

THE ROBERT LEE OBSERVER

1889 - OUR GOLDEN ANNIVERSARY YEAR - 1939

VOLUME 49

ROBERT LEE, COKE COUNTY, TEXAS, FRIDAY MAY 26, 1939

NUMBER 47

THE FAIR IN PICTURES

NEW YORK — With the opening date of the New York World's Fair 1939 — April 30 — coming nearer and nearer, activities on the fair grounds are increasing daily. At the top you see a giant American flag, 90 x 230 feet, being saluted by 1,000 school children in a ceremony marking the dedication of the Court of Peace,

around which 62 nations are gathering their exhibits. In the middle appears a modern sculptural group called "Speed," featuring a woman astride a winged horse. At the bottom is one unit of tulip beds. More than 1,000,000 bulbs were imported from Holland to accentuate landscaping.

The school librarians are going to keep the library open practically every day from 8:10 to 2:00 during the summer for the convenience of the public.

S. B. Ratliff of San Angelo, spent last week-end here with his son, O. M. Ratliff. Mr. Ratliff expects to leave in a few days for California to visit another son.

Ronald Louis is the name of the 7 1/2 pound son born to Mr. and Mrs. Turney Hall last Friday morning.

Waco, Texas.—Ed Hickman, Robert Lee, was awarded his frosh numeral in track by the Baylor athletic council this week. Hickman showed lots of promise in all of his performances during the past season and is being counted on as a serious contender for the varsity track team next spring.

The Town Where I Live—
It's My Town

Hudspeth County News, Sierra Blanca: Dr. Geo. M. Dunne reports that he delivered two babies this week thirty miles apart at the same hour and same minute on the same day. One was in Sierra Blanca and the other was up the valley where there is an hour's difference in time. Even at that the doctor lost no time in getting from one of the patients to the other.

They Gave the Answers

"When did the world begin, and how?"
I asked a lamb, a goat, a cow.
"What's it all about, and why?"
I asked a hog as I went by.
"Where will the whole thing end, and when?"
I asked a duck, a goose, a hen.
And I copied all the answers, too—
A quack, a honk, an oink, a moo.

INCH RAINFALL HERE WEDNESDAY NIGHT

Wednesday night an inch rain fell in this immediate section, and reports coming in from some of the drouth-areas, state that good rains covered those sections, enabling farmers to plant. A good rain fell at Sanco with considerable hail. Valley View an inch, Wild Cat good rain, Divide light, Bronte and Tennyson report light rains.

Collier-Collins

Last Sunday's Anilene Reporter carried the following announcement:

Dr. and Mrs. R. A. Collins are announcing the engagement and approaching marriage of their daughter, Charlotte, and R. I. Collier.

Miss Collins has selected her graduation day from Hardin-Simmons university—June 1—as date for her wedding. The ceremony will be read at the University boulevard home of the bride's parents.

Miss Collins is the daughter of the Dean of Hardin-Simmons university while Mrs. Cova Collier is hostess of the university apartments.

Mr. Collier is a son of Mrs. Cova Collier. Graduate of Hardin Simmons university, and is band director at the Anson high school.

Big Song Festival at Miles

There will be a big song festival at Miles Methodist church Sunday afternoon from 2 to 4:30, May 28. Singers are expected from San Angelo, Ballinger, Winters, Miles, Robert Lee, Bronte, Maverick, Wingate, Norton Tennyson, Veribest, Wilmeth, Eola, Mereta, Harriett, and other towns and communities. Stamps' new song books will be used in connection with other books. Mothers and Fathers Day. A big crowd and many singers are expected to attend. The public is cordially invited to attend.

Ratliff Cleaning Plant installed a much larger press this week which will enable them to turn out work speedier. The installation of this press now gives Robert Lee one of the most modern plants of its kind in this section.

We don't know of anything that will make a person more jittery than trying to get out a newspaper when not a thing happens that would make news. A paper is supposed to have something new every week. Its easy to fill a country paper with news of the state and the world in general, but daily papers cover this class of news and it is old before country papers can use it. As for local news, sometimes it breaks, and sometimes it don't. Oh, well, anyway you look at it, its fun (?) to print a paper.

BOY SCOUTS RECEIVE TENDERFOOT BADGES

Several weeks ago several citizens of Robert Lee set out to organize a Boy Scout troop for our community. Whether or not it succeeds or fails depends upon the cooperation of the local citizens. This week they received the approval of their charter. Some 20 boys have already joined and 10 have passed their Tenderfoot test and were presented with their badges last night in a regular meeting. The names of these boys were not available at the time of this writing.

The charter list includes, T. M. Wylie, Scoutmaster. Earl Childress and Ray Stark, assistant Scoutmasters.

Troop Committee are—Fred McDonald, G. C. Allen, H. E. Smith, A. F. Landers, McNeil Wylie, S. E. Adams, A. E. Latham, and Marvin Barns.

Baptist Brotherhood

Tuesday evening, May 30 at 7:30, the Brotherhood will have the pleasure of the presence of their wives at the regular Brotherhood Supper at the Baptist church. A good program of food, fun and fellowship, will be offered to those who bring no ticket but their appetites and nappy dispositions.

Mr. and Mrs. R. E. Downey of Jarrell, Texas, were week end visitors here. They came for their daughter, Miss Dorothy, who has been teaching in the school here the past two years, and will return for the next term.

Mrs. J. C. Jordan and her son, Bob, returned last Friday from Iredell, Texas, where they went to attend the funeral of Mrs. Jordan's mother, Mrs. R. W. Royal.

Mr. and Mrs. Dan Buchanan of Colorado, and Mrs. Burch of New Mexico were guests in the J. S. Gardner home first of the week.

Federal, state and local taxes took 22 cents of every dollar earned in the U. S. last year, according to a new survey by the National Industrial Conference Board. The \$13,700,000,000 collected by government, the Board said, was the largest chunk of the national income ever paid in taxes. The previous high, in 1927, was 17.7 cents per dollar.

It is going to be awfully hard for future generations to support the government in the style it is accustomed to now.

Have you ever stopped to think that perhaps the reason some fellows talk in their sleep is because it is the only chance they get to express their opinion?

J. C. Jordan was a business visitor to Coleman Wednesday.

Do you have anything for sale? Or do you wish to buy something? Either way, why not try a small want ad in this paper?

ANOTHER JUDGE HARDY PICTURE COMING

Friday and Saturday there will be an unusual Western coming to the Alamo, "The Terror of Tiny Town." This is a novelty picture and played by the world's smallest people. You'll get an evening's entertainment out of this picture. Also a comedy by the Three Stooges.

Sunday and Monday you will have the pleasure of seeing another one of those delightful Judge Hardy pictures, "Love Finds Andy Hardy," featuring Lewis Stone, Mickey Rooney, Judy Garland, Cecilia Parker and Fay Holden.

America's favorite family finds its son in the pangs of puppy love!

Andy gets his first car . . . and takes Judge Hardy for a ride.

Andy began to wash his ears, and the Judge knew it was love!

Andy thought he was the King until he met three Queens, then his troubles started!

Imagine a boy making love to three girls!

You know Judge Hardy's Childrens well enough to know that you will be entertained.

Comedy and news.

Wednesday only, a great picture starring John Garfield in "They Made Me a Criminal" supported by Claud Rains, Ann Sheridan, May Robson, Gloria Dickson.

Hounded by the law, shunned by the woman he loved . . . day was living terror, night a torturing dream! No wonder his anguished cry will stir every heart in America! Garfield is one of the most sensational stars on the screen, and his superb acting in this picture will make him one of your favorites.

See this picture! see how the law can make you a criminal! Don't miss it, for it is one of the best the Alamo has ever shown. Also a comedy.

Nothing new is developing that can be unearthed regarding the UCRA survey, but probably something will break in the next week or so, either good or bad.

The King and Queen of England had a fine visit in Canada, but the Dionne Quints stole the show when they were presented to the royal couple. The little girls were so charming that they completely captivated everyone.

Mrs. Frances Zachary, who has been teaching in New Mexico for some time, is here visiting relatives.

Lacy Stewart, who spent the past year on the Marvin Stewart farm, has returned to Ft. Worth.

No evil can happen to a good man, either in life or after death. —Socrates.

FRIENDS

A rich man has so many friends, He counts them by the score. The friend for me is one who'll be A true friend to the poor.

WEEKLY NEWS ANALYSIS BY JOSEPH W. LaBINE

Three Democratic Candidates Start Pre-Season Campaigns; Toe-Stepping Carefully Avoided

(EDITOR'S NOTE—When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.)

Released by Western Newspaper Union.

POLITICS:

Early Rumblyings

From coast to coast extend the great rural regions whose political power has been recognized too late by many an office seeker. More vocal, more government-minded than their apathetic city cousins, America's small towns and farms write three-fourths of all letters to congressmen. They vent an opinion readily on such matters as those destined to determine 1940's election, namely: (1) foreign policy, and (2) agriculture, as related to the U. S. economic, labor and relief problems.

In 1938 serious Democratic reverses in farm states gave rise to a Republican hope: That the nation's midland vote pool will go G. O. P. in 1940. A Gallup poll recently confirmed it, giving Democratic hopefuls the jitters and forcing premature rumblyings of next year's campaign. Nobody yet knows whether President Roosevelt will run again (31 per cent of U. S. voters would approve it) but this month three

crat to actually open his 1940 campaign. Significantly, however, he has taken no cracks at Messrs Roosevelt, Farley or Garner; a vice presidency (which is the most likely berth for him) is no longer to be sneezed at after what is happening to Cactus Jack Garner.

BUSINESS:

Distribution

In 1870 about 75 per cent of U. S. workers were producing goods, the other 25 per cent distributing them. By 1930, reports the Twentieth Century Fund, production efficiency had increased so much that only 50 per cent of U. S. workers were needed for this phase. Meanwhile distribution had absorbed the other 25 per cent, accounting for half the jobs. A possible conclusion: Distribution may be costing too much. A possible rebuttal: Men must eat, and men kicked out of production by labor-saving machinery must turn to distribution jobs or starve. Though this raises per item cost to the consumer, every man benefits by a higher living standard.

Breaking down a sample year's total sales volume, Twentieth Century Fund found 1929's finished goods cost \$66,000,000,000. Of this, \$39,000,000,000 (or 59 cents on the dollar) went to distribution. This meant that production, which employs half the man power, gets less than half the revenue. Of the total 1929 distribution cost, \$13,000,000,000 went to retail distribution, \$7,000,000,000 to wholesalers, \$9,000,000,000 to transportation, another \$9,000,000,000 to manufacturers' distribution costs.

Smallest item of all was advertising, which (contrary to popular misconception) cost less than \$1,000,000,000 and probably paid its way by giving consumers a better buy for their money.

EUROPE:

Peacemaker

"There are knots in European politics, but recourse to the sword is, perhaps, not necessary to cut them. Nevertheless, there is need that these knots be untied once and for all because sometimes a hard reality is preferable to a long uncertainty."

Benito Mussolini's statement referred specifically to two "knots," his own demands against France for

CANDIDATE FARLEY
Just looking around.

Democratic nomination campaigns are taking shape despite wise counsel that the administration had better settle immediately on a man who can be elected, rather than think only of the nominating convention. The campaigns:

Farley. At Mexico, Mo., America's smartest politician told a group of military students that "we are one of the few nations where a man's destiny is in his own hands." Postmaster General James A. Farley's destiny probably lay in the trip he was then taking, a gun-jumping, cross-continent tour in which he placed some 200 delegates under lock and key for himself or the man he chooses to run for President. Carefully avoided was any statement that might offend either Mr. Roosevelt or Vice President Garner, but Jim Farley was sizing up matters as a good politician should. A Roman Catholic probably could not be elected President, but Mr. Farley's 200 votes might easily make him vice presidential nominee.

Garner. Never has a southerner been elected President, the more so today because Negro voters almost furnish a balance of power in several northern states. But John Nance Garner's campaign manager has concentrated in south and southwest states to line up 200 delegates for the aging Texan whose intense popularity is the year's No. 1 political phenomenon. If a secret agreement exists between Democrats Farley and Garner, the tactics thus far bear it out. Each has studiously avoided an invasion of the other's stamping grounds, and though neither has spoken there is every indication that they see eye-to-eye. Both advocate economizing, and both looked with alarm on the President's "purge" last fall. Since a northern Catholic cannot hope to carry the South, and since a southerner might have trouble in the North, nothing could be more logical than a union of Garner and Farley forces.

McNutt. In 1940 a million college students will cast their first votes, and newly organized Student Opinion Surveys finds their choice (17.7 per cent) is Indiana's ex-Gov. Paul V. McNutt, now high commissioner to the Philippines. Meanwhile, from Indianapolis, Manager Frank McHale is busy broadcasting that Mr. McNutt is the only Democrat who can carry Indiana and is therefore a powerhouse throughout the northern states. Hurrying back home from his Pacific post, handsome Mr. McNutt is the first Demo-

IL DUCE
There are knots in Europe.

concessions in the Mediterranean, and Germany's demands against Poland for Danzig and a slice of the Polish corridor. This offer to resort to conciliation in place of war gave heart to France and Britain, but they probably forgot that Signor Mussolini's speech fitted perfectly into a chain of events which matches with the pattern created last autumn at Munich.

At that time it was Mussolini who "counseled" Der Fuehrer to talk things over at Munich. Hitler won concessions and Italy's reward was German support in Spain and Albania. This spring Il Duce again appears as Europe's peacemaker just a few weeks after the Rome-Berlin axis has been cemented into a military pact. Frightened France, realizing her Mediterranean argument with Italy is one of the "knots," will probably untie it and persuade Britain to appease once more by conceding Germany's right to Danzig.

Today's most likely solution of the Danzig problem is a plebiscite with League of Nations sanction, in which Danzig's 96 per cent German population will make quick work of an international crisis.

Star Dust

★ A Promising Newcomer

★ Warning Bing Crosby

★ Radio Veterans Team Up

By Virginia Vale

WHEN you see "Wuthering Heights" you'll probably want to know something about Geraldine Fitzgerald. She plays the part of "Edgar's" sister, who marries "Heathcliff," and she makes a definite contribution to every scene in which she appears.

She was born in Dublin, Ireland, in 1914, was educated in a convent school, studied painting for a while, and then joined the Gate Players. The Gate Players did repertoire, so Miss Geraldine got experience in all sorts of roles. Then she was asked to make pictures in England, and did; she appeared in "The Turn of the Tide" and "The Mill on the Floss," and went right back to the theater.

But this time it was the New York theater, where she was seen in "Heartbreak House." Hollywood discovered her then. Warner Brothers gave her a contract, (with six months off each year for the theater), and she made tests on the Coast, and then returned to Ireland.

She wouldn't believe that she ought to return for "Dark Victory" until she had received three letters and a cablegram; she'd known people who rushed to Hollywood and then sat around and waited everlastingly for things to get started. But she finally returned, was borrowed by Samuel Goldwyn for "Wuthering Heights," and made "Dark Victory."

If Bing Crosby is ever found mysteriously dead a lot of the other singers in motion pictures will probably be questioned by the police.

Some one of them will certainly be driven to commit the crime by the way in which the young man

BING CROSBY

sings. For example, he strolled into the Universal sound room not so long ago, took the pipe out of his mouth, sang four songs, one after another, put his pipe into his mouth again and went home. The recordings were perfect—you'll hear them in "East Side of Heaven," which is probably his best picture to date.

All of which won't seem remarkable to you unless you know what a complicated business this matter of recording sounds can be.

Mr. Crosby has been known to astound fellow-singers even more by eating a heavy luncheon before he had to sing, without its affecting the result at all.

Erno Rapee, Jane Froman and Jan Peerce will be co-starred in a gala musical revue which has been signed to replace the Screen Guild show on the Columbia network for the summer months, beginning June 11. There will also be a 16-voice mixed chorus.

The three stars are radio veterans, but this is the first time that they have appeared together. Rapee is one of the best known musical directors in America, Jane Froman has made a name for herself in both movies and radio, and Jan Peerce has long been a protegee of Rapee's as well as one of the screen's popular singers.

ODDS AND ENDS—Rudy Vallee, who recently announced on the air that he'd like to direct pictures, recently wrote and acted in a dramatic skit on his weekly broadcast, as well as acting as master of ceremonies, directing the music, and doing a bit of singing. . . Lewis Stone is proud of his record in pictures, but he's prouder just now of receiving an award for driving 500,000 miles in 34 years without having a traffic accident.
(Released by Western Newspaper Union.)

Bruckart's Washington Digest

Hoan's 'Good Government' Plea Ignored by Washington Press

Milwaukee Mayor's Criticism of Relief Administration Practices Neglected as Mayor LaGuardia Furnishes Usual Newspaper Copy.

By WILLIAM BRUCKART

WNU Service, National Press Bldg., Washington, D. C.

WASHINGTON.—It has come to be quite a habit for mayors of cities and governors of states to come rushing to Washington for appearances before congressional committees. They appear as out of the blue sky; rush to the capitol; testify before a committee; repair to a hotel suite and hold a press conference and gain a lot of publicity, and go back home. They usually come for just one thing—money.

The traffic in mayors and governors, especially mayors, has grown so heavy that it is seldom news, except for the mayor's home town; and, frankly, the news writers describe them as being worth about a dime a dozen from a strictly news standpoint. I don't mean to neglect the governors when I stress the number of mayors. It is a fact that there are more mayors who come, hat in hand and a bouquet to toss to themselves later, than there are governors.

Hoan Flays Relief Spending

Those preliminaries ought to explain why the appearance here the other day of Mayor Daniel W. Hoan of Milwaukee, Wis., failed to get anything like the attention it deserved from the press. Now, Mayor Hoan is a socialist. He is, however, an individual who thinks about city administration along many practical lines, thus differing from the mine run of mayors who are concerned only with re-election or a political promotion. The mayor came to testify, but the mayor wasn't in the capital city just to beg for money for Milwaukee. He saw some things around here which he believed were wrong, as national policy, and he talked about them.

Said the Milwaukee mayor, in substance: you fellows are spending a lot of money for relief of the destitute; you are wasting a lot of that money, and it ought to be stopped. It ought to be stopped because you are letting the states and the cities get into the habit of coming to Washington for money and more money. They are, therefore, getting out of the habit of justifying to the people of their communities the necessity of expenditures they are making and money their poor are using. In other words, you ought to make the states and the cities kick in with a greater share for the support of those on relief, and force them again to recognize that taxes must be paid for wasted, as well as proper use of, funds. And, more important than anything else, you ought to put this relief business on a pay-as-you-go basis and stop getting further into debt.

Those were not Mayor Hoan's words, of course. Yet I have presented them as substantially what his testimony meant, and seldom, in recent years, have I heard better sense spoken to a committee of congress. To me, it was almost startling testimony, the more so because it was offered while another committee was looking into President Roosevelt's request for \$1,750,000,000 for relief in the next year. It should be said just here that Mr. Roosevelt's appeal for the annual relief appropriation was, or appears to be, modest. That is, the amount is modest if it is all he will ask for. There are those who expect that he will ask congress next winter for a deficiency appropriation when the projected sum runs out.

Charges States Shirk Relief Responsibilities

Mayor Hoan appeared to believe that some of the states were, and are, shirking their responsibilities. It is so easy to come to Washington and tell a congressional committee that "our people are destitute and we have no money to care for them." Aside from the mayor's belief, it ought to be observed that the mayors and the governors are prone to think only of how much money they can pay out without having to assess their own taxpayers for it.

Another mayor was around town at the same time that Mayor Hoan was here. He was Mayor LaGuardia of New York. Nobody seems to know exactly where "the Little Flower" should be catalogued, politically. He once was a member of congress as a Republican. That is, he was a Republican when he came in, but he wandered around into three or four different political parties and seems now to be among the bell wethers

of the American labor party. Anyway, the New York mayor is a great little testifier in favor getting all of the money for New York city that is possible—so long as it comes from the federal treasury.

Mayor LaGuardia is a great favorite among many news correspondents in Washington. He is what is called "good copy." That is to say, he always is ready with comment on—well, on about any subject. Picture it for yourself; if you were a writer and had to have stories for your next edition and you found the mayor of a great city willing to talk. Mayor LaGuardia will talk, a-plenty! Let there be no misunderstanding about that.

LaGuardia's Statement Politically Expedient

Surely, then, a casual reader can understand why the comparative statements of mayors of two great cities had the effect on me that I have attempted to report. One of them giving consideration to the future of the nation as a whole, a statesmanlike examination of a paramount policy; the other apparently thinking only of protecting the political hide of himself.

So, I say that Mayor Hoan's testimony was almost sensational, while Mayor LaGuardia was singing the same old refrain of "gimme, gimme." And I believe thoroughly that the words of the Milwaukee mayor will sharpen the wits and stir the courage of those men and women in congress who are seeking an honest solution for the relief problem that is now scarcely less repulsive than a festering sore.

A subcommittee investigator presented statements to the effect that WPA money was used to build lakes in Tennessee "without reference to the need for recreational facilities considered on any statewide or community basis." The statements were attributed to a member of the Tennessee fish and game commission, and the investigator's conclusions were that the money had been diverted in this manner in order to increase the value of real estate held by several politicians.

The investigator and his sources of information named ex-Senator George L. Berry and Gov. Prentice Cooper, of Tennessee, as holders of land which benefitted by the WPA-built lakes. This is the same Senator Berry who sued the Tennessee Valley Authority for a million dollars or so on account of damage claimed to have been done by construction of one or more of the TVA dams. The then member of the United States senate charged that some of his marble quarries were under 50 feet of water as a result of TVA dams.

Move Started to Publish WPA Salaries

As a part of this general WPA use and misuse of millions of dollars, Rep. Joe Martin of Massachusetts, has started a move to find out how much money is being paid to those who run WPA. He has introduced a resolution to have the WPA headquarters here supply the house with a complete list of salaries paid under WPA. You know, there have been many charges tossed about concerning the salaries paid out of WPA funds—and the lack of work done for them. In other words, Mr. Martin wants to know some facts why only about 60 cents out of each WPA dollar ever gets down the line to the poor devil out of a job and with a wife and children to feed.

This action on the part of Mr. Martin seems to link into contentions long made that numerous politicians have placed their pets in WPA top jobs where, if need be, they could be quite influential, politically. Mr. Martin tried to obtain the information about Massachusetts, but Col. F. C. Harrington, WPA administrator, refused to make the facts public. He contended that disclosure of the salaries would be "embarrassing to those who receive them." Mr. Martin told the house, however, that federal salaries should always be a matter open to the public and he believed there is no more right to secrecy about WPA salaries than about the salary of the President or a member of congress.

It will be interesting to see if the house votes the order to make the list public, but it will be more interesting to see the amounts of those pay checks.

ATTENTION MEN

If you are looking for Comfort and Quality in SUMMER UNDERWEAR, try HANES-- none better. Shorts, Shirts, and BVD's for men and boys. Large line for your selection. SEE OUR BARGAIN COUNTER EVERY FRIDAY and SATURDAY.

WE PAY HOMAGE

Honor and fame, the battlefield and battlecry, the bursting bomb and camouflaged carrier, the flag and freedom, we salute them all. Memorial Day, celebrated in northern states for decorating the graves of the soldiers of the Union Armies, who fell in the Civil War, is appointed for May 30th. In the south, some of these states have a Memorial Day set aside the 26th of April for the tribute to the fallen Confederate soldiers. What matter it is the honor, it still goes to those of the brave who gave up their lives in a fight which they felt to be right. The beat of a drum theory of a hurrah does not carry the weight today that it did in other years. We are more loathe to jump into a fray, not from lack of love of country, but because we desire to know if such a move would be beneficial to the country. There are these graves of departed heroes of past wars who wear the wreath of laurel, those monuments stand proudly for a cause and effect. Only history proves that cause and effect to be right. Those who marched were fired with patriotism and convinced that the battle was not in vain. We do not take away from this belief.

It is our duty as American citizens to guard the living young, to keep these bodies whole and strong. To give to this country's youth the conviction that nation is to be honored and respected and if necessary, fought for. But we must prove to this youth that the cause for which lives have been lost in the past, is a just cause. That to lay down one's life is a valiant deed but that the fight must be worth the sacrifice. We honor the dead, we must protect the living.

PUBLIC WARNING

All persons are hereby warned against the placing of fences or other obstructions across any of the streets or alleys of the City of Robert Lee, and are definitely instructed to remove any fences or other obstructions hitherto placed thereon, and are forbidden to enclose by fence or otherwise any vacant lots or portions of the same without permission from the owners of the said property. Official Routes to The New York World's Fair

NEW YORK—Approved recently by Mayor F. H. La Guardia of New York City and Grover A. Whalen, President of the New York World's Fair, this map is designed to be of especial use to those motoring to the exposition. A comprehensive system of handling Fair traffic has been developed. Information booths will be found at bridge and tunnel approaches to New York. According to Mr. Whalen, out-of-town motorists will be able to thread their way through the city to the Fair grounds "as easily as they now go from home down to Main Street."

Equine Encephalomyelitis or Sleeping Sickness in Horses

(CONTINUED FROM LAST WEEK)

I would like to quote you the summary of this article: "Summary.-- The recognition of a series of cases of equine encephalomyelitis in pheasants adds valuable information concerning the distribution of this disease, and the designation 'equine' becomes an unfortunate misnomer. Indeed, it may be seriously questioned whether the horse or other domestic animals play any essential role in assuring the perpetuation of this disease. The present demonstration of the natural occurrence of the infection in game birds and the experimental evidence obtained by Remlinger and Bailly of the susceptibility of migratory birds to certain strains of encephalomyelitis suggest an easy mode for the wide distribution of this virus. A search for spontaneous infection in migratory birds is indicated. Extensive surveys will be required in order to know just how widely the infection is spread in nature. It may be only under accidental circumstances or when the infection rises to a certain level that it overflows and becomes a serious problem as regards the horse and even the human being.

During October we received reports of the occurrence of a disease amongst wild ducks in Montana in an area where sleeping sickness was prevalent at the time. The symptoms exhibited by the ducks consisted of paralysis or weakness of the wings and legs, later prostration, and eventually death in many cases. These symptoms were suggestive of encephalomyelitis such as we had often seen in experimentally-inoculated birds and although botulism and alkali poisoning had been considered, we were still very desirous to determine if possible whether or not the virus of sleeping sickness might be the causative agent. Accordingly, through the efforts of Dr. G. W. Cronen, we obtained a few of the dead birds and examined their brains for the presence of sleeping sickness virus. Although no virus was recovered, our pathological studies of the brains revealed alternations somewhat suggestive of those of a virus disease. It is unfortunate that the disease terminated shortly after we began our studies and further specimen material was not available. The symptoms, seasonal occurrence in a sleeping sickness area, and our pathological findings certainly are suggestive of those of encephalomyelitis. The study of this bird disease should be followed up whatever other outbreaks occur.

Measures for the control of the disease are directed along two lines, 1st, the prevention of the introduction of the causative agent into a susceptible animal and, 2nd, the raising of the resistance of the animal's body to the infection by vaccination procedures.

Since it is generally accepted that the disease is transmitted to susceptible animals by biting insects, particularly mosquitoes, much can be accomplished by protecting animals from insects. During the past two years striking examples have been reported of the values of this method of attack in preventing losses from the disease, both in civilian establishments and the U. S. Army. Stabling horses at night in screened stables, the use of sprays, both for the destruction and repelling of insects, the use of fly nets, hoods and other measures cannot be emphasized too strongly as first line defensive measures against the disease.

Your Secretary, Mr. Dinsmore, has issued a number of notices containing valuable, practical information on spray formulas with instructions for their use. It is strongly recommended that all horse owners familiarize themselves with the contents of these notices.

Gratifying progress has been made in raising the resistance of animals to infection by vaccine therapy. This year a new type of vaccine, the so-called "chick" vaccine was developed and has had extensive use in the field. Experimentally the chick vaccine, so called because it is prepared from 9-to-12-day chick embryos that have been inoculated with the virus which is then destroyed by formalin, has been found to be much superior to the original formalized brain tissue vaccine. The virus of encephalomyelitis, which is contained in the brains of animals that succumb to the disease, is rendered germ-free by passage through filters which retain bacteria, so that the resulting filtrate is sterile and no organisms are there but the virus. It is in a pure form. This is inoculated through the egg shell. The egg is cracked and with a hypodermic needle the virus is deposited on the membranes surrounding the chick embryo. The virus multiply very quickly in this chick embryo and destroy the embryo in from 18-to-24 hours. It has been found that a tremendous amount of virus is found in the embryo, many, many times more than has been found in the brains of animals artificially inoculated.

The chick embryos are harvested, that is, they are taken out of the shells under proper laboratory conditions. They are ground up and otherwise treated, and they are subjected then to a .4 percent formalin solution, which destroys the virus, that is, there is no active virus present in the vaccine. Prior to formalization there is a tremendous amount of virus. It has been estimated in some cases that there are ten million times more virus in the chick embryo than in the horse's brain.

Experimentally both in laboratory animals and horses, the immunity produced by the chick vaccine has been outstanding. Animals treated with the chick vaccine can withstand very severe doses of experimental massive infection. A recent test conducted by the Bureau on horses indicated a high degree of immunity in the animals 6 months after vaccination with the chick vaccine. This test has just recently been completed. Six months ago we immunized three horses -- this was a commercial vaccine, by the way, a commercial chick vaccine-- two injections seven days apart, six months ago. Two weeks ago those animals were exposed to the virus of the disease by a direct inoculation into the brain, which is the most severe method of exposure possible. At the same time three normal horses which had set aside 6 months previously with the three vaccinated horses--these three normal horses, which had received no vaccine-- were injected with the same material, at the same time, into the brain. The result of that experiment was that the three normal horses promptly showed a rise in temperature and all the symptoms of encephalomyelitis within four days, became prostrated and died, whereas the vaccinated horses showed no rise in temperature and remained perfectly normal right through.

DAREN'T START DRY

EVEN if this camel holds records for going-without-more-drink, could he last if he had to start dry? Your car and your engine oil can't last either if you keep starting dry this Summer.

You can't help it with any oil that always drains down to the crankcase completely. But you can certainly help it by getting your engine OIL-PLATED.

NEVER all down in the crankcase, no matter how long you park, OIL-PLATING is lastingly close-knit to inner engine surfaces by the action of Conoco Germ Processed oil-- patented. Its strong "power of attraction" fastens non-detachable OIL-PLATING throughout your engine. Does chrome-plating drain down? Neither does OIL-PLATING. Therefore in advance of starting, it's ready to slide every working part into easy motion, without rasping dryness. And since OIL-PLATING doesn't fly off or fry up it helps your engine to shatter the record for going-without-more oil. That's why to OIL-PLATE today with Conoco Germ Processed oil, at Your Mileage Merchant's. Continental Oil Co.

CONOCO GERM PROCESSED OIL

OIL-PLATES YOUR ENGINE

AROUND THE HOUSE

For Glue Stains.—White vinegar will remove glue stains.

An Appetizer.—Celery stuffed with crabmeat salad can be used for variety on an appetizer tray.

For Shiny Linoleum.—Dissolve a lump of sugar in the water when washing linoleum or oilcloth and a brilliant polish will result.

A Good Sink Brush.—A worn whiskbroom makes a fine sink brush if you cut off the worn bristles clear up to the stiff part. Always rinse clean after using.

DIZZY DRAMAS—Now Playing—"BRO. NOAH"

By Joe Bowers

Uncle Phil Says:

Except That of Innocence

Ever since Adam fell, man has been trying to get back to his state.

The mistakes most of us regret are the mistakes that cost us money.

Cheerfulness is courtesy. It is a social duty.

That Takes Gumption

Know where you don't belong and keep away from that locality.

If one gets no gratification out of generosity, of course he won't practice it.

WHAT to EAT and WHY

C. Houston Goudiss Describes the Role of Phosphorus in Nutrition; Tells Where to Obtain This Mineral

By C. HOUSTON GOUDISS

There are at least 11 different mineral salts which are essential to the structure or functioning of the human body. But of these, only four—calcium, phosphorus, iron and iodine—require the careful consideration of the home-maker. That is because a diet which furnishes adequate amounts of these four will automatically provide the others. But when the diet is deficient in any one of these four minerals, disastrous consequences may result.

It is therefore of the utmost importance that every homemaker should know something of their functions, and what foods supply them. In this article, we shall deal specifically with phosphorus.

Versatile Phosphorus

It has been said that if the biographies of the elements could be written, that of phosphorus would be the most interesting of all. That is because there are 14 different ways in which compounds of phosphorus may function in the body. In fact, it is doubtful if any other inorganic element enters into such a diversity of compounds or plays an important part in so many functions.

This mineral is indispensable for all the active tissues of the body and likewise helps in regulating the neutrality of the blood. It is found abundantly in nerve tissue.

Needed for Teeth and Bones

Its most significant role, however, is to team with calcium in giving rigidity to the bones and teeth. Approximately 90 per cent of the total phosphorus of the body and 99 per cent of the calcium are found in the bones and teeth.

Both these minerals are required in generous amounts, but almost twice as much phosphorus as calcium should be supplied every day. Moreover, children should have about one-and-one-half times as much phosphorus as adults, to meet the requirements for growth.

The muscles and soft tissues need phosphorus as well as the bones, and in the dietary of the child, they must share with the bones, the phosphorus that is provided by the food. Hence, the greater need for this mineral during childhood.

Phosphorus and Rickets

If a child's diet is deficient in phosphorus or calcium, or if conditions are not favorable for their proper absorption, rickets will occur. This devastating nutritional disease may result in deformities of the chest and pelvic bones, as well as the more familiar bow legs and knock-knees.

Investigators have spent many years in discovering how to prevent and cure this disease which

has made life miserable for so many children and which has far-reaching effects that carry over into later life. For example, adults who have bow-legs or a pigeon breast as a result of childhood rickets, are always self-conscious because of their defects. And motherhood may be far more difficult for young women whose pelvic bones were deformed by rickets in their early years.

A Low-Phosphorus Diet

It was found that rickets may be associated with a low-phosphorus diet, even when the calcium content is high. And investigations also determined that there is a seasonal tide of blood phosphorus which corresponds to the amount of available sunlight. This led to the realization that sunlight—which we now know helps the body to manufacture vitamin D—is closely related to the proper utilization of phosphorus. And today it is well established that rickets can be prevented, or cured, by a diet containing liberal amounts of phosphorus, calcium and vitamin D. Vitamin D can be obtained from direct sunshine, but where this is not available in adequate amounts, cod-liver oil, irradiated foods, or those fortified with a vitamin D concentrate will supply this necessary substance.

Make Use of Sunlight

As we approach the season when the greatest amount of sunshine is available, homemakers should see to it that not only the children, but every member of the family spend as much time as possible in the sunlight. This will help to promote the proper utilization of phosphorus and calcium. And both teeth and bones will benefit, as well as the general health.

Where to Find Phosphorus

Every homemaker should acquaint herself with the foods that supply phosphorus most abundantly, so that she will be prepared to include this mineral in the diet every day. Egg yolk and dried beans are both valuable sources of phosphorus. So are whole grain cereals and lean meats. In fact, cereals and meats have this in common—both are rich in phosphorus and deficient in calcium. Whole grain breads are likewise important for their phosphorus content. And on a percentage basis, cheese ranks very high as a carrier of this mineral.

Cocoa also contains a large percentage, though it must be re-

membered that, as a rule, only small quantities of cocoa are consumed at one time. Many nuts, including almonds, peanuts, pecans and walnuts, furnish significant amounts. And this mineral is found in dried fruits such as raisins, figs and prunes, and in much smaller quantities in vegetables, such as spinach, cauliflower, string beans, carrots and Brussels sprouts.

Milk supplies phosphorus, though not in such generous amounts as calcium. However, if you follow the rule of a quart of milk daily for every child and a pint for each adult, you will contribute materially to the phosphorus and calcium content of the diet.

Questions Answered

Mrs. S. E. N.—The three- or four-year-old child who wakes early should not be allowed to go for a very long period without breakfast. For this reason, seven o'clock is recommended as a good hour for his first meal of the day. After such an early breakfast, however, a mid-morning lunch of milk and crackers will be necessary. A child of this age may be expected to go to bed not later than seven o'clock.

QUICK QUOTES

ESSENTIAL LIBERTY

"THEY that can give up essential liberty to obtain a little temporary safety deserve neither liberty nor safety."—Benjamin Franklin.

ASK ME ANOTHER ?

A Quiz With Answers Offering Information on Various Subjects

The Questions

1. What is the difference between a bridge, a viaduct and an aqueduct?
2. How many stars has the President's flag?
3. What is the origin of the round table?
4. What is a wash-bear?
5. When a ship's clock strikes five bells, what time is it?
6. Who are the cajuns?
7. Is it possible to impeach or accuse any national officer?
8. Is it possible to stand at the North pole and walk any other direction than south?
9. What are the verses in the Bible which seem to prophesy the automobile?
10. Does the sun go around the earth or does the earth rotate around the sun?

The Answers

1. A bridge is usually over water, a viaduct usually over land, such as a railroad bridge, but an aqueduct is a conduit for carrying water.
2. There are four stars in the President's flag.
3. Boswell traced it to a sailor's custom followed when they entered into a conspiracy so as to hide the identity of the first signer.
4. A raccoon.
5. It is 2:30, 6:30 or 10:30 of the night or day.
6. Descendants of the Acadians, banished from Nova Scotia by the British.
7. Yes. The Constitution provides for the bringing of the impeachment by a member of the

house with the senate sitting as a court.

8. No.

9. Nahum II, 3-4: "The chariots shall be with flaming torches . . . The chariots shall rage in the streets, they shall jostle one against another in the broad ways; they shall seem like torches, they shall run like the lightnings."

10. The earth goes around the sun.

Work of Stonecutter

Most modern sculptors do not produce their own marble statues. They merely make small models in wax, clay or plaster and then turn them over to a stonecutter or carver for reproduction. Sometimes the sculptor adds a few finishing touches, but these are not necessary when the marble worker is an expert.—Collier's.

LOST YOUR PEP?

Mrs. Eleanor Roosevelt

To greet America's first lady two weeks hence, Britain's King Georg and Queen Elizabeth will have to look up. Mrs. Roosevelt is 5 feet, 11 inches tall, and as regal in appearance as any queen.

George and Elizabeth will find their hostess smiling, humorous, kindly, quietly efficient, intelligent, interested and interesting. If they want information about what Americans are, how they live, what they eat, they could scarcely seek a better source; Mrs. Roosevelt has seen as much of the United States as any woman alive.

Since 1933, she has traveled 250,000 miles by train, plane and her own automobile, which she drives herself. She has been down into a coal mine and has traveled across Norris Dam by suspension car. She has talked with miners, share-croppers, subsistence homesteaders, tenement dwellers, politicians, club women, tradespeople and artisans. She like people.

The John Hopkins Hospital in Baltimore was opened in 1889. Its medical staff numbered 23, its beds 220. Today it has 483 doctors and 953 beds. It would take one person 20,000 years in bed to duplicate the time spent in Hopkins by 361,000 bed-patients it has received since opening day, and 18,500 for one patient to duplicate all the visits which have been made to the Hopkins clinics. Nearly half of all care has been given to patients for nothing.

Just to be sure people will enjoy a bite to eat at ten, two and four, or remember the pause that refreshes, some bottling plants are experimenting with soda pop straws made of a plastic like substance that's delivered in the bottle and pops up when the cap is removed. The next thing we know, some fellow with a bright idea will be coming out with some gadget that won't allow the cap to be removed until the price of a soda pop is put in a slot or something. Solomon might have decided there wasn't anything new under the sun, but we feel sure that was before the day of enclosed soda pop drinking straws. --Exchange.
