At a meeting of the New Mexico Catle Sanitary Board at Las Vegas on the 16th-inst., the report made of conditions on the ranges in Grant and Luna countles was alarming. The drouth continues and thousands of cattle are dying. The conditions cause endless trouble among the cattlemes. There are constant fights and struggles among the cattlemen for the possession of the few water holes, thefts are on the increase, grass is entirely gone and the stock is eking out a precarious existence by eating the mesquite bean. In order to cope with the condition, the board appointed as a special stock inspector for the district Pierce Ross of the Victorio Cattle Company. Papers for the incorporation of the

For many years Las Padillas has been the home of a number of stock thieven, but they have been quiet since one of their leaders, Abel Romero, was shot and killed, and Claude Doane, another leader was captured and sent to the penitentiary. Several months ago, under the leadership of Benjamin Lopez, a desperate character, they renewed their raids on the

A short time ago they stele a band of horses, defaced the brands and sold the animals to ranchmen and farmers. About a week ago they came within a few miles of this city and stole eighteen head of cattle from the pastures of Gregorio Jaramillo. The latter commenced to investigate. He suspected the Las Padillas gang, but for fear of death would not tell his suspicions.

Two days ago he found a few of his cattle near Las Padillas and learned that Lopez and his gang were killing stolen cattle and peddling the meat to native valley farmers. Lopes got an inkling that Jaramillo, with officers, was on his track. Yesterday after noon he accused Luis Padilla, a young fellow said to be a member of the gang of thieves, of putting the officers and owner of the stock on his trail. Luis denied the accusation, but Lopes was not satisfied, and, drawing his pistol, sent a bullet into the right side of Padilla, the hall passing out through the latter's liver and out of his back.

Lopes, Pedro Romero, a brother of Abel Romero, and a half-breed Indian named Jose, then fled toward the Manjano mountains. Although the consta-ble of the precinct was near by when Padilla was shot down, he and others of the town allowed the bandits to escape, fearing death themselves. Easterday was called to attend the wounded man. It is thought he will die to-night.

#### Will Be Tried for Murder.

An Albuquerque dispatch of July 16th saya: Carlos C. Ayer, night operator on the Santa Fe railway at Isleta Junetton, who shot Henry H. Harrison, by Chief Justice Mills against strikers a negro porter on a west-bound train, now faces a charge of murder. Harrison died this morning, and this afternoon Ayer had his preliminary hearing

> The testimony ing as to the quarrel, Harrison pushing Ayer off the train, and then the shooting, was about the same as was sent out last night.

> Conductor John Dovern, who had charge of the train on which Harrison was porter, testified that he told Ayer he could have lee water from the gar cooler. He was not an eye witness to the quarrel and subsequent shooting. It is the opinion of the train officials that both men acted hastily and showed bad temper, Harrison in shoving Ayer off the train when he was getting ice water by permission of the conductor, and Ayer in using his gun, It would seem that Ayer did not fire to kill, for the pistol was aimed low, and the bullet struck the right thigh It glanced upward however entered the abdomen and perforated the intestines.

### Garnes Day at Coents.

The annual festival and dance of the pueblo of Cochiti on Thursday, July 14th was of naugual excellence and interest. July 14th is the Saints' day of Cochiti, San Buepaventura being the patron. The ceremonial dance was participated in by forty-four from Neestufa and thirty-eight from the other, besides thirty-six musicians, two standard bearers and three delight makers, 123 in all. It lasted from 2 o'clock in the evening until sunset.
Dr. Henry Baum, with the members

of his archæological expedition, was present and succeeded in taking a number of large and comprehensive views, among which are several panoramic scenes that embrace the entire plaza, with both sets of dancers and the spectators.

Dr. Baum's party proceeded norther ly from Cochiti next day to visit the celebrated stone lions on the Potrero de las Vacas and will go thence to the cliff dwellings in the Pajarito park Thereafter it will be met by Superintendent Crandall and President Prince of the historical society in order to determine on the proper boundary between the proposed natural park and the Santa Clara reservation, so as to facilitate the passage of the park bill next winter in Congress.

Survey of Salt Lands.

Prof. W. G. Tight, president of the New Mexico University, returned to Albuquerque on the 11th inst. from a visit to the White Sands region near Alamogordo, where he has been at work with a surveying party consist-ing of Prof. C. L. Herrick and A. Hunt, surveying the saline lands which are claimed by the University of New Mexico and which are under dispute in the United States Land Office.

Congress has given to the territory for the use of the university all the saline lands within its border. These lands have to be selected by a special commissioner and then approved by the land office. It is necessary, first to determine the saline character of the lands and then make application to the commission for their selection. There is a large tract of land, in cluding nearly fifteen townships, in the region of the White Sands saline bearing bed. It is this bed that the university is now having carefully surveyed and examined. The waters in all the springs and wells of the region are highly charged with saline. In some cases the waters are almost a saturated brine and wholly unfit for stock or domestic purposes.

A few weeks ago Dr. Tight examined the salt lakes lying east of the Pecos, where he reports that there are also large and valuable deposits of salt. At least five large salt-bearing lakes were selected and located.

the land office at Santa Fe is now dvertising for bids for the lease of some of the salt lands of the university located in Western Socorro county.

#### Bold Burglary.

An Albuquerque dispatch of July Sth says: The little town of Belen, south of Albuquerque, is intensely excited over a bold robbery committed there last night and discovered this märning.

A strong box containing \$500 in cash and bonds and securities representing thousands of dollars, was stolen from residence of Hon. Felipe Chaves large force of deputies under sheriff Baca of Valencia county are scouring the country in search of the house breakers.

Mr. Chaves is accredited with being one of the richest men in New Mexico. He maintains a splendid residence in Belen, which he seldom leaves, being well advanced in years. A number of servants live in the house, but the owner holds them above suspicion. The strong box containing the cash and securities, with many personal papers of great value, was kept in the office in the residence. Few of the papers are in negotiable form, but failure of recover them will entail an enormous loss to the owner.

#### University's Big Wind Mill.

The largest windmill ever brought to New Mexico was delivered to the University of New Mexico a few days ago and will be set up by D. A. Dultman in the course of the next few weeks. The big "air motor" is going to draw water from a 200-foot well which has fust been sunk on the campus and which will be driven down an additional fifty feet before the opening

of the fall semester. The windmill is twenty feet in diameter and will stand seventy feet from the ground when completed. It is connected with two immense sheet iron tanks, each with a capacity of 10,000 gallons of water, and from these water will be piped into the buildings and over the grounds, giving the university its own water works. The present plans contemplate a swimming pool which will be supplied from this plant and which the management hope to have completed by the early fall.

The office of Felipe Chaves of Belen was entered on Friday night, July 800 by thieves who carried off an iron chest containing \$500 in money, also some securities and bonds. No clue to the burgiars has been discovered.

Dr. K. D. Harper, a pioneer in New Mexico and one of the most widely known physicians in the Southwest, was taken through Albuquerque on the 8th inst., from his home in Gallup to the territorial insane asylum at Las. Vegas. He had been in failing health for some time and finally became violently insane.

### COLORADO CASE

THROUGH RUSSIAN SEIZURES

England and Germany Excited Over Search and Detention of Vessels Transpin the Red Sea. Deaver, July 20.-Dispatches from

Europe intimate that Germany and England are on the verge of being drawn into the Oriental war. Here is what the Russian fleet has done in the Red sea to provoke general war:

The volunteer steamers Smolensk and St. Petersburg passed through the Dardanelles into the Mediterranean sea last week and proceeded to the Red sea, after placing heavy guns in position and transforming themselves from peaceful craft to war vessels.

They stopped the North German Lloyd steamer Prinz Heinrich, seized all mail aboard and searched her for contraband of war. They stopped and searched the Brit-

ish Peninsular & Oriental steamship Malacca, put a prize crew of Russians aboard, and, manned by Russian soldiers and officers, took her to Suez as prize of war. They stopped and detained the Brit-

ish steamer Persia at Aden and trans-ferred to her the mail sacks confiscated from the Prinz Heinrich. They stopped and detained for three

hours the two British steamers Woodcock and Dalmatia and searched them for contraband of war.

The captain of the St. Petersburg notified the British residents at Aden to wire the British consuls at Suez and Port Said that he would seize all British steamers bound for the East if the contemts of their cargoes were not clearly shows in their manifests, Two more steamers of the Black sea

volunteer fleet were given permission o-day by Turkey to pass through the Dardanelles. London, July 20 .- In British officia

circles the recent seizures and over-hauling of British ships in the Red sea by the Russian volunteer fleet steamers Smolensk and St. Petersburg are regarded as very grave international incidents.
The seizure of the Peninsular &

Oriental steamer Malacca by the St. Petersburg, and her arrival in the Suez canal as a prize of war on her way to Libau, on the Baltic, has come as a climax, and the Cabinet to-day is considering the course to pursue.

The dangers and difficulties of the

natter are commented upon in the newspapers, which are practically unanimous in denouncing the "dubious and irregular character"-of the volunteer vessels. "If their actions are proved, as we believe, to be those of vulgar filibusters," says the St. James Gazette, they must be recalled by Russia, or the

skull and cross bones must be run up and they will be fired upon whenever sighted." Berlin, July 20.- The foreign office, denies the report, circulated by a news agency in the United States, that Great Britain has informed Germany that she is sending a squadron

to check Russian irregularities in the Red sea. Russia has not answered the German protest against the seizure of the mails of the Prinz Heinrich by the Smolensk, but the foreign office confidently expects a disapproval of the ac-

tion of the commander of the Smo-

lensk. the newspapers refer bitterly Russia's action as especially ungrateful, since Germany allowed her to leave her western frontier practically unprotected in order to send troops and artillery against the Japanese.

### Denver-Boulder Road.

Denver, July 20 .- The directors of the Denver, Boulder & Interurban Railroad Company held a meeting at the offices of the company in the Boston building yesterday afternoon and discussed with representatives of several construction companies the matter of the cost of building the road. It was announced that most of the right of way between this city and Boulder had either been secured or was in such a position that it could be controlled when a final decision had been reached.

At the meeting J. R. McKinnie of the Exchange National Bank of Colorado Springs was elected president of the company by the following directors: Sterling V. Toney, H. V. Johnson and C. F. Potter of Denver: L. L. Aitken of Colorado Springs and John H. Simpson of Cleveland, Ohio.

Before the active work will begin will be necessary for other construction companies to submit estimates for the construction and to issue the general stock. Only a nominal amount of stock has been issued. All that has been done up to date is a completion of the surveys and estimates of cost received. received. The general stock will prob-

HAS THE PRESIDENT'S ATTENTION

Miners' Committee Received at Oyster Bay.-Present Petition for Investigation of Conditions in Colorado.

Oyster Bay, N. Y., July 20 .- Prestdent Roosevelt yesterday received a committee appointed last Sunday by the convention of the coal miners and allied crafts of Wilkesbarre, Pennsylvania. The mission of the committee was to present personally to the President a petition reciting the conditions in which organized labor has been placed by the action of the authorities in Colorado and requesting him to institute an investigation of the labor troubles in that state, with a view of possibly remedying the condition. The president of the committee, T. M. Burke of Carbondale, Henry Herzovits of Plymouth, Pennsylvania, and Frank E. McCafferty of Victor, Colorado, are the men who came to Oyster Bay last week but were unable on that day to obtain a personal interview with the

President.
The committee arrived here yesterday afternoon and met the President at his Sagamore Hill home at 7:30 this evening. They passed a half hour with President Roosevelt in his library. The petition, which was the expression of 225,000 men of the union labor organizations of northeastern Pennsylvania, was laid before the President. He read it carefully and then informed the committee he would be glad to do anything he properly and legally could do to ameliorate the condition existing in the state of Colorado. He indicated that an investigation of the labor troubles in that state is now being made by agents of the Department of Commerce and Labor. Thus far the situation had not been such as would warrant inter-

ference by the federal government, Following the presentation of the petition, the President talked with his callers on subjects of mutual interest. The talk developed the fact that Mr. Herzovits had fought with Mr. Roosevelt in Cuba. After talking of the war with him, the President gave Mr. Herzovits an autograph card bearing the

following inscription: "To Comrade Henry Herzovits, with the good wishes of Theodore Roosevelt, July 19, 1904."

Mr. Hersovits is proud or the memento of his trip, and will have it framed with a picture of the President. The members of the committee express pleasure with the result of their visit and unite in saying that their in-terview was perfectly satisfactory to them and doubtless will be to the unions which they repr In his address to the President, M. T.

Burke, the spokesman of the delegation, demanded that the President appoint a special commission similar to that which he named to settle the strike in the anthracite regions of Pennsylvania. He said. "We ask that you appoint a special

commission to report to you forthwith the violations of the constitutional rights now complained of. And, as Article XIII., Section 2 of our constitutional amendment defines the supreme law of the land, the laboring people wish to be guided, protected and gov-erned by it, and ask you to see to it, and see that justice is meted out acconding to it."

"You may quote me as eaying that the President gave us every assurance of fair play and honest investigation that we could expect," said Mr. Burks.

### Utah Railway Extension.

Salt Lake, July 20.—The Tribune ays: The Rio Grande Western will SBYS: at once ask for bids on construction of about seventy-five miles of road from Marysvale to Cedar City, Utah. The final survey, even to cross sectioning, has been done, and as soon as the contract is awarded the work of construc tion is to commence.

This means the penetration of the Rio Grande into the iron and coal de-posits of Iron county, a plan it has had in mind for twenty years and more. But recent developments have proved beyond any question that the company is eager to get into the region, not for the coal, as it has an ample supply of fuel, but solely for the iron, and this fact fits in very nicely with the plans for the purchase of the Salt Lake copper plant, built about twelve years ago, but which has never been

operated. This, it is now stated, is to be converted into a steel mill, the reported purchasers being the Utah Fuel Company. In connection with the fight for new territory now on between the va-rious transcontinental lines, the Tribune states that within a year every amall line in the state will be owned by one or the other of the big system of Utah.

### Race Quostion an Issue.

Washington, July 18 .- (Special.)-The inclusion of a pro negro plank in the Republican platform demonstrated that the race question was to be made an issue in the coming campaign, but apparently nobody has attached as much importance to it as the negroes themselves. The plank in connection with the spectacle of a little white girl and a little negro boy on the stage at the same time after Rooseveit had been nominated, has conjured up all sorts of hopes in the breasts of negroes and who are not well balanced and the possible results are not pleasant to contemplate.

MORE LAND FOR SETTLEMENT is of Acres in South Daketa

to Be Made Productive. Three hundred and eighty-two and acres of the choicest of Unclean's unallotted lands are thrown en for settlement of American citens on the 28th of July. This vast reage comprises a very large part of the Rosebud Indian reservation in outheastern South Dakota. The land has been apportioned in 160 dry, dull, envious, execrable, fastidiacre tracts, practically 2,400 quarter out, fleras, freetal, froward, frampish, sections in all. Each successful drawer will have one of these tracts turned over to him, to be his without condition at the expiration of five years, if he meets all of the national government's requirements.

To be more accurate in the matter of location, the Rosebud reservation es in Gregory county, between the Missouri and Niebrara rivers. It ad-

joins lands already highly cultivated for corn raising. The adjoining farm land is selling now at prices ranging from \$15 to \$35 an acre. In many instances recently as high as \$40 an acre has been offered for land touching the reservation lines.

The government disposes of the public lands at a nominal cost, in easy payments-\$1 per acre in cash. 75 cents per acre at the end of two years, 75 cents more per acre at the end of the third and fourth years. and within six months after the expiration of the fifth year a total of \$4 per acre.

Any citizen of the United States, 21 years of age or over, male of female, After a temporary seclusion she and heads of families under 21 years of age, are entitled to enter a homestead of 160 acres or less, while every soldier of the civil war or the Spanish-American war secures the special advantage of having his time of pubtie service deducted from the five years of residence required on the reservation land.

GOOD SPELLING.

It is One of the Most Essential Parts of an Education

Among the superfine wrangles upon public school education curious notions are held. One is that spelling is not an important branch in the primary, grammar and high school course of study. Recently, in a public discussion of educational matters, it was asserted by a woman who thought she knew what she was talking about—at all events she talked—that there were more important things to be learned in school than good spelling. What, it may be asked, is more important than the teaching of correct

spelling? The study of first importance in all American schools is the language of the country as pronounced, spelled, defined and as arranged in sentences.

English as spoken and written. To give any boy or girl the idea that spelling is unimportant is to start that young human being upon a short, straight road to inefficiency and uselessness in the world's work. The public schools, all schools, are trusts held in the hands of grown-up people for the good of the coming generation. It is a duty to equip for the battle and march of life these tender children and youthful students. Let no one imagine that a field is waiting for half-educated young persons who cannot speak or write correctly the Eng-

lish language. What hired hand on a farm would not creat a favorable impression upon his employer, or any one to whom he should write, by a well written, correctly spelled letter? What carpenter, blacksmith or factory worker does not stand a better chance of advancement if in his written menoranda and reports a perfect knowledge of spelling is shown? And what cook, housemaid. milliner or other working woman has not, in the power to write orders, letters and plans, a direct passport to promotion in her business, as well as to new openings into fields she considers attractive?

Settled the Case With Her. Many great discoveries have been

made by accident and things better than gold mines have been found in this way, for example when even the accidental discovery that coffee is the real cause of one's sickness proves of most tremendous value because it locates the cause and the person has then a chance to get well.

"For over 25 years," says a Missouri woman. "I suffered untold agonies in my stomach and even the best physicians disagreed as to the cause without giving me any permanent help. different ones saying it was gastritis. indigestion, neuralgia, etc., so I dragged along from year to year, always half sick, until finally I gave up

all hopes of ever being well again. "When taking dinner with a friend ore day she said she had a new drink which turned out to be Postum and I liked it so well I told her I thought I would stop coffee for awhile and use

it, which I did. "So for three months we had Pos tum in place of coffee without ever having one of my old spells but was always healthy and vigorous.

"Husband kept saying he was convinced it was coffee that caused those spells, but even then I wouldn't believe it until one day we got out of Postum and as we lived two miles from town I thought to use the coffee

we had in the house. "The result of a week's use of coffee again was that I had another terrible spell of agony and distress, proving that it was the coffee and nothing else. That settled it and I said good bye to Coffee forever and since then Postum alone has been our hot meal-

time drink. "My friends all say I am looking worlds better and my complexion is much improved. All the other members of our family have been benefited, too, by Postum in place of the old drink, coffee." Name given by Postum

Co., Battle Creek, Mich. Ten days trial of Postum in place of coffee or tea is the wise thing for every coffee drinker. Such a trial tells the exact truth often where coffee is not suspected.

World's Largest Tortoise.

The Zoological gardens in London have lately become the home of a tortoise imported from the Island of Manritius which weighs 500 pounds and measures four feet seven inches from head to tail. It was purchased from a family in Mauritius who vouched for having it in their possession for 150 years. Experts who have examined it hink its age nearer 300 than 200 years, and it seems to be not more than in its

A tortoise still larger than this one was given to the Natural History museum by the same person. It weighed 870 pounds when it died, and as it was known to be not much more than 80 years old, it is to be supposed that its weight would have continued to increase with advancing years.

Of Wide Interest.

Breed, Wis., July 18-Special-Charles Y. Peterson, Justice of the Peace for Oconto Co., has delivered a judgment that is of interest to the whole United States. Put briefly, that judgment is, "Dodd's Kidney Pills are the best Kidney medicine on the market to-day."

And Mr. Peterson gives his reason for this judgment. He says: "Last winter I had an aching pain in my back which troubled me very much. I the morning I could hardly straighten my back. I did not know what it was but an advertisement led me to try Dodd's Kidney Pills. After taking one box I can only say they have done more for me than expected as I feel as well now as ever i did before."

Pain in the back is one of the first symptoms of Kidney disease. If not cured by Dodd's Kidney Pills it may develop into Bright's Disease, Diabetes, Rheumatism or some of the other deadly forms of Kidney Disease.

Insist on Getting It. Some grocers say they don't keep

Defiance Starch. This is because they have a stock on hand of other brands containing only 12 oz in a package, which they won't be able to sell first because Deflance contains 16 cm .for Do you want 16 oz. instead of 12 oz. for same mones? Then buy Defiance Starch. Requires no cooking.

A cat near Dusseldorf in Germany drove a sitting hen from her nest, sat on the eggs and hatched them, and is now caring for the young brood. Possibly nussy has started in the poultry business because she is fond of spring

Every housekeeper should know that if they will buy Defiance Cold. Water Starch for laundry use they will save not only time, because it never sticks to the iron, but because each package contains 16 oz.—one full pound-while all other Cold Water Starches are put up in %-pound packages, and the price is the same 19 cents. Then again because Defiance Starch is free from all injurious chemicals. If your grocer tries to sell you 12-oz. package it is because he has a stock on hand which he wishes to dispose of before he puts in Defiance. He knows that Defiance Starch has printed on every package in large letters and figures "16 ozs." Demand Defiance and save much time and money and the annoyance of the iron sticking. Defiance never sticks.
