onditions that now exist it does young pure-bred cattle will alrope must call on us for much of grade calves and yearlings of the beef breeds. There is doubt. There has been no large sales however, whether the herd of for they will regain much of whose their flesh rapidly when the pas-

In conclusion I wish to emphasize to all farmers raising purebred or high-grade stock, fattening cattle for the market, or running a dairy, the importance of planting a field of early corn which may be used for silage during times of drouth. Bear in mind, also, that such cattle should should have almost all of the silage they will consume in addition to the grass. Start the cattle on about twenty pounds of silage per day and gradually increase the amount until the steers are eating the normal amount in about ten days. A medium ration of cottonse meal fed with the silage will prove especially valuable for fattening cattle and for young growing stock. W. F. WARD. U. S. Dept. of Agriculture.

## Capt. T. J. Molinari Re-appointed

Capt. T. J. Molinari, last week, eceived the appointment of another three year term as a member of the Roosevelt county road board, from the State Highway

Some time ago he tendered his esignation and did not desire reappointment. The State High way Commission did not consider this however and evidently appreciated the fact that he has made a good record and should have another term.

It means considerable to a man in business to devote the time the time necessary as a memi of the road board, who by the way gets no compensation exwhile in discharge of his dutie

A supply of utensils for the Domestic Science class has been installed, and work in the culinary line will begin this week.

tressed to "the seven churches that black, but with smaller headgear, are are in Asia," of which Smyrna was seen less frequently. The Latin one of the foremost. While criticism church, as the church of Rome is is made of the other churches in the called in the Levant, is represented by titles of Asia Minor, founded by the three missionary bodies, the Jesuits and Dominicans in black and the Franciscans in brown. They do an extensive missionary and educational work in Turkey. Their head turies. It was often called the most quarters are in Europe where they are beautiful city in the world-a title taught before beginning their work.

## American Missions There.

American missions at Smyrna are maintained by the American board of Boston. Their chief plants are the International institute and the Girls' school. Owing to the troubled conditions brought about by the war, all the foreign schools have been seriously hampered. The International institute has now between 150 and 200 students, of various races and creeds. This is far below normal, but the other four largest foreign schools have less than a dozen boarders among them all. The neutrality and popu-Crusaders. ### Ideals of Peace. A Detroit kindergarten teacher went

to school the other morning wearing one of the new "Peace" badges. A little Polish girl, noticing it, asked: "Teacher, wot stands on de pin?"

"It says 'Peace,' Katie," the child was told.

"And wot means peace?" was Katie's next question

"Suppose when you go home this noon you ask your mother and father to tell you what peace is," the teacher

Next morning Katie came quietly up to her teacher, and "I knows wot peace is," she whispered. "It is youse mustn't kick, youse mustn't slap and youse mustn't spit in de face."

His Line.

"What is your son going into when he leaves college, Jorrocks?" queried Brenson.

"Well, I don't know yet; but he knows so little about everything that I have a hunch he'll take up what he calls littratcha," said Jorrocks.-Judge.

Gently cleanse your liver and sluggish bowels while you sleep.

Get a 10-cent box. Sick headache, billousness, dizzi sess, coated tongue, foul taste and foul breath-always trace them to torpid liver; delayed, fermenting food in the bowels or sour, gassy stomach.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes con gestion and that dull, throbbing, sickming headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels. A Cascaret to-night will surely

straighten you out by morning. They work while you sleep-a 10-cent box from your druggist means your head clear, stomach sweet and your liver and bowels regular for months. Adv.

His Frame of Mind.

The horse had run away and was tangled up in the wire fence at the side of the muddy read. Its half-witted owner had kicked and sworn and tried to lift the animal until he was out of sorts and covered with mud.

A well-groomed man came along, took in the situation, and suggested: "Spring the fence back, then he can get his feet free."

The owner of the horse did as he was told. "Now give him a cut with the whip and he'll get up himself,"

This the ewner did. Then he looked at the horse, up and ready for travel, looked at himself covered with mud. and looked at the immaculate gentleman in the road. Wrath filled his

"Well," he grumbled, "thank you just as much as if you'd helped me.

## FALLING HAIR MEANS DANDRUFF IS ACTIVE

Bave Your Hair! Get a 25 Cent Bottle of Danderine Right Now-Also Stops Itching Scalp.

Thin, brittle, colorless and scraggy hair is mute evidence of a neglected scalp; of dandruff-that awful scurf. There is nothing so destructive to the hair as dandruff. It robs the hair of its luster, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die-then the hair falls out fast. A little Danderine

tonight-now-any time-will surely

save your hair. Get a 25 cent bottle of Knowlton's Danderine from any store, and after the first application your hair will take on that life, luster and luxuriance which is so beautiful. It will become wavy and fluffy and have the appearance of abundance; an incomparable gloss and softness, but what will please you most will be after just a few weeks' use, when you will actually see a lot of fine, downy hair-new hair-growing all over the scalp. Adv.

Mark of 100 for "Sammy." "Sammy" April, the small boy who supplies President Wilson with newspapers, called on Secretary Tunnuity and asked him what he thought of Mr. Wilson's message to congress. Mr. Tumulty immediately launched into a laudstory discussion of the subject. When he had talked a few minutes, he paused and asked: "But why do you ask, Sammy?"

"I have to write a composition on it in school tomorrow," replied the boy, "and I thought I would come to beadquarters for the information."

## CLEAR YOUR SKIN

By Dally Use of Cuticura Soap and Ointment, Trial Free.

FOODS FOR THE LITTLE PEOPLE.

Of course the universal food for the moved. small folks is milk, pure, fresh and wholesome. On the commonplace food · that it does not stand in as high repute as it should. When one lives in a city and pays 10 to 12 cents a quart for pure milk we have a higher appre-

ciation of it. Milk is by far the most important food for children. If they object to taking it fresh and warm when it is so obtainable try them with cool milk.

There are all sorts of devices used by mothers to get children to take served on slices of cucumbers, laid milk. One that they will usually ac- on a bed of watercress, is another cept willingly is milk through straws. good salad. For creamed onions allow A pretty glass or a fancy cup will often be the means of persuasion. A cooky or cracker with the milk will make the taking of it easier for some.

Soft cooked or baked custards, junkets and cornstarch puddings served and pepper is added and the vegewith sugar and rich milk make another method of serving milk.

Eggs should be given at least every other day and dried fruits, like dates. figs and raisins should be often in their diet. Candy, if given after meals in small quantities, is rather a help than a detriment, but eating candy before meals is a most reprehensible habit.

If the children carry a lunch to school for the noon meal there should be some means for the serving of hot milk or chocolate. A hot drink is absolutely necessary during cold months. Apples, grapes or oranges are all good fruits and so are mananas, taken moderately, if well ripened.

Begin with young children to serve sweet, nutty olive oil on green vegetables, so that the habit will be formed in youth to enjoy the most wholesome of all salad dressings.

Carrots, onlone and spinach should often be served, as they free the body from many impurities. Spinach has been well called "the broom of the stomach." Green vegetables should be given in abundance, as the child needs the mineral saits which they contain. Children should never be given stimulants of tea or coffee, but hot water and milk is a good hot drink. Plenty of good, pure water and no spices or pickles ought to keep the can't buy one make one out of a candy

For Comfort in Winter Weather

HE stores are displaying a great | very attractively made, are worn unmany knitted and crocheted gar ments, made for wear in the coldest weather, when one must face it, and also warm nightrobes of soft canton or eiderdown fiannel, and bed shoes for those who sleep in cold rooms or sleeping porches. A whole line specially designed things have been made for those courageous believers in fresh air who sleep out-ofdoors all the year round. For them up the outdoor bed with many cotton and woolen blankets, comforters and of striped patterns in combinations of outside covering of waterproofed

cloths. Among the knitted clothes, vests to be worn under coats, and the short close-fitting underskirts have proved themselves most popular. Some of the vests are long sleeved, but many are sleeveless, like that shown in the picture. They are made in white and all colors, with gray leading in point

of demand. For daily wear the knitted vests, tical for the business woman or for elderdown is very soft and soothing; anyone who is out every day. White they are ideal for winter sleeping and light-colored vests, some of them robes. JULIA BOTTOMLEY,

der dressy wraps of velvet, satin, or brocade. Vests of quilted satin are made for similar wear. These close-knitted, spug-fitting

bodies, worn under suit coats, with neckpiece and muff of fur, prove almost as comfortable as fur coats and are less bulky. They are washable and inexpensive and many of them possess style.

One of the heavy-fleeced canton instructions are furnished for making flannel nightgowns is shown at the right of the picture. These are made tan and white, blue and white, etc. They are cut to set rather close to the figure without gatherings, and the sleeves are long and plain. Many of them are fastened with frogs of cotton braid that remind one of pajama designs. They are often bordered with plain sateen in a solid color matching that in the gown, and fin ished with narrow soutache braid.

Bed shoes are made of elderdown and anyone who does not know of with sleeves and double breast, are their comfort in the cold sleeping delightfully cozy. As gray does not room should make haste to possess a become quickly solled it is very prace pair. The feel of canton flannel and

ALIVE TO SITUATION

Administration is Awake to Needs of National Defense.

Able Report of Secretary of War Garrison Should Convince the Country That the Matter is in Safe Hands.

If any honest and sincere person has really believed that the Wilson administration was indifferent to the question of national defense and not fully alive to its responsibilities in the unlikely event of war his doubt should be removed by an unbiased reading of the very able report of Secretary of War Garrison and of the testimony of Secretary of the Navy Daniels before the naval committee of the house of representatives. Especial significance attaches to the views of Secretary Garrison, because it is well known that he more than any other member of the cabinet is the chosen confidant of President Wilson. It was because of the president's confidence in the excellence of his judgment that he was elevated from his judicial post in New Jersey to his present position, where he has fully vindicated the faith placed in him. When President Wilson's message

to congress and the report of the secretary, which, of course, was first submitted to the president, are taken in conjunction they form a very admirable statement of the attitude of the administration toward the whole question of national defense. The president, refusing to yield to any passing hysteria, eloquently stated the traditional position of the people of the United States toward war, and his opposition to a large standing army. Entirely consistent with this position is Secretary Garrison's advocacy of increasing our present small army by adding 25,000 men and in other ways strengthening the military power of the government. His other wise suggestions, based upon a careful study of our present defenses, doubtless reflect in detail the views which the president stated in a general form in his message.

In all the information which the administration has readily placed before the committees of congress there has been no disposition to withhold anything, to gloss over defects or exaggerate dangers. President Wilson and his advisers have shown that they are making the best possible use of the one layer or two, tunicwise—there resources at hand. That is all that High collars bordered with dark fur are some evening frocks with skirts the American people wish them to do.

Remarkable Report.

Secretary McAdoo's annual report will always rank as a historical document of great value in the annals of American finance because it tells the official story of the financial operations incident to the outbreak of the world war of 1914, from the government point of view. On the purely financial side, this administration destined to bulk large in history for two reasons: The new federal reserve banking system is one; the unprecedented financial crisis caused by the war is the other. The secretary of the treasury in this report, reviews episode after episode since August 1 that combined will hereafter make one of the most memorable chapters in the history of the treasury department. Future students of this period will marvel that the Wilson administration was bitterly denounced as "hostile to business" while it was scoring a great triumph in carrying the burden of the most extraordinary emergency known to modern finance. There is still almost no recognition of this fact by the people, least of all by bankers and business men.-Springfield Republican.

Judgment Without Reason.

"The broadest charges of naval deeline now stand officially confirmed."-

The Tribune. By whom? By Admiral Badger, who says that ship for ship there is no SYRUP OF FIGS FOR better navy in the world? By Admiral Fletcher, who says that "the ships individually are in a high state of efficiency, as high as they have ever been," and that only the British navy surpasses ours in fighting It is cruel to force nauseating. strength? Or has the Tribune suddenly decided that Hearst journalism shall no longer be left without a New York competitor?-New York World.

Uphold the President.

The people trusted the Democratic party to do what it promised. In his inaugural address the president closed with these noble words: "Men's hopes call upon us to say what we will do. Who shall live up to the great trust? Who dares fall to try? I summon all honest men, all patriotic, all forwardlooking men, to my side. God helping me, I will not fail them if they will but counsel and sustain me." This is a compelling appeal, and all true and honorable Democrats in congress should beed it and rally around the president to redeem the party pledges.

Administration's Good Work.

Many novel expedients were adopted in meeting the crisis caused by the European war. The government through it all has led rather than followed, with the federal reserve board irstead of some Wall street banker pre-eminent in expert guidance. If mistakes have been made, they have not been vital. The great outstanding fact is that this country has weathered one of the most critical years in its financial history in a manuer high JULIA SOTTOMLEY, ly creditable to its administration.

It is impossible to be strong and robust if handicapped by a weak stomach er lazy liver; but you can belp Nature conquer them with the assistance of

### GRANDMA USED SAGE TEA TO DARKEN HER GRAY HAIR

She Made Up a Mixture of Sage Tea and Sulphur to Bring Back Color. Gloss, Thickness.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray; also ends dandruff, itching scalp and stops falling hair. Years ago the only way to get this mixture was to make it at home, which is mussy and troublesome. Nowadays, by asking at any store for "Wyeth's Sage and Sulphur Hair Remedy," you will get a large bottle of the famous old recipe for about 50 cents.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time, by morning the gray hair disappears, and after another ap-plication or two, your hair becomes beautifully dark, thick and glossy.— Adv.

## COUNTRY LIFE.

The great agricultural movement of! today has for its ultimate purpose the building up of a country life that shall be wholesome, cultured, efficient, and profitable. There are many sections of our country today that have one or more of these conditions, but the sections where all are found in happy unison are comparatively few. The desire of those who are thinking on rural problems is that rural communities everywhere shall be wholesome, attractive, and cultured, and that each individual shall receive a fair reward for the labor done and the capital invested. In proportion as agriculture is made profitable will the community become attractive, cultured, and a place wholesome and desirable to live

Just what is meant by a profitable agriculture? Simply this: There shall be a reasonable return on the capital invested in farming and a reasonable return for the farmer's labor and managerial ability. A farmer. like any other man in any other business, is entitled to just what he earns and no more: but what he earns shuold be sufficient to give to him and his family some of the more essential conveniences of modern life, time for study, some recreation, and opportunity for education for his children. Secretary of Agriculture David F.

# Portales Herald-Times THE RURAL

THE FARMERS THE CUSTODIANS OF THE NATION'S MORALITY.

Co-operation of Church, School and Press Essential to Community Building.

By Peter Radford

The church, the press and the school form a triple alliance of progress that guides the destiny of every commun ity, state and nation. Without them civilization would wither and die and through them life may attain its great est blessing, power and knowledge The farmers of this nation are greatly indebted to this social triumvirate for their uplifting influence, and on behalf of the American plowmen I want to thank those engaged in these high callings for their able and efficient service, and I shall offer to the press a series of articles on co-operation between these important influences and the farmers in the hope of increasing the efficiency of all by mutual understanding and organized effort. We will take up, first, the rural

The Farmers Are Great Church Build-

The American farmer is the greatest church builder the world has ever known. He is the custodian of the nation's morality; upon his shoulders rests the "ark of the covenant" and he is more responsive to religious influences than any other class of citizenship

The farmers of this nation have built 120,000 churches at a cost of \$750,000,000, and the annual contribution of the nation toward all church institutions approximates \$200,000,000 per annum. The farmers of the United States build 22 churches per day. There are 20,000,000 rural church communicants on the farm, and 54 per cent of the total membership of all churches reside in the country.

The farm is the power-house of all progress and the birthplace of all that is noble. The Garden of Eden was in the country and the man who would get close to God must first get close

The Functions of a Rural Church. If the rural churches today are going to render a service which this age demands, there must be co-operation between the religious, social and economic life of the community.

The church to attain its fullest mess ure of success must enrich the lives of the people in the community it serves; it must build character; develcial, business and intellectual. as well as the spiritual and moral side of life. If religion does not make a man more capable, more useful and more just, what good is it? We want a practical religion, one we can live by and farm by, as well as die by.

Fewer and Better Churches. Blessed is that rural community which has but one place of worship. While competition is the life of trade it is death to the rural church and moral starvation to the community Petty sectarianism is a scourge that blights the life, and the church prejudice saps the vitality, of many communities. An over-churched community is a crime against religion, a serious handicap to society and a useless

tax upon agriculture. While denominations are essential and church pride commendable, the high teaching of universal Christianity must prevail if the rural church is to fulfill its mission to agriculture.

We frequently have three or four churches in a community which is not able to adequately support one Small congregations attend services once a month and all fail to perform the religious functions of the community The division of religious forces and the breaking into fragments of moral efforts is ofttimes little less than a calamity and defeats the very purpose they seek to promote

The evils of too many churches can be minimized by co-operation. The social and economic life of a rural cannot be successfully divided by denominational lines, and the churches can only occupy this important field

by co-operation and co-ordination. The efficient country church will definitely serve its community by leading in all worthy efforts at community building in uniting the people in all co-operative endeavors for the general welfare of the community and in arousing a real love for country life and loyalty to the country home and these results can only be successfully accomplished by the united effort of the press, the school, the church and

organized farmers. Man has accomplished considerable in the course of time, but he hadn't up to the hour fox trotting to press, discovered a five cent eigar with a ten cent flavor.

health, when I finally decided to try

After I began taking Cardul, I was greatly helped, and all three bottles re-Beved me actirely.

I fatiened up, and graw as much stronger in three months I fait like another person altogether."

Cárdul is purely vegetable and gentleing. Its ingredients have a mild, tonic fact, on the womanly constitution.

Cardul makes for increased strength, improves the appetite, tones up the neryour system, and helps to make pale. sallow cheeks, fresh and rosy.

Cardia has helped more than a million weak women, during the past 50 years. It will surely do for you, what it has sone for them. Try Cardul today.

GENERAL FEDERATION OF WOMEN'S CLUBS-

Mrs. Percy V. Pennybacker, presimen's Clubs, is spending two months at her home in Austin, Texas, after an absence of six months, during most of which time she was traveling in the interest of the organization. Mrs. Elmer Blair, chairman of the

Public Health Department of the General Federation, spoke in Watertown, N. Y., recently, under the auspices of the Present Day Club, on "Woman's Share in Public Health Work." While there she held a conference with Miss Helen Louise Johnson, head of the Home Economics Department, relative to phases of work in which their departments are mutually interested.

Mrs. Eller Carlisle Ripley, of Boston,

chairman of the Educational Department of the General Federation, has appealed to the presidents of all State Pederations and also to chairmen of Education of these organizations, for co-operation in a country-wide campaign to reduce illiteracy. Mrs. Rip-ley encloses a table settles forth the standing of each State in this matter, and urges that the subject be brought at once to the attention of all clubs Only eight States have fewer than three filtterates in every hundred inhabitants, and fifteen have from three to five illiterates in every hundred. lows ranks first, having only 1.7 in every hundred, with Louisians stands at the foot, with twenty-nine out of every hundred persons unable to read

Special attention is called to the "Insidious growth of illiteracy in some startling facts are given.

If the million and a half women who wake up the General Federation of Women's Clubs take hold of this question great good must result, for their fufluence is savingly felt wherever it in exerted

Mrs. Ripley urges that they first carefully study the subject, then give publicity to the facts, suggesting ways by which conditions may be improved. and then (most important of all) that they become sponsors for particular activities which will reduce fillteracy in particular situations.

War song you should try on some tough constitution: "Sister Susie's sewing shirts for soldiers, such skill at sewing shirts our shy young sister shows, some soldiers send episties, say they'd seoner sleep on thistles than the saucy soft shirt for soldiers Sister

state and from other states to give

even eating the coarser stems. "Second crop is today (October 13, 1913) six to seven feet high and will mature seed in another week with the prospect of a larger yield of seed than those of the first crop

ed, but estimated at four tons to the

acre. The stock relished the straw

"Sudan that was planted with grain drill on March 24 at the rate of 20 pounds per acre was used as a soiling crop from June 5 to 17. At this time it was from six to seven feet high and yielded at the rate of 21,000 pounds of green forage to the acre The second crop grew rapidly and by August 13 it had matured a crop of seed yielding at the rate of 314 pounds to the acre. The yield of straw was estimated at 2.5 or 3 tons per acre. The third crop started off slowly, the soil at this time being as dry as ashes. but by September 8 it had attained a height of two feet. After the rain of September 9 it grew rapidly, and now October 13. is six to seven feet high and promises another yield of seed i frost does not come in two or three weeks." (As a matter of fact, frost came early and this patch made very few matured seed.)

"A small patch was cut by hand on the following date: June 12, seven feet high yielded at the rate of 587 pounds hay per acre; July 12, four feet high, vielded at rate of 25000 pounds hay per acre; August 12, 2. feet high yielded at rate of 1087 pounds hay per acre; September 29 3.5 feet high, yielded at rate of 2500 pounds hay per acre. Total yield of the four crops, 11,959 pounds hay per acre. The fifth crop is now (October

3) 18 inches high. From a selection of Sudan grass grown at the Temple-Belton substa drouth resistant hay plant. The Alation during the season of 1912 there was produced, in 1913, a bunch with Sudan grass will make a most excel-90 sterns from the one seed. ## Results in Many States

As demonstrating the wide range adaptability of Sudan grass to various climates and soils we append extracts from letters in our files from parties to whom small samples of seed

were sent last spring Mr. W. F. Duncan, Tasso, Tenn (of seed) which I sowed May 15th. It the height of seven feet when cut, Anspring sowing.

much pleased with its appaerance and

have the hogs break in and eat it year

d reports of the government station Mr. R. R. Bradley, Corning, Calicooperators are given. The aim of the Texas Experiment stations is to better agricultural conditions in Texas, and the sim of this brief collection of fornia: "I obtained last spring a small sample of seed which was planted and now makes a fine showing."

Mr. Henry Murphy, Mile, California; 'At my house the topic at merning, noon and night the topic is Sudan Grass. I planted the 7th day of May be impossible to give the results of The land was old, worn out land having been in use for fifty years, but the growth of the Sudan grass far exceeds my most sanguine expectations. It stands today four to six feet, with from five to fifty stalks on the hill. At this writing, August 4th, it does not show any signs of drought. I have been experimenting with forage plants for 21 years, and I want to say that Sudan grass is the only grass to all the bill. I take off my hat to Sudan grass. You will get many orders for seed from California.

Mr. Gustave Klarner, Quincy, Ill.: On June 5th I planted a row about three hundred feet long right next to corn. It is a solid row of dark grass four to five feet tall looks fine. The corn next to it is fired, yellow and shrivelled from the most severe shell of drought and heat ever known here; no win since April. Have cut and fed several bunches to my horses and cowst they like it and eat it, stalks and all

In circular No. 125, Bureau of Plant Industry, we find some valuable reports covering a wide area. Extracts of some of these reports will be of interest in showing the adaptability of Sudan to various climatic and soil

conditions At the Chillicothe station during the season of 1912, with a rainfall of 15.32 inches ranging from April 26 to October 14. Sudan planted at the rate of three pecks of seed per acre made the following yields from one tenth acre plats:

Cut June 22, 214 pounds; cut July 17, 181 pounds; cut August 20, 305 pounds: cut October 17, 180 pounds: Total 880 pounds, making 4 1-5 tons per acre for the season.

At Brookigs, South Dakots, small plats were grown, one for seed the other for hay. The seed plat yielded 678 pounds per acre and the hay plat yielded at the rate of 6.08

In Oregon the cooperator reports this spring (1912) at this station the Sudan is the only one that gave good results." In Wisconnsin grass planted very thick grew to an average height of 58 inches. At the Louisiana State Experiment Station, Sudan produced an estimated vield of three tons per acre the first cutting, two tong the second and a prospect of a good third cutting. In Oklahema, Sudan grass has proven very successful as a bama Experiment station reports that ent hay plant for that section. Simi-

plant throughout the entire United the rate of 10 pounds of seed per acre yielled. August 23, 2.8 tons of hay per acre. This had made a growth of three feet when killed by ed on June 3 in 18-inch drills at the Governors during the boildays, is not Last spring you sent me a sample rate of five pounds per acre grew to

New Jersey, Kansas, Alabama and

.5 tons per acre. Sudan grass was planted on May 15, while the ground was quite dry. The Mr. C. F. French, Olancha, Califor | Kaffir corn and other sorghums plant-I planted this seed at least a led in the same field, died out but the cure pure Sudan grass propagation of seed. In 1911 small) In the early spring of 1913 there month late, but it is four and one-half Sudan grass kept growing through the a slight adulteration quantities of seed were distributed were organized at each of the experi-

It usually made ment stations successfully launched to seven feet high, sixty-two days from it should be cultivated. In sowing tures ninety days from planting, and this grass is expressing it yery mildly, seeding. It passed through a three broadcast for hay, the land should the second crop is ready for harvest and to those who are yet skeptical or weeks drought just after seeding and be prepared as for grain and a grain No Nation is ing within thirty days from the first who are unfamiliar with its merits some of the seed did not come up drill should be used or it can be sown by hand and harrowed in

As stated above; Sindan will not au vive after a severe frest, consequent ly it must be sown each year. At Lampags a bunch of Sudan that was covered with straw and protected dur-ing the winter has made an enormous growth this spring and is not 10 feet high and measures three feet in diameter.

## Opinions of Experts in Seed

Mr. Conner, who is recognized as the very best authority on Sudan grass in the state of Texas, in a recent communication to Farm and Ranch, says: "The present acreage will scarcely supply the needs of the Texas farm-ers, and I should regret very much to see a very large portion of this seed sold to farmers in other states when we ourselves are so badly in need of hay crops.

Sudan grass has come to be recognized as a crop of real merit whereever grown. Mr. H. N. Vinall of the United States Department of Agricul ture, Washington, D. C., has just returned from a tour of inspection of the Sudan fields of New Mexico and Texas, and pronounces them to be the finest he has seen anywhere in the United States. The grass this year (1914) stands from seven to ten feet in height and is well matured. It is grown without irrigation. The seed retails at one dollar (\$1.00) per pound The demand will greatly exceed the supply. Last year (1913) the price of the seed rose as high as \$5.00 per

### Demand Great—Supply Limited

will

Contrary to the opinion of some Sudan grass seed will be scarce this season. The acreage is yet small and this year the demand for seed, due to its increasing popularity, will much greater than the supply.

The reports from the states tend to establish the fact that Sudan grass will make equally as arge tonnage of hay as in the West ern section, but the Eastern section must depend on the West for seed. This is no doubt due to the sorghum midge that is prevalent in all humid regions. This fact indicates that for several years to come there will be sufficient demand for Sudan seed to warfant its growth for seed alone. that "Of the several grasses planted and in consideration of the fact that livestock relish the threshed straw It gives great promise of becoming on of the most profitable stable

### LEGISLATIVE RECEPTION-

## TEXAS STATE BANK OF FARWELL

KEEP ON SMILING.

Does the way-stretch long and dreary. On ahead? Do your footsteps lag a-weary,

Do you dread Does your spirit seem to falter And your strength of purpose alter As you tread Keep your courage and your cheer,

Oh, dear heart, Keep on smiling. That's your part.

Do the days seem long and lonely As they go? Filled with pain and sorrow only

As you know? Does the burden seem too great, Does relief come all too late And so slow?

But keep, Oh, keep on with your cheer, Oh, dear heart. Keep on smiling,

That's your part.

And the clouds with "silver linings" Flitting by Will turn back and show their shining,

Bye and bye, And a joyful warmth, not sadness. Will just fill your heart with gladness As you try.

So be sure and keep your courage, Oh, dear heart, Keep on smiling That's your part. -Mabel C. Bushnell

NOTICE OF FORECLOSURE SALE.

No. 1044. Whereas, on November, 3rd 1914, in Roosevelt county, wherein Florence Maxey is plaintiff and Homer Wright is defendant, the plaintiff recovered a judgment and decree foreclosing a mortgage deed executed and delivered by said defendant to plaintiff, whose name was formerly Florence Weir, for the spin of \$315.17 upon the following described real estate to wit: The N.1-2 of the NE. 14 of Sec. 24 Twp. 2 s. R. 35 c. N. M. P. in Roosevelt county, N. M. with all improvements thereon, said mortgage being recorded at page \$13 of Book "K" of Mortgage deed records of Roosevelt county, N. M. That the amount of said decree at date of sale hereinafter mentioned will be For Quick Oniverses one 71. Trunks a Specialty 8325.35, and also all cost of suit and cost of sale; and whereas, said undersigned was appointed by the court in sald decree as special master and directed to advertise and sell said property as provided by law and to apply the proceeds of such sale in settlement of plaintiff's said judgment and cost of suit.

Therefore, by virtue of said judgment and decree and the power vested in me as Special Master, I will, on the 9th day of Feb., 1915, at the hour of 2 o'clock P. M., at the Northeast front door of the Court house. in the Town of Portales, New Mexico, sell said described real estate to the highest bidder, for cash, for the purpose of satisfying said judgment, and costs.

Witness my hand this the 12th day of Jan. 1915.

Ben Smith Special Master

## "Bull" Durham an International Favorite

Smokers of experience and discrimination the world over obtain year-round, daily enjoyment from "Bull" Durham tobacco. Men prominent in the social, business and public life of many nations find supreme tobacco satisfaction in the deliciously fresh, mild cigarettes of unique savor they roll for themselves, to their individual liking, from this wonderfully pure, mellow tobacco. Their distinguished example has made it correct, smart, fashionable to "Roll Your Own" upon every occasion.

GENUINE BULL DURHAM

SMOKING TOBACCO There is no purer, milder tobacco in the world than "Bull" Durham-none other with such a sweet, mellow, irresistible fragrance. This rare, balmy aroma is as delicate and elusive as it is

distinctive and pleasing, and can only be retained and enjoyed in the fresh-rolled cigarette.

"Bull" Durham hand-made cigarettes afford wholesome enjoyment and lasting satisfaction to more millions of men than all other highgrade smoking tobaccos combined.

An Illustrated Booklet, showing correct way to Roll Your Own Cigarettes, and a Package of cigarette papers will both be mailed free, to any address in United States on postal request. Address "Bull" Durham, Durham, N.C.

### SYNOPSIS.

of Hearts is the "death sign" em-by Seneca Trine in the private war geance which, through his daughter . a woman of violent passions like m, be wages against Alan Law, son man (now dead) whom Trine held the man (now dead) whom Trine held consible for the accident which made a helpless cripple. Rose, Judith's and double, learns of her sister's paign against Alan and leaves her to aid him, whom she loves. Undramatic circumstances Alan saves the life and so wins her love. But the to shake his constancy to Rose less Judith's jealousy and settles her er homicidal purpose. She is largely consible for a shipwreck in Nantucket d, from which Alan and Rose escape their friend Barcus in a power-driv-

### CHAPTER XV.

The Masked Voice.

For a matter of twelve hours the fog, leaden, dank, viscous, as inexorable as the dominion of evil, had wrapped the world in an embrace as foul and noxious as the coils of some great, gray, slimy serpent.

Through its sluggish folds the ponderous, power-impelled lifeboat crept at a snail's pace, its stem parting and relling back from either flank a heavyhearted sea of gray.

In the bows a young woman rested in a state of semi-exhaustion, her eyes closed, he head pillowed on a corkbelt life-preserver, her sodden garments modeled closely to the slender body that was ever and again shaken from head to feet with the strength of a long, shuddering respiration.

Seated on the nearest thwart, Alan Law, chin in hand, watched over the rest of this woman whom he loved with a grimly hopeless solicitude. He was in no happier case than she, so far as physical comfort went-he was in worse, since he might not rest.

Premonition of misfortune darkened heart with its impenetrable

In the stern Tom Barcus presided morosely over the steering gear; and Law was no more jealously heedful of his sweetheart than Barcus of the heavy-duty motor that chugged away so purposefully at its business of driving the boat heaven-knew-where.

Lacking at once a compass, all no

tion whatsoever of the sun's bearings, and any immediate hope of the fog lifting or chance bringing them either to land or to rescue by some larger and less comfortless craft, Barcus steered mainly through force of habit -the enit-water man's instinctive feelever in any conceivable circumstance and you needn't tell me I don't know be without a hand at the helm. It had the dulcet accents of that angelic conseemed impossible that it could long traito!" escape repetition of the disaster, but that by a wide margin; never once ing cry ringing through the murk: had it passed near enough to another vessel to see it.

And now for more than an hour the aflence had been uncannily constant. broken only by the rumble of the motor, the muted lisp of water slipping the wake.

For bodings no less portentous than Law's crawled in the mind of Barcus. the fog. And gasoline tanks can and oftentimes plied reassuringly. do become as empty as an official weather for a holiday.

More than this, Mr. Barcus was a

the demon of perversity that tenants was no earnest whatsoever of future the mist. good behavior, that when such a complicated contraption was concerned there was never any telling . . .

In view of all of which considerations he presently threw open the bat-

And the aching void created in the

form drone was startling enough to rouse even Rose Trine from her state

With a look of panic she sat up. thrust damp hair back from her eyes, and nervously inquired:

"What's the matter?" "Nothing," Barcus told her. "I shut

the engine off-that's all." Tempers were short in that hour and Alan was annoyed to think that the rest of his beloved should needlessly have been disturbed

"What did you do that for?" he demanded sharply.

"Because I jolly well wanted to." Barcus returned in a tone as brusque. "Oh, you did-eh?"

"Yes, I did-eh! I happen to be bossing this end of the boat and to have sense enough to realize there's no sense at all in our wasting fuel the way we are cruising nowhere!"

"Well," Law contended, struck by the fairness of this argument, but unable to calm his uneasiness-"just the same, we might-"

"Yes: of course, we might," Barcus snapped. "We might a whole let. We might, for instance, be heading for Spain, for all you or I know to the contrary. And in such case, I for one respectfully prefer to have gas enough to take us home again if ever this da-blessed fog lifts!"

And for several seconds longer the stillness strangled their spirits in its ruthless grasp.

Then of a sudden a cry shrilled through the fog, so near at hand that ft seemed scarcely more distant than over the side:

"Ahoy! Help! Ahoy there! Help!" So insistent, so urgent was its accent that, coupled with the surprise it brought the three as one to their feet, all a-tremble, their eyes seeking one another's faces, then shifting un-"What can it be?" Rose whispered,

aghast, shrinking into Alan's ready

"A woman," Barcus put in harshly "Judith," the girl moaned. Alan shook himself together. "Im-

possible!" he contended. "I saw her go down "That doesn't prove she didn't come up," Barcus commented acidly.

'Ahoy! Motorboat aho-o-oy! Help!" "And that," Barcus pursued sadly, 'tust proves she did come up-blame the luck! Alive she is, and kicking; stand clear. An able-bodied pair of ing that no boat under way should lungs was back of that hall, my friend:

Without heeding him. Alan cupped somehow, it always did escape, and hands to mouth and sent an answer- mad!"

"Ahoy! Where are you? Where away?" "Here-on the reef-half-drowned-

throttle down the carburetor and jump | fog back like a scroll and sent it spin-

lifeboat and Alan Law had parted company as definitely as though one of them had been levitated bodily to the far side of the earth.

It could not have been more than a minute after the accident before Barcus was guiding the boat over what, going on his sense of location and judgment of distance, he could have sworn was the precise spot where Alan had disappeared, but without discovering a sign of him.

And for the next twenty minutes he divided his attention between attempts to soothe and reassure the half-distracted girl and efforts to educe a reply from Alan by stentorian bailing-with as little success in the one as in the other.

"Alan!" he shricked at the top of his lungs. "Alan! Give a hail to tell

There was a little pause; he was racking his brains for some more moving mode of appeal when the answer came in another voice-in the voice of Judith Trine, clear, musical, effervescent with sardonic humor:

"Be at peace, little one-bleat no more! Mr. Law is with us—and safe -oh, quite, quite safe!"

dumb corsternation Barcus sought the countenance of Rose. Her eyes, meeting his, were blank with

Vanked Him Off to His Cell.

despair. He shook his head helplessly and let his hands dangle idly between With no way on her, the lifeboat

drifted with a current of unknown set

"What can we do?" Rose implored. We must do something. We can't leave him . . Oh, when I think

of him there, in her hands, I could go "If only I knew." Barcus protested:

"but my hands are tied, my wits are There's nothing to go by—except the movement of such grace and vigor bare possibility that the reef she that it seemed hard to believe she had spoke of may be Norton's. With a cry of incredulity he leaped the girl, aiding her to rise.

At this juncture the motor took | Hardly had Rose had time to com charge of the argument, ending it in prehend what had happened, when summary fashion. With a smart ex- Barcus was over the eide and wresplosion in the cylinder, it started up tling with the bows, dragging the boat

Mr. Barcus and precipitating Alan man could manage; and when her stem had bitten a little more deeply It was not given him to know what into the sands, Barcus gave over the was happening until he found himself attempt and, lifting Rose down, set planting the former well up towards she gathered Alan in the schooner of the foot of the cliff.

> he was half blinded by the glare of the the captain and signed co-partnership westering sun as it broke through the articles, or something like that. Any-

on which the two had landed was deluged with sunlight, bright and

beautifully warm. He showed a thoughtful and considerate countenance to the girl. "You're about all in?"

She nodded confirmation of this, which was no more than simple truth. Where are we?" she added.

He made her party to his own perplexity. "You're not able to travel," he pur-

sued. "Do you mind being left alone while I take a turn up the beach and have a look round? We can't be far from some sort of civilization; even if it's an island there are no desert isles along this coast. I'll find something soon enough, no fear."

By tacit consent both avoided mention of Alan, but each knew what thought was uppermost in the other's

"There's a niche among the rocks up here," Barcus indicated, "almost a cave. You'll be warm and dry enough, and secure from observation overhead. Maybe you can even snatch a few winks of sleep. . . ."

She negatived that suggestion with weary smile; no sleep for her until sheer exhaustion overpowered her, or she knew of Alan's fate And so, reiterating his promise to

might be needful, he left her there.

CHAPTER XVII.

This Mortal Tide.

She was very certain she would never sleep before her anxiety was assuaged by word of Alan's fate; but she reckoned without her host of trials that had bred in her a fatigue anodynous even to her mental an-

It was not true, she told berself, that people never die of broken hearts. She knew that, were he taken from

her, she could no longer live. . . And sleep overwhelmed her suddenly, like a great, dark cloud . .

But its dominion over her faculties was not of long duration. Slowly, heavily, mutinously, she was rescued from its nirvana—came to her senses with an effect of one who emerges from some vast place of blackness and terror, to find Barcus kneeling over and gingerly but persistently shaking her by the shoulder.

And then she sat up with a cry of mystified compassion: for in the brief time that he had been absent-it had not been more than an hour-Mr. Barcus had most unquestionably been se-

He had acquired a long cut over one eye, but shallow, upon which blood had dried, together with a bruised and swollen cheek that was badly scratched to boot. And what simple articles of clothing remained to him, after his strenuous experiences of the last forty-eight hours, had been reduced to even greater simplicity; his shirt, for example, now lacked a sleeve that had been altogether torn away

"don't waste time pitying me. I'm all right-and so is Alan! That's the these last, without hesitation or furmain thing for you to understand; he's still alive and sound-"

"But where is he? Take me to him!" she demanded, rising with a

"That's the rub," Barcus confessed. squatting on the sands and knuckling with the inhabitants of this tight little island-and you can't get to where Alan is without mingling considerably. Sit down, and I'll tell you all about it, and we'll try to figure out what's best to be done. Maybe we

self beside him he launched into a

"It's Katama island, all right," he announced, "but a change has come Norton's reef by swimming-it's too over the place since I visited it some "Nothing doing," Barcus retorted far. That's the answer; they were years ago. Then it was a community curtly "The motto is now Full speed picked up, stole a boat, and piled it of simple-hearted villagers and fishermen: now, unless all signs fail, it's a den of smugglers. I noticed a num-"Only of the fog relenting. If we ber of Chinese about; and that, taken could make the mainland and get in connection with the fact that, when I ventured to introduce myself to the His accents died away into a discon- village ginmill and ask a few innocent questions, the entire population, to a child, landed on me like a thousand brick-the two circumstances made me think we'd stumbled on a means! I know it sounds heartless of the tide that Barcus never appreciated settlement of earnest workers at the me—and it's my own sister. But you they were within touch of any land gentle art of helping poor Chinamen

for me, I landed out back of the joint, "If we leave her out there," Alan to his feet -- "Land, by all that's on the nape of my neck, and took the count, surrounded by a lot of unsympathetic boxes and barrels that had seen better days. And when I came to and started to crawl unostentatiously away, I was just in time to witness the landing of your amiable sister, that gang of cutthroats she keeps on the pay roll, and Alan in company with as choice a crew of scoundrels as you'd care to see. I gathered from a few words that leaked out of the back door of the barroom, that it was as I had rammed it on Norton's reef; and after these smugglers happened along, and And as he rose from this last labor she hailed it and struck a bargain with way, her lot and the islanders were In less than five minutes the miracu- soon as thick as thieves, and tanking ery sufficiently to reverse the wheel, plished fact; the wind had rolled the chance to whisper a word to Alan and the farther point of rocks.

beach, if luck served him with an escape. That was all I got a chance to

say, for Judith marched up just then and yanked him off to his cell. I mean to say, he's locked up now in a little stone but on the edge of the cliff, with the door guarded and the window overlooking a sheer drop of thirty feet or so to the beach. When I'd seen that much I calculated it was about time for me to get quit of that neighborhood, before Mam'selle Judith nicked me with the evil eye."

"You don't think she saw you?" the

"I don't think so," Barcus allowed gravely and then, lifting his gaze, he added as he rose in a bound: "I just know she did-that's all.

In another instant he was battling might and main with three willing ruffians, who had come suddenly into view round a shoulder of rock; but his efforts were shortlived, foredoomed to failure. He was weakened with suffering and fatigue and the three were fresh and had the courage at least of their numbers. He was overborne in a twinkling, and had his face ground brutally into the sand while his hands were made fast with stout rope behind his back. And when he rose, it was to find, as he had anticipated, that Rose's resistance had been as futile as his own; she, too, was captive, her be gone no longer than absolutely hands bound like his, the huge and unclean paw of one of Judith's crew cruelly clamped upon her shoulders.

He was by no means poor-spirited, but he shrank openly from the look she gave him, and was relieved when she, with a sneer, passed him by and planted herself squarely before her

"Well?" she demanded brusquely 'How much longer do you think I'm going to tolerate your interferenceyou poor little fool! How many more essons will you require before realiz ing that I mean to have my way, and that you'll cross me only to suffer

The courage of the other girl won the unstinted admiration of Mr. Barcus. Far from cringing, she seemed to find fresh heart in her sister's challenge. Her head was high, her glance level with illimitable contempt as she replied: "So you've tried again?" she in

quired obliquely, with a tone of pity. You've offered him your love yet another time, have you?" "Silence!" Judith cried in fury.

"Only to learn once more that he would rather death than you?" Rose persisted, unflinching. "And so you come to take your spite out on me, do you? You pitiful thing! Do you think I mind-knowing as I do now that he could never hold you in anything but compassion and contempt?" "You will see," she said in even and

frigid accents. And the light of her mania leaped and leaped again in her eyes like a living flame. "I have prepared a way to make you understand what opposition to me means . . She waved a hand toward the nearer

point of rocks. "Take them along." she commanded The understanding between her and her men was apparently complete: for

ther instructions, marched Rose and Barcus down to the end of the epit and on, into the water. It was nearly knee-deep before Barcus was balted with a savage jerk, backed up to a rock, forced despite his frenzied resistance to sit down in the water, and swiftly, with half a dozen

knot, made fast in that position-submerged to his chest. This accomplished, the men turned attention to Rose, lashing her in simi-

deft hitches of rope and a stanch

lar wise at Barcus' side. Standing just above the water-line, with every sign of complete calm and sanity other than that ominous flicker-

done my best. I suppose it's wrong to give up-but they've made it too much for me, this time."

"I know," she said gently. "You"-he stammered-"you're not afraid?" "There is nothing to fear," she said,

but death. "Then," he said more bravely, after a time-the water now was near his chin-"good-by-good luck!"

"Not yet, dear friend," she returned, "not yet." But the sun was perflously close

apon the rim of the world. But a little time, and it would be night. He closed his eyes to shut out the rision of its slow, implacable descent.

The water was now almost level

with his lips; it seemed strange that his throat could be so dry, so parched .

He lifted his gaze . . .

He opened his eyes, shuddering, "It's good-by now," he faltered. "Not yet!" her voice rang beside him, vibrant. "Look-up there along the cliff!"

Two men were running along the

and the man who pursued was one of Judith's, and stuck to the trail like a blood-hound fresh from the leash. And now the water was at his lips;

cliff-and the man in the lead

Barcus could no more speak without strangling. Of a sudden he groaned in his heart; though there was no passable way down the cliff, still the sight of his friend alive and unharmed had brought with it a thrill of hope; now that hope died as he saw Alan stumble and go

Before he could rise the other was upon him, with the fury of a wolf seeking the throat of a stag.

For an instant they fought like madmen; then, in a trice, the sky line of the cliff was empty; one or the other had tripped and fallen over the brink, and falling had retained hold of his enemy and carried him down as

By no chance, Barcus told himself, could either escape uninjured. Yet, to his amazement, he saw one man break from the other's embrace

and rise. And he who lay still, a crumpled, inhuman heap upon the sands, was Judith's man. With a violent effort Barcus lifted his mouth above water and shrieked: "Alan! Alan! Help! Here—at the

end of the point-in the water-help!"

A precious minute was lost before

Alan discovered their two heads, so barely above that swiftly rising flood. Then he ran toward them as he had never run before, and as he came whipped out a jack-knife and freed its

Even so-since it was, of course, Rose whom Alan freed the first-Barons was half-drowned before Alap nelped him in turn up to the beach.

And as this happened the last bloodred rim of the sun was washed under by the waves.

Two minutes later the lifeboat was afloat, and Mr. Barcus, already recovered, was laboring with the flywheel of the motor, stimulated to supreme exertion by the sight of a party, led by Judith, racing madly down the beach. But it was not until well out from

shore and on the way to the safety promised by the mainland-now readily discernible on the horizon-that any one of them found time for speech. Then Mr. Barcus straightened up from his assiduous attentions to the

motor, and observed: "You bear a charmed life, my adventurous friend. I want to tell you that when I saw you go over that cliff I made up my mind your usefulness would be at least permanently impaired. As it is, I don't mind telling you that if ever I get out of this affair alive, I'm going to have a try at your

life myself, just once, for luck!"

## TO TILL UNOCCUPIED CALONEL WHEN BILIOUS? NO! STOP! ACTS LIKE DYNAMITE ON LIVER CANADIAN LANDS

THE CANADIAN GOVERNMENT ASKING FOR INCREASED ACRE-AGE IN GRAIN, TO MEET EUROPEAN DEMAND.

There are a number of holders of fand in Western Canada, living in the United States, to whom the Canadian Government will shortly make an appeal to place the unoccupied areas they are holding under cultivation. The lands are highly productive, but in a state of idleness they are not giving any revenue beyond the unearned increment and are not of the benefit to Canada that these lands could easily be made. It is pointed out that the demand for grains for years to come will cause good prices for all that can be produced. Not only will the price of grains be affected, but also will that of cattle, hogs and horses, in fact, everything that can be grown on the farms. When placed under proper cultivation, not the kind that is often resultant the kind that is often resultant which lessens yield and land values, many farms will pay for themselves in two or three years. Careful and intwo or three years. Careful and interest work is required, and if this given to the high-priced lands of older settled countries, surprising results will fol-

There are those who are paying rent, who should not be doing so. They would do better to purchase lands in Western Canada at the present low price at which they are being offered by land companies or private individuals. These have been held for the high prices that many would have realized, but for the war and the finan cial stringency. Now is the time to buy; or if it is preferred advantage might be taken of the offer of 160 acres of land free that is made by the Dominion Government. The man who owns his farm has a life of independence. Then again there are those who are renting who might wish to continue as renters. They have some means as well as sufficient outfit to begin in a new country where all the the owners of unoccupied lands would be willing to lease them on reasonable terms. Then again, attention is drawn to the fact that Western Canada numbers amongst its most successful farmers, artisans, business men, lawyers, doctors and many other professions. generation ago. The fact that a man sorts of bladder disorders. is not following a farming life today. and making a success of it. If he is not in possession of Western Canada agricultural possibilities are certain not worry. But to let it lie idle is not good business. By getting it placed under cultivation a greater profit will come to him. Have it cultivated by working it himself, or get some good representative to do it. Set about get-

one to operate on shares. The department of the Dominion Government having charge of the Immigration, through Mr. W. D. Scott, Superintendent at Ottawa, Canada, is directing the attention of non-resident "General, I fear that the battle is owners of Western Canada lands to the fact that money will be made out of farming these lands. The agents of the Department, located at different points in the States, are rendering assistance to this end.-Advertisement.

Ammunition Used in War.

How much ammunition does a modern army use? We shall not know until after the war what the German and the allied forces have been expending; but we know what the Germans used in 1870-71. The total for rifles was 30,000,000 cartridges, for field artillery 362,000 rounds. It is worth noting that battles are much less costly in ammunition than sieges. The slege of Strassburg alone cost, weight for weight, three times the amount of ammunition used in all the decisive battles and actions throughout the whole war. Of course these figures are a mere bagatelle comgle, with its millions of soldiers and its quick-firing guns and its week-long battles.-Manchester Guardian.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithiawater drink which everybody should take now and then to keep their kidneys clean, thus avoiding serious com-

A well-known local druggist says he sells lots of Jad Salts to folks who be lieve in overcoming kidney trouble while it is only trouble.-Adv.

Quiet Louvain.

I had a look at the now much-talkedof Louvain, quite a pretty old place, with its magnificent hotel de ville crowded in by the impressive church in the center of the town, and its innumerable other old gray churches with long sloping roofs—the place a perfect nest of nuns and friars. The streets were lined with the high walls and closed windows of convent after convent, and huge clusters of monasteries were on the hills about the town -many very newly built and modern -and the town was seething with black-robed priests and brown barefooted monks and coped nuns. This was the great Roman Catholic center, where some of the monastic orders have their chief establishments. The library of the university, so ruthlessly destroyed, contained a priceless collection of church documents.-"A Glimpse of Belgium Before the War." Isabel Anderson, in National Maga-

### The Masked Voice.

For a matter of twelve hours the for leaden dank viscous as inexorable as the dominion of evil, had wrapped the world in an embrace as foul and noxious as the coils of some great, gray, slimy serpent.

Through its sluggish folds the ponderous, power-impelled lifeboat crept at a snail's pace, its stem parting and relling back from either flank a heavyhearted sea of gray.

In the bows a young woman rested in a state of semi-exhaustion, her eyes closed, he head pillowed on a corkbelt life-preserver, her sodden garments modeled closely to the slender body that was ever and again shaken from head to feet with the strength of a long, shuddering respiration,

Seated on the nearest thwart, Alan Law, chin in hand, watched over the rest of this woman whom he loved with a grimly hopeless solicitude. He was in ne happier case than she, so far as physical comfort went-he was in worse, since he might not rest.

Premonition of misfortune darkened his heart with its impenetrable

In the stern Tom Barcus presided morosely over the steering gear; and Law was no more jealously heedful of his sweetheart than Barcus of the heavy-duty motor that chugged away so purposefully at its business of driving the boat heaven-knew-where.

Lacking at once a compass, all notion whatsoever of the sun's bearings, and any immediate hope of the fog lifting or chance bringing them either to land or to rescue by some larger and less comfortless craft, Barcus steered mainly through force of habit -the sult-water man's instinctive feeling that no boat under way should be without a hand at the heim. It had seemed impossible that it could long traito!" escape repetition of the disaster, but somehow, it always did escape, and that by a wide margin; never once had it passed near enough to another vessel to see it.

And now for more than an hour the silence had been uncannily constant, broken only by the rumble of the motor, the muted lisp of water slipping called back. down the side, the suck and gurgle of

For-bodings no less portentous than Law's crawled in the mind of Barcus. It was as likely as not that the lifeboat was traveling straight out to sea. And gasoline tanks can and oftentimes do become as empty as an official weather prophet's promise of fair weather for a holiday.

More than this. Mr. Barcus was a confirmed skeptic in respect of maintimate experience with the ways of

Delivered Into the Hands of the Enemy.

the demon of perversity that tenants them one and all, he knew that the present sweet-tempered performance of the exhibit under consideration was no earnest whatsoever of future good behavior, that when such a complicated contraption was concerned there was never any telling . .

in view of all of which considerations he presently threw open the bat-

tery switch. And the aching void created in the nce by the cessation of that uni-

form drone was startling enough to rouse even Rose Trine from her state

of semi-somnolence. With a look of panic she sat up, thrust damp hair back from her eyes. and nervously inquired:

"What's the matter?" "Nothing," Barcus told her. "I shut the engine off-that's all."

Tempers were short in that hour and Alan was annoyed to think that the rest of his beloved should need

lessly have been disturbed. "What did you do that for?" he demanded sharply.

"Because I jolly well wanted to. Barcus returned in a tone as brusque. "Oh, you did-eh?"

"Yes, I did-eh! I happen to be bossing this end of the boat and to have sense enough to realize there's no sense at all in our wasting fuel the way we are cruising nowhere!"

"Well." Law contended, struck by the fairness of this argument, but unable to calm his uneasiness--- "just the same, we might-"

"Yes; of course, we might," Barcus snapped. "We might a whole lot. We might, for instance, be heading for Spain, for all you or I know to the contrary. And in such case, I for one respectfully prefer to have gas enough to take us home again if ever this da-blessed fog lifts!"

And for several seconds longer the stillness strangled their spirits in its ruthless grasp.

Then of a sudden a cry shrilled through the fog, so near at hand that it seemed scarcely more distant than

"Ahoy! Help! Ahoy there! Help!" So insistent, so urgent was its accent that, coupled with the surprise, it brought the three as one to their feet, all a-tremble, their eyes seeking one another's faces, then shifting up 'What can it be?" Rose whispered,

aghast, shrinking into Alan's ready

"A woman," Barcus put in harshly. "Judith," the girl moaned. Alan shook himself together. "Im-

possible!" he contended. "I saw her "That doesn't prove she didn't come

up." Barcus commented acidly "Ahoy! Motorboat aho-o-oy! Help!"

"And that," Barcus pursued sadly. just proves she did come up-blame the luck! Alive she is, and kicking: stand clear. An able-bodied pair of lungs was back of that hail, my friend; and you needn't tell me I don't know the dulcet accents of that angelic con-

Without heeding him, Alan cupped hands to mouth and sent an answering cry ringing through the murk: "Ahoy! Where are you? Where

free, "it's her life on our heads!" At this juncture the motor took

charge of the argument, ending it in summary fashion. With a smart exunexpectedly, at one and the same farther upon the shoals. time almost dislocating the arm of Mr. Barcus and precipitating Alan

was happening until he found himself in the water; he struggled to the surface just in time to see the bows of

CHAPTER XVI.

The Island.

Not more than twenty seconds could have elapsed before Barcus recovered from the shock of the motor's treach-

out of the engine-pit.

lifeboat and Alan Law had parted company as definitely as though one of them had been levitated bodily to the far side of the earth.

It could not have been more than a minute after the accident before Barcus was guiding the boat over what, going on his sense of location and judgment of distance, he could have sworn was the precise spot where Alan had disappeared, but with out discovering a sign of him.

And for the next twenty minutes he divided his attention between attempts to soothe and reassure the half-distracted girl and efforts to educe a reply from Alan by stentorian hailing-with as little success in the one as in the other.

"Alan!" he shricked at the top of his lungs. "Alan! Give a hall to tell us you're safe!"

There was a little pause; he was racking his brains for some more moving mode of appeal when the answer came in another voice-in the voice of Judith Trine, clear, musical, effervescent with sardonic humor:

"Be at peace, little one-bleat no more! Mr. Law is with us-and safe -oh, quite, quite safe!"

dumb corsternation Barcue sought the countenance of Rose. Her eyes, meeting his, were blank with

Yanked Him Off to His Cell. despair. He shook his head helplessly

and let his hands dangle idly between With no way on her, the lifeboat drifted with a current of unknown set

and strength We must do something. We can't

Oh, when I think leave him . . of him there, in her hands, I could go "If only I knew," Barcus protested;

"but my hands are tied, my wits are as helpless as my eyes are blind. There's nothing to go by-except the bare possibility that the reef she spoke of may be Norton's. It doesn't seem possible, but we may have made that much southing. In that case we're about three miles off the main-"To port," the response rang through land, somewhere in the neighborhood Judith might object. Besides, you can the fog. "Starboard your helm and of Katama island, a little, rocky, desoby fishermen."

The girl wrung her hands.

"Don't ask me. Going on my expe-Leaping on the forward thwart and rience with the lady, I'd be willing to can manage a rescue under cover of "Can't make out anything," he to. One thing's certain-she must up on the reef."

"And there's no hope-!"

could make the mainland and get

upwards of an hour. So slowly the current bore the lifemeans! I know it sounds heartless of the tide that Barcus never appreciated

far and a grating sound. With a cry of incredulity he leaped to his feet - "Land, by all that's on the nape of my neck, and took the retorted, shaking his arm impatiently lucky!"—and stooping, lent a hand to the girl, aiding her to rise.

Hardly had Rose had time to com prehend what had happened, when Barcus was over the eide and wres away, I was just in time to witness the plosion in the cylinder, it started up tling with the bows, dragging the boat

She was, however, more than one man could manage; and when her stem had bitten a little more deeply into the sands, Barcus gave over the attempt and, lifting Rose down, set her on dry land, then climbed back into thought-Judith had stolen a boat the vessel, rummaged out her anchor the lifeboat back away and vanish into and cable, and carried them ashore, planting the former well up towards the foot of the cliff.

And as he rose from this last labor

In less than five minutes the miracu-

ning far out to sea, while the shore on which the two had landed was beautifully warm.

He showed a thoughtful and considrate countenance to the girl.

"You're about all in?" She nodded confirmation of this, which was no more than simple truth. Where are we?" she added.

He made her party to his own perplexity.

"You're not able to travel," he sued. "Do you mind being left alone while I take a turn up the beach and have a look round? We can't be far girl cried. from some sort of civilization; even if it's an island there are no desert isles along this coast. I'll find something soon enough, no fear."

By tacit consent both avoided mention of Alan, but each knew what thought was uppermost in the other's mind

"There's a niche among the rocks up here," Barcus indicated, "almost a cave. You'll be warm and dry enough, and secure from observation overhead. Maybe you can even snatch a few their numbers. He was overborne in winks of sleep. . . ."

She negatived that suggestion with a weary smile; no sleep for her until sheer exhaustion overpowered her, or she knew of Alan's fate.

And so, reiterating his promise to be gone no longer than absolutely might be needful, he left her there.

CHAPTER XVII.

This Mortal Tide.

She was very certain she would never sleep before her anxiety was assuaged by word of Alan's fate; but she reckoned without her host of sister. trials that had bred in her a fatigue anodynous even to her mental an-

It was not true, she told herself, that people never die of broken hearts. She knew that, were he taken from her, she could no longer live. .

And sleep overwhelmed her suddenly, like a great, dark cloud . .

But its dominion over her faculties was not of long duration. Slowly, heavily, mutinously, she was rescued from its nirvana-came to her senses with an effect of one who emerges from some vast place of blackness and terror, to find Barcus kneeling over and gingerly but persistently shaking her by the shoulder.

And then she sat up with a cry of mystified compassion; for in the brief time that he had been absent-it had not been more than an hour-Mr. Barcus had most unquestionably been severely used.

He had acquired a long cut over one eye, but shallow, upon which blood had dried, together with a bruised and swollen cheek that was badly scratched to boot. And what simple articles of clothing remained to him, after his strenuous experiences of the last forty-eight hours, had been reduced to even greater simplicity: his shirt, for example, now lacked a sleeve that had been altogether torn away at the shoulder

he told her, as her wits were awake once more-"don't waste time pitying me. I'm all right-and so is Alan! That's the main thing for you to understand; he's still alive and sound-"

"But where is he? Take me to him!" she demanded, rising with a movement of such grace and vigor that it seemed hard to believe she had ever known an instant's weariness.

"That's the rub," Barcus confessed squatting on the sands and knuckling his hair. "I dassent take you to him. see for yourself it isn't safe to mingle with the inhabitants of this tight little island-and you can't get to where Alan is without mingling conhow could Judith get there—and with siderably. Sit down, and I'll tell you all about it, and we'll try to figure out what's best to be done. Maybe we

And when the girl had settled her self beside him he launched into s detailed report.

"It's Katama island, all right," he somebody; they couldn't have made announced, "but a change has come Norton's reef by swimming-it's too over the place since I visited it some "Nothing doing." Barcus retorted far. That's the answer; they were years ago. Then it was a community picked up, stole a boat, and piled it of simple-hearted villagers and fishermen: now, unless all signs fail, it's a den of smugglers. I noticed a num-"Only of the fog relenting. If we ber of Chinese about; and that, taken in connection with the fact that, when I ventured to introduce myself to the His accents died away into a discon- village ginmill and ask a few innothe motor had turned suddenly stub- solate silence that was unbroken for cent questions, the entire population, to a child, landed on me like a thousand brick-the two circumstances ipon his sleeve. "Think what it boat toward the beach and so still made me think we'd stumbled on a settlement of earnest workers at the me—and it's my own sister. But you they were within touch of any land gentle art of helping poor Chinamen

With a wry smile, he pursued: "As for me. I landed out back of the joint, count, surrounded by a lot of unsympathetic boxes and barrels that had seen better days. And when I came to and started to crawl unostentatiously landing of your amiable sister, that gang of cutthroats she keeps on the pay roll, and Alan in company with as choice a crew of scoundrels as you'd care to see. I gathered from a few words that leaked out of the back door |-off. of the barroom, that it was as I had from the ship that picked her up, and rammed it on Norton's reef; and after she gathered Alan in the schooner of these smugglers happened along, and she hatled it and struck a bargain with he was half blinded by the glare of the the captain and signed co-partnership westering sun as it broke through the articles, or something like that. Anyway, her lot and the islanders were ery sufficiently to reverse the wheel, plished fact; the wind had rolled the chance to whisper a word to Alan and the farther noint of rocks.

throttle down the carburetor and jump | fog back like a scroll and sent it spin- | tell him you were all right, and that he'd find us both down here on the beach, if luck served him with an esdeluged with sunlight, bright and cape. That was all I got a chance to say, for Judith marched up just then and yanked him off to his cell. I mean to say, he's locked up now in a little stone hut on the edge of the cliff, with the door guarded and the window overlooking a sheer drop of thirty feet or so to the beach. When I'd seen that much I calculated it was about time for me to get quit of that neighborhood, before Mam'selle Judith nicked me with the evil eye."

"You don't think she saw you?" the

"I don't think so," Barcus allowed gravely and then, lifting his gaze, he added as he rose in a bound: "I just know she did-that's all.

In another instant he was battling might and main with three willing ruffians, who had come suddenly into view round a shoulder of rock; but his efforts were shortlived, foredoomed to failure. He was weakened with suffering and fatigue—and the three were fresh and had the courage at least of a twinkling, and had his face ground brutally into the sand while his hands were made fast with stout rope behind his back. And when he rose, it was to find, as he had anticipated, that Rose's resistance had been as futile as his own; she, too, was captive, her hands bound like his, the huge and unclean paw of one of Judith's crew cruelly clamped upon her shoulders.

He was by no means poor-spirited, but he shrank openly from the look she gave him, and was relieved when she, with a sneer, passed him by and planted herself squarely before her

"Well?" she demanded brusquely. "How much longer do you think I'm going to tolerate your interferenceyou poor little fool! How many more lessons will you require before realizing that I mean to have my way, and that you'll cross me only to suffer for it?"

The courage of the other girl won the unstinted admiration of Mr. Barcus. Far from cringing, she seemed to find fresh heart in her sister's challenge. Her head was high, her glance level with illimitable contempt as she replied: "So you've tried again?" she in-

quired obliquely, with a tone of pity. You've offered him your love yet another time, have you?" "Silence!" Judith cried in fury

"Only to learn once more that he would rather death than you?" Rose persisted, unflinching. "And so you come to take your spite out on me, do you? You pitiful thing! Do you think I mind-knowing as I do now that he could never hold you in anything but compassion and contempt?" "You will see," she said in even and

frigid accents. And the light of her mania leaped and leaped again in her eyes like a living flame. "I have prepared a way to make you understand what opposition to me means . . She waved a hand toward the nearer

point of rocks. "Take them along," The understanding between her and her men was apparently complete; for these last, without hesitation or further instructions, marched Rose and

Barcus down to the end of the spit and on, into the water. It was nearly knee-deep before Bar cus was halted with a savage jerk, backed up to a rock, forced despite his frenzied resistance to sit down in the water, and swiftly, with half a dozen deft hitches of rope and a stanch knot, made fast in that position—sub-

merged to his chest. This accomplished, the men turned attention to Rose, lashing her in simiar wise at Barcus' side.

Standing just above the water-line sanity other than that ominous flicker-

Already the Waters Had Risen Over an Inch.

ing in her eyes, Judith superintended the business till its conclusion, then waved the men away.

Quietly, like well-trained servants, they turned their backs and marched And again, after a brief wait, the

woman laughed her short and mirthless laugh. "The tide will be high," she said, "precisely at sunset. You may time your lives by that. When the sun dips

into the sea, then will your lives go down with it." She turned on her heel and strode swiftly away, with not so much as a soon as thick as thieves, and tanking backward glance, overtook her men, lous commonplace was an acom- up so sociably that I actually got a and passed quickly from sight around

valuity with his bonds. As for Reshe wasted no strength in strangillo looked her way he saw her exqui profile unmarred by any line of fear a doubt, sharply relieved against the darkness of the rising flood. Her level gaze without a tremor traversed the shining flood to its far horizon.

He noted that already the waters had risen more than an inch. Humbled even in his terror by that

radiant calm that dwelt upon her, he ventured diffidently: "Rose - Miss Trine-She turned her head and found the heart to smile. "Rose," she corrected

"I'm sorry," he said-which was not at all what he had meant to say, "I've

to give up-but they've made it too much for me, this time." "I know," she said gently. "You"-he stammered-"you're not

"There is nothing to fear," she said, 'but death. .

time-the water now was near his chin-"good-by-good luck!" "Not yet, dear friend," she returned,

"Then," he said more bravely, after

But the sun was perilously close upon the rim of the world. But a little time, and it would be night.

He closed his eyes to shut out the vision of its slow, implacable descent, The water was now almost level with his lips; it seemed strange that his throat could be so dry, so

parched . . He opened his eyes, shuddering,

"It's good-by now," he faltered. "Not yet!" her voice rang beside him, vibrant. "Look-up there along the cliff!" He lifted his gaze . . .

Two men were running along the cliff-and the man in the lead was and the man who pursued was one of Judith's, and stuck to the trail like a blood-hound fresh from the leash.

And now the water was at his lips? Barcus could no more speak without strangling.

Of a sudden he groaned in his heart; though there was no passable way down the cliff, still the sight of his friend alive and unharmed had brought with it a thrill of hope; now that hope died as he saw Alan stumble and go to his knees.

Before he could rise the other was upon him, with the fury of a wolf seeking the throat of a stag. For an instant they fought like mad-

men; then, in a trice, the sky line with every sign of complete calm and of the cliff was empty; one or the other had tripped and fallen over the brink, and falling had retained hold of his enemy and carried him down as well. By no chance, Barcus told himself,

> Yet, to his amazement, he saw one man break from the other's embrace and rise. And he who lay still, a crumpled, inhuman heap upon the sands, was Judith's man. With a violent effort Barcus lifted

his mouth above water and shrieked:

could either escape uninjured.

"Alan! Alan! Help! Here—at the end of the point-in the water-help!" A precious minute was lost before Alan discovered their two heads, so barely above that swiftly rising flood. Then he ran toward them as he had never run before, and as he came

Even so-since it was, of course, Rose whom Alan freed the first-Barcus was half-drowned before Alap selped him in turn up to the beach.

whipped out a jack-knife and freed its

And as this happened the last bloodred rim of the sun was washed under

Two minutes later the lifeboat was afloat, and Mr. Barcus, already recovered, was laboring with the flywheel of the motor, stimulated to supreme exertion by the sight of a party, led by Judith, racing madly down the beach, But it was not until well out from shore and on the way to the safety promised by the mainland-now readily discernible on the horizon-that any one of them found time for speech.

Then Mr. Barcus straightened up

from his assiduous attentions to the

motor, and observed: "You bear a charmed life, my adrenturous friend. I want to tell you that when I saw you go over that cliff made up my mind your usefulness would be at least permanently impaired. As it is, I don't mind telling you that if ever I get out of this affair alive, I'm going to have a try at your

OR SICK STOMACH

Time it! Pape's Diapepsin ends all Stomach misery in five minutes.

Do some foods you eat hit backtaste good, but work badly; ferment into stubborn lumps and cause a sick, sous, gassy stomach? Now, Mr. or Mrs. Dyspeptic, jot this down: Pape's Dispepsin digests everything, leaving nothing to seur and upset you. There never was anything so safely quick, so certainly effective. No difference how badly your stomach is disordered you will get happy relief in five minutes, but what pleases you most is that It strengthens and regulates your stomach so you can eat your favorite foods without fear.

You feel different as soon as "Pape's Diapepsin" comes in contact with the stomach-distress just vanishes-your stomach gets sweet, no gases, no belching, no eructations of undigested food.

Go now, make the best investment you ever made by getting a large fiftycent case of Pape's Diapepsin from any store. You realize in five minutes how needless it is to suffer from indigestion, dyspepsia or bad stomach. Adv.

GANADIAN LANDS

THE CANADIAN GOVERNMENT ASKING FOR INCREASED ACRE-AGE IN GRAIN, TO MEET EUROPEAN DEMAND.

There are a number of holders of land in Western Canada, living in the United States, to whom the Canadian Government will shortly make an appeal to place the unoccupied areas they are holding under cultivation. giving any revenue beyond the unearned increment and are not of the benefit to Canada that these lands could easily be made. It is pointed out that the demand for grains for years to come will cause good prices for all that can be produced. Not only will the price of grains be affected, but also will that of cattle, hogs and horses, in fact, everything that can be grown on the farms. When placed under proper cultivation, not the kind that is often resorted to, which lessens yield and land values. many farms will pay for themselves in two or three years. Careful and intensive work is required, and if this

is given in the way it is given to the

high-priced lands of older settled countries, surprising results will fol-There are those who are paying rent, who should not be doing so. They would do better to purchase lands in Western Canada at the present low price at which they are being offered by land companies or private individuals. These have been held for the high prices that many would have realized, but for the war and the finan cial stringency. Now is the time to buy; or if it is preferred advantage might be taken of the offer of 160 acres of land free that is made by the Dominion Government. The man who owns his farm has a life of indepen- Weekly. dence. Then again there are those who are renting who might wish to continue as renters. They have some means as well as sufficient outfit to begin in a new country where all the advantages are favourable. Many of the owners of unoccupied lands would be willing to lease them on reasonable terms. Then again, attention is drawn to the fact that Western Canada numbers amongst its most successful farmdoctors and many other professions. generation ago. # Own a Meat Manufacturing Plant In the Portales Valley of New Mexico

The following figures show what a farmer in the Portales Valley can do producing meat on the hoof. On 30 acres devoted to raising ensilage, seven acres in alfalfa and three acres for house, lots, barns, and for the raising of vegetables, fruit, etc., he might expect to make the following profit.

The plant cost on which he will figure his calves will be as follows:

Value of land	at	\$10	$\infty$	p	e!	r	a.(	cr	e	 		 				-	 -	-	-	-	-		-	 	\$4,	,000.00
200-ton silo														_					-			-		 -		600.00
Barn, fences.	ete	c								 _		-		-	-			 				-	-			500.00
7	Onto	a l						_	_		_		_				_								\$5	100.00

## **COST OF PRODUCTION OF ENSILAGE:**

Plowing, estimated at	<b>\$2.5</b> 0	per acre
Cultivating	1.50	per acre
Seed, less than 4 cents per acre, not counted.		
Water	2.50	per acre
Harvesting, hauling, cutting and placing in silo		per acre
Incidentals	80	per acre

Total cost of ensilage delivered ready to feed \$13.00 per acre Production, 61 tons per acre, cost of ensilage \$2.00 per ton. Cutting ensilage by electricity costs about 6 cents per ton.

Ensilage put up with grain set.

## **COST OF ALFALFA:**

Alfalfa will cut 5 times p	er season	and	the 7 a	cres of	alfalfa w	ill tota	1 3 <b>5</b> tor
Water, \$7 per acre	or					\$49	.00
Cutting, hauling, et	c., \$2 pe	r ton				70	00.0
Incidentals						21	.00
	or s	\$4.00	per ton			\$140	00.0

We will say this man purchases 100 calves, purchasing top calves at \$30 per head, average 400 pounds, which is a very high valuation and should secure the very best calves available.

## FEED FOR CALVES.

The farmer will feed his calves for six months. He will feed each calf about

W	pounds of ensilage worth \$2 per ton.	
	Cost of ensilage	3.60
	300 pounds of cake worth \$38 per ton	4.45
7	700 pounds of alfalfa	1.40
	500 pounds grain bought on market	3.20
	Salt and incidentals	<b>5</b> 0
	\$	13.15
	Add 10 per cent for bad feeders and shrinkage	1.35
		-

Total .....\$14.50 We therefore have the following costs as chargeable to the feeding of calves: Price of calves, delivered \$3,000 00 Note-Labor is figured in on cost of production of feed. Total cost of calves finished -----\$4,450.00

The manure obtained is considered as paying for all labor of feeding; 9 cents per pound is a low selling price for these calves and they will put on 400 pounds in this six months feeding period, so that they will easily sell for \$72 per head, making a total of \$7200 selling price.

Total cost------4,450,00 

This is 34 per cent on the \$8,100 capital investment including all of the capital invested in land and cattle. In addition to the profit on the calves the farmer will of course run twenty-five

or thirty head of hogs after this bunch of one hundred finishers. These hogs he will put in at about 75 pounds average weight each and they will gain 150 pounds, worth 7 cents per pound or approximately \$10.50 per head, which gives an additional item of profit of \$315.

He will also carry some milking cows and he will plant fruit and vegetables and he will raise chickens, turkeys, etc.

TO THE MAN QUESTIONING THESE FIGURES WE SAY, GOME TO THE PORTALES VALLEY AND SEE FOR YOURSELF
