The objectives of farmers and ranchers in developing a plan for applying conservation on their land are well expressed in a basic policy adopted by the National Association of Soil and Water Conservation Districts. Smith cited the policy in part:

"There is a need for a complete conservation plan for every farm and ranch in the nation to provide a conservation and land use program fitted to the resources of each operating unit. As a matter of good business, a farmer or rancher can do a better job of farming or ranching with a conservation plan then without one. Piecemeal and uncoordinated efforts can not be fully effective. When each acre is protected according to its individual needs, the cost of promatic products will be recognized.

FIRST STATE

MERCHANTS INC.

There are now 182 such districts in Texas, which include include 98.7 per cent of the land area of Texas, as reported by Arthur Leesch, Chairman of the State Soil Conservation Board.

When a farmer or rancher requests assistance from his district, a technician of the Soil Conservation Service goes over the unit with the operator. The soil, water and plant resources are studied in detail, and the conservation problems and needs are analyzed. Alternative treatments are developed that would result in getting the needed protection and desired products.

The County of Castro rese right to waive any informa in, or reject any or all bids The County of Castro By Raymond E. Wilson County Judge

Most Texans, we believe, are fair-minded folk They believe in fair play, square dealing, and man spect for personal and property rights. Those who we take advantage of their neighbors are the exception Sometimes it may be hard to define "a fair shan" can occur in dividing oil or gas production, when he

more landowners are involved. As we all know, oil and gas don't pay any attention fence lines.

Here in Texas many wells have been allowed to be more oil or gas than they should have because the drilled on very small tracts. That extra oil or and from under the neighbors' land.

Some oilmen made a regular practice of this to operation. Obviously, one owner got more thank share-others, less.

People in 26 out of 29 oil-producing states have have way to divide their oil and gas so that each owns what is rightfully his. They simply put their small in together and share the cost and income. This part known as POOLING.

Such a system is needed in Texas. It is proposed bill now before the Legislature, HOUSE BILL SIDE the neighbors cannot agree, the Railroad Comwould set up a drilling block and see to it that the of all owners are protected . . . all costs and pre equitably divided.

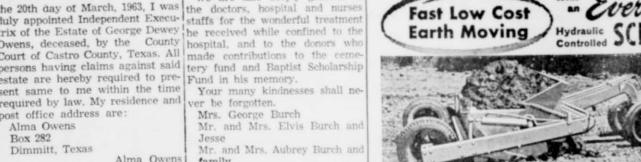

Oilmen who have made fortunes at the expens ers could not be expected to support House Bill Sittle are bitterly opposing it. But the responsible of Texas are overwhelmingly for it. So are the informe zens who want to see justice done.

Ask your Senator and Representative at Austati port House Bill 510-So Texas, too, will have a reco and legal way to assure to each landowner his SHARE.

Lubbock, Texas

TEXAS COTTON GROWERS REPORT:

Di-Syston Treated Plants Are Stronger, Straighter...Produce More Squares Earlier

have a new way to control thrip damage and earlyseason stunting... with Di-Syston granular insecticide. Di-Syston is placed in the soil with the seed or side dressed after planting. The chemical is then absorbed by the growing roots and carried to all parts of the plant through the sap stream—as soon as the plant emerges. No part of the plant is unprotected-even tender new growth as it is formed.

The result? With Di-Syston, your early cotton grows faster, has stronger, straighter stems, more vigorous foliage. Squares form earlier and the plant produces more of them. Many growers in the Lubbock area have reported full season control of thrip with just the one application. You get higher yields because of the good Di-Syston start. This year, get your crop off to a good start with De Syston. Complete instructions for use are printed on the label on every package. Use Di-Syston, and

NITROGEN FERTILIZER

TIME The period of greatest utilization of nitrogen by all crops is the 6 to 10 weeks following germination. By the end of that period the die is cast and any defi-

ciency in nitrogen cannot be overcome by later application. The plant and its fruit will reflect

that deficiency regardless of how well cared for otherwise. This means that for maximum

effect on the quantity and quality of the crop, the nitrogen should be in the soil waiting when

the crop is planted, available from the first day the plant can utilize it. There is much to be

said for Fall plow-down and side dress applications of nitrogenous fertilizer. But the single most important consideration is that nitrogen be available during the plant's early growth.

It means that if you haven't fertilized with a high-nitrogen fertilizer since harvest, it would

CAST MEMBERS for the play "Rest-Assured" are (left to right) Kenneth Fincher, Estella Rubucabala, Gilbert Guyman, Bill Farris, Dennis McLain, Carol Mousner, David Gardener, Joann Clark, Carol Nivens and Phil Green, Seated are (left to right) James Mitchel, Konnie Bowden, Betty Gaylon and Linda Cole. The Hart Junior class presented the three-act drama before a crowd of

Hart Juniors Present Drama 'Rest Assured"

Approximately 200 were present the Hart Junior class play Ret Assured." The 13 member ast gave a good performance of he three-act comedy by Donald teacher in Hart.

James Mitchell did an excellen ob in portraying the fidgety, nerous, grouchy old goat who doesn't we anything except money and imself. Mitchell used gestures and his voice to give the audience good insight into the man who the Sunnyside Community building. euds with everybody and won't let his daughter, Mary become enaged to Joe Lanconi because Joe' father is poor.

Mary is portrayed by Linda Cole tho does a nice job of being a harming, sweet and pretty girl she is an "ideal daughter." Betty Gaylon Portrays Morlock, 'the long-suffering wife.

Mrs. Morlock is attractive, sensile and understanding woman. Konnie Bowden portrays Jessica,

the daughter who is full of action and engery. She wants to be a champion wrestler. Miss Bowden through the use of gestures gave a good performance as Jessica. Gilbert Guyman played Luig He is the papa of Joe who wants to wed Mary but Mr. Mor lock will not give his consent, Luiand Morlock have a fight it which Luigi has a bad heart attack and dies. Luigi then comsack to haunt Mr. Morlock unti e decides to allow the couple t e chaacter, Luigi

Others playing in the drama an olng a nice job were Joann Clar who played Martha, Luigi's de eased wife; Phil Green, Lucifer Carol Mousner, Miss Akers who i Mr. Morlock's secretary with b of playing Mrs. Schmaltz, wh ears a cheap outlandish gree emal with saddle shoes and dverloaded with cheap jewelry avid Gardener who plays Dr frown, the family physican; ill Farris who plays, Mr. Black e mortician.

The tense situation of Mr. Morock's death and Luigi's death is solved with a delightful ending the audience discovers along with Mr. Morlock that he has been naving a frightful nightmare. The results of the nightmare

which Mr. Morlock saw himsel as he looked t other people gave delightful Payton ending. Mr. Morlock is a changed man who allows Mary, his daughter and Joe Lanconi to have their wedding and peace finally reigns at the

Morlock home. The drama was under the direction of Walter Cummings, math
