in treating a child for a broken leg. The boy lost his leg.

* Child support payments should be lowered for a once wealthy father who lost his money on the stock market.

AG OPINIONS — Grand juries can only investigate alleged criminal offenses and report as to indictments returned, Atty. Gen. Crawford Martin held.

In other recent opinions, Martin concluded:

* House of Representatives personnel records can be disclosed "within sound discretion," although there is no law making them public records.

* A county judge (or his bondsman) who signs a minor's application for a driver's license is not liable for any subsequent negligence or misconduct of the minor in operating a car.

* School districts cannot prohibit teachers from participating in political activities.

* No vacancy exists in a justice of the peace precinct where part of land is detached and transferred to another precinct by commissioners court action. Commissioners have authority to reduce JP salaries during their term.

* Commissioners precincts may be redistricted on the basis of either total registered voters or total population as long as the count remains substantially the same in each.

ALIENS SMUGGLED IN — About 412,000 illegal immigrants were deported from the U. S. last year, according to a Texas Good Neighbor Commission report.

Most of the group were Mexican citizens. The Commission said smuggling of the aliens into the country has become big business and that tougher criminal laws are needed to deal with exploitation of Mexican labor.

Short Snorts

Houston may be a prime area for industrial expansion from Europe and Japan, according to Texas Industrial Commission.

Sen. Chet Brooks of Pasadena will serve as governor for a day Aug. 12.

University of Texas Bureau of Business Research reports a big swell in non-residential construction.

Twenty million dollars in state student loan bonds were sold July 20 at an effective interest rate of 4.89 per cent.

Texas Welfare Board learned a new federal regulation may force the state to pay assistance to illegal immigrants.

Sen. Lloyd Bentsen complained Texas flood victims are not getting equitable treatment from the federal government, and demanded the same helping hand as is being extended victims of Hurricane Agnes in six eastern states.

A statewide food stamp program for the needy will be put into effect this year, with stamps purchased at post office windows.

The Texas calf crop this year is expected to be the highest since 1924, the Texas Crop and Livestock Service reports. A calf crop of 5,444,000 head is expected this year; this compares with 5,286,000 head last year.

Nationwide, the 1972 calf crop is expected to total 48,445,000. This is three per cent more than 46,974,000 head produced in 1971. The 5,444,000 calves expected in Texas this year is more than twice the number expected in second ranking Missouri. Oklahoma is the third leading state in calf production.

SHEEP and lambs on feed in Texas as of July 1 is down 18 per cent from a year ago. Sheep and lambs on feed totaled 150,000. Marketings of fed sheep during March through June at 226,000 head were 1,000 below the same period last year.

Sheep and lambs on feed are those intended for slaughter being fed a ration of grain or other concentrates or on succulent pastures and expected within the next three months to produce a carcass that will grade good or better.

SCREWORMS continue to infest Texas livestock as well as wildlife and domesticated animals such as dogs. Little or no relief is expected from the screwworm infestations until cold weather

sets in this fall and winter.

Livestock owners are urged to continue to check their livestock regularly and to treat wounds on livestock for screwworm control.

LESS pollution from wind erosion has been noted this year compared to last year. Wind erosion in the Great Plains moved downward from damage totals a year ago.

Texas, with 1,145,150 acres, or about one-half of the total nationwide, reported the most wind erosion damage this season. Nationwide, land in condition to blow is reported at 3,269,060 acres this year compared to 6,693,695 acres for 1971.

CROPS are continuing to make generally good progress throughout the state. Cotton is reported to be making excellent progress on the High Plains and Low Plains due to recent rains. The crop is doing nicely in the Blacklands and East Texas except for insect problems. Harvest in the Lower Rio Grande Valley has been delayed by rains.

Corn is making good growth in most areas of the state. Grain sorghum harvest is more than 20 per cent complete. Yields have ranged from good to excellent in Blacklands and parts of south and south central Texas.

Soybeans and peanuts are making good to excellent progress. Rice harvest is making fair progress but rain has delayed harvest operations. Harvest for the state is nearing the 20 per cent completion mark.

As for commercial fruit, peach harvest continues in most areas with Elberta varieties now in production. This year's pecan crop shows good potential with most trees having moderate to heavy nut set.

VACCINATE now for control of Venezuelan equine encephalomyelitis (VEE), authorities recommend.

VEE is now about 600 miles from the Texas border. Several hundred head of horses have died from VEE in Mexico. VEE appears to be moving northward in a pattern similar to last year when the disease invaded Texas.

WASHINGTON

"As it looks from here"

OMAR BURLESON

Congressman
17th District

Washington — The United States Senate has again passed the Bill entitled "The Comprehensive Headstart, Child Development and Family Services Act of 1972." In December of last year the Congress passed a similar measure as an amendment to the Economic Opportunity Act which was vetoed by the Presi-

dent. "Child Development" should not be confused with "day care" which provides facilities for children of working mothers. There are provisions for these services in other legislation.

The Bill passed by the Senate and which will soon be before the House of Representatives is more than just "child care." As described by the advocates it is "an activist's program intent upon perfecting the child's early environment." Dr. Reginald Lourie, president of the Commission on the Mental Health of Children, in testifying before the Senate Committee said "there is serious thinking among child researchers that we cannot trust the family alone to prepare young people for this new kind of world—not only are parents unnecessary, but they are too inept to rear their own children."

Well how do you do, Dr. Lourie!! — The "new kind of world" Dr. Lourie refers to must be that novelized by Huxley who foresaw test tube children and regimented adults whose pleasure was dispensed in governmentally prescribed doses.

The assumption of those who promote and support these ideas seem to be that an institution, run by an impersonalized staff, can substitute for parental love and care.

As Dr. Ernest van den Haag New York University psychoanalyst testified, "the assumption that social science has as yet produced a tested theory of child rearing is sheer fantasy. Only a few variables have been detected and they suggest that family care should be encouraged, not replaced."

No one argues that there is not a need for remedial services for disadvantaged and neglected children. There are programs already in effect for this purpose. The "Child Development Bill" as passed by the U. S. Senate and now to be considered is much, much more. The whole concept appears to be that the Government and its agents know how to provide "healthful and stimulating development" of children. Dr. Van Den Haag further testified: "If the government has such knowledge it is a well kept secret of which the scientific community is quite unaware."

Mr. George Gilder in a recently published article had this to say: "When these havens (family and home) are eliminated, where does one go to find love and individual affirmation—to be accepted for who one is, rather than for what one does or how much money one makes? Where can one find meaning and a sense of the future—of human transcendence? Not in a day care center, I trust."

The concept of communal child rearing is alien to America and would deeply affect the traditional values found in the family unit.

The "standardizing" of children has historically been the practice of totalitarian countries. Probably Communist China has the most far reaching of any in modern times. Political and social direction are the principle motives. This sort of regimentation just does not represent the American family life which has been the mainstay of the moral fiber of our nation.

We cannot demand on one hand more academic freedom, more freedom of mobility and more freedom of speech while on the other hand abdicate to the government the responsibility for teaching these freedoms to our children. Not only is it glaringly inconsistent, but the chances are these and other principles would never be taught.

The greatest objection of all to these proposals is the simple proposition of substituting a building for a mother's image.
