This instrument was filed for Record on the 12 day of July 1918 at 2 o'clock P. M. and duly recorded in Book ..... Fees..... Seth Amore County Clerk

# PORTALES JOURNAL

VOLUME II

PORTALES, ROOSEVELT COUNTY, NEW MEXICO, FRIDAY, JULY 12, 1918

NUMBER 3

### Judge McGill Appointed

Judge W. R. McGill has been nominated by President Wilson as register of the United States land office at Fort Sumner. Judge McGill is one of the old Democratic wheel horses, has devoted his time and his money to the cause without reward, he is a lawyer of ability and his integrity is above question. He has strong opinions and the courage of his convictions, but he is fair and above board in all his dealings, both political and personal. Judge McGill will administer the affairs of the land office, fairly, impartially and efficiently. He was, probably the first Wilson man in Roosevelt county. It will be remembered that when he, Senator Jones, Hand and others went to Washington for the purpose of attempting some alleviation from the iniquities of the then, proposed constitution, that he came home an enthusiastic supporter of Woodrow Wilson for the presidential nomination. Judge McGill has every qualification necessary for an able and efficient administration of the land office and the Democrats of this neck of the woods should be pleased with his appointment.

### Youngest Red Cross Member

Miss Ida Belle Anderson, daughter of Mr. and Mrs. Bertram R. Anderson, joined the local chapter of the Red Cross Thursday afternoon of this week. The little lady is eight weeks old, owns seven War Savings Stamps, is one hundred per cent American and, probably, the youngest Red Cross member in the United States. The father of the Miss Ida Belle is within the draft age, under the ruling of the war department, would be entitled to a deferred classification, but he did not claim it, for the reason, as he said, that he was able bodied, an American and just as much duty bound to serve his country as he would have been were he single. The little lady is scarcely large enough, as yet, to do much in the way of knitting socks, sweaters, etc., but she is doing her bit, her father is doing his and her mother is one of the most efficient workers in the local chapter. Her grand parents, Mr. and Mrs. E. B. Hawkins, are also among the strongest supporters of the administration in its efforts to win the war, as a matter of fact, Miss Ida Belle is surrounded by patriotic Americans and her early adoption by the Red Cross is a fitting compliment to herself and her parents.

### Shot With a Target

Lee Johnson, son of County Assessor and Mrs. Burl Johnson, was accidentally shot in the left hand while out hunting rabbits Sunday. While the wound is not dangerous it will be an annoyance for some little time. The other boy in the case was the son of Mr. and Mrs. Banks and the gun was a twenty-two calibre rifle.

B. B. Clayton made a trip to Gcheltree county, Texas, this week looking for grass for his cattle. He reports that he found a little and that he will ship to that place within a few days.

## ..Red Cross Rally..

There will be a Red Cross rally at Portales Saturday, July 20. All members and friends of the Red Cross are invited to be present with a basket lunch. Spend the day in discussing plans for furthering the cause. A good program has been arranged. I trust that each auxiliary will have as many representatives as possible present. Come. Bring your friends.

### J. S. Long, County Chairman

American Red Cross

### A Chain Letter

Several copies of a chain letter have been received by people of Portales. While the sending of these chain letters is a violation of the postal regulations, yet this particular letter is a good one and if the suggestions contained in it are followed much annoyance might be averted. The letter follows:

Dear Sir—The unbridled tongues of foolish and disloyal citizens can easily change our land into a field of carnage and riot. The false rumors and malicious stories constantly being circulated discrediting the high officials, the Red Cross, the care and conduct of our troops, the condition of cantonments, etc., is enemy propaganda, intended to create distrust and discontent among our soldiers and our own people and discourage those working for the government.

These stories are being accepted as news and unfortunately are being given the widest circulation by patriotic Americans who do not realize they are aiding our enemies.

The Espionage act provides punishment for those who convey false reports or statements concerning the government. Those who are fighting for us deserve the fullest measure of our loyalty and support, both in work and deed.

I have resolved to close my ears to all such stories and to discourage their circulation. Will you do the same?

Every loyal citizen should assist in stopping these malignant stories, so enlist friends by mailing today ten copies of this letter. Do not break the chain.

Yours truly,

Dr. D. B. Williams will move his office some time this week to the rooms vacated by the insurance office of Connally & Littlejohn, in the rear of the First National bank. When the move is completed his telephone number will be 60.

John Prine and family will leave Saturday for Arizona seeking a place where Mrs. Prine's health will be better.

### Nation's Want Column

The engineer's corps is in need of certain skilled men. Only white men qualified for general military service may be accepted under this call. No man who is needed to fill the July calls already announced should be allowed to volunteer for this service.

The following types of men are desired: auto repair men, axmen, blacksmiths, boatmen, bridge carpenters, cabinet makers, construction foremen, cooks, draftsmen, electricians, caulkers, concrete foremen, concrete workers, gas enginemen, stationery enginemen, farriers, harseshoers, lithographers, machinists, buglers, photographers, plumbers, powdermen, quarrymen, riggers, saddlers, shoemakers, surveyors, tailors, teamsters, telephone operators, timbermeee, topographers. Those who may wish to volunteer for any of these branches of the service should get in their applications not later than the fifteenth of this month.

### "Fighting in France"

R. H. Adams, proprietor of the Cosy theater has perfected arrangements to show the above titled picture here on July 25th. This is a picture of fighting on the French front as it actually took place. This is not the creative genius of some movie star, but pictures taken during the progress of the war; pictures that are guaranteed by the French government as genuine and authentic. If you have any curiosity as to how the fighting on the other side of the pond is carried on, you can satisfy it by seeing this picture. It is realistic, true; it is the war brought home to you. Every American should see it, should feel the thrills our boys feel. Actual battle scenes, bombarding of cities, shells seen exploding, life in the trenches and caring for the wounded. There are six thousand feet of these films, all representing actual happenings, and taken in the trenches by the "Operateurs Mobilises." Cosy theater, July 25th, 16 and 33 cents to see it all.

### Building Completed

Art Jaynes, the contractor, has completed his contract on the new First National bank building and it has been accepted. The contract price, aside from furniture and fixtures, was \$16,270.00, and including those items will reach \$28,000.00. The new home is 50x50 feet and 25 feet high, with an 18 feet ceiling. It is constructed of Acme hydraulic pressed brick, iron spotted, and trimmed with Carthage, Missouri, marble. The foundation is of reinforced concrete, the ceiling is staff plastered and paneled beams. The woodwork what little there is of it, is of quarter, sawed oak. It has a double vault and is practically fire proof. The windows and all openings are equipped with copper strips. There is not another building in the state that will compare with it in point of workmanship and materials used. The furniture and fixtures have been shipped for some time and should be along now most any day and it should not be long before the new building may be occupied. The structure will stand for many years as a monument to the almost perfect construction methods of Mr. Jaynes. His work has been better in every way than, even the specifications called for. He has let no matter of profit to himself stand in the way of any betterments. His work is without a flaw and furnished ocular proof that he is a builder who takes pride in his handiwork. Mr. Jaynes was, also, the contractor on the two new school buildings that were erected a year ago, and those structures were put up in the same thorough and workmanlike manner as was the new bank building, in fact, the character of the work that was done on the school buildings went far toward getting this later job. The officers and directors of the bank express themselves as well pleased with the new home and are loud in the praises of Mr. Jaynes and his work.

### Council Proceedings

Portales, N. M., July 2, 1918. The town council met in regular session and upon roll call the following members were present, Mayor, E. B. Hawkins, Trustees, Jack Wilcox, and Geo. M. Williamson, absent, G. W. Carr and C. J. Whitcomb, the council then taken a recess until Wednesday evening July 3rd, at 7:30 p. m. 1918.

E. B. Hawkins, Mayor. Attest W. H. Braley, Clerk. Portales, N. M., July 3, 1918. The town council met in adjourned session and upon roll call the following members were present, Mayor E. B. Hawkins, trustees, J. T. Wilcox, and Geo. M. Williamson, minutes of previous meeting read and approved.

The following claims was presented and after having been examined and audited was ordered paid, as follows to wit:

Earl McCollum, labor....	\$ 5 85
W. J. Taylor, drayage....	2 00
Continental Oil Co., oils..	218 19
C. M. Dobbs, supplies....	15 70
Quick Service Garage....	6 50
Portales Publishing Co....	27 90
Bob Adams, drayage....	1 00
Bowers and Norris, labor	151 95
C. O. Leach Coal Co. supplies.....	8 50

### Portales Lumber Co., supplies

Portales Lumber Co., supplies.....	9 00
Ed J. Neer, supplies.....	1 80
J. L. Fernandes, blacksmithing and supplies....	37 50
S. Howell, supplies.....	1 75
J. L. Gilliam, drayage....	4 50
M. S. T. & T. Co.....	8 75
Connally & Littlejohn, premium on bonds.....	32 50
Portales Valley News, printing and supplies....	21 98
J. B. Sledge, supplies....	31 15
Lee Carter, Insurance premium.....	33 00
Braley's Garage, welding.	2 50
A. T. & S. F. Ry. Co. for water .....	262 02
Joyce-Pruit Co., supplies.	
Pittsburg Meter Co., meters .....	20 88
W. E. Keeter, salary....	100 00
Tom Livingston, salary..	75 00
Roy Keeter, salary.....	75 00
G. W. Carr, salary.....	25 00
Jess McCormack, salary.	30 00
W. H. Braley, salary....	25 00
Harve Baker, supplies... 4 75	
J. W. Cunningham, Exp. 10 40	
J. W. Cunningham, Exp. 1 95	
Ford and Barton, digging well .....	224 90
J. W. Cunningham freight on engine.....	203 94
Draft Fairbanks-Morse & Co. payment on engine... 2500 00	
H. L. Atkinson, labor....	34 65
Harry Miller, labor.....	14 40
Tom Harris, work on engine bed .....	45 00

Motion was made by Wilcox and seconded by Williamson, that the above claims be paid, those voting "aye" Wilcox, Williamson and Mayor Hawkins, absent and not voting, Whitcomb and Carr, whereupon the mayor declared the motion duly carried and the account approved and ordered that warrant be drawn in payment of same.

Motion was made by Williamson, and seconded by Wilcox, that G. L. Billberry, be appointed pound keeper, those voting "aye" Williamson, Wilcox, and Mayor, E. B. Hawkins, whereupon the mayor declared the motion duly carried, and G. L. Billberry appointed pound keeper, and was instructed make his bond for \$250.00 and qualify as pound keeper, which was done.

There being no further business council adjourned.

E. B. Hawkins, Mayor. Attest W. H. Braley, Clerk.

### Army Promotions

Among the army promotions at Camp Kearney, California, appears the following from Roosevelt county. Corporal Carl L. Reed, of Elida, promoted to sergeant in the same company; Corporal Homer D. Compton, of Portales, advanced to sergeant in the same company. The above indicates that these two boys have made good in actual service and their advancement is purely a reward of merit.

J. B. Sledge and family and Mrs. J. V. McGehee, mother of Mrs. Sledge, will leave the first of the week for an outing at Las Vegas. Mr. Sledge will take fishing tackle but has no advance information as to what the catch is likely to be.

John Tyson and Mart Servis, cattle kings of De Baca county, were investigating rain prospects in the irrigated area around Portales this week.

# The Deep Sea Peril

By VICTOR ROUSSEAU

(Copyright by W. G. Chapman)

## CHAPTER X.—Continued.

He pointed behind the mound, and, following his gaze, Donald and Davies saw something like a sun-dial, made of a large bone whetted to razor fineness, and somewhat resembling a grindstone.

It rested behind the mound, on a flat rock about the size of a large table, and it tapered in thickness from that of a sharp razor, at the curving edge, to that of a jackknife blade at the base. It was perhaps two feet in diameter.

"What's the matter, Clouts?" asked Donald, seeing the expression upon the sailor's face.

"Don't you know what that is, sir?" volunteered Clouts huskily. "It's a sacrificial stone, sir. I saw one of them in the museum at Acatalpec, in British Honduras, once, sir. They said the Mayas used them, and that they learned about them from the priests that had them in Atlantis, the continent what sunk beneath the waves, sir."

"Do you see how it works, Donald?" asked Davies. "These beasts can't lift things. Of course they can't lift under the pressure of miles of sea, and so they have no lifting muscles. And so they push instead. They push their victims down upon the stone."

That was as far as he had explained when Donald touched the edge of the blade with his thumbnail. The flexible bone twanged, sending forth a sound of immense volume. Traveling four times as fast through the water vapor as through the air, it seemed to reverberate under the cloudy roof for an immeasurable time, sending forth resonant echoes. It was totally unlike the sound that they had heard before, and yet equally clear and beautiful.

The response was astonishing. Instantaneously, as it seemed, the interior of the temple was filled with the devil men. Donald had just time to catch Ida to him when they were pushed backward behind the mound, and ringed with phosphorescent fire. The atmosphere seemed to have become filled with tense and resilient rubber.

The hall was crammed with the globular shapes of the monsters, that glided over the well-trodden ooze. And from the midst of them MacBeard stepped out. He touched the thing he wore about his neck, and a musical tinkle, which followed, produced an instant cessation of all movement. The ring of fire had slightly widened; the prisoners were able to move within a limited space.

"We know each other, I think," said MacBeard, with suave irony.

"What do you propose?" inquired Donald.

"I don't quite know," answered the professor thoughtfully. "You see, I never took you into consideration at all. You are, so to say, the fly on the wheel. As a part of the human race, you should meet the fate in store for the race."

"You make me sick," said Donald.

MacBeard looked rather angry.

"You can have your life for the present," he returned, "but not as a permanent gift. I shall not single you out to bestow on you the boon of continuing that constant adjustment to external forces which Herbert Spencer has named 'life.' In other words, you can go to the devil until I am ready to take you in hand again, on one condition."

"Name it, you blackguard," said Donald.

"I want the two missing pages of Masterman's manuscript."

"Take us all back to the submarine out of this hell's kitchen of yours, then show us the way to the top of the island, and you shall have all the rest of the papers."

MacBeard eyed Donald with amusement. "I offered you your life, not the others," he answered. "One man returning with a story like Masterman's would be called a lunatic; two would awaken doubt; three would be fatal. And then his eyes fell upon Ida.

She was standing at Donald's side, as brave and defiant as he, and their eyes met. And at that instant something happened to the professor that upset all his calculations, something at which he would have scoffed as entirely incredible.

He fell in love for the first time in his life.

Science has never succeeded in penetrating the mystery of love. It is not known why one man falls in love at fifty and another at nineteen; one at sight and another after five years of suitcases and supper parties with the object of his adoration. MacBeard did

not know why it had happened to him, but he knew that it had happened. And with it there came the universal instinct to display his superiority to the man at Ida's side, in whom he intuitively sensed his rival.

"You've played your cards pretty badly," he sneered. "You had the secret in your hands, and you surrendered it to me. You think a little more highly of old Masterman now, don't you?"

"You blackguard!" cried Donald again, clenching his fists.

MacBeard stepped out of range hastily. He disliked violence, partly as an attempted violation of the principle of the conservation of energy, but principally because he was a coward.

"It is all our lives for the missing part of the manuscript, or none," said Donald.

MacBeard rubbed his hands together. In that infernal light he seemed hardly less monstrous than the creatures about him.

"You will think differently in a few moments," he answered. And taking the implement that he had used before, into his hands, he struck another note.

Instantly the resilient wall closed in about them, and, with the same slow, steady pressure, they were urged forward, Clouts in the lead. The note sounded again; they stopped. Clouts was now immediately in front of the sacrificial knife of bone. And, very slowly, he began to lean forward.

At any other time he would have presented an appearance distinctly ludicrous. He seemed to be waddling slowly, and with great dignity, toward the razor-edged weapon. He stood stock still, planted his legs hard in the ooze, and began to bend forward, as if he were about to undertake some callisthenic exercise.

Donald understood what was happening. The monsters were urging Clouts' body downward in such a way that the edge of the bone knife would lie immediately against his breast. Then, with an increased pressure, Clouts would be forced down until the keen bone sliced his body in twain.

He plunged his hand into the mound and drew out a bone. Whirling it about his head, he struck out right and left with it. He heard the skulls of the monsters crack under the impact.

He clove a path to Clouts' side. He reached him just as the edge of the knife lay across Clouts' breast. As he beat back the sea devils, Clouts straightened himself with a jerk and looked up mournfully.

"It ain't no use, sir," he said, and plunging his hand into his breast, he drew out his mouth organ.

The relief was only momentarily achieved. The monsters came crowding back. They pinioned Donald's arms to his sides by pressure. In another instant Clouts would have paid the debt he never owed MacBeard.

It was then the ruling passion asserted itself in Clouts. Perhaps it was because he thought his chance would never come again, or it might have been mere habit. Setting his hand to his lips, he struck out the reedy notes of "Sally in Our Alley."

Donald saw the phosphorescence run from them along the cave like liquid fire. He heard MacBeard's deep note, saw the fire quiver and vanish in the darkness outside the cave. Meanwhile Sam Clouts played on.

Donald seized Davies' arm in wild excitement.

"Don't you see?" he cried. "It's music, not the sounds, because they can't hear those, but only the vibrations. That's their language. And MacBeard learned somewhere that they wouldn't hurt him if he brought—do you know what he brought? Do you know what it was that he struck?"

"A tuning fork!" shouted Davies.

With their arms linked, they ran into the throng of scurrying monsters, Ida between Donald and Davies, and Clouts in the van, blowing his mouth organ like a madman. The monsters hurried before them in evident panic. The contact with the slippery bodies no longer produced resilience. The elusive phosphorescent gleams shot here and there like will-o'-the-wisps. MacBeard was nowhere to be seen.

At the cave's entrance Sam Clouts paused and turned to Donald.

"I wish I'd brought my bass concertina aboard, sir," he said.

"Never mind; you're doing very well indeed, Clouts," answered Donald. "Play, man! Play!"

The lights, which had remained stationary during the moment's interlude, grew dimmer again as Clouts struck out with his lips the tune of "Cock of the North."

"The submarine!" gasped Donald, pointing before him as he ran.

But, even as he heard it, it began to grow dim. Not more than a hundred paces away, the vessel sank into obscurity as they raced toward it. It seemed gradually to be blotted out before their eyes.

And slowly, almost imperceptibly, the cloudy curtain began to descend and to dissolve.

Donald gasped for air. He heard Clouts coughing, and saw the middy stagger as he ran. Ida fell back into his arms. The submarine was still fifty paces away, and she was nothing more than a cloudy image upon the night.

On they ran, groping through the complete blackness. The air was like wine jelly. Donald had almost ceased to breathe. He ran with his lungs full of a little reservoir of air, which he exhaled slowly.

He could see neither Clouts nor Davies, but he believed that they were struggling toward the submarine.

And he found it, and them, almost by a miracle. He had the good fortune to blunder into them as they tugged at the outer door of the airlock.

Somehow they opened it. They got Ida inside and followed. The outer door was closed. Clouts, reeling forward, opened the inner one, and the stale, worn-out air within the conning tower seemed like ozone.

## CHAPTER XI.

### The Interloper.

Ida went into Donald's cabin. Donald himself arranged to sleep in the messroom. Davies had his cabin, and Clouts the first watch. Presently Donald found himself alone.

He got into his hammock, but he could not grapple with the situation. It seemed so unreal that he half expected to awake and find that he had been delirious, and that he was just coming to after rescuing Ida from the wreck of the Beotia. He felt more and more nervous. He got up and sat down at the table, staring into the darkness in front of him.

Suddenly he leaped to his feet with a choked cry. Across the messroom,

MacBeard Stepped Out.

at a distance of about eight paces, he saw, mistily outlined, the face and body of the woman whom he had imagined that he saw in the house in Baltimore—and again outside!

He stared at her incredulously. He saw her so faintly that once again he believed himself the victim of a hallucination. The faintest illumination played about her, showing only the ethereal spirit that seemed incarnate in a vapory cloud.

But this was no monster such as those devils of the sea. It was the most beautiful woman whom Donald had ever seen or imagined.

He stumbled toward her. He put out his hand. As he did so, the figure moved, and he heard unmistakably the faintest slide of feet upon the floor.

He tried to catch her, to satisfy himself that he was not dreaming, but she eluded him with ease, seeming to float before his eyes, now here, now there.

Suddenly the door opened. Donald saw Ida standing in the doorway, by the light of the candle within her cabin.

"Donald!" she cried. "I thought—I thought I saw a woman pass my door."

"Ida!"

The denial died on his lips. He was not sure. He glanced hastily about him, and, at the far end, he thought he saw the dim outlines of his visitor again.

Ida peered through the darkness. She saw nothing, but she interpreted Donald's movements correctly.

"Donald! Who is she? How did she come here?"

"There is nobody, Ida." He heard the desperation in his voice; and at that instant a yearning toward the ethereal loveliness of that uncanny wraith filled his whole heart. He took a match from his box and struck it.

The spurt of flame illuminated the messroom. It was entirely empty.

"You see, dear," said Donald, turning to Ida with an embarrassed laugh. "You have been dreaming, dear."

"Yes, I suppose I have been dreaming," she answered. But she spoke without conviction. And suddenly she was crying upon his shoulder.

"Donald, you were disappointed when I came in!" she sobbed.

"Dear, you are hysterical. In the morning it will be all right."

"You don't love me any more, Donald."

(TO BE CONTINUED.)

## WRITES HIMSELF TO DEATH

Anagram Writing From Shakespeare's Works Takes Vitality of Noted British Author.

The death of Capt. Basil Willett Charles Hood, the British author, was brought about by his excessive attempts at anagram writing from Shakespeare's works, according to testimony at the Inquest in London. He was fifty-three years old and a former officer of the Prince of Wales' West Yorkshire regiment.

The coroner, according to the London Times, said it was evident what caused death. Captain Hood was engaged in a laborious undertaking, constructing writing out of the cryptograms which he alleged that he found in Shakespeare.

"There are reams of writing here," said the coroner. "Every single letter is written most carefully, and it must take months to file all this stuff about secret writing and various messages which he purported to have found concealed by means of cryptograms in Hamlet and other plays. It seems to me that he has been working very late at night and all day at this rubbish—it cannot be called anything else—and has been exhausting himself and wearing out his nervous system by going without a proper amount of nourishment because he thought his brain more active on an empty stomach. All the time he was using his strength in this way he was exhausting his strength."

### Efficiency of Sammy's Kit.

It may sound strange to American ears, accustomed as they are to denunciations of our national unreadiness, says Leslie's Magazine, to hear that the American soldier's equipment is conceded by military authorities to be the finest of any army in the world.

Thus it is that Sammy will go to France (or to Russia or Mesopotamia or wherever the fates decree) carrying on his person the most complete, most adaptable, lightest, handiest and most thoroughly efficient living, working and fighting outfit of any soldier on earth, not excepting either our enemies or our allies. The personal equipment of the American infantryman (and we take the infantryman because he is both the backbone of the army and the bulk of it) represents American business efficiency and applied common sense in its highest practical manifestation. Each detail of every tiniest article, even the most insignificant strap or lace, is the result of scientific study and experiment. Some things about our army may not be above friendly criticism, but when it comes to the design of the individual soldier's outfit the United States army has no peer.

### Scanty Fare.

William Snyder, head keeper at the Central park menagerie, is willing to answer any question regarding animals at any hour of the day or night. That readiness frequently gives him an insight into domestic tragedies affecting the life or liberty of birds, dogs, cats, monkeys and even turtles kept as pets in New York homes, says the New York Herald.

Mr. Snyder was called to the telephone the other afternoon and questioned by an agitated woman who sought to know the proper food for a turtle. Mr. Snyder explained that it depended upon the type of turtle, and upon being informed that it was a little one, 2 inches in diameter, suggested that it be fed one lettuce leaf a week.

"Oh, pshaw!" exclaimed the woman, "and I've just sent the maid over to get it a pound of chopped meat."

### Theory That Doesn't Work.

A great social truth, says the Philadelphia Ledger, was enunciated by the janitor of a New York apartment house, who had lost his job, he explained by his wife's jealousy of the elevator girls he had employed and was being sued by her for nonsupport. "Grls are girls," said this shrewd observer, "and you have to pay more attention to them than you do to men." The theory that women who go into business should be treated "just like men" is held by many, especially by the women themselves. It is an excellent theory, but it does not always work.

### Daily Thought.

Victories that are easy are cheap. Those only are worth having which come as the result of hard fighting.—Beecher.

A motor-driven grinder has been invented for sharpening button dies used for cutting screw threads.

## Her Face Beams

with the "Wash day smile," instead of the Wash Day Grouch, in sheer joy and delight at the dazzling, snowy white purity of her white goods.

## Red Cross Ball Blue

will chase "wash-day-blues"—Succeed where others fail, and bring the smile of triumph to every housewife who really cares for pure, white, fresh clothes.

5 CENTS. AT ALL GROCERS.

### China's Big Canal.

The imperial canal of China has a length of 2,100 miles, which exceeds that of any other in the world.

Grove's Tasteless chill Tonic destroys the malarial germs which are transmitted to the blood by the Malaria Mosquito. Price 60c.

## MANY INDIAN PEACE EMBLEMS

Wisconsin Braves Still Retain Numerous Medals Given to Them by Various Governments.

Wisconsin Indians still retain many peace medals that were given to them or their ancestors by various governments, and some of the medals date back to 1720, according to an article on Wisconsin Indian medals in The Wisconsin Archeologist.

The earliest medals owned by Indian families today include one of brass issued at the time of George I, four of silver bearing the bust of George III, an old Spanish medal and four American medals.

A Washington medal is in the possession of an aged Ottawa Indian on the Menomonee reservation near Shawano. Philip Nacotee, a Menomonee Indian of the South Branch settlement, has a Lincoln medal. A silver medal with the bust of President Polk, dated 1845, was owned by the Menomonee chief, Shunlen.

Arthur Gerth, Milwaukee collector, once owned a silver medal issued by President Jefferson. An Andrew Johnson medal is in the collection of A. T. Newman of Bloomer. Dr. Alphonse Gerend is the owner of a silver George III medal, formerly the property of the Wisconsin chief, Waumegesako.

### Bear Took Possession of a Car.

Breaking from his crate in an express car, a big black bear, being shipped from Shreveport, La., to Meridian, Miss., took possession of the car and during the run consumed three crates of chickens and three five-gallon buckets of ice cream.

### The Call to Worship.

To inform women of the neighborhood of the hour for worship is one of the objects of a vigilance committee in certain Lutheran mission stations in India, a land where clocks are few.

Better Off if you drink

**INSTANT POSTUM**

instead of coffee.

Postum is nutritious, healthful, economical, delicious and American.

TRY IT FOR EVERY GOOD REASON

## DAIRY BARN CAN BE KEPT CLEAN

Sanitation Depends Upon Proper Construction Methods.

### CONCRETE BEST FOR FLOORS

Plans for Structure Should Be Made With a View to Providing Plenty of Sunlight and Air for the Stock.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose three-cent stamp for reply.

By WILLIAM A. RADFORD.

The biggest criticism which may be launched against the building of the average farmstead is that it was done in a too makeshift manner. The temporary nature of many of our farm buildings is merely a sign of our agriculture. We are not yet settled to farming permanently—grandson following son and son following father on the same ancestral acres. We are mostly exploiters as yet, soil-miners, or perhaps developers would sound less harsh. There has always been a place "out west" to which we could move when the old place wore out. Now the day when we could move onto pastures new is over and a new area is no longer available. It is time to begin to build our farmsteads to stay. They should be planned to last and built for

central feed alley. Since there is more work at feeding the cows than in cleaning out the manure, it seems that the plan with the central feed alley and the cows facing it should be preferred as saving somewhat more labor. Then the same arrangement lets the light fall on the cow's hind-parts and the milker can see whether or not the udder is clean. Likewise, it is easier to see when cleaning the stalls, and the drainage is better when running from the center to the outside. Also there is less of a mixup in letting the cows in or out of their stalls. On the whole it looks as if most of the arguments favor standing the cows in two rows facing each other.

The dairy barn floor must be made of something that can be thoroughly and easily cleaned. Many substances have been tried, but concrete seems to be by far the most enduring in popularity. The biggest kick lodged against it is that it is so cold, but the use of plenty of bedding or of wooden platforms largely obviates the objection. Sunlight and Air Essential.

Plenty of sunlight and air are absolutely essential. No farmer will build a dairy barn until he is sure that he has the lighting and ventilation problems solved in the best way for his particular location and style of barn.

The problem of equipment has been absolutely solved for us by the manufacturer, who should be consulted for ideas and plans as soon as one decides to build. Valuable aid may be secured from these manufacturing specialists and it is given cheerfully.

The old wooden fixtures have been replaced by sanitary, enduring, attractive steel tubing, and the simplicity and effectiveness of the numerous patents on stanchions, feed and litter carriers, and every manner of equipment beggar description.

#### Good Type of Basement Barn.

The accompanying design is an exceptionally good example of a high-grade basement barn, planned and built in the approved style and equipped with all sanitary and labor-saving dairy stable conveniences. It was built

## POULTRY FACTS

### SUITABLE SHELTER FOR HENS

House of Appropriate Size, With Nests, Roosts and Feeding Appliances Is Needed.

(Prepared by the United States Department of Agriculture.)

Every flock of hens needs a suitable shelter—a coop or house of appropriate size, furnished with roosts, nests and appliances for feeding and watering. A flock that is to be used for breeding should also have a yard where the birds can exercise on the ground and in the open air. Hens kept only for eggs for the table may be confined to their house continuously for as long a time as ordinary hens are profitable layers. It is better to give them an outdoor run, but when space is limited it can be dispensed with.

Small flocks need a little more floor space per bird than large flocks, and birds confined constantly to the house should have a little more floor space per bird than others. A coop for six hens should allow five or six square feet of floor space for each; a house for twenty to thirty hens, three or four square feet to each. Yards are usually planned to give not less than 20 square feet of land per hen.

Small coops which can be cleaned without entering them may be built only three or four feet high. This height is most comfortable for the hens. Coops for flocks of more than six or eight birds must be of such height that a grown person can move about in them. In a low coop the same opening will answer for door and window. In high coops with larger wall

A Boy's Backyard Poultry House, Built by Himself.

surfaces a full-sized door and one or more windows are needed.

Roosts are commonly made of small scantling or narrow strips of board, about eight or ten inches length of roost being allowed to each fowl. In small, low coops the roosts should be placed about twelve to fifteen inches from the floor. In larger coops wide boards, to catch the droppings of the birds, are generally used under the roosts, the droppings board being from twenty to thirty inches from the floor and the roost a few inches above the droppings board.

The simplest form of nest is a box a little over a foot square and not less than five or six inches deep. When space is limited the nests should be attached to the wall, the bottom of the nest being a foot or more from the floor. For flocks of five or six hens two nests are needed; for larger flocks one nest for each four or five hens.

The feeding utensils required are: Hoppers for dry mash, trough for table scraps or moist mash, small hoppers for shell and grit, and drinking pans or fountains. For flocks containing not more than 30 birds one of each kind of utensil, if of appropriate size, is enough.

### HOW TO BREAK BROODY FOWL

Confine Hen in Small Coop With Slat Bottom and Give Her Plenty of Water to Drink.

When hens become broody and it is not desired to allow them to hatch chickens, they should be "broken up" as quickly as possible. The sooner this is done the sooner they will resume laying. To break a hen of broodiness she should be confined to a small coop, preferably with a slat bottom. Give her plenty of water to drink; she may be fed or not, as desired. Not much difference will be found in the time required to break her of broodiness whether she is fed or made to fast. Usually three to six days of confinement will do the work, but some hens require ten to twelve days. The broody hen will be recognized by her inclination to stay on the nest at night, the ruffling of her feathers and her desire to pick anyone who approaches her, and by the clucking noise she makes.

#### Habits of Turkeys.

Young turkeys usually remain with the mother hen until about October or November, when the males ordinarily separate from the females and range by themselves.

Knew the Answer.  
"Say, pa!" "Yes, my son?"  
"Are you too busy readin' to explain somethin' to me?"  
"No, my son. Your father is never too busy to give his children the benefit of his information."  
"Well, in this story it says 'the ship weighed anchor.' Why does a ship have to weigh its anchor before it starts out?"  
"Ah, yes. To be sure. You've always noticed, that in your reading haven't you? Yes. Well, this is the reason. You see, when a ship stays a long time in a harbor it accumulates a lot of—er—binnacles. And these binnacles cling to the anchor in such numbers that they increase its weight. So they have to weigh it. Do you see?"

## A CHILD DOESN'T LAUGH AND PLAY IF CONSTIPATED

LOOK, MOTHER! IS TONGUE COATED, BREATH FEVERISH AND STOMACH SOUR?

'CALIFORNIA SYRUP OF FIGS' CAN'T HARM TENDER STOMACH, LIVER, BOWELS.

A laxative today saves a sick child tomorrow. Children simply will not take the time from play to empty their bowels, which become clogged up with waste, liver gets sluggish, stomach sour.

Look at the tongue, mother! If coated, or your child is listless, cross, feverish, breath bad, restless, doesn't eat heartily, full of cold or has sore throat or any other children's ailment, give a teaspoonful of "California Syrup of Figs," then don't worry, because it is perfectly harmless, and in a few hours all this constipation poison, sour bile and fermenting waste will gently move out of the bowels, and you have a well, playful child again. A thorough "inside cleansing" is oftentimes all that is necessary. It should be the first treatment given in any sickness.

Beware of counterfeit fig syrups. Ask your druggist for a bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Look carefully and see that it is made by the "California Fig Syrup Company."—Adv.

Felt the End Near.  
Joyride (consulting his watch)—The car went over a mile that last minute. Timid Passenger—And I went over my whole life.

## THE MAKING OF A FAMOUS MEDICINE

How Lydia E. Pinkham's Vegetable Compound Is Prepared For Woman's Use.

A visit to the laboratory where this successful remedy is made impresses even the casual looker-on with the reliability, accuracy, skill and cleanliness which attends the making of this great medicine for woman's ills.

Over 350,000 pounds of various herbs are used annually and all have to be gathered at the season of the year when their natural juices and medicinal substances are at their best.

The most successful solvents are used to extract the medicinal properties from these herbs.

Every utensil and tank that comes in contact with the medicine is sterilized and as a final precaution in cleanliness the medicine is pasteurized and sealed in sterile bottles.

It is the wonderful combination of roots and herbs, together with the skill and care used in its preparation which has made this famous medicine so successful in the treatment of female ills.

The letters from women who have been restored to health by the use of Lydia E. Pinkham's Vegetable Compound which we are continually publishing attest to its virtue.

### DAISY FLY KILLER

placed anywhere, attracts and kills all flies. Wash, clean, wash, clean, convenient, cheap. Lasts all season. Made of metal, can't spill or tip over; will not soil or injure anything. Guaranteed effective. Sold by dealers, or 8 cents by express, prepaid, for \$1.00.

HAROLD BROWN, 150 DE SABLE AVE., BROOKLYN, N. Y.

### A Discouraging Precedent.

There is nothing original about Marshal Von Hindenburg's boast that he would drive the English into the sea. In the Peninsular War Soult made the same remark about the British under Wellington that Von Hindenburg has now uttered about the British under Haig. Wellington did retire perilously near to the sea, just as Haig has. But Soult looked at the position and changed his mind. Is Von Hindenburg, in apparently still planning to give battle, going to show less sense than his renowned French predecessor?—Christian Science Monitor.

### In Style.

Hobbs—What do you do with your old clothes?

Dobbs—Wear them.

### Ford Owners Attention!

W. N. U., Oklahoma City, No. 25-1918.

Floor Plan of Basement Barn.

permanence. There is little sense in building temporary, tumble-down places which have to be done over in a few seasons.

A dairy barn is usually a rather expensive structure—too expensive to permit of making mistakes in planning or equipping. A dairy barn should first of all be a clean and sanitary place, because here is produced food of first importance. And, strange as it may seem to some people who are familiar only with the usual type of unhandy barn reeking with dirt, dairy barns can be planned in such a way and furnished with such modern equipment as to make them absolutely sanitary and capable of being thoroughly cleaned at no great cost for labor.

#### Best Interior Arrangement.

As soon as you begin to talk about how a man should arrange the inside of his barn you step on his toes. Almost every farmer has his own particular ideas as to the ideal inside arrangement of his barn. But in dairy barns there are two possible ways to dispose of the cows. It is generally recognized that having two rows of them is more economical of both space and labor. The cows may be placed facing the walls, or they may be stood with rows facing each other across the

in Winona county, Minn., where the land is rolling and there are a good many side hills, yet you will notice that the farmer and his building advisers had enough gumption to keep away from the old side hill bank barn style. They set this barn out in the open where the basement could have full-size windows on all four sides. They built a bridge to the haymow floor out of re-enforced concrete. The embankment is back ten feet from the basement wall, and this distance is spanned by a re-enforced concrete slab.

This is the way to build a bridge and a bank barn without a bank. The old way makes a damp, dark basement that is more like a cellar than a sanitary dairy stable.

This barn stables 38 cows in stalls. There are also two stock pens, a large feed-mixing room, a feed room adjacent to the silo, and in the other end of the stable a partitioned-off wash-room. The foundation wall is constructed of vitrified hollow tile, eight feet high from the concrete footing to the floor joists. Moisture will not penetrate through this kind of a wall. The cells of the tile interpose several dead-air spaces to break up the wall and prevent the transmission of moisture or cold.

--- This paper has enlisted with the government in the cause of America for the period of the war ---

**"BY THEIR FRUIT," ETC.**

That the propoganda of one, Teddy Roosevelt, is bearing fruit is evidenced by the case of Roy Boddy, an Elida boy, at present engaged in the railway mail service, of the United States. Roy Boddy is an enthusiastic supporter of "terrible Ted," believes in him as he believes in his father and his mother. He, evidently, knows or thinks he knows, that his idol was the power behind the throne that inspired the congressional investigation of the work of Secretary Baker. He knows that Mr. Roosevelt is making use of the Kansas City Star for the purpose of discrediting the Wilson administration in so far as lies in his ability so to do. This young man thinks that if it is all right for Mr. Roosevelt to lambast the administration, to engage in criticism that is neither honest nor truthful, that he, himself ought not to be deprived of the same privilege and, believing this, he has come to grief. In the lobby of the Antlers hotel at Clovis, this young man was engaged in a heated argument against the super-human abilities of Roosevelt as against the alleged weaknesses of President Wilson. In conducting his argument in favor of Roosevelt he quoted many of the things credited as Roosevelt utterances and, mayhap, enlarged upon some of them. The natural and logical thing followed. He was arrested and taken before Judge James A. Hall, United States commissioner at this place, and put under a bond in the sum of one thousand dollars for his appearance at a preliminary hearing. The Journal has no fault to find with the officers, it believes that they did their duty under the law, and they should have the support of all right thinking people, but it does believe that this young man's conduct was inspired by the utterances of Roosevelt; that it was the direct fruit of his propoganda; that it furnishes the proof of the contention of the Journal that Mr. Roosevelt is a dangerous man; that he should be mobilized in some detention camp and there interned for the duration of the war. "By Their Fruits Ye Shall Know Them," is just as true today as it was the day it was written. This young man's folly was the direct outcome and the legitimate fruit of his Roosevelt faith and it is not far fetched to believe that he is only one of many who have been accused of disloyalty for the same reason. Mr. Roosevelt does not set a good example before the young men of

the nation; his utterances and publications are neither wholesome nor truthful and, followed to their natural conclusion cannot but infect his followers with disloyalty, if not worse. This paper believes in the espionage act, believes that it should be enforced to the letter equally against principal, accomplice and instigator. If the young man is proven guilty he cannot and should not be heard to blame Roosevelt for his downfall, however truthful such a statement might be, for he followed his footsteps blindly, unthinking and unafraid, and must take the punishment his conviction would merit, yet it does seem that Mr. Roosevelt should not escape with a whole hide, while his dupe suffers the penalty.

**BURSUM'S JOKE**

Holm O. Bursum, perennial Republican candidate for the governorship of the state of New Mexico, has come forward with a proposition that, were it not for the fact that it is impossible of accomplishment, would be picking for him. He proposes that there be no county or state elections held this fall and that all incumbents hold for the ensuing two years. This would mean only another two year's lay off for Bursum in his gubernatorial aspirations, and he might expect to come back in that time strong with the bunch that controls Republican politics in the state, whereas, if some dark horse was nominated and elected, it would be but natural to give him a second rub at the luckystone, thus compelling Mr. Bursum to wait four instead of two years. Another thing that might have had some weight in arriving at this conclusion might be the fact that the Democrats are gradually but surely driving the old line Republicans out of the state house and many of them are being relegated to the scrap heap. If this proposition was made in earnest, it is not only silly in itself, but exposes the shallowness of the vaunted patriotism of him who fathered it.

**Municipal Bond Sale**

The town of Portales, Roosevelt county, New Mexico, will on July 13, 1918, at the hour of two o'clock in the afternoon, at the office of the town clerk in said town of Portales, sell to the highest bidder an issue of bonds amounting to twenty-five thousand dollars, interest bearing at six per cent per annum, maturing thirty years from date of July 1st, 1918, the proceeds of which will be used in the installation of needed repair of water works system of said town.

E. B. Hawkins, Mayor,  
W. H. Braley, Town Clerk.

BY THE CUB REPORTER

**FOR RENT**—Two good rooms, apply at this office.

Mit Reynolds, and old timer in Portales, arrived Monday from Texas.

Mayor E. B. Hawkins left Monday morning on a hunt for grass.

W. E. Keeter left this week for Texas points looking for grass for his cattle.

Coe Howard this week shipped two acrs of cattle to the market at Kansas City.

**FOR SALE**—Two Ford automobiles in good condition, see Oldham and Honea.

Dr. L. S. Skelton, of Muskegee, Oklahoma, was visiting Dr. Bailey and wife this week.

Mrs. Walter Crow left this week for a visit to her old home at Coleman, Texas.

Mr. and Mrs. C. W. White, of Oklahoma, are the guests of Mr. and Mrs. Joe Howard.

Mrs. Adam Troutt returned this week from a visit with relatives at Little Rock, Arkansas.

**FOR SALE**—Winter cabbage plants, 30 cents per hundred, See or write S. S. Six, Portales.

Miss Lora Parton, of Richland, Texas, arrived Wednesday for Abilene, Texas, to attend a business college.

Wagon and hay rack metal wheeled, \$18:00 to \$20:00; three burrows \$5.00 each. Herdlaw Jones, 8 miles east.

"Big" Johnson left this week for Garden City, Kansas, where he has some four or five hundred head of cattle on pasture.

"Dad" Adams, the baker, left Monday for a tour of Texas looking for a location. It's dollars to doughnuts that he comes back to Portales.

Joel Fuller, for the past year employed in one of the offices in the state house at Austin, Texas, arrived Saturday for a visit with his father.

Mrs. George W. Carr returned this week from Fort Sumner. She was accompanied by her niece, Miss Virgie Moss, of Fort Worth, Texas.

The preliminary hearing of C. E. Wantland, charged with the shooting of Trotter has been postponed awaiting the outcome of Trotter's condition.

Judge George L. Reese and Judge James A. Hall were in Roswell Wednesday and Thursday of this week transacting business with the court.

Mrs. E. B. Neale entertained a number of friends at her home Monday night. Mrs. Neale is a royal entertainer and her guests enjoyed the occasion immensely.

W. A. Craig, two daughters and two grandchildren arrived from Greer county, Oklahoma, Thursday morning for a visit with Monroe Honea and family. They are old friends.

C. W. Ison and G. A. Dickbreeder are remodeling the rooms in the rear of the First National bank. These rooms, when completed, will be occupied by Dr. D. B. Williams.

Our esteemed contemporary says that J. R. Webb is in El Paso, Douglas and other Arizona points this week. He sure had to scatter some to be at all these places at one and the same time.

Mrs. C. B. Thompson entertained delightfully Wednesday and Friday nights at her home on Webber street near Santa Fe avenue in honor of her sister, Miss Irene Molinari, who has just returned from California to spend a few weeks vacation in Santa Fe, which she visited last summer and at Christmas. There was dancing, followed by refreshments. — Santa Fe New Mexican.

Deputy Sheriff Milton Kornegay was up from Elida Wednesday having in charge J. H. Fleming, an insane person whom he took to Roswell Thursday to appear before the court. It is supposed that the continued dry weather and loss of stock has affected his mind.

Motorists say that the road between here and Elida varies in regard to smoothness. That going to Elida it is rather rough and that twenty miles per hour is a good average, but that coming back, there are no rough places and that a speed of fifty to sixty miles per hour is not uncommon.

There is only one trouble with the bread made at Mrs. Kohl's bakery. It is so good that many people will not believe that it is war bread, but it is and made exactly according to the specifications laid down by the food administration authorities.

Two cases were dismissed in the justice court this week. One against M. C. Hawes, for the alleged theft of a calf, and the other against Ed Hudson, charged with obtaining money under false pretenses. Both cases were dismissed by the state.

Carl Graf, now one of the high moguls in the Standard oil syndicate, and lately an ordinary nester on a five hundred acre tract of land in Texas, arrived Saturday for a short business stay. Carl says that it seems good to get back to Portales.

Seth Tidwell, formerly of this place, but now operating a goat ranch near Avis, this state, was in the city the first of the week, arranging to move his family to their new home.

**FOR SALE**—One five horse Fairbanks-Morse engine and five kw generator, both having been used about thirty days, guaranteed as good as new. R. H. Adams.

# ECONOMY

The world, today, faces a problem in economy, in saving, in conserving, in putting our resources and our energy into things that are worth while. Avoid ALL extravagance and unnecessary waste. Put your surplus money in the bank, get away from its jingle, the temptation to spend will not be near so great, and you'll have it when the pinch comes.

# SATINS AND LACES NOW

Materials Not Included in Goods Needed by Government.

FURS ARE IN GREAT VARIETY

Plain Clothes Are Obviating Fabrics Demanded by the War Department—Considered by Loyal Women.

The shortest road to economy just now is to use the materials not demanded by the war department, no matter how expensive the substitutes may be. At least so says the government. That ordinary aid to vanity, common starch, notes a correspondent, may be a luxury the next thing we know, for it is used extensively in the manufacture of explosives. However, so far nothing has been said about the use or manufacture of satin, lace and fur, although it does appear extravagant to wear them at this time.

Whatever the modes may express, femininity is first and foremost, and the materials at hand fit in well indeed with the atmosphere of the present moment. Very plain clothes are in order, too, it is noted, but for strictly business purposes, and when that very busy person, the modern young woman, dons her uniform or working clothes, it is to present herself in as nearly the opposite type of costume as opportunity affords.

Satin is a fabric which is always fascinating. Once in a great while it becomes a little too prevalent and has to be dropped for a time, only to reappear more triumphantly than ever. Time can not stale or dim its luster, and for the present it is as popular as ever. In the lighter colors it is far too brilliant for use in most daytime clothes, but at night these shades have their turn.

Combined with navy and darker shades beige and gray satin are excellently suitable for wraps and trotteur dresses, but so much has been written and seen of this costume that further mention is unnecessary. Satin for capes and long all-enveloping wraps has grown in favor for the last few weeks and it must be classified as truly smart. A good looking cape of tan satin had a reverse side of very dark blue and was bordered all the way round the bottom with deep fringe of both blue and tan. The collar rolling over below the shoulder line was of blue, and the whole cape was reversible, showing the opposite colors.

Long black satin coats have deep bands of quilted patterns, roses being a favorite pattern, and appliqued figures in gold were lavishly used on the deep collar of another model. Fiber satin is extensively used for capes and coats for motoring and for semisport or utility wear.

After the use of satins as an economy is exhausted and a bit of real warmth is necessary come furs, and these are so charmingly set forth that satin or thinner material, such as georgette or voile, worn with furs, will probably take the place of the smart blue and beige serge frocks which were last season's fads.

"SCENT CAPS" FOR THE HAIR

Locks May Be Perfumed by Wearing the Little Head Covering One Night a Week.

Any woman may add a dainty and completing touch to the toilet by perfuming the hair and may accomplish it with little or no expense. But of two things she must be very sure, and they are that the perfume is very delicate and that conflicting scents are never used.

If one prefers to use a liquid, good results are obtained by spraying the hair, after it has been shampooed and

BAG-PILLOW A NEW NOVELTY

Efficiency and Comfort Kit and Softness of Real Pillow Combined in the Outfit.

All the efficiency of the comfort kit and the softness of a real pillow are combined in a pretty novelty. Just why it was not thought of long ago is a mystery, but it gives the added charm of novelty to the lucky possessor.

Out a strip of material just double the length you wish the pillow to be and fit it up with three or four pockets, the largest one half the length of the strip. This is to contain the pillow. In the others one may stock the various articles that are necessary on a hike or at the seashore. Long handles of the cloth make it convenient to carry.

Of course, the choice of material rests with you. Cretonne and plain material, painted oilcloth lined with waterproof material, denim or crash embroidered in bright-colored wool in some conventional design, are just a

while it is loosely hanging, with an atomizer.

Or the perfume may be rubbed into the palms of the hand or upon the bristles of the hairbrush and rubbed or brushed immediately over the head. But the best result is achieved by wearing "scent caps," for they cover the hair and also protect it from unwelcome snarls. All that is needed is a circular cloth large enough to keep the hair free and allow circulation of air. It may be fitted to the head by an elastic, but not too tight a one, of the circulation will be stopped. Silk and silkoline are the best materials, for they are so sheer. An interlining is necessary, and this may be of the thinnest cashmere, for that holds the odor well. Between the inner and outer caps sprinkle any kind of sachet you may desire. Orris root is sweet and lasting, but never cloying. Thoroughly brush and comb the hair at night and braid it loosely. Then don the light little cap one night a week. The hair will acquire a delicate scent.

Tiny sachet pads sewed into one's hats take little time and trouble to arrange, and they help the hair to retain the sweetness which exposure to the air might otherwise destroy.

CHECK SILK GINGHAM FROCK

A chic frock for summer mornings is this one of blue and white checked silk gingham, with its bodice and sleeves of white georgette.

Cotton Voile in Favor.

Cotton voile, then, is one of the new fabrics for children, and sometimes this is plain, and sometimes striped, and sometimes checked. Silk Jersey also finds its way into many of the attractive little-girl frocks, and so does organdie when the effect to be gained is one of crisp summer freshness. Silks are found in real variety—in fact, even very little girls are often permitted to wear bright-colored taffetas and flowered silks that would have been regarded as impossible, a decade ago.

few of the many pretty ways in which it may be carried out.

Correct Clothes for Youths.

The designers of children's clothes give just as much thought and attention to bringing out styles which are appropriate to the type and age of the small wearer as to those fashions created for their elders. Mothers nowadays are studying their children more. Simplicity is the rule today, and the smart, tailored styles are found to suit many children perfectly, while other types look better in the quaint styles which are being introduced this season.—Angelica Schuyler, in the Mother's Magazine.

Artificial Wheat on Hats.

The supply of wheat is now plentiful, but, unfortunately, this applies to hats only. Navy blue hats and wheat in the foreground and wheat and field flowers are very prominent as trimming on them; such a trite combination, no matter how smart at first, is one sure to be copied to extinction! Wheat bristling from small toques in colors matching the straw of the hat is simpler and rather less expected.

Too Awful—Nowadays. Paterfamilias—What's that noise, my dear? (Suddenly stricken with panic.) Surely the cat can't have got into the larder!—London Opinion.

The Gardener is a Patriot. I believe there is no greater patriot in the country, except the man who goes to the trenches, than the man of woman who can say: "I have helped to feed myself." This is patriotism of the highest order. A nation of gardeners means a nation determined to win the war.—Charles Lathrop Pack in The People's Home Journal.

Grove's Baby Bowel Medicine aids Digestion, relieves Sour Stomach, Diarrhoea and Flat. It is just as effective for Adults as for Children. Perfectly harmless.

A Current Jest. Th Grandstander—Say, the language that fellow down there uses in rooting is perfectly shocking. I wish you would arrest him. The Park Cop—Nothin' doin' boss. I learned years ago to keep my hands off an electric fan.

Grooving Machine Building Ships. Revival of the wooden shipbuilding industry has brought into the limelight a number of labor-saving appliances, among which is a grooving and planing machine, capable, it is claimed, of doing as much work as 15 or 20 men equipped with manual tools. The device, which is illustrated in the Popular Mechanics Magazine, weighs about 56 pounds and may be driven either by compressed air or electricity.

New Compact Fire Escape. One of the boys aboard our navy's fleet has invented a fire escape which is similar to the rope ladders used aboard ships. His principal object was to provide a collapsible fire escape which could be compacted and conveniently arranged at the window of a dwelling. It consists of a container hinged to the sill in such a manner that by opening the window and folding the container on its hinges the metal ladder may be unfolded and dropped. When this operation is gone through, a means is automatically provided whereby the ladder is held at a distance from the walls of the building. The advantage of such precaution is obvious.

The Old Man's Call to Duty. J. H. Snowden, a retired farmer and capitalist, told a Seattle reporter that he is on his way back from southern California to his old home at Calgary, Can., to go back to the fields. He supposed that he had earned a rest for the remainder of his days, but now sees that he was mistaken. "I am now fifty-five years of age," he said, "and have not done any manual labor for eight years, but I am going to hire out this summer and fall to help my former neighbors to harvest their crops. I figure that as long as I am too old for military duty, I can help win the war by helping produce crops." Thousands of Americans as well as Canadians will see their patriotic duty and take similar action before the war is over. The call to the colors is by no means confined to men and youths under thirty-two.—Nebraska State Journal.

# Farmers! Watch Your Stomachs In Hot Weather

We and Our Allies Are Depending Upon Your Strength To Supply Our Armies With Food.

You men who work long hours in the fields under a blazing sun—you've got to be big eaters, because your food is your strength, and now, more than ever, your strength is badly needed. So guard your health. Be sure and watch your stomach, for in the summer time nearly all illness can be traced to stomach and bowel complaint. You, yourself, know how liable a man is to sunstroke if he goes in the hot sun too soon after eating a hearty mid-day meal, and also how liable he is to sudden attacks of stomach miseries. So cool off in the shade before going back to work. Don't take chances.

Take care of your stomach, friend. You know you can't work well with your stomach out of fix. "Safety first," must be your motto, so send to your druggist and get a big box of EATONIC, enough for yourself and family, and yes, and the hired folks, too. It's the wonderful new compound for the quick relief of stomach and bowel miseries. It was originated by H. L. Kramer, the man who made millions of people happy with his first great remedy, Cascarets.

Now, all you need do is to take a tablet or two of EATONIC after your meals. It's good—just like eating candy. Enjoy the quick, sure relief it brings—how almost instantly it relieves indigestion, heartburn, food-

repeating, sour stomach, and that painful, puffed-up, bloated, lumpy feeling after eating. EATONIC will help you all to a pain-free stomach—a sweet, cool, comfortable stomach—in fact, those who take EATONIC say it makes them forget they have stomachs. They never dreamed that anything could bring about such quick and wonderful results. Don't wait until the summer sickness of stomach and bowels weakens you—but start using EATONIC today! Just one or two after meals; that's all.

Your health—your folks' health—is a matter of vital importance, not only to yourself, but also to the nation. And you know one can't be too careful of one's stomach and bowels during the hot spells.

EATONIC only costs a cent or two a day to use it—a big box 50 cents—no more. That is the price, and yes, and the hired folks, too. It's the wonderful new compound for the quick relief of stomach and bowel miseries. It was originated by H. L. Kramer, the man who made millions of people happy with his first great remedy, Cascarets.

You know your druggist; trust him then to make our guarantee good; if EATONIC fails in any way, take it back; he will refund your money. If your druggist does not keep it, drop us a postal and we will send it; you can pay when you get it. Address H. L. KRAMER, Pres. EATONIC REMEDY CO., 1018 S. Wabash Ave. Chicago.

The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of

In Use For Over 30 Years The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

## THE KITCHEN CABINET

It is a good thing to be rich, and a good thing to be strong, but it is a better thing to be beloved of many friends.—Euripides.

### A SCORE OR MORE OF SANDWICH FILLINGS.

Sandwiches are just as popular with war breads as they were when wheat was plentiful.

A few crumbs of roquefort added to French dressing with a piece of lettuce or a sprig of water cress laid between buttered slices of bread is a delicious morsel.

Cottage cheese with chopped chives, or slices of rich New York cheese on buttered bread will make a hearty sandwich for the boy who goes fishing.

Minced hard cooked eggs and sardines (skin and bones removed), seasoned with lemon juice.

Chopped dates and nuts with a little cream cheese.

Equal parts of cold cooked ham and chicken, minced fine and seasoned with curry.

Chopped mutton (cold roast or boiled), seasoned with chopped capers and French dressing.

Chopped figs and peanuts with lemon juice; prunes and cottage or cream cheese.

Salmon, pickles and olives. Baked beans mashed and seasoned with onion and celery with a dash of lemon juice.

Minced hard cooked eggs, butter, mustard and a dash of salt and cayenne.

Thin slices of cucumber, covered with scraped onion, dipped in French dressing.

Sardines with olives and French dressing. Water cress dipped in French dressing.

Cooked liver chopped and seasoned with onion and celery.

Thin slices of banana sprinkled with nuts and dipped in French dressing.

Chicken chopped with a few almonds and bits of celery. Almonds (salted) chopped and mixed with maple sugar and cream.

Equal parts of minced ham, celery and mayonnaise dressing.

Chopped onions with French dressing—fine sandwiches for Sunday night lunch, after church.

When the wild plum blossoms in the lane  
'Tis time for dulcet laughter and refrain,  
Time for airy fairy dreamings which pered low  
By the woodland pixy people as we go,  
Time to lolter and make glad among the flowers—  
Oh, it is a heartsome place, this world of ours.

### DISHES DAINTY AND APPETIZING.

Hot fried sardines served on a bed of water cress make a nice way of serving these small tidbits.

Celery and nuts chopped fine and mixed with a little salad dressing make a good sandwich filling.

Chopped apples, a few nuts and a chopped green pepper make a most delicious salad combination; serve with mayonnaise.

Cheese and Tomatoes.—Cut round slices of bread, toast brown and on each round place a slice of tomato, sprinkle with a little minced onion and green pepper, a dash of cayenne and a thick layer of grated cheese. Put into the broiler and set under the gas flame until the cheese melts. Serve piping hot.

Peanut Butter With Rice.—Take two cupsful of well cooked rice; while hot, stir in a cupful of peanut butter, a cupful of cracker crumbs, a half cupful of milk, two beaten eggs and salt and paprika to taste. Shape in a rounding loaf and place in a well buttered pan; bake a nice brown and serve hot with parsley.

Walnut Loaf.—Take a cupful of chopped walnut meats, four cupsful of bread crumbs, one hard cooked egg chopped, one beaten egg, one chopped onion, salt and sage to taste with sufficient milk, stock or water to moisten. Bake until brown. Serve either hot or cold.

Cheese Fingers.—Beat the whites of two eggs until stiff, then fold in lightly a cupful of grated cheese. Season to taste with salt and cayenne, spread on long crackers and brown in the oven. Serve hot or cold with the salad course.

Baked Tomatoes With Peas.—Take small sized tomatoes; do not peel; remove some of the center and fill with seasoned peas. Put into a baking dish and bake while baking with butter and water or a rich soup stock. Keep covered the first part of the cooking.

*Nellie Maxwell*

### FARMERS ARE WORKING HARDER

And using their feet more than ever before. For all these workers the frequent use of Allen's Foot-Ease, the antiseptic powder to be shaken into the shoes and sprinkled in the foot-bath, increases their efficiency and insures needed physical comfort. It takes the Friction from the Shoe, freshens the feet, and prevents tired, aching and blistered feet. Women everywhere are constant users of Allen's Foot-Ease. Don't get foot sore, get Allen's Foot-Ease. Sold by dealers everywhere, 25c.—Adv.

#### Using Them All.

Thomas Catt (boss of the establishment)—What do you mean, young fellow, by asking off again? By actual count your grandmother has died seven times since the baseball season began. When will this thing stop?

Clarence Klttin—Please, sir, when she's used up her other two lives.

#### Cuticura Complexions.

Nothing better than Cuticura Soap daily and Ointment as needed to make the complexion clear, scalp clean and hands soft and white. For free samples address "Cuticura, Dept. X, Boston." Sold by druggists and by mail. Soap 25, Ointment 25 and 50.—Adv.

#### Match Famine in England.

Great Britain is suffering from an acute match famine. Cigarettes, cigars, candy, beer and whisky can be bought almost anywhere, but a box of matches is as hard to find as a raiding airplane on a dark night. Why, no one seems to know.

### GAINED 55 POUNDS

#### Doan's Kidney Pills Effected Wonderful Recovery After Other Medicines Had Failed.

"I don't believe I would be alive to give this testimony if it weren't for Doan's Kidney Pills," says Mrs. Julia A. Thomas, 125-A Missouri Ave., East St. Louis, Ill. "I was in a serious condition with kidney trouble; my feet and ankles were terribly swollen and the kidney secretions caused agony in passage. I had terrible rheumatic pains and often got so dizzy I dared not walk for fear of falling. I felt as if I would go frantic. I grew weak as a baby and often had to grasp something to keep from falling. My nerves were all unstrung and the least noise startled me. Nothing benefited me and I was discouraged. A neighbor happened to recommend Doan's Kidney Pills and I began using them. The swellings and pains were soon eased up and it was but a short time before my kidneys were in good shape again. They have never bothered me since nor have I had any backache or other kidney trouble. I have gained 55 pounds since I was cured and can do all my own work without suffering."

Mrs. Thomas

"Sworn to before me."

### UNITED STATES AND SCIENCE

Activities of Entire World Centered on This Country and Interest Expected to Continue.

"Very few people realize that the scientific activities of the world are centering in the United States, and that they will doubtless continue to do so if material means be given to keep up the work," said Father Charles B. Moulmier, regent of the Marquette university school of medicine, in a recent interview in the Marquette Tribune.

"South America, for instance, is now looking to us for scientific leadership. China and Japan are once more turning to us. Great attention is being paid to medicine in South America, Buenos Aires alone having a medical school with 5,000 students.

"The Wistar institute of anatomy, in Philadelphia, is one of the most decisive factors in turning the attention of the scientific world to the United States. This institute has an endowment which makes it possible to give large service to mankind. Just now it is printing copious translated extracts from the medical journals published and sending them to China and Japan. Duplicates of the journals are also sent to South America.

"A great deal of research work is being done by this school in the direction of discovering dyes. Certain chemical dyes, formerly produced only by Gruebler of Germany, are required in technical work. Wistar is now producing dyes the equal of Gruebler's.

"It may be interesting to know that much of this research work has been done by a young Philadelphian who delved into chemistry for his own pleasure and experimented in his private laboratory. Wistar hearing of some remarkable discoveries made by him immediately called him to the institute, placing its facilities at his disposal for this important work.

#### What Exporters Should Know.

A needle factory had sent to Aleppo, Turkey, needles that were tied up with green twine. The Mohammedan merchant who had ordered them returned the package, for the reason that the use of the green, the color consecrated to the prophet, for such a purpose was a derision of religion. Another consignment of the same factory to China wrapped up in white paper was returned because the Chinese recipient would not accept goods packed in "paper of mourning." White is the mourning color of the Chinese.

#### "Conscription of Wealth."

It is the simple fact, so thinks the Monetary Times of Toronto, that the idea of conscription or confiscation of wealth must be abandoned upon this continent. "The great need of the western world, and all countries coming within the scope of western civilization, will be a fund of investment capital at the close of the war."

#### Couldn't Find Peter.

"Borrowing from Peter to pay Paul is bad business," said Mr. Dubwaite. "So it is," replied the impecunious citizen. "In my case I find it exceptionally bad business." "Why should it be worse for you than anybody else?" "I have the dickens of a time finding Paul."

#### Away With the Cats!

The damage to crops which is indirectly attributed to cats has recently brought the question of cat suppression into more than one state legislature. Cats eat birds that eat insects that destroy crops.

#### Ambiguous.

She—What do you think of my war bread, dear?  
He—It's a stunner.

The first self-moving gun carriage was invented in France in 1769.

**Tonight! Take Dodson's Liver Tone!**  
**Better Than Calomel For Liver**  
Calomel sickens! If bilious, constipated and head-  
achy read my guarantee.

Listen to me! Take no more sickening, salivating calomel when bilious or constipated. Don't lose a day's work!  
Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel, when it comes into contact with sour bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just take a spoonful of harmless Dodson's Liver Tone.  
Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tone for a few cents. Take a spoonful tonight, and if it doesn't straighten you right up and make you feel fine and vigorous by morning, I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not salivate or make you sick.  
I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.—Adv.

**Hunt's Salve**  
**Letter**  
**MONEY BACK**  
without question if Hunt's Salve fails in the treatment of Eczema, Tetter, Ringworm, Itch, etc. Don't become discouraged because other treatments failed. Hunt's Salve has relieved hundreds of such cases. You can't lose on our Money Back Guarantee. Try it at our risk TODAY. Price 75c, at drug stores. A. B. Richards Co., Sherman, Texas

**LIVE STOCK NOTES**  
An acre of good soybeans should maintain 20 hogs for a month.  
Hogs increase fast under ordinary farm conditions. They are also very thrifty feeders, making more meat from a given quantity of feed than any other farm animals.  
The marked success of the self-feeding system of hog raising is due largely to the fact that they may eat an abundance of those feeds which will nourish them to the best advantage.  
While silage is succulent and palatable and has an effect similar to that of good grass, it should not be the only feed used.  
Get those spring pigs to eating shorts, tankage, or slop of some kind before you wean them, and you will have no trouble.  
There is no section of the country which can produce cattle more cheaply than the South, for the lands are still cheap, the grazing is good and the pasture season is long.  
They All Have.  
"Has your daughter a definite object in view, now that she has finished her business education?"  
"Yep; matrimony."  
The wool from sheep more than pays their way, leaving the lambs for profit; besides they make good use of weeds and rough feed that would otherwise go to waste.  
No one can feed pigs profitably at any age, at any time, that are affected with worms.  
The weeds, grass, corn stover and other good feed wasted on many farms would support from 10 to 100 ewes, and produce both food and clothing.  
Fresh meat will be high and scarce this year. Unless farmers raise calves, lambs and pigs for the market fresh meat may be prohibitory for the poor.  
Why are good teams so high and scarce? There are at least two reasons for this: farmers have not been raising many mules and horses during recent years.  
Art Is Long.  
"You have to start early to be a great pianist."  
"I imagine so. It must take years to grow all that hair."—Judge.

**GROVE'S BABY BOWEL MEDICINE**  
This valuable and harmless Baby Medicine is composed of the following:  
**BISMUTH, LIME, PEPSIN AND CATECHU WITH PURE SIMPLE SYRUP**  
Bismuth is healing to the mucous membrane of the stomach; the Lime neutralizes the acid where there is a sour stomach; the Pepsin digests any indigestible food that may be in the stomach, and the Catechu acts as a mild astringent to control the bowels where there is a disposition to Dysentery, Diarrhoea, Flux or Sick Stomach.  
GROVE'S BABY BOWEL MEDICINE is not a patent medicine. We give the ingredients and tell the effect of each ingredient so that you can judge for yourself.  
**SPECIAL NOTICE.**—This preparation does not contain Morphine or Opium in any form and we don't advocate the giving of Opiates unless it is absolutely necessary.  
**RELIEVES For Dyspeptics who are AIDS**  
**SOUR STOMACH Troubled with Sour Stomach DIGESTION**  
**It Relieves Stomach and Bowel Trouble and is Just as Good for Adults as for Children**  
We have numerous letters on file from parties claiming that this preparation relieved their babies of Chronic Dysentery, where everything else had failed and where they had been troubled in this way for several years. Children like to take it.  
For sale by all Dealers in Drugs.  
Made and recommended to the public by PARIS MEDICINE CO., Manufacturers of LAXATIVE BROMO QUININE and GROVE'S TASTELESS CHILL TONIC, St. Louis, Mo.

Testigo mi firma y sello como tal tesoroero, esto el dia 14th de Junio, 1918.

JOHN W. BALLOW,  
Tesorero y Ex-Officio Collector de el Condado de Roosevelt, Nueve Mexico.

## Why We Fight

No. 3

Because Germany Having Split the World in Half is Now Trying to Devour the Halves

By CLARENCE L. SPEED  
Secretary of the War Committee of the Union League Club of Chicago.

We are fighting Germany, for one thing, because Germany, having split the world in half, is now seeking to devour the halves separately. She has driven a wedge straight through the heart of Europe, and into Asia, and is seeking to extend it to the Persian gulf.

This is no accidental happening, due to the downfall of Russia and the sudden shifting in the fortunes of war. Germany planned it all decades ago. She made no effort to keep the plans secret. She told us all about it. She had a reputation for making plans and sticking to them, from one generation to another; yet the world paid no attention. It seemed too preposterous even for Germany to attempt.

As long ago as 1895 a pamphlet, "Pan-Germany and Central Europe About 1860," was published in Berlin and had wide circulation. It laid the whole Mitteleuropa plan bare as follows:

"Poland and Little Russia (the kingdom to be established at Russia's expense) will agree to have no armies of their own, and will receive in their fortresses German and Austrian garrisons. In Poland, as well as in Little Russia, the postal and telegraph services as well as the railways will be in German hands."

In 1911 Tannenber's book, "Greater Germany" was published. This was only three years before the war, but it showed that the idea of a German Mitteleuropa had not been allowed to languish. It says:

"The new kingdom of Poland is made up of the former Russian portion of the basin of the Vistula, and of Galicia, and forms a part of the new Austria."

How the plan has grown since then! Russia's collapse dropped whole provinces into the lap of the kaiser, and now Germany plans its empire on a scale which would dwarf that of ancient Rome. It is to embrace the original Central Europe, inhabited by some 78,000,000 Germans, make the Black sea a German lake, and extend clear to the Persian gulf through the vassal states of Bulgaria and Turkey.

The German government started to put its scheme for a Mitteleuropa into effect years ago when it began the construction of the Berlin-to-Bagdad railway. Little Serbia stood in the way, so Serbia was attacked and the world was plunged into war. In the opposite corner of Europe Belgium was invaded and crushed. The world then thought that this was only because Belgium offered the easiest route to France; but study of the Mitteleuropa plan of years ago shows that Belgium was included in the scheme of conquest.

"How does all this affect America?" one may ask. Germany was a late comer in the family of great nations. Most of the uncivilized world had been pre-empted by other nations before she arrived. Germany wanted colonies. To get them she would have to take them away from someone else.

Africa and South America offered the best fields for German colonization. England possessed the best part of Africa—the parts in which the white man might hope to settle and thrive. England had a mighty fleet, and a disposition to hold what she had, even though she did not show a disposition to fight for more.

There remained South America. It was divided among weak nations. It was protected only by the Monroe doctrine. This Monroe doctrine was a sacred thing to Americans, but, not being backed up by mighty armies and fleets, was not even a "scrap of paper" to the Germans. Can anyone doubt, should Germany succeed in welding into a mighty empire the 78,000,000 Germans and the 100,000,000 inhabitants of the vassal and conquered states of her Mitteleuropa, that her next step would be toward the west? The very fact that she had this empire would presuppose the defeat of England, so that no British fleet would stand between us and Germany when the time came for the kaiser to send his legions across the Atlantic.

"As in the East, so in the West," is a motto which, of recent weeks, has been much heard in Germany. At a conference of the national liberal party, held in March of this year, the following amazingly frank declaration was made:

"Our policy has been directed to making the government and majority turn away from the reichstag resolution of July 19. (Peace without annexations and indemnities). In that we have succeeded. Peace has just been made in the East under conditions in flat contradiction to the no-

licy of July 19, and has received the support and assent of all the bourgeois parties."

In other words, all Germany is now planning both annexations and indemnities, such as will leave her without a formidable opponent in the world.

Can we make peace now and leave Germany, flushed with victory, in possession of all she has gained and lusting for further conquest? If we did, would not the whole world live in perpetual terror of German aggression, each country awaiting its turn to be gobbled up? Can any red-blooded American talk about peace without victory—victory so decisive that Germany will be forced to disgorge all it has seized, and the German menace be removed from the world forever?

## Red Cross

Notice has been received from Denver that knitted articles are more in demand just now. Roosevelt county's quota is 107 sweaters and 645 pairs of socks to be finished and shipped by September 1st. All branches are asked to send in their orders for yarn to the local secretary, Mrs. A. F. Jones. Mrs. J. P. Stone and Mrs. Rose McDowell have plenty of yarn on hands to supply the town chapter. Please send in finished articles at once so that they may be shipped. The Portales chapter has some cut pajamas on hands and expect a large shipment of refuge garments soon. Each branch will be asked to take as many as 20 refuge garments. All chapters are hence forth asked to buy all materials from headquarters, especially yarn, outing, etc.

Mrs. Arthur Jones, Secretary.

## Notice of Removal

I have moved my office to permanent location in the rear of the First National bank, formerly occupied by Connally & Littlejohn, and in the same suite as is occupied by the law office of Judge James A. Hall. My telephone number is 60.

## NOTICE OF SUIT

No. 1392  
In the district court of Roosevelt county, New Mexico.

R. H. Morrow, plaintiff vs. James J. Chapman, Ruth Chapman, the unknown heirs of said James J. Chapman and Ruth Chapman, and unknown claimants of interest in the premises adverse to plaintiff, defendants.

The State of New Mexico to James J. Chapman and Ruth Chapman, the unknown heirs of the said James J. Chapman and Ruth Chapman, and the unknown claimants of interest in the premises adverse to the plaintiff, greeting: You are notified that suit has been commenced in the district court of Roosevelt county, New Mexico, entitled and numbered as above; that the general objects of said suit are that plaintiff have his title to the northwest quarter of section twenty-seven, and the northwest quarter of section twenty-eight in township four south of range thirty-two east of the New Mexico meridian, New Mexico, quieted and forever set at rest against your adverse claims, and that you be barred and estopped from claiming title to said premises adverse to plaintiff. Unless you appear in this cause on or before the second day of August, 1918, you will be adjudged in default and plaintiff awarded the relief he prays.

Plaintiff's attorney is James A. Hall, and his business address is Portales, New Mexico. Witness my hand and seal of court at Portales, New Mexico, this the 19th day of June, 1918.

[Seal.] SETH A. MORRISON,  
June 21-July 12 County Clerk.

## NOTICE OF SUIT

No. 1391  
In the district court of Roosevelt county, New Mexico.

R. H. Morrow, plaintiff, vs. The unknown heirs of Louis Purpus, deceased, and the unknown claimants of interest in the premises adverse to the plaintiff, defendants.

The State of New Mexico to the unknown heirs of Louis Purpus, deceased, and the unknown claimants of interest in the premises adverse to the plaintiff, greetings:

You are notified that a suit has been commenced in the district court of Roosevelt county, New Mexico, entitled and numbered as above; that the general objects of said suit are that plaintiff have his title to the north half of range thirty-three east of the New Mexico meridian, New Mexico, quieted and forever set at rest against your adverse claims, and that you be barred and estopped from claiming title to said premises adverse to plaintiff. Unless you appear in this cause on or before the second day of August, 1918, you will be adjudged in default and plaintiff awarded the relief he prays.

Plaintiff's attorney is James A. Hall and his business address is Portales, New Mexico. Witness my hand and seal of court at Portales, New Mexico, this the 19th day of June, 1918.

[Seal.] SETH A. MORRISON,  
June 21-July 12 County Clerk.

## NOTICE OF PENDENCY OF SUIT

The state of New Mexico to Henry B. Allen and Martha M. Allen.

Greeting: You are hereby notified that a suit has been filed against you in the district court of the Fifth judicial district of the state of New Mexico, in and for Roosevelt county, wherein the Advance Rumely Treadler Company is plaintiff, and you, the said Henry B. Allen and Martha M. Allen, are defendants, said cause being numbered 1393 upon the civil docket of said court.

The general objects of said action are as follows: Plaintiff asks the defendants upon four promissory notes and a mortgage, executed by the defendant, Henry B. Allen, and delivered to the Rumely Products Company on the 17th day of November, 1914, and thereafter duly assigned to the plaintiff, for the sum of \$1000.00 less a payment of \$668.50, with interest thereon at the rate of 8 per cent per annum until maturity and 10 per cent thereafter until paid, and the plaintiff seeks to foreclose said mortgage given for the security of said sum including 10 per cent additional on the amount due, for attorney fees, and a further sum of \$37.46 for taxes paid by the plaintiff for the defendants, upon the following real estate to wit: The northwest quarter of section twenty-seven in township one south of range thirty-three east of the New Mexico meridian, New Mexico, and the plaintiff prays for the sale of property upon the foreclosure thereof, and for the application of the proceeds to the payment of his said judgment and demands; to have its said mortgage declared a prior lien upon said described real estate, superior to any claim of the defendant, Martha M. Allen, who is alleged to have purchased said property subsequent to, and with due notice of plaintiff's said mortgage; and for general relief, with costs of suit.

You are further notified that unless you enter your appearance in said cause on or before the 31st day of August, 1918, the plaintiff will take judgment against you by default in said cause and will apply to the court for the relief demanded in the complaint.

You are further notified that George L. Reese is the attorney for the plaintiff and that his post office address is Portales, New Mexico. Witness my hand and seal of the said court on this the 8th day of July 1918.

[Seal.] SETH A. MORRISON, Clerk.
