# County JOUR

PORTALES, ROOSEVELT COUNTY, NEW MEXICO, FRIDAY, JUNE 14, 1918

**VOLUME 11** 

Ordinance No. 58

Be it ordained by the board of trustees of the town of Portales. New Mexico:

Section 1. It shall be, and is heleby made, the duty of every owner, agent, or occupant of any building or buildings situated on anymot or lots of land adjoining or abutting on any street or alley where any sewer pipes are now laid, or may hereafter be laid, to have and make proper connections of every sink, bath tub, basin, watercloset, privy, slophopper, wash tray, and all other fixtures discharging waste or waste water, whether inside the house or separate therefrom, with the city sewer; said connection or connections to be made in an approved sanitary manner under and in accordance with the rules and regulations of the water and light department

Section 2. No building buildings shall hereafter be erected or constructed upon any lot or lots, or lands adjoining or abutting any street or alley where a sewer pipe is laid, without the owner or owners, or the agent of such owner or owners causing the proper sewer connections to be made, as is now or may hereafter be prescribed by the ordinances of the town relating to sewer connections.

Section 3. Any person violatingany of the provisions or requirements of the forgoing sec-

For Better Health The board of trustees for the town Tuesday night enacted two health ordinances that should appeal to the better judgment of

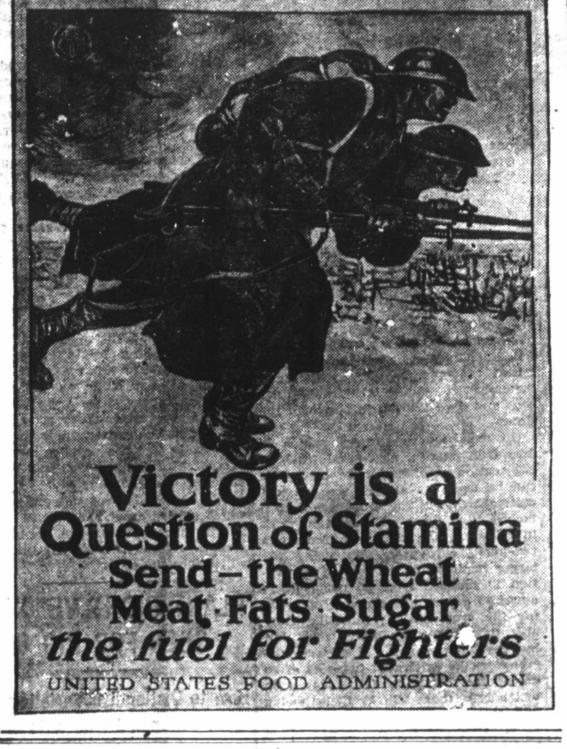

every man in the city. While, on their face, they may appear a little drastic, yet it must be remempered that the public health is a matter of the highest importance and, while there are many who are always willing to do their full duty without legal requirements, yet some always have to be driven. The sewers were constructed under a special provision of congress for the special reason that the public health might be conserved. So long as there was no law compelling the use of this system the expense was more or less of a waste and the health was not benefitted to the extent contemplated by the act. To the man who really

wants to do the right thing there are no terrors in the new ordinances will be enforced, reasonably, bud without fear or favor. The town board has acted wisely and should be commended.

## Ordinance No. 59

NUMBER 1

recorded in Beok

Be it ordained by the board of trustees of the town of Portales. New Mexico:

Section 1. It shall be, and is hereby made, the duty of every owner, agent or occupant of any building or buildings, or of any premises whatsoever, where sewer connections are not made. to have and maintain all privies, waterclose s and toilets in such condition and manner that the discharge and waste therein deposited shall not be accessible to flies, and easily accessible to the city scavenger; and at all times to keep such privies, waterclosets and toilets thoroughly disinfected with lime or other disinfectant of equal effectiveness.

Section 2. That there shall be provided and kept by the owner, agent, or occupant of every building a suitable covered metallic vessel, free from leakage and so that they are not accessible to flies, in which shall be placed all garbage and liquid refuse that accumulates in said building or on the premises. Said receptacle shall be emptied not less than once during each week; and no person shall deposit, or cause to be deposited, any garbage, rubbish, manure, dead animals, or other offensive or unwholesome matter at any place other than that designated as the town dumping ground.

Section 3. All buildings, premises, lots, corralis, wagon yards, whether occupied or not, shall be kept by the owner, agent or occupant in a sanitary condition. free from garbage, rubbish, refuse, weeds, offensive and unwholesome matter, noxious and offensive odors, and all things that might endanger the public health. Section 4. Any person violating any of the provisions or requirements of the foregoing sections shall upon conviction therefor be fined not less than twentyfive nor more than one hundred dollars, or by imprisonment for not less than five nor more than ninety days, or by both such fine and imprisonment; and each and every day that such violation is done, or suffered to be done, shall constitute a separate of-

tions shall upon conviction thereshall constitute a separate of dist church as she taught the prominent educators of the state fense.

be in force and effect on and after thirty days from the date of its passage and approval, and all ordinances and parts of ordinances in conflict herewith are hcreby repealed.

Passed and approved this 11th day of June, 1918.

(Seal) E. B. Hawkins, Mayor. Attest: W.H.Braley, Town Clerk.

It is easier to lead a man to the altar than it is to make him eat war biscuits.

Originality usually consists of repeating bright remarks to people who never heard them before.

Cross Ball Blue

One way to avoid a fight is to stop and count ten. By that time the other fellow will probably have you licked.

THE ART OF TEA MAKING.

The three components of tea are essential oil, theine and tannin. These

give character to the beverage. The flavor of the tea depends chiefly upon the essential oil. The caffeine found in coffee is an alkaloid like theine and the fatigued one who finds refreshment and restored energy

from a cupful of tea has been stimulated by this ingredient. There are hundreds of blends of

teas but those commonly known and most used are English Breakfast, Formosa, Oolong, Ceylon, Orange Pekos, young Hyson and Souchong.

Properly brewed tea is an important essential. Tea should not be infused too long and should under no circumstances be boiled.

Ceylon tea is the tea best liked for lced tea and when serving it hot the tea ball is desirable.

Green tea known by gun powder, Hyson and various other names, is much lighter in color, a drink of high fragrance, but a bit more harsh than black teas. The English know the ach-ache, diarrhœa, remember, a genvalue of fresh boiled water for the fragrant beverage.

In many places certain springs or wells have water which makes a most superior tea, the tea makers going many rods to carry this precious water to have the right tasting cup of tea.

Russians, we are apt to think, always require a slice of lemon in their tea while as a fact they serve jam with their national drink, dropping it into the tea which is drunk from tumblers.

In Morocco the leaves of thyme and verbena are added to the tea to lend It piquancy.

The Persian likes his sweetened almost to a sirup. The Burmese add garlic and other highly flavored sesame oil to theirs.

Perhaps in America as in no other

ACH, LIVER, BOWELS. "CALIFORNIA SYRUP OF FIGS" CAN'T HARM CHILDREN AND

Mother! Your child isn't naturally cross and peevish. See if tongue is coated; this is a sure sign the little stomach, liver and bowels need a

cleansing at once. When listless, pale, feverish, full of cold, breath bad, throat sore, doesn't eat, sleep or act naturally, has stomtle liver and bowel cleansing should always be the first treatment given. Nothing equals "California Syrup of Figs" for children's ills; give a teaspoonful, and in a few hours all the foul waste, sour bile and fermenting food which is clogged in the bowels passes out of the system, and you have a well and playful child again. All children love this harmless, delicious "fruit laxative," and it never

fails to effect a good "inside" cleansing. Directions for babies, children of all ages and grown-ups are plainly on the bottle.

Keep it handy in your home. A little given today saves a sick child tomorrow, but get the genuine. Ask your druggist for a bottle of "California Syrup of Figs," then see that it is made by the "California Fig Syrup

## THE PORTALES JOURNAL

Singular Growth Resembles Animal So Greatly as to Deceive Even an Experienced Shepherd.

"Some of the most singular plants in the world," says a writer in the April Wide World, "are the vegetable sheep of New Zealand. These are known to science as Raoulia eximia, and although they are of such a strange habit of growth they are members of the daisy tribe. The vegetable sheep grow at high altitudes, usually on some bleak mountain slope, which may be 5,000 feet above sea level. The whole plant is a compact mass of stems densely covered with small woolly leaves. So closely do the Raoulias resemble sheep that experienced shepherds will often climb a long way up the mountain thinking that they see some missing member of their flock huddled against a rock, only to discover that they have been deceived by a plant! During a recent exhibition at Christchurch, in New Zealand, some specimens of the vegetable sheep were collected for the show. The plants are often large and heavy, and it required the efforts of half a dozen strong men to secure some fine examples of the Raoulias."

## Conscientious Cuss.

"Enos Dubblehook is the most conscientious gent in town," related the landlord of the Petunia tavern. "The other evening the fellers here in the office were telling funny stories, and Enos got off one about a drunken man meeting a ghost. He strung the yarn out quite a distance, and then, after he had got through and we had all laughed politely, he recollected that a drunken man always says 'Hic!' And so, as he wanted to be perfectly accurate, he told the whole story over again, putting in the missing hiccoughs at the proper intervals. I sometimes think that with a little different education Enos would have made a first-class German spy."-Kansas City Star.

Deal for Small Portion of Land. One-vigintillionth of one-vigintillionth of an inch of land in Figueroa square, a California city subdivision, and one-tenth of one-vigintillionth of an inch in another subdivision, was the amount of land disputed in a case at Fresno, Cal., the other day. Mathematicians said the width of the strip described would be a fraction of an inch designated numerically by one, preceded by 43 groups of three ciphers each. Attorneys in the case said the suit was brought for the purpose of removing a cloud placed on the title in a tax proceeding several years

## Trust Me! Try Dodson's Liver Tone! **Calomel Harms Liver and Bowels**

country cream in tea is the tea par excellence. We must bear in mind, however, that tannin in tea will act upon the delicate stomach lining and should be infused just long enough to extract the flavor. Any added steeping tends to increase the amount of tannin.

## GOOD EATING.

Simple desserts are the rule these flays. Dates which are rich in food

~

value are little appreciated by the average housewife. Wash the dates, remove the pits and arrange in small dishes, sprinkle with a tablespoonful of broken nut meats, such as pecans, add a spoonful of

sweetened whipped cream and you have a dessert which is both nutritious and dainty.

Taploca and Date Sponge .--- Put a scant half teaspoonful of salt and a pint of boiling water in the upper part of a double boiler, stir in one-third of a cupful of minute taploca and stir lightly until it thickens, then cover and cook until the taploca is transparent. Pour boiling water over half a pound of dates, stir, then skim them, cut and dry in the oven. Cut in sections, removing the pits and stir into the tapioca with one-fourth cupful of sugar and the juice of a large lemon. Beat the whites of two eggs and fold into the mixture. Serve with sugar and cream.

Green Pea Soup.-To serve ten people boil two quarts of green peas in two quarts of water with an onion and three sprigs of parsley. Remove the onion and parley and press the peas through a puree sieve, diluting mean while with the vegetable liquor saved from the cooked peas. Add a quart of chicken broth and stir until boiling. cook ten minutes, add two teaspoonfuls of salt, a teaspoonful of sugar and a dash of pepper. Serve very hot.

Chop Suey .- Heat a half cupful of sweet fat in a kettle, add one pound of chicken cut into bits, remove chicken when brown and add a pound of lean pork also cut in bits, return the chicken to the kettle and add one cupful of chopped onion, the same of celery and a can of mushrooms, using the liquor in the can, one and one-half cupfuls of water and one cupful of blanched and finely chopped peanuts. Add salt and pepper to taste and boil one-half hour.

A juicy pie may still be palatable and save its juice by using an egg beaten with the sugar and a little flour well stirred into the fruit when putting it into the crust. Another method to save the juice in the pie is to insert a paper funnel in one of the small openings of the crust. The juice boils up but does not escape.

Company."-Adv

#### An Improvement.

A familiar card seen on one thing or another that is temporarily out of commission bears the blunt announcement, "Out of Order."

A card that seemed an improvement on this, something slicker, smoother, nicer, read: "Out of Service."

### Saloniki Ancient City.

In the days when St. Paul addressed his epistle to the Thessalonians, Saloniki was not modern, for it was built about 315 B. C., on the site of an older city called Therme, says the London Globe, and was named by its founder after his wife, a sister of Alexander the Great. It has always been a place of importance, as it is the chief harbor of Macedonia, and was a point on the ancient highway from "Don't worry," said the doctor, "I'll Rome to the East. With the few fine

had been in turn a temple of Venus and a Christian church, it has always been a collection of houses largely of wood, and therefore highly inflammable in the extreme continuous heat of summer.

## Reason for Woman's Longer Life.

Life insurance experts contend that a woman who is in good health at the age of forty-five is likely to outlive a man of the same age, because she is likely to be more temperate and is less liable to accident.

of brick made from this valuable byproduct. Mortar containing a large quantity of sawdust, and a sort of stucco, is now being made entirely of sawdust.

## Flattering Likeness.

Young Bobbie was looking at his sister's new photograph.

"Do you think it looks like me?" she asked.

"Oh, yes!" Bobbie answered, emphatically. "Only I don't think it looks sawdust, as in the instance of a form | like your face."-Harper's Magazine.

## **GROVE'S BABY BOWEL MEDICINE**

This valuable and harmless Baby Medicine is composed of the following:

## BISMUTH, LIME, PEPSIN AND CATECHU WITH PURE SIMPLE SYRUP

Bismuth is healing to the mucous membrane of the stomach; the Lime neutralizes the acid where there is a sour stomach; the Pepsin digests any indigestible food that may be in the stomach, and the Catechu acts as a mild astringent to control the bowels where there is a disposition to Dysentery, Diarrhea, Flux or Sick Stomach.

GROVE'S BABY BOWEL MEDICINE is not a patent medicine. We give the ingredients and tell the effect of each ingredient so that you can judge for yourself.

SPECIAL NOTICE. - This preparation does not contain Morphine or Opium in any form and we don't advocate the giving of Opiates unless it is absolutely necessary.

RELIEVES SOUR STOMACH

For Dyspeptics who are Troubled with Sour Stomach

It Relieves Stomach and Bowel Trouble and is Just as Good for Adults as for Children

We have numerous letters on file from parties claiming that this preparation relieved their babies of Chronic Dysentery, where everything else had failed and where they had been troubled in this way for several years. Children like to take it.

## CLEAR FIELD MUST BE GIVEN

Cleanliness and Freedom From Dust Are Absolutely Essential if Really Good Job is to Be Done.

Mr. William A. Radford will answer guestions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he s, without doubt, the highest authority on all these subjects. Address all inquiries o William A. Radford, No. 1827 Prairie evenue, Chicago, Ill., and only enclose three-cent stamp for reply.

## By WILLIAM A. RADFORD.

The master painter who undertakes to handle the finishing contract under present-day conditions causes considerable friction before the contract is completed. Oftentimes the general oil has been absorbed by the wood. contractor has been delayed and the outside work has not gone along as smoothly as it might had those columns arrived on time or if the dormer trims had not been changed over. Then the plumbers have had trouble in getting their work installed, with the result that the floors are tracked up and The floors should receive the same paper and excelsior litter the once clean floor. The decorator appears with his curtain outfits just when it is advantageous to varnish the trim and floor for the last coat in several rooms, of dust, the ruination of much varcausing the master painter to wonder | nished trim. If the work is to be whether, after all, "It is better to rubbed with felt pad, pumice stone and smoke here than hereafter." Last of water, start with the head casing and all, the owner comes along, looks continuous trim, using a pad of Spanproudly at his new possessions, and as | ish felt % by 3½ by 5 inches. Have a last straw, leaves behind the sugges- two pails handy, one with water and tion, "Hurry and finish up the job, so sponge in which to dip the rubthat I can get in here in a couple of bing felt, the other to contain clean days." And yet the master painter water for sponging off after rubbing.

and more permanent, because it is not being influenced by undue moisture in the plaster and walls. The first thing to be done is to start with the uppermost rooms and clean all walls, doors, casings, trim and floors very carefully and thoroughly, closing and locking each foom as it is cleaned. This prov cedure should be followed down to the basement, and all material swept up should be carefully taken out of the building.

Spirit Stains Hard to Apply.

The woodwork and standing trim should first be stained, shellacked and filled. The former should be a water or oil stain. Avoid spirit stains, because they are exceedingly difficult to apply free from laps and "holidays," and are not permanent to light. The shellac coat may be either orange or white, depending upon whether or not the work is dark or light. Shellac should be reduced one-half with denatured alcohol; do not use wood alcohol if you wish to avoid the possibility of blindness resulting from the exposure to fumes in a closed room. Never apply shellac as an undercoat in full body; it is merely a sizing coat for the wood and will prevent much cloudiness from improper sanding when the filler is applied. Let the shellac coat dry at least three hours, more if the rooms are cold. Prepare the filler, being sure to use one prepared from a silex base and not from cornstarch or flour, which will shrink and fade when the

### Freedom From Dust Big Ald.

After the varnish has dried three days, or longer, it should be sanded free from nibs with No. 00 or 0000 sandpaper. The trim should be carefully dusted; better still, sponged with clear water and dried with a chamois. treatment. If this method is followed, and the rooms kept closed, an enormous amount of sanding will be saved in the end because of great freedom

# Neckline Given **Drastic Change**

New York .--- The world that amuses | shaped--- the decolletage that we asso or instructs itself by watching the clate with Dresden shepherdesses changes in dress finds itself highly Dolly Varden styles. Mozartian oper diverted in the month of May. This and Janice Meredith. This kind of is the time for settlement. February neckline was accepted only for frocks: is full of rumors and cables from it should go without saying that it was Paris concerning the gowns that are not contemplated for coats. exploited there by the dressmakers. During the month of March the clothes that arrive in America are shown first by the importers, who cater to the dressmakers, then by the dressmakers and shops, who cater to the public. After the first week of tight skirt, for it necessitated thought April the public takes a hand in the and an entire change in the arrange settlement of fashions and wears its new spring clothes at all hours, with been carelessly worn in the same comreckless prodigality.

thority, we come to the month of ob- gard one's self for numerous momenta servation. We see what has failed before mirrors in order to secure a and what has succeeded. We know satisfactory adjustment of the new what the public likes and what it has fashion to one's neck and face. discarded.

#### Established Neckline.

In the settlement of fashions which comes this month there is one predominant feature that interests the majority as well as the minority. It is the new arrangement of the neckline. This style has been creeping on us unawares since January, but it seems to have sprung out of ambush and attacked the people as the warm weather burst over the land.

Those who were not observing fashion closely went about with their shiftwaist collars pulled out over the coat collars, or the wide collars of guimpes pulled out over the bare edge of a one-piece frock.

Then, suddenly, the whole process seemed to be wrong. The careless public observed that the fastidious crowd had abandoned white coat col-

skirts.

But whatever the garment, its neck line was no more hidden and enveloped by a white collar. It is quite probable that this somersault in fashions disturbed the minds of more women than even the incoming of the ment of the garments which have bination for several seasons. It made Now, asserts a leading fashion au- one go into numerous shops and re-

## High Collar on Coat Sults.

And another movement in the ar rangement of the neck is disquieting dy: It is the introduction of the high collar at an hour when the high fashion designers decided to discard it, and the public was informed that it was no longer in first fashion. No sooner had this edict gone out and been accepted than a vast number of women -well-dressed women, too-appeared with high loose collar, that either enveloped the chin or rolled in a loose ground.' fold beneath it.

There are two or three practical things that every woman must somehow manage to master in this new fashion if she intends to look her best during the warm-weather season.

One of them is that a coat suit requires some kind of collar at the back and sides of the neckline, to prevent the rough material from resting against the skin.

Another feature of the new neck arrangement which it is well to absorb into the mind is that the blouse with the Italian decolletage is the best to wear under all coats. It is wifar to

## THE MOON'S TALK.

"A little girl named Tiddy," said Daddy, "went to visit a little girl named Beatrice.

A Ridiculously

Big Moon.

lived where 11 was very warm. The roses blossomed almost all through the winter and there was no such thing as snow and ice and blizzards.

"Now Beatrice

"Tiddy was glad she didn't live in that country all the time. for she loved to coast and skate. Of course for Beatrice it was

different. Beatrice would not have iked a cold climate.

"One morning Beatrice said to Tid-

"'Let's cut some roses.' There were so many roses and flowers that Tiddy didn't know what to make of such quantities of them.

"'How will we ever find enough vases to put them in? she asked.

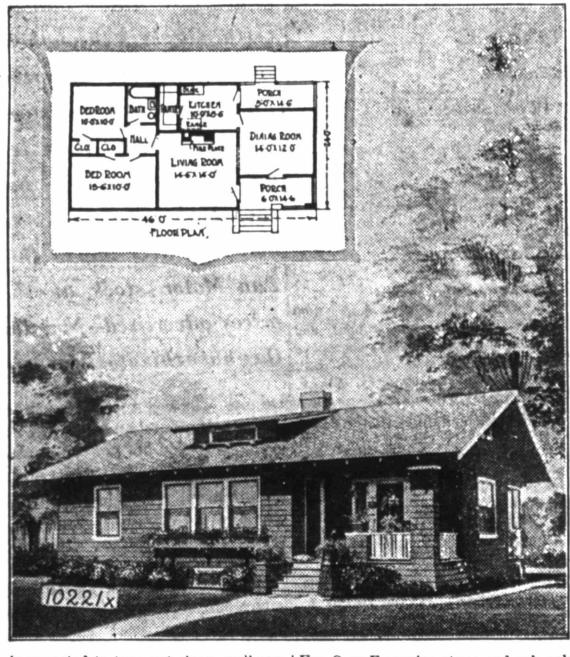

"'Oh,' said Beatrice, 'we'll only take the ones with the great long stems for the vases and leave the others on the

"'Are you joking?' asked Tiddy.

"'No, certainly not,' said Beatrice. "'You mean you're going to leave roses on the ground! Can't we give them to some one?

"'Every one around here has all the roses imaginable. It may seem strange to have all the roses one can use and give away and enjoy, but that's the truth. And we really cut them of and let them drop on the ground, because we try to make them grow with longer stems next time.'

"Tiddy was never so surprised in her life. It was like living in a land of roses. She had never visited Bea-

is expected to turn out clean, well-var- | Use O or F pumice stone and rub only nished and enameled work; walls free from finger marks left by other men than his own, well-polished floors, free frem heel-marks and scratches.

For safety's sake, however, the master painter should have it stipulated in his specifications that all inside work shall be complete and accepted; all refuse and dirt removed from all rooms, closets and halls; that he will not be responsible for results if plumbers, masons, carpenters, decorators or others come in and cause dust, litter or other annoyance, while working on the fulfillment of his contract. If this is agreed to in black and white before the contract is signed, but little trouble will be experienced later on when the work is under way.

Plaster Should Dry Three Weeks. No inside work should be attempted antil the plaster has dried at least three weeks, nor should the last coat of outside finish be applied until after this time has elapsed. The priming and second coats on the siding protect the lumber from external moisture. cold and heat conditions, but at the same time I am convinced that they also exert a valvular action and allow internal moisture to escape. For this

with the grain of the wood until the work is smooth and the surface has been leveled off free from nibs. Sponge clean, using a two-inch chişel Chinese bristle brush for molding, and wipe dry with a chamois. Avoid all cloths for wiping, as they invariably leave lint, which will ruin any varnish finish. Never let the pumice stone dry on the work, as it will dust off and float around to spoil fresh varnish applied later.

#### Finish Woodwork First.

All woodwork should be finished, except for the last sponging off and polishing before the walls are touched, ei- bughly practical for the summer clothes ther for painting, enameling or papering.,

Much care must be exercised throughout, in order that the work may proceed smoothly and not cause trouble, because some part may be influenced by some other portion through not having been undertaken in the proper order. Cleanliness and freedom from dust are absolutely essential to really good work, and will save much excessive sandpapering or rubbing if carefully observed. Clean brushes, carefully put away in the proper son I much prefer to apply the last liquids at night so that they do not French importations that the French coat of finish on new houses after all rest on their own bristles, will do much fashion leaders have not thought it

avoid superimposing one collar on another. This Italian neckline may be round, or stragiht across the shoulders, or brought to the base of the neck. The wearer must decide on that. Her features should determine the exact curve which is employed.

## Low Neck for Day Usage.

Another interesting detail of fashion is the definite tendency toward a deep decollete for day usage. The neckline may be on the Italian model, or it may be on the American Colonial model, which brings the material high and tight against the back and side of the neck and then dips it down to a deep square or delta in front.

The introduction of the high collar seems to have come about through necessity rather than choice or inclination. True, there are smart women who insist that their one-piece frocks like collars that rise on the stem of the neck and open out wide to envelop the chin and the back of the head, but | it, but it doesn't seem real.' the majority of women have adopted high collars only with coat suits. They I don't understand. When things are don't know any other kinds of collar beautiful and wonderful and everyone to adjust with a jacket that is high in is happy folks will say, "It doesn't the neck and has rolling revers.

They find that the wash blouse, which has a high turn-over collar and is worn with a cravat of black or colored picot ribbon, gives just the right silhouette to the neckline of an everyday coat suit. If this high collar cannot be adopted, then a low one must be worn with the suit, because of its collarless condition.

The lessened number of chiffon blouses shown this summer is indicative of the lessened number of tailored suits worn, so the workers claim. (Copyright, 1918, by the McClure Newspaper Syndicate.)

trice before in the rose season. How wonderful it all was.

"When night came and she had become used to seeing roses, roses everywhere—on the ground, in vases, on the bushes she saw an enormous moon come up from behind a hill.

"'Did you ever, in your life, see such a big, such a ridiculously big moon?' she asked Beatrice.

"Beatrice laughed. 'Well, I suppose I am so used to seeing such a big moon that it doesn't surprise me.'

"Tiddy couldn't think of anything else after she had gone to bed but the many, many roses and the great big moôn.

"In a little while she saw something round and yellow at the end of her bed. And it began to grow bigger and bigger until it covered up all the iron rods at the foot.

"'Well, Miss Tiddy,' said the Moon shall have these up-standing, flower- in a low and solemn voice, 'how do you like this part of the world?'

"'I like it,' she said; 'in fact, I love

"'Now,' said the Moon, 'that is what seem real." And if things are going wrong they think they are very real. Lovely things and happy things are just as real as the other kind-just as real, Miss Tiddy.'

"'Why are you so big, then? You don't look real-though I suppose you are.

"'I'm real, and this is the way I look in this part of the world. Other

things are big and beautiful and so I try to look the same way. I'm not really at the foot of your bed, but I am teally in your "'And what I

Land of Roses.

THE VILLAIN MAC BEARD, POSSESSED OF THE DEAD MAS-TERMAN'S SECRET, GOES TO FIND THE ABODE OF THE WEIRD THINGS NEAR SHETLAND 113 1 27 1 ISLANDS—HAS DEADLY PURPOSE.

Naval Lieutenant Donald Paget, just given command of a submarine, meets at Washington an old friend and distinguished though somewhat eccentric scientist, Captain Masterman. Masterman has just returned from an exploring expedition, bringing with him a member of the strange race, the existence of whose species, he asserts, menaces the human family. At the club, the "March Hares," Masterman explains his theory to Paget. The recital is interrupted by the arrival of a lifelong enemy of Masterman, Ira MacBeard, and the former is seized with a fatal paralytic stroke. From Masterman's body Paget secures documents bearing upon the discovery and proceeds to the home of the scientist. Paget proceeds to sea on his submarine, the F55, and encounters a German cruiser. He sinks the enemy, which had destroyed the Beotia, on which Ida Kennedy, his fiancee, was a passenger. The girl escapes in a small boat. He rescues her, but finds himself unable to take the skiff to the submarine because of invisible forces. Paget, Ida, Midshipman Davies and Seaman Sam Clouts barely escape death. Clouts plays the mouthorgan.

## CHAPTER VI-Continued.

Donald heard him leap into the tor- ing by turns, and the silence was bropedo room below. A moment later his ken only by a passing word and the ocvoice came up the funnel. "I'm ready casional tunefulness of Clouts' mouth for the lady, sir!" he called. Donald raised Ida in his arms and ley."

lowered her through the tube. "After you, sir," said Davies.

"I have assumed command, Davies," Donald replied.

"Very well, sir," said the middy quietly, and descended. Donald followed men who are recognized by their conhim. As he jumped for the floor of temporaries as master minds. an army to victory, not to sit back and watch the working out of blind forces that he had set in motion.

Besides, destruction must be followed by construction, to satisfy his scientific mind.

His second thought was to produce a race of men, somewhere in the icebound wastes of Greenland, that should grow to maturity in a few years; a race organized for war, a primal blend of man and tiger. It had been done with the plants.

But he was too old. He would be seventy before this plan could be carried to perfection. And then it was improbable that the details would work out as he anticipated. His final idea came through Masterman.

men whom he had broken in his days different caliber from the rest. Mashad almost succeeded.

the old dreamer, came at last to watch Masterman uneasily. He knew that 498 "Improved," 215 "not improved," the old captain was crazed upon the 147 abandoned treatment and 76 were subject of deep-sea life; but he knew, dead. too, the facts that underlay his letters to the newspapers.

He had sent a paper embodying this subject to the magazine of the Inventors' club. Unfortunately, Halfield had won the ballot for the editorship that month. Masterman's scholarly contribution had been consigned to the waste basket, and the articles in the magazine had been as follows: "A Lancet. King in Masquerade," "King James I as Universal Man," "Shakespeare and the JIM cipher," "Bacon and the MIJ Cipher," "What Civilization Owes to James I."

the editorship during his absence, the just a century ago? printers, instead of inserting his latest quantity of his old, unpublished material.

swim like other fishes and have one eye on either side of the head. The modifications in the physiological structure come with maturity. The adult monsters, MacBeard

learned, had already acquired the ability to exist for an indefinite period upon the surface of the sea. While the young had gills, these became modified into a species of lung, capable of breathing both above and under water. This was a new adaptation of nature. MacBeard hurried back to the dead monster, and found the lung already partly formed. That satisfied him that Masterman was an accurate observer.

The submarine sinks. Paget's party take to the water in diving suits. They make some amazing discoveries.

ALL WOMAN HAD IN WORLD

Pathetic Plea Made to Governor Goodrich Asking Him to Allow Liberty to Her Dog.

"All I have in this world is my poor dog," a southern Indiana woman said mucous membrane, bone or cartilage in a heartfelt, pathetic letter to Governor Goodrich, begging him not to make a law "that no one is allowed to let their dogs out this summer." Possibly an owner of sheep spread a report that an offensive campaign is to be conducted against dogs this year.

The letter:

"Governor Goodrich: Beg pardon. Could I ask you a question they say, you are going to make a law that no one is allowed to let their dogs out this summer. Would you be so kind to not

conning tower, and hadn't reason poverty in which he had lived. enough to know that they could get through the hatches!" cried Donald blackboard; a thing considered theojoyfully.

"Their reason won't get them down the tube, sir, unless they've got bodies ing solar energy, although he had not as slim as ours," said Clouts. "And succeeded in making his process valuthey feel like-like barrels, sir," he able commercially. added.

Overhead, the scraping continued. sometimes approaching the tube and failing. He had trained himself intelthen receding. Presently there came lectually at the expense of his moral the sound of a commotion. Donald inferred that the sea devils had found control his primal gutter-urchin prothe one that he had injured, and that pensities.

they were satiating their horrible canmibalistic instincts. He heard a body dragged this way and that, and a dreadful rending.

After a while the swishing began again, and a faint tapping of flippers against the walls, as if the creatures were endeavoring to explore the interior of the ship. Occasionally a faint, phosphorescent luminosity was visible at the top of the tube. But the monsters made no attempt to descend into the torpedo room. An idea came to Donald.

"Davies! Listen to me!" he said. "They don't know we're here."

"No, sir. I was thinking-"

"That they have no sense of smell." "Yes, sir."

"And little hearing. At least, that tions.'

"Yes, sir. And of course their sense of sight must be extremely limited. a lasting mark upon the world. And so, roughly, that leaves them only the use of taste and touch, but probably developed far above our own." "We'll beat them, Davies."

### Famous Fencing Masters.

Metternich says, in his Memories, that he was sent to Strasbourg in the summer of 1788, and that he had the same fencing master as Bonaparte, who had just left the school. This fencing master, a M. Justet, called on Metternich when he was passing through Strasbourg, in 1806, and remarked that it was a furny thing that he should have given Metternich fencing lessons shortly after having given some to Napoleon. "I hope," he added, "that my pupils, the emperor of the French and the Austrian ambassador in Paris, will not think of fighting each other !" An old Almanac d'Alsace also witnesses to the fact that there was, in that year, a fencing master of the name of Justet living in Stras-

## Danger of Sleeves and Ties.

bourg.

Although time and again workmen have been warned regarding the danger of loose clothing when working around machinery, it appears that many of them persist in ignoring the danger. As a result 986 workmen were killed in the United States by being drawn into the wheels of machinery or thrown to death when parts of their clothing became caught in rotating members. Loose sleeves and necktles are prolific sources of danger, and should not be tolerated for a single moment by the careful worker,-Scientific American.

## Soy Beans as Food.

Soy beans, introduced into the Unit ed States more than one hundred years ago primarily for use as a forage crop. are in reality one of the most nutritious of the bean family when used as human food, according to specialists of the department of agriculture.
