SILVER METHODISTS RECEIVE CHURCH OF THE YEAR AWARD

The First Methodist Church of Silver, Texas, received the highest award given an individual Methodist Church this past week at the Annual Conference in San Antonio when it was presented the Country Award as Church of the Year in communities of 500 and under in population.

COKE SOIL CONSERVATION DISTRICT NEWS

C. N. Webb, Chairman; W. E. Burns, Vice Chairman; D. K. Glenn, Secretary and Treasurer; Bryan Yarbrough and Robert Wal-

A Great Plains Conservation Program plan has been prepared on the Preston Davis stock farm near Fort Chadbourne. The plan included brush control, pasture planting, deferred grazing and net wire diversions.

The Small Watershed Program is a nationwide movement in which local communities are organizing to combat their soil and water problems. In each of these local programs, rural and urban people work together to prevent floods and save soil by bringing an entire valley's water under control.

Practices and structures are established to hold more of the rainfall in the upland soils and in stock ponds and reservoirs—while releasing run-off at a safe rate. In general, they make running water walk... so that more and better water is made available

for constructive use. People downstream benefit from flood prevention and more dependable water supplies.

M. J. Krall has pitted and seeded about 21 acres on his place just west of Robert Lee. The pitted area was seeded to a mixture of Blue Panic, Blue grama, Sideoats grama, Green sprangletop and Buifalograss.

BESTS

Independent experts and official facts and figures prove Chevy's ahead of its field in seven big ways.

BEST BRAKES . . . In direct competitive tests of repeated stops from highway speeds, conducted by NAS-CAR*, Chevy out-stopped both the other leading low-priced cars—and why not? Chevy brakes are far larger, built with bonded linings for up to 66% longer life. **BEST TRADE-IN** . . . Check the figures in any N.A.D.A.† Guide Book. You'll find that Chevy used car prices last year averaged up to \$128 higher than comparable models of the "other two." **BEST STYLE** . . . Popular Science magazine sums it

up: "The fact is, in its price class the Chevy establishes a new high in daring styling . . ." It's the only car of the leading low-priced three that's unmistakably modern in every line. **BEST ECONOMY** . . . No doubt about this: two Chevrolet Sixes won their class in the famous Mobilgas Economy Run, got the best mileage of any full-size car. **BEST ROOM** . . . Official dimensions reported to A.M.A.‡ make this clear. For example, Chevy front seat hip room is up to 5.9 inches wider than comparable cars. **BEST**

ENGINE . . . Every motor magazine has given Chevy's standard and Corvette V8's unstinted praise. As Sports Cars Illustrated puts it: "Indeed, this device is surely the most wonderfully responsive engine available today at any price." **BEST RIDE** . . . You'll be able to tell this yourself, instantly. But Motor Trend magazine expresses it this way: ". . . the smoothest, most quiet, softest riding car in its price class."

4-H ROUND UP

Coke County 4-H Club members will be represented at the State 4-H Club Roundup in College Station next week by members of the district winning Soil Judging Team. Kenneth Wink, son of Mr. and Mrs. L. E. Wink, Sanco; Eddie Glenn, son of Mr. and Mrs. D. K. Glenn, Bronte; Eddie Spiller, son of Mr. and Mrs. T. O. Spiller, Bronte; and Dee Arrott, son of Mr. and Mrs. J. P. Arrott, Tension; will join the some 2,000 other 4-H'ers at the big get-together on June 9-10.

The top two teams from each of the 12 districts in the State will be vying for honors in the 25 judging and team demonstration contests. The Coke County soil judging team was first in this district contest and three team members were the high individuals in the contest. Eddie Glenn, Kenneth Wink and Donald Spiller placed in the order listed.

The team will leave for College Station on June 9 and will return following the contests on June 11. They will be accompanied by the County Agricultural Agent.

GRASSHOPPER CONTROL

Word of grasshoppers in various spots in the county continues to come in. Damage has been light thus far, but the hoppers are still small. If favorable conditions abound and if expansion of the pest is not controlled, they could do extensive damage to cotton and other crops. As they tend to over-

grow and overpopulate their present feeding grounds, coupled with the growth of field crops, they will migrate to the fields.

Grasshoppers are more easily controlled while they are small and while they are still in the hatching areas, such as borders, fence rows, draws or other areas with heavy growth and dead organic material or straw.

Several insecticides have proven effective in controlling hoppers. Aldrin, dieldrin, toxaphene and heptachlor are recommended. Dusts, sprays or baits can be used.

Several operators in the County have sprayed weeds in the past couple of weeks. The period for effective control of pasture weeds is about over except in isolated cases. Sun flowers, cockle bur and other field weeds can still be controlled, but rag weeds, and similar weeds that are reaching maturity and are not growing rapidly will not respond readily to treatment. Also, cotton is up and would be killed by volatile ester sprays.

If you do spray in the future, be sure to use a low volatile ester or an amine. High volatile sprays will volatilize too readily in hot weather. Also, if you are spraying in young tender grass plants such as sudan, do not add soap or a detergent as a wetting agent. You could burn the plants.

CARD OF THANKS

We wish to express our thanks and deep appreciation to friends and neighbors for their sympathy and many acts of kindness in our bereavement. We especially thank the ladies who served such a nice meal to our group who attended the funeral of our dear one. —The Wallace Family.

A FINE RAIN

Another good rain came to Coke County Wednesday morning. All sections of the county received moisture varying from three-fourths to more than an inch. The rain will be of fine benefit to fields and pastures. Some cotton and crops may have to be re-planted, but in many fields crops are up and off to a good start.
