AD-LIB-BEN

The death of President Lyndon B. Johnson is indeed a sad thing for us. As a publisher of a weekly newspaper we have been privileged to meet several people of more or less greatness and who occupied more or less great positions in government and other fields. But Mr. Johnson was the only great man of our time whom we felt we knew somewhat personally.

The first time we ever met him was in 1948 when he came to Bronte in a helicopter seeking votes in his second U. S. Senate race, which he won by the landslide majority of some 40 votes.

Later we had the pleasure to meet and talk with him several times while he was a senator, vice president and president. Libby and I went to the ranch a couple of times for the Johnson's famous barbecues, both times in 1964, when he was running and again after he had been reelected.

Mr. Johnson was a magnetic man who could make you feel that he was giving you his undivided attention while he was talking with you. I remember well one time in the early 1950s when we went to a graduation exercise at Texas Tech and I went up and talked with him a short time after he had delivered the commencement address. He told me in no uncertain terms that he felt the support of The Enterprise won the election for him and he was grateful. Of course this same thing could have been said about any newspaper that supported him in the squeaky election of 1948.

Mr. Johnson needs some time for vindication of some of his actions while was President of the United States. It's not necessarily true in Texas, but in much of the country he is thought of mainly as the President who accelerated the war in Vietnam. And that's true. He inherited the war and he really wanted to win it and get out of there. But some of the anti-war people put so much pressure on him that he, even in his great position of power as President, felt obliged to slack off and not even run for reelection in 1968. We felt then and feel even now that if the doves had left him alone he would have won the war and we would be out of Vietnam already.

But the Vietnam war is not all Lyndon Johnson will be remembered for in the years ahead. Rather, he will be remembered as the Southerner who instigated and pushed through the Congress

his mother, Mrs. W. T. Green, retired as postmaster.

The new postmaster is the son of Mr. and Mrs. W. T. Green. He attended school at Tennyson, Bronte and San Angelo. He attended San Angelo College two years, then transferred to Texas Tech where he received his degree.

Mrs. Green served as postmaster at Tennyson for 30 years before her retirement last summer.

REP. ROSSON NAMED TO HOUSE COMMITTEES

State Representative Renal B. Rosson was named to three committees important to his district this week by newly elected Speaker Price Daniel Jr., in appointments which generally reflected a shift of influence from the rural areas of Texas to major cities, particularly in the Houston-Gulf Coast area.

Under a new rule which gives the Speaker power to choose the chairman and vice chairman of each committee plus half the remaining members, Rosson, generally regarded as a conservative, retained his membership on the Wild Appropriations Committee, and was also named to the Judiciary and Insurance Committees. Of the 21 chairmen appointed, 14 were from counties of over 100,000 population.

House committees have been reduced from 46 to 21, so each committee is more powerful and encompassing. Rep. Rosson's place on the Appropriations Committee, generally considered the most powerful of all House bodies, assures at least one voice from rural West Texas.

Bronte area residents awakened Thursday morning to find a blanket of snow covering everything. Snow fell heavily most of the morning but there was little accumulation on the ground due to the fact that the thermometer hovered above freezing and the snow was very wet and melted easily. Most of the snow was nothing but slush by the middle of the afternoon.

Forecasters predicted continued rain and snow flurries for Thursday night and warmer weather Friday.

A high wind moved into this area last Saturday afternoon, bringing some blowing dust. The wind continued to blow Saturday night and most of Sunday. The front brought rain and snow early Sunday morning. Some damage was reported to roofs, as the wind gusted up to 45 miles per hour. L. W. Duncan, who lives northwest of town, reported damage to irrigation equipment.

status should await general revision of drug laws also brought some complaints. He planned to present his narcotics law revision to the Legislature this week. Among the Governor's priority proposals:

Strengthening the lobby registration act and adoption of a new code of ethics, early creation of a constitutional revision commission, penal code revision, laws to curb 'fences' of stolen property and give courts power to deny bail to dangerous offenders, requiring convicts to serve more of their sentences before becoming eligible for parole, more emphasis on vocational education and a requirement that spending bills be accompanied with long range estimates.

SENATE RULES ADOPTED — Lt. Gov. Bill Hobby easily won his first big test of authority in the Senate when rules he favored were adopted 24-6.

One of the most significant rules for Hobby restored his power to appoint all Senate committees. A change adopted last September fixed appointments on the basis of seniority, leaving the lieutenant governor authority only to fill vacancies.

Another alteration in which newspaper executive Hobby had a strong interest will require Senators to vote in open meeting on confirmation of appointments by the governor. They will still debate qualifications and character of appointees in closed sessions unless two-thirds of Senators vote otherwise.

Still another change in the rulebook will make it more difficult to resurrect bills on 'minority reports' which have been 'killed' in committee earlier. Two-thirds of the Senate must vote to permit substitution of minority reports for majority reports of committees. Hobby broke a 15-15 tie in favor of the two-thirds rule.

The Senate rejected amendments to permit shutting off filibusters after 24 hours, to permit Senators to elect their own committees and to throw debate on appointments wide open. They also turned down by a close margin an amendment to retain executive sessions for voting on appointments.

Hobby named veteran Senators to head Senate committees, but he gave vice chairmanships and subcommittee chairmanships to freshmen.

WELFARE LAW COST TOLD—New federal legislation may cost Texas another \$66 million in fiscal 1975, a special study committee reported.

'Findings indicate consequences for Texas are of far greater magnitude than those which might be supposed from federal estimates thus far,' the committee said.

The federal government will pay cost of adult welfare recipients, but relaxed eligibility for medical care more than offsets state savings.

The committee estimated adult caseloads will more than double under the federal program.

Short Snorts

Governor Briscoe named Mark W. White Jr., 33, a Houston lawyer, as his Secretary of State, ending wide speculation.

Big city school enrollment has declined slightly.

Republican Executive Committee members will meet here Friday to elect a new state vice chairman, look backward to 1972 political gains and forward to 1974 plans.

Speaker Daniel is backing legislation to curb the power of lawyer-legislators to delay trials by entering cases while a legislative session is in progress.

POWER IN THE CHURCH

This is the third in a series of questions and answers regarding the important experience of the baptism with the Holy Spirit. This is presented with the prayer that it will stimulate you to a deeper interest in the plan God has for your life in His Spirit.

Why is the baptism with the Holy Spirit so important?

Jesus considered the baptism with the Holy Spirit so important that He expressly forbade His disciples to begin their ministry until they had received it. He knew it was essential for them to have the power which baptism with the Holy Spirit provides. Acts 1:4-5

There are many other reasons, only a few of which I shall list:

(1) It is only through this Heavenly gift empowering us, guiding us, and transforming us that we have immediate union with the glorified Jesus and are given power to do His work and His will and to grow up into His likeness.

(2) Through this union now, open to every believing and obedient disciple of Jesus, every one of us finds himself on the opposite kind of cross from His.

(3) The Holy Spirit is the only Consciousness that knows Jesus and is capable of revealing Him as He is. At the same time it reveals us as we really are.

(4) Through the Holy Spirit we are guided into all truth and shown things to come and given power to overcome (John 16:13).

HERE'S BLACKWELL

By Mrs. Rockety Thompson

Mrs. Sweet Goes to Alaska

Mrs. Elna Sweet has returned from a Christmas visit with her children and their families, Mr. and Mrs. Gene Cole and Joe in Dallas and Mr. and Mrs. Walter Sweet, Kyle, Kerry and Kody of Kenai, Alaska.

She was greatly impressed with the beauty and grandeur of Alaska. Its deep rivers and rugged mountains, she found, were very exciting, and it was truly a white Christmas, with the entire countryside covered with snow and fresh snow falls every few days. The sun rises at 10:30 and sets at 3:30. Temperatures are usually zero and below except when it warms up to snow, she said.

People there go about their business with no regard to the darkness and they dress warmly for out-of-doors.

She went snowmobiling with her grandsons and partying with her son and his wife.

Most of the people she met were young couples connected with the oil industry. She met very few people her age, and said at times she felt like Grandma Moses. But, she said, a grandma is so unique up there and she was treated like fine china and rather liked it.

She attended a party hosted by the Soldadna Hospital, as her son is on the administrative board. She was interested in the varied types of personnel among the hospital employees and board members.

She said conversation was informative and stimulating with very little of it political. The affairs of the "outside," as the other states are called, seemed very far away.

Mrs. Sweet said the cost of living is puzzling—lettuce costs \$1 a head and all fresh fruits and vegetables are very costly. Canned and staple goods are more in line with prices here.

An average teacher's salary is \$16,000 a year and the hospital administrator's salary is \$18,000 a year. But rent is about \$400 a month. The town's schools are very much like our own, but there are many "Bush" schools in Eskimo communities, taught by well educated and dedicated teachers who are interested in improving the lives of the Eskimo children.

Her son's family, and most people there, keep a freezer full of moose and caribou meat and salmon from their own hunting and fishing.

The morning she left Alaska it was announced over TV that the temperature had gone up from 10 below zero.

After traveling 4800 miles to the coldest and furthestmost part of the U. S. in a matter of hours and with no problems, she arrived back in Dallas and couldn't get to Blackwell because of ice and snow. Finally when the highways were passable, she was accompanied home by her sister-in-law and her husband, Mr. and Mrs. G. C. Schwedler, who remained with her for a short visit.

Texas Still Cotton King... Weather and Agriculture... Milk Production Is Down But Also Shows Gain.

Texas will produce almost one-third of the total cotton grown in the nation during 1972. The Tex-

as Crop and Livestock Reporting Service notes that upland cotton production in the state during 1972 is now estimated at 4,050,000 bales. Nationwide, the total for 1972 is now estimated at 13,472,500 bales.

For Texas production in 1972 is almost double that of 1971. Yield per acre for 1972 is set at 377 pounds per acre compared with 263 pounds in 1971. Harvested acres are expected to total 5,150,000 compared with 4,700,000 acres in 1971.

FULL effects of the worst snow storm in Texas in 100 years which occurred recently are still not known regarding agriculture. But losses will be heavy. The oat crop, which had been showing some improvement, suffered from the ice and snow. Citrus harvest has been hampered by the cold weather. Rainy weather halted harvest of cabbage and carrots.

In the coastal bend, spinach harvest is at hand. Vegetable growers in Central Texas are preparing land and applying fertilizer when field conditions permit.

Wheat seeding for the state is complete, and wheat grazing has been restricted due to wet fields. Soybean, grain sorghum, and pecan harvesting are all virtually completed.

The cold, wet weather has been hard on livestock throughout the state. Supplemental protein feeding and haying is widespread over the state.

MILK production in Texas during December was four per cent below a year earlier, but still two per cent above the previous month's production.

Milk production per cow kept for milk averaged 730 pounds per cow during December, which is 30 pounds below a year earlier but 15 pounds above the previous month. Nationwide, milk production during December was virtually unchanged from a year ago. Milk cows on farms during December totaled 12,127,000, a one per cent decline from a year earlier.

Appliance Care

Proper use and care of appliances insures their greatest value. Detailing general rules of thumb for small electrical appliances:

- * Always use the appliance's own electrical cord.
- * Connect cord to appliance before plugging into wall.
- * Don't use extension cords.
- * Unplug immediately after use.
- * Clean after each use.
- * Don't use scouring pads or cleaners on non-stick coating.
- * Don't put cold water on hot griddles, saucepans or fry pans—it may cause warping.
- * Store appliances under cover or keep free of dust.

Other small appliances require special care tactics. These include blenders, can openers, coffee makers, toasters and waffle irons.

For blenders: don't overfill the jar, clean by filling with warm detergent water and running on low speed or by removing the blades.

Can openers: wipe with damp cloth, remove cutter wheel assembly and clean occasionally.

Coffee makers: wash interior thoroughly, use brush for spout.

Toasters: empty crumb tray

frequently, never use fork to dislodge particles.

Waffle iron: brush grids with pastry brush, they don't require washing (the brown film helps prevent sticking). If sticking is a problem, recondition by covering grids with unsalted vegetable oil and letting them heat for about 10 minutes.

more social legislation than any other man in the history of this country.

He was particularly instrumental in promoting legislation which has provided equal rights for black people. More legislation for minority groups was passed at his suggestion (which often included a good bit of arm twisting in the cloak rooms of the House and Senate) than during the administrations of all other Presidents since the end of the Civil War.

He was truly the friend of the oppressed.

The thing that made him so great was that he loved this country and its people, and he used his unusual power for what he felt in his heart was for the good of the country.

In our book he was as big a man as his own giant physique and as his own beloved Texas.
