Austin — Most homeowners are expected to get a big break on insurance rates next year.

Exceptions will be those who live in the 27 county Gulf Coast area.

The industry-oriented Texas Insurance Advisory Association recommended the State Board of Insurance reduce by 17.7 per cent extended coverage (hail, wind-storm, vandalism, etc.) rates and by 16.2 per cent homeowners' rates in the North-Northwest area. That includes most of the Panhandle and South Plains.

Association recommendations

for the big Central Inland territory (Dallas, Fort Worth, San Antonio, El Paso, Austin areas) included a 12.1 per cent decrease in

About 500 insurance agents who attended the Board hearing on the proposals expressed approval but loudly protested another recommendation by the Association to standardize their commissions.

The Board staff is awaiting directions as to whether to calculate new rates on its own formula or the new recommendations.

COURTS SPEAK — Texas Supreme Court agreed a re-trial is in order for a lawsuit against Union Carbide Co. as a result of an explosion which killed two and injured two.

The Court of Criminal Appeals held a San Antonio man cannot complain about exclusions of blacks from his murder trial jury extended coverage and 10.9 per cent reduction in homeowners' premiums.

The Seacoast territory would get a 17.5 per cent hike in extended coverage premiums and an 8.3 per cent increase in homeowners' policy rates.

All territories would benefit from an Association proposal to reduce fire insurance rates by 7.7 per cent.

An Association spokesman estimated total savings of \$6 million for extended coverage and \$9.8 million for homeowners' insurance in the Central Inland territory. He calculated increases of \$8 million for extended coverage and \$5.9 million for homeowners' rates in the Seacoast territory, since he agreed to the exclusion himself.

The Third Court of Civil Appeals held property owners in Wylie School District should have the right to join the Abilene School District.

GAS PROBLEMS TOLD — Natural gas supplies are dwindling and producers are not meeting agreements, the Railroad Commission was told in a hearing last week.

The Commission is studying the possibility of setting priorities for gas distribution when there is short supply.

One pipeline company claimed a chief supplier delivered little more than half the gas it agreed to provide. A company spokesman suggested homes and schools

get first priority on the gas supply available, with second priority allocated to generation of electricity for domestic consumers.

HORSE RACING REVIVAL — A Senate committee is conducting a survey, results of which admittedly may be used to bolster new drive for pari-mutuel horse race betting.

The Senate Horse Racing Study Committee sent out 5,000 questionnaires to assess the horse industry and its economic impact on Texas.

Among questions asked of the horse owners and riding equipment suppliers is whether pari-mutuel wagering would expand their operations and how local lawmakers would vote on the issue.

The Committee vice chairman said results of the survey "could be used to build an economic case" for wagering on horse races. A meeting of the panel is slated here Dec. 14 to hear opponents of racing and pari-mutuel gambling and to receive a report on potential state revenue from legalized wagering. Committee heads said a constitutional amendment would be necessary to revive pari-mutuel betting on the races.

HOW TO PICK UP \$5 MILLION — Texas could gain \$5 million a year in delinquent sales taxes by changing collection procedures in

the comptroller's office, a Senate interim study committee has been told.

Actually, an Illinois tax expert estimated, the state could collect \$8 million more each year, but hiring of an additional 200 state sales tax auditors would take about \$3 million of the gain.

An attorney general's representative said Attorney General Martin wants to require Texas businesses to post bond to insure payment of the sales taxes they collect.

Short Snorts

Atty-Gen.-elect John Hill has pledged to head up a "strike force" of lawyers to fight organized crime in Texas.

The State Bar came up with a plan for prepaid legal services.

A consumer protection study committee of the state Senate heard a plea for new laws to protect tenants from unscrupulous landlords who refuse to refund security deposits or make needed repairs.

Gov. Preston Smith plans to make about 50 appointments to offices before his term expires.

An El Paso representative-elect will introduce a bill to protect the confidential nature of newsmen's sources.

Attorney General Martin underwent cataract surgery at Johns Hopkins Hospital, Baltimore, last week.

Every minute of every day, your electric clock indicates with visible proof, the precision and dependability of electric service.

It's dependable, because electricity operates the clock faithfully — 24 hours a day. It's precise, because our electric system operates in time with a master clock at the U.S. Naval Observatory, keeping your clock in step, down to the second.

Your clock operates a whole year on about 43 cents worth of electricity...one of the bargains you get with your electric service.

Today, the average residential customer uses nearly twice as much electricity as he did in 1962. But the average cost of a kilowatt hour is 15% less now than it was ten years ago.

## Blackwell Junior High Team Finishes 1972 Football Season with 6-0 Record

Blackwell's junior high football team has concluded a most successful season, and Coach Ed Poehls said he is extremely proud of his young charges. The lads wound up the 1972 season with a perfect 6-0 record.

Coach Poehls said he wouldn't be so impressed with this record,

except for the fact that the main thing the boys had going for them was lots of heart and desire. "The biggest boy on the squad weighed only 115 pounds," he said, "and we played teams that had lots of guys who weighed up to 160 pounds."

The junior high team offense averaged slightly more than 41 points per game, while the defense gave up an average of 4 points to their opponents.

Members of the squad include Flent McNeill, Kent McNeill, Larry Francis, Tim Scott, Johnny Hamilton, Lynn Pate, Charlie Roland, Gid Ware, Joe Bell, Bryan Andrade, Terry Francis, Scott Motley and Wendell Wade.

The coach singled out the following boys for doing an especially good job: The McNeill twins, who did the most ball carrying; Larry Francis and Scott for defense; Pate for quarterbacking; and Ware who was center and did an outstanding job of blocking.

The Blackwell Pee Wee team had a pretty good season, also, winding up with a 2-2 record.

Coach Poehls said with boys like his junior high bunch coming along, he expects to have some good varsity teams in years ahead.

### DRIVE UNDERWAY TO STOP MOSS AT OAK CREEK LAKE

A drive is underway to figure out a method of stopping the growth of moss and weeds in Oak Creek Lake.

I. B. Pate, owner and operator of Sportsman's Lodge at the lake, is spearheading a drive to raise funds for use in a moss and weed control program.

Pate mailed letters this week setting forth the value of the lake to this area and presenting the seriousness of the problem.

A fund has been set up at First National Bank in Bronte and anyone who wants to contribute to it may take or mail his contribution to the bank.

Pate said in his letter, "If the rate of (moss and weed) growth we had in the lake this year can be used as an indicator, it is imperative a vegetation control program be established."

### How to help your child succeed

The most important thing any parent can do for a child at any age is to try and give him a good self-image. The way he sees himself, feels about himself, in large part determines what he will attempt to achieve and the degree of his success, say child specialists Louise Bates Ames, Ph.D., of the Gesell Institute of Child Development in New Haven, Connecticut, and Joan Ames Chase, Ph.D., from Children's Mental Health Center, Columbus, Ohio.

Self-esteem is based chiefly on two concepts: "I am lovable" and "I am worthwhile." You can help promote these ideas if you realize that how you treat your children has a greater influence on their feelings of self-acceptance than what you say to them.

One way to insure failure and self-depreciation is to expect too much. Make only reasonable demands on your children, demands they can fulfill—and try to see that away from home, at school, for example, only reasonable demands are placed on them. How much you require of a child depends on his age and his personality. The more you know what to expect of a child of a particular age and the more you know your own child, the better job you can do making reasonable demands of the child or in en-

couraging the child to make reasonable demands of himself.

**What to do if he fails . . .** It's your job, and a difficult one, to help your child handle failure. Here are some general rules on what not to do:

Don't reason with your child to show him that he shouldn't be disappointed at his failure.

Don't put him off with clichés, such as "Everything's for the best."

Don't point out to him how you would have acted differently.

Don't try to improve his personality by telling him how he should have behaved.

Don't minimize the situation, as if his failure really didn't matter.

Don't immediately try to cheer him up. Give him a chance to express his disappointment and sorrow.

If you want your children to grow up to be successful and have a happy adult life, your example may have as much affect as your admonition. Start by setting reasonable goals for yourself, your spouse and your children, and remember, that praise is a necessary ingredient of success and self-affirmation.

**Fruitcake Novelty**

Fruitcake is traditional during the holidays and traditionally time-consuming to prepare . . . until this one. Gayly decorated with glacé cherry flowers and served from within a ring of holly, Ever-So-Easy Fruitcake features a truly novel use for packaged corn flake crumbs, mincemeat and sweetened condensed milk. Measuring and mixing together the seven ingredients result in a batter to be baked slowly, allowing the flavors to blend. For further "ripening," this fruitcake can be well-wrapped and stored a week or more before bringing it to the holiday table.

**Ever-So-Easy Fruitcake**

3 eggs  
2 cups packaged corn flake crumbs  
1 teaspoon baking soda  
1 14-oz. can (1 1/2 cups) sweetened condensed milk  
1 28-oz. jar (2 2/3 cups) ready-to-use mincemeat  
1 lb. (2 cups) mixed candied fruit  
1 cup chopped nuts

1. Lightly grease 9-inch tube pan; line with waxed paper. Lightly grease waxed paper. Set pan aside.
2. In large mixing bowl, beat eggs until foamy. Add remaining ingredients; mix well. Pour batter evenly into tube pan.
3. Bake in slow oven (300°F.) about 1 hour 45 minutes or until wooden pick inserted near center comes out clean. Remove from oven; cool slightly before removing from pan. Let stand until thoroughly cooled. If desired, decorate with glacé cherries.

Yield: 1 9-inch fruitcake.

Note: Fruitcake may be wrapped tightly in waxed paper and foil and stored in refrigerator for several weeks before serving. For added flavor, wrap fruitcake in liquor-soaked cheesecloth before wrapping in waxed paper and foil.
