Austin — Legislative Redistricting Board will meet here Aug. 24 to begin consideration of state senatorial reapportionment.

Shortly after the Board announced its meeting date, Gov. Preston Smith issued a sharply worded statement calling on the Board to forget "political considerations" and start work on a House of Representatives redistricting bill also.

Smith noted the fact that Atty. Gen. Crawford Martin's appealing a district court decision invalidating the 1971 legislative act which attempted to reapportion the House does not preclude the Board from preparing for any eventuality.

Supreme Court of Texas, Governor noted, may uphold or overturn the district court's Aug. 2 decision that the Legislature illegally divided more than 20 counties. In either case, he said, the Board should be prepared with a House as well as a Senate reapportionment plan to avoid the need for a "million dollar" special session of the Legislature.

Lt. Gov. Ben Barnes, a member of the Legislative Redistricting Board, expressed surprise at Smith's blast. He said the Board has made no decision not to consider House redistricting and, indeed, has not even discussed the issue.

Board has just 60 days to draw

the reapportionment after its initial meeting which means its lifespan expires in late October. State Supreme Court Chief Justice Robert W. Calvert said the Court will meet within 48 hours after receiving a request for an appeal hearing and can reach a decision in 10 days or less.

Attorney General Martin said a transcript of the lower court proceedings is being speeded to completion and can be placed before the Supreme Court within another week.

AUTO INSURANCE RATE CURB ASKED — Governor last week called on the State Board of Insurance to permit no increase in auto coverage rates this year.

He summoned three members of that agency to his office to hear his proposal.

Board is due to meet this month to review requests of insurance companies for increases totalling almost 10 per cent on all types of auto insurance. Board staff members have proposed a modest 2.8 per cent average hike effective Sept. 1.

Governor asked the Board to begin study immediately of no-fault insurance plans with a view toward adopting one for Texas. He said Massachusetts achieved a substantial reduction in auto insurance rates under its no-fault concept.

Smith also urged the Board to study the feasibility of establishing a flexible and competitive insurance rating system in an effort to reduce rates.

"We are confident that a suitable alternative to the ever-rising rates could be found—if the insurance industry and the agencies of state government wish to find them," said Smith.

WATER BONDS SOLD — A Chicago firm was low bidder on a \$25 million Texas Water Development Bond issue to help build or improve sewage treatment facilities.

Issue was the first step in a \$100 million program authorized by voters May 18 for loans to cities, towns, river authorities and water districts. State loans make political subdivisions eligible for increased grants from federal government for water quality improvement.

Board said it expects 40 or 50 applications for assistance by Oct. 1. It will act on the first ones at its meeting here Sept. 16-17.

Local units can borrow 25 per cent of cost of a sewage treatment project from the state. Federal government will provide 50 to 55 per cent of the cost where a state program exists.

Halsey, Stuart and Co. Inc. and Associates bid effective interest rate of 4.9533 per cent for the issue.

AG OPINIONS — Justices of the Peace must take a 40 hour course of instruction determined by state supported accredited institutions of higher learning in performance of their duties unless they are licensed attorneys.

Martin also ruled:
 * Non-elective state officers or appointees who accept other non-conflicting state positions of honor, trust or profit must receive clearance of their agency heads.

* A sheriff has no authority to release prisoners in his custody prior to expiration of sentences imposed and may be compelled to re-arrest prematurely released prisoners.

18-20 YEAR OLD VOTE RULE CHANGED — Voter registration has, in effect, been reopened for newly enfranchised 18-20 year olds to permit them to sign up at any time prior to March 1, 1972, close of the voting year.

County registrars have been instructed to accept applications from 17, 18, 19 and 20 year olds, with registration certificates to

be effective for any election held 30 days or more afterward. Young voters who failed to register during the registration which ended Feb. 28 may now present their applications to tax assessor-collector either in person or by mail.

They must sign up again Oct. 1 or thereafter to remain eligible to vote in elections beyond March 1, 1972.

TIGHT WELFARE CONTROLS ADVISED — New State Welfare Commissioner Raymond W. Vowell, in meetings with field workers, is urging tighter controls on welfare caseloads.

He also is calling for greater effort at detection and elimination of fraud in claims and limitations on Texas' Medicaid Program. Vowell has been visiting 17 regional offices of the Welfare Department in a two week swing.

Short Snorts

Highway Department has approved an expanded program for multiple use of highway right of way — or parks, parking areas and recreation.

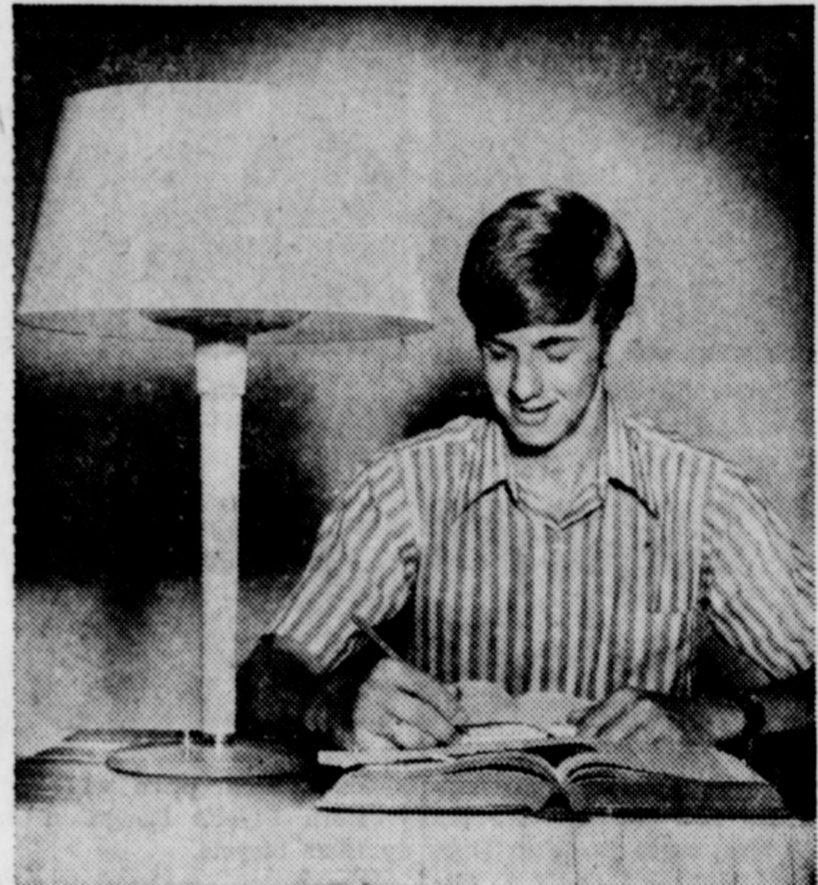

Texas Animal Health Commission announced that authorities are very close to bringing Venezuelan Equine Encephalomyelitis, a major threat to the state's horses, under control.

AFL-CIO has prepared a man for man voting record of the Texas Legislature based on 16 selected issues.

Byron Fullerton of Austin has indicated interest in running for governor as a Republican next year.

Department of Public Safety Director Col. Wilson E. Speir reports one out of 16 miles driven in the U. S. is driven in Texas.

Rate Change on Long Distance Set

Long distance telephone rate changes that benefit customers who dial their own long distance calls within Texas and take advantage of special calling periods have been announced by General Telephone Company of the Southwest.

At the same time, operator assisted calls within the state will cost more in the adjustment of rates that go into effect Sept. 1. General Telephone President L. Gray Beck explained the lower rates for direct dialed station to station calls parallel the national trend to increase the cost of calls that require operator assistance while giving an incentive to customers who complete calls themselves.

Another change in the calling structure will establish rate periods for day, evening, night and weekend calls within the state which are the same as those now in effect for calls going outside Texas. Also two holidays, Labor Day and July 4, were added to New Year's Day, Thanksgiving Day and Christmas Day when reduced rates apply all day for direct dialed calls.

Another change will establish a one minute initial rate period between 11 p.m. and 8 a.m. rather than the usual three minute initial rate period. Additional charges are made for each minute following the initial rate period.

"In other words," Beck said, "if you call any time other than between 11 p.m. and 8 a.m., you will be charged for three minutes; regardless of whether you talk one, two or three minutes. You are also charged for each additional minutes after the first three.

He explained that under present rates, an evening rate call for a distance of 300 miles costs 85 cents. The same call under the new customer dialed rate and for those without DDD who provide the Area Code and complete number for the operator will be 66 cents. The same call placed by a customer who can dial the number himself but prefers to place his call with the operator will cost \$1.25, regardless of the time of day.

"So we are placing the increase where it belongs, and giving a savings to the customer who dials the call himself," Beck explained.

Robert Lee BCD Items of Interest

Civil Defense was emphasized at Tuesday's meeting of the BCD. Robert Large, county coordinator for the Civil Defense program, was a guest and brought out the importance of having an active program for the county.

Large announced a meeting for Aug. 24 at 8 p.m. when John M. Lukert, field consultant with the State Health Department, will be the main speaker. Large said that a film will be shown on local and national disasters. Included will be such items as atomic bomb attack, floods, tornadoes and other disasters, as well as ambulance service during any of these emergencies.

Large brought out in his talk that Robert Lee and Bronte have emergency plans and more work is being done all along to perfect the procedures to be used in case of disaster. He said the main thing needed now is practice in carrying out the procedures.

The Civil Defense coordinator said there are three steps which must be carried out in case of tornadoes, floods or other disasters:

No. 1: Local residents who have been named will be alerted to gather at the courthouse to supervise the whole operation.

No. 2: Ambulance service, fire trucks and other volunteer help must be readied and sent out into the field wherever they are needed.

No. 3: a mop-up and clean-up program must be put into effect.

The courthouse and school house have been chosen as shelter areas in case of disaster. The two buildings are large enough to hold every person in the area. Only Monday, the county purchased a large generator which is capable of providing emergency power for the courthouse. Plans are in the making, Large said, to create an Emergency Corps for Coke County.

He added that Lukert would like to set up some first aid training programs while he is in Coke County Aug. 24. Large emphasized that the public is invited to attend the meeting on that date.

Air Stop Scheduled

Mayor Wilson Bryan announced the Air Tour which is scheduled to land here Oct. 3 at 10:15 a.m. will be welcomed. A letter has been written by the city officially welcoming the flyers. Refreshments and a guided tour of Lake Spence are being planned. The mayor said city officials, county officials, business men

and others are needed as a welcoming committee.

The Mayor added that the water situation in Robert Lee never looked better. He said even though Mountain Creek Lake has caught no water in the most recent rains in the area, the city is assured of plenty of water at least until the latter part of the coming spring.

Alton Pyburn of Sweetwater, who is Coke County representative with the Farmers Home Administration, was at the meeting and told BCD members that more federal money has been appropriated to finance loans for farming operations, homes, improvements and other items in rural areas of the country. Pyburn invited inquiries from anyone in Coke County who needs money to finance operations.

Salads

Salads have no season, but their popularity zoom in the summertime. Crisp and refreshing, salads beat the heat and pep up flagging appetites.

With the fresh produce array available during the summer months, vegetable and fruit salads are especially a joy to prepare.

But no matter what kind of salad you create, it will usually include greens, either as the basic ingredient or as a bed or garnish for other ingredients. According to the national average per capita, each of us eats 21½ pounds of greens yearly.

Head lettuce is the most popular salad green. But other kinds add variety in texture, taste and color. The brilliant green of escarole, for example, or the dark green of spinach leaves, help make a salad more interesting. Or add watercress and spark salad with a spicy flavor.

If you're not familiar with salad greens, the quickest way to become acquainted is to buy and try. Once you know the taste you can use greens to their best advantage.

Proper handling of salad greens is also important for crisp, tasty salads. At home, remove fringed or inedible leaves and twist or cut out cores. Wash greens gently under cold running water, then drain well. Place in a moisture-vapor proof container and refrigerate. Store the greens in a separate area from fruits, such as melons, apples and pears. These fruits give off ethylene gas as they ripen and are one cause of "rusting greens."

Another salad favorite is the tomato. This rich red fruit turned vegetable is rich in vitamins A and C. One medium sized tomato, eaten raw, supplies almost one-half of the daily requirement of vitamin C and one-third of the vitamin A.

When you buy tomatoes look for those which are firm and not overripe. Test their firmness by hiding them gently in your hand. Choose plump, smooth tomatoes that have an even red color and are fairly well shaped. Avoid bruised, puffy tomatoes; they are watery and usually break down when cut and have a poor flavor.

Tomatoes with small irregularities, such as well healed growth cracks, roughness or uneven shape, are undesirable only from the standpoint of appearance.

Tomatoes are usually sold by the pound this time of year. When buying them, remember

one pound equals four servings—about 2 large, 3 medium or 4 small tomatoes.

At home, store ripe tomatoes in the refrigerator and use quickly. Tomatoes with a greenish tinge will ripen when left at room temperature, out of direct sunlight.

Children Resist Rest

A universal trait of children often seems to be the hate to go to bed syndrome. But the youngsters are not just being contrary.

During the ages of 2 to 4, children may resist rest for several reasons.

Children often are not sleepy at bedtime. Check the actual amount of time your child sleeps in 24 hours. Like adults, children differ in the amount of sleep they need.

A child may have played too

hard just before bedtime, consequently finding it hard to settle down. Read him a story before bed, instead of rough housing with him.

Excitement or excess noise at home may distract the child.

Or, he may be seeking attention you've been too busy to provide during the day.

For a youngster, going to bed interrupts everything he is doing; he lives only for the moment, with little understanding of what tomorrow means. Many sleeping difficulties can be avoided if you help your child understand that going to bed is a time reserved for rest and sleep. Treat bedtime as a routine, not open to question.

Allow plenty of time to get your child to bed. If he senses your haste, he'll find ways to prolong the performance just to keep you around.

Going to bed happily is more apt to produce a peaceful sleep.
