

on the 27 day of July at 2 o'clock recorded in Book page Fees

Why Not in Portales

Is Portales to be the only town in the state of New Mexico that does not hold some kind of memorial services for its fallen heroes on the battlefield. Carl McDermott was a Portales boy and he gave his life in the defense of his country. In all other towns and communities the people have assembled and conducted memorial services in recognition of their martyred dead, why should not Portales be equally as patriotic? Are we lacking in sympathy with the parents of this young man, or are we careless of our respect for those who have made the supreme sacrifice? Is it fitting that we should pass these heroes by unwept and unhonored? The Journal believes that the citizens of Portales are just as patriotic and just as anxious to do homage to its dead as are the citizens of any other locality, and our failure in this instance is due more to the lack of some one taking the initiative than to any other cause. Let us appoint some day to hold this memorial service, and then let every citizen attend to do honor to the memory of this young man who gave his life that we might live to enjoy the fruits of freedom and the blessings of a democracy unfettered and unhampered by a Prussian autocracy or a military oligarchy. This should be at once and should be done spontaneously and without urging. Don't let the parents of this young man feel that the sacrifice of their son was not appreciated by his fellowmen and his friends.

Women to Register

The government of the United States is asking the women of Roosevelt county to register, and this registering process goes a little farther, the registrants being classified in the same manner as are the draftees for the army. There are a considerable number of duties to be performed by women, in their homes for the most part, and the idea is to getting a working organization that may handle these matters methodically and expeditiously. Mrs. Jack Wilcox is one of the ladies having this registration in charge, and she asks that all the ladies of Roosevelt county call at the store of Whitcomb & Williamson and register. The books will be open all of next week and the hours will be from 8 o'clock in the morning until 5 at night. This registration is not compulsory but the government has asked that the names of all who do not voluntarily register be furnished proper officials. This work should be hurried and no woman should shirk.

A Narrow Escape

Archie Stephenson, son of Mr. and Mrs. John R. Stephenson, was on the ill fated battleship San Diego when it was hit by either a torpedo from a submarine or a floating mine. This vessel had just returned from a successful trip across the water conveying American transports loaded with soldiers, when it was struck. Archie is one of the fireman and his escape from death was little short of the miraculous. Happily his parents had not heard of the sinking of this ship until they received a telegram from him notifying them of his safety, and they were thus saved from much worry.

THE BEAST OF BERLIN AS HE IS

Graphically, Forcefully, Truthfully Told by W. E. Private Collinge

Holds a Big Crowd for Hour and a Half With Thrilling Experiences While Battling the Minions of Hell.

"Buying a few Liberty Bonds and Thrift Stamps is not conclusive evidence that you are 100 per cent Americans--the damned Huns are doing that. Able bodied, physically fit men not in service are slackers. He who has a family has that much more to fight for. Women who violate food regulations, or take unfair means to get more than their just share, steal from those who are fighting for their honor, their virtue and the virtue of their daughters. A field dressing, six inches of cold steel, is the only first aid to which the Hun is entitled. The rich people who withhold their money from the government now will have to disgorge when the Sammies come home." --Pertinent Sayings of Private Collinge.

Private W. E. Collinge, one of the few surviving members of the famous Canadian Seventh regiment of Highland troops, the first Canadian contingent sent to France and Belgium at the outbreak of the war in 1915, spoke at the court house in Portales Thursday night. The court house was crowded to its capacity, many arriving a little late were unable to get seats, but loitered on the stair landing, many going home. Private Collinge is touring New Mexico, giving his experience at the front for the purpose of bringing this war home to the non-combatant population of the state in order that they may get a correct understanding of actual conditions as they exist at the front today. This non-combatant population must get the situation fixed in their minds in order to more promptly and cheerfully meet the requirements of the food administration. Put the matter up to yourselves in the most favorable aspect possible and we, who stay at home, are slackers. The speaker emphasized the fact that there are no able bodied hundred per cent Americans outside the service and not included in this draft. He pointed out the further fact that buying Liberty Bonds and Thrift Stamps was not an indication of patriotism, necessarily, and proved it by showing that the Germans, themselves, were buying our bonds and securities. He gave a detailed description of the battles in which he and his comrades participated; he told of the scarcity of food and its almost impossible condition for food. He described the modus operandi of the bombing squads, of their intense loyalty to each other; of how the wounded would urge stretcher bearers and first aid helpers to attend to the others and let him go. His description,

at many places, was extremely pathetic, while at others the red blood would surge and the audience could not help but inwardly curse the brutes that were guilty of the outrages described. He told how Belgian and French girls were debauched as many as one hundred and eighty times in one day, how they were mutilated, of insanity that followed these brutalities, of the loathsome diseases with which they were inoculated. It was a harrowing picture and one well calculated to instill the hearts of his hearers an intense hatred for the Hun and his atrocities. If American soldiers don't repay in kind, measure for measure, this bestialized enemy for his atrocities they will fail in the highest duty ever given mortal man to perform. At the conclusion of the address the audience packed about the speaker anxious to shake his hand and to thank him for the message he had come so far to deliver in the interest of humanity and freedom from bestiality. Private Collinge could have talked for hours and held his audience but a war picture at the Cosy theatre had been billed prior to this meeting and the speaker did not wish to hold the crowd away from this picture. He talked for an hour and a half and every minute of the time had a thrill. Judge George L. Reese introduced the first speaker, Lieutenant Gregory, who made a five minute talk on food conservation and the importance of the co-operation of the housewife along these lines. Lieutenant Gregory has his orders for France in his pocket and is counting the hours impatiently until his embarkation.

Mrs. H. Wilkison, who has been visiting Mrs. A. D. Ribble, will leave Monday for her home at Friona, Texas.

Off to Camp

Twenty more Americans left Friday morning for the training camp at Deming, New Mexico. These twenty young men last night listened to the address of Private W. E. Collinge, of the Canadian Highland Scots regiment. They were given some understanding of what they would be expected to go up against when they reached France, and every one of them will remember, when they arrive at the front and enter the trenches what to expect if the "Beast of Berlin" gets his clutches on them. Knowing what to expect, they will make the better soldiers; death will hold no terrors for them equal to the fear of capture, consequently they will fight to their last drop of blood. They were taken to the show, a war picture, by friends in the city. This is one more bunch of one hundred per cent Americans who are giving their all for their country. Many there are in Roosevelt county who appreciate at its proper value the sacrifice these young men are making; some there are who are profoundly thankful that this cup has not been pressed to their lips; just a few there are who have taken advantage of position and, mayhap, some misrepresentation, to have their sons put into the slacker list. Those of these young men who come home will not fail to give such their proper rating, and those who remain at home from old age or physical disability, should not hesitate to make any known slacker as miserable as possible to the end that he may repent of his cowardice and become a man, take his place with the boys at the front and redeem his past. These young men like all the rest, are leaving Portales with the best wishes of the whole people; with the full knowledge that they will manfully perform their duty uncomplainingly. Here is hoping that every one of them comes back whole.

Robert White Arrived

Mrs. Robert Wood is in receipt of a letter from her son, Robert White, recently wounded while serving his country in France, which states that he has arrived safely in America, and that he is now in an embarkation hospital at Camp Stuart, Virginia. Mr. White returns to his American home minus one arm, given in defense of humanity and American liberty. He was in the railway service, an engineer, and was hit by a piece of shell, or some other projectile, as a consequence of which he lost his arm. Mrs. Wood will, without doubt give her wounded son a royal reception upon his arrival here after leaving the hospital, and some little demonstration from the citizenship at large, would be both a fitting compliment to his sacrifice and a graceful acknowledgment of his service abroad.

Fatal Auto Accident

Last Sunday Mrs. C. A. Lawrence, mother of Brackett Lawrence, of this place was thrown from an auto and killed. Her home is at Artesia, and she and Mr. and Mrs. Charley Tanner started for Hope, where she has a married daughter and the accident occurred on the road. Mr. and Mrs. Brackett Lawrence attended funeral services at Artesia.

Got the Goods

Sheriff Arch L. Gregg returned from Motley county, Texas, Wednesday night where he had been in search of a Ford touring car and the gentleman who drove it. He secured both, but not without much night driving and considerable hardship. The machine was traced to I. L. Clements, a farmer living near Garrison, who was, evidently putting the tenets of the Socialist doctrine, ie, "The rights of the user are paramount to the rights of the owner," into actual practice. It appears that Clements had taken the car from Lewis Little on the night of July 17th, and had driven the car from Lewis Little on the night of July 17th, and had driven it to Motley county direct, where he had traded it for an old one, then left and was visiting relatives at another point. Sheriff Gregg located the stolen car, then hunted up Clements and brought both back to Portales. The preliminary is set for Monday.

Party to Roswell

Last Saturday morning Ed J. Neer, George Williamson, E. E. Hoagland, W. B. Oldham and Seth A. Morrison left for Roswell to take the Knight Templar's degree in Masonry. They were met at Elida by A. A. Beeman and Dr. A. J. Evans, who accompanied them the rest of the way. All except Mr. Morrison were candidates for this degree and all were given this work. They report that they finished along towards morning, after which a sumptuous banquet was served. The same gentleman will return this coming Saturday and take the Shrine.

Attention Home Guards

In accordance with orders received from the adjutant general, a meeting is called of company "B" of the New Mexico Home Guard for Monday evening the 29th inst. at 7 p. m. Company will meet at building formerly used by the White House grocery, which place will be used as an armory until further notice. Company "B" will be formally mustered into service of the state at this meeting, by J. B. Priddy, Colonel Aid de Camp, New Mexico National Guard.

P. E. Jordan was in El Paso, Texas, this week looking after business matters and, while there, closed a deal whereby he takes the agency for the new Ford in Roosevelt and De Baca counties. These Ford tractors are built with two objectives in view, one is to build a tractor that can be sold at a price that will not be prohibitive to small or large farmers, the other to produce a tractor that will actually do the work on the farm economically and thoroughly. The Ford tractors should find a ready sale in Roosevelt county.

Rev. W. W. Turner has been elected county chairman of the Red Cross association, vice Professor Long, resigned. The rules provide, among other things, that parties aspiring to public office or actively engaged in politics may not hold office in the Red Cross organization, and Mr. Long, being a candidate for the legislature, tendered his resignation.

The Deep Sea Peril

By VICTOR ROUSSEAU

(Copyright by W. S. Chapman)

CHAPTER XII—Continued.

"She went inside the cave, I think," said Davies.

"Yes, I'm sure of it," answered Donald; and he entered farther into its recesses, calling "Ida! Ida!"

They began to be alarmed. They hurried from point to point. The cave was a wide one, but tapered, some distance back, into the neck of a bottle. It seemed evident that Ida could not have gone farther than this point.

"Run back, Davies, and see if she can't be outside," said Donald.

And, while he called, Davies took up the search without. Donald waited in terror. He did not dare go farther into the cave just then.

Ten minutes later Davies returned. A glance at his face told that his mission had been entirely fruitless. They looked at each other.

"There's light ahead," said Davies. They proceeded cautiously, and suddenly they came upon a little entrance leading up from the sea. Close by was the point around which MacBeard had disappeared in his motorboat.

Davies saw Donald shaking with mixed terror and rage. He stared out hopelessly toward the sea. Then, brushing past Davies without a word, he almost ran into the bottle neck of the interior. The midday followed him.

The ground grew damp, the floor seemed to descend abruptly. Davies could hardly keep his feet. All at once he heard Donald's muffled voice calling to him. He saw the spurt of a match flame.

Ten paces farther Donald pulled him back as his foot slipped on the edge of a precipice. Donald struck another match and looked down.

Under them was the level of the ocean bed. They were upon the very verge of a precipitous descent, a sheer wall having, however, natural footholds at regular intervals.

Something white fluttering near drew their attention. Donald picked it up and held it out. It was a woman's handkerchief.

"She slipped here—" began the little midday, but Donald took the words from his mouth.

"No!" he cried furiously. "She was caught in the cave by that damned scoundrel MacBeard. He put his boat in at the tiny cove and came on her from behind. And he's taken her—my God, he's taken her. . . . That's her message to me, that handkerchief. . . ."

His voice grew incoherent and he broke down. Then he raised it in furious declamation.

"But I'll follow that cur until I die!" he swore. "I may not rescue her—I don't know, Davies, and I hardly dare to hope. But I'll stay here and give my life—"

He broke off suddenly, a spasm passed across his features, and all at once he became completely calm once more.

"No, I won't, Davies," he said. "It's my duty now to fly to England with all speed. You'll stay here and do what you can. It may be very little, old man, but we mustn't think of anything but our jobs."

"No, sir," said Davies. There was nothing more to be done but prepare for the journey. Donald felt reasonably sure that the F55 was safe against the herd. The terrific upward pressure of the night had not started a rivet; lying as she was upon the beach, she was unassailable.

They filled her oil-tanks and carried the stores aboard. Then Donald filled the gasoline tank of the hydroplane, and, entering, made a short trial flight out to sea and back. The machine was in perfect condition.

A grasp of the hand, and Donald was gone upon his journey. From his post in the conning tower Davies watched the hydroplane rise and fall to the wind, and sweep into the distance, to dwindle and disappear.

CHAPTER XIII.

The Swarming of the Herd. Davies had correctly divined the secret of the air under the sea. Nature, who does nothing in haste, had prepared the sea monsters for their change of environment by bestowing upon them the property of condensing the hydrogen in the water in such a manner as to separate it from the other constituent of water—oxygen.

But, being too unstable to exist as a separate gas, except under high pressure, the oxygen combined with the nitrogen that sustained the crinoids and other plant life at the bottom of the sea. The resulting combination was oxygen and nitrogen in place of

oxygen and hydrogen, or air in lieu of water.

Masterman, who overlooked nothing, had explained all this in his letter to Donald. He had also told him of the means of controlling the sea monsters. Their auditory apparatus being still in its most rudimentary stage, they heard sounds only as vibrations.

Masterman had discovered, during those weeks of exploration and imminent danger, that G was the signal for dispersal. A, on the contrary, was the assembly call. The sacrificial bone knife vibrated to the sound of A, and it was this which had given the herd the key-tone of their language.

Unfortunately for MacBeard, he had been unable to learn much more than this. The last page of the manuscript, as well as the first, was missing. MacBeard was sure that Donald had kept possession of them.

Had he possessed them, he would have learned that the power of uttering these calls rested with the queen of the swarm alone, a human organism, the type of the race toward which the monsters tended, differentiating from them as the queen bee differs from the worker or the drone.

He had discovered that the search for food was the one purpose of the creatures' existence. It had assumed a religious aspect. Their god, their altar stone, the sacrificial rite were all the soul's instinctive groping upward, based upon the dominating animal impulse.

The tune that Clouts had played, with its discords, had been the deep-sea equivalent of an artillery salvo. The terrified monsters had dispersed in all directions, letting down the curtain of condensed hydrogen. Fortunately for the professor, the main portion of the herd had kept together, and this afforded him a medium in which he could, with difficulty, breathe. But their rapid movement kept the hydrogen stirred up, and he was nearly asphyxiated before he reached his refuge within the cave. He did not like inhaling carbonated jelly.

Seeing Donald and Davies upon the island, he had attempted to open negotiations with them. Repulsed, he fled in terror, and on rounding the point saw Ida alone at the cave's mouth. At once his scheme was born in his mind.

Pushing ashore, he entered the cave by the narrow way toward the rear. He came upon Ida suddenly, and grasping her in his arms, he placed one hand over her mouth, preventing her from crying for aid. Then, dragging her to the top of the precipice, he sounded the assembly call.

Instantly the water beneath began to dissolve. Thick clouds of steaming hydrogen rolled up to the cave's roof. Soon there was a natural passage, three hundred feet deep, from the interior of the cave to the crater below.

He carried Ida down the descent. The girl, who had contrived to drop her handkerchief, was no match for the professor. She screamed once or twice, but the echoes of the cavern absorbed the sound of her voice. And so she found herself again within the submarine temple.

MacBeard released her and stood in front of her, devouring her with his gaze. He could not understand whence this novel emotion in his heart derived its power; and, now that she was his captive, he did not know what to do. Geometry, physics, mathematics and the calculus all failed to help solve his problem.

Overcome by the presence of the woman he loved, the professor stammered like a youth with his first sweetheart.

"Why have you brought me here?" asked Ida.

"Because—because I—er—I love you," answered MacBeard.

Ida burst into ironical laughter. The situation was so impossible that there was room for no emotion but amusement. And in that laugh the professor felt a thousand arrows of jealousy rend him.

"Listen to me!" he exclaimed passionately. "You don't know who I am or what I am trying to do. I am going to obliterate the earth, as it is known to you. I command the Man of the Future. The Man who is to come. The new race of the sea, which is to sweep away the puny monkey-man. And I want you to share my power with me."

Ida laughed hysterically. She could not help herself. MacBeard glared at her. He did not know what to do.

"You shall see!" he cried, beside himself with anger. "You don't believe what I tell you? I'll prove it."

"It doesn't make any difference, professor. I am not a blackboard," answered Ida. "Will you kindly take me

back to the place you brought me from?"

"No!" shouted MacBeard. "You'll stay here until you learn to love me. Why can't you love me?"

Ida's look was touched with pity. She did not answer him.

MacBeard sounded his tuning fork, and immediately the monsters gathered about them. The hydrogen haze rolled higher, disclosing the entire interior of the cave, and the idol. MacBeard sounded another fork, and the creatures began edging Ida toward the recesses of the cave.

"If I sound the sacrificial note you die," snorted MacBeard.

Ida, perfectly passive, waited. The monsters guarded the entrance. She was alone. Outside MacBeard paced up and down beneath the sea in fury. He had encountered a problem which seemed insoluble.

As Ida waited, all at once a most remarkable object broke upon her gaze. Advancing through the midst of the luminous, vague monsters outside the entrance there came a perfectly human figure, a man with a square beard.

He passed through the monsters without the slightest difficulty and entered the cave. He was walking exactly as a boy walks when he drives a flock of geese or a herd of pigs; that is to say, there was a straddle in his step quite different from the rolling gait of a sailor, and he had his arms extended. With his lips he made a hissing sound which resembled "Shoo!"

And in front of him, retiring backward, Ida thought she saw a phantom woman's form. But it must have been a delusion, because it was only by straining her eyes that she could discern anything at all; and now and again the figure seemed to vanish into the air.

The man was Clouts. As he passed her, Ida called to him. Clouts jumped. He looked at her with a comical expression of fear on his face.

"Clouts! Where is Donald? Can you get me out of here? Take me to him at once!"

Clouts looked terrified. "Certainly, marm," he said. "But that isn't nobody. There's all sorts of shapes and things here, but it isn't a real person, marm. I'm telling you this so you'll understand, marm."

He hastened past her, and, far ahead

"You Don't Believe What I Tell You? I'll Prove It!"

of him, Ida discerned the shadowy shape of the queen.

"Clouts! Help me! You aren't going to leave me?" cried Ida pitifully.

She heard Clouts' muttering tones come back to her, and he was lost in the hydrogen haze. She was astounded at his abandonment. Hadn't he understood?

To do the sailor justice, Clouts had one of those minds which are open to only a single impression at a time. Just then his mind was open to the necessity of keeping Donald's elusive sweetheart from Ida's knowledge.

He could see only the faintest luminosity now, and he stood with his arms stretched out to prevent her slipping past him. Suddenly he heard a singularly melodious sound proceeding from her throat.

It was a note unknown even to MacBeard. It was, in fact, the demi-semitone between G sharp and A, which is unknown to the Bach scale, though the bagpipes and Oriental music in general are acquainted with these subdivisions.

It was the swarming note. The queen was ready to lead the brood forth upon its adventures. The spirit, emanating from her, made itself felt simultaneously throughout the herd.

Instantly, from all quarters of the crater, the monsters rushed together. The hydrogen haze rolled far away. The ocean opened to its summit. Ida could see the sky above her, and the daylight. The air became surcharged with oxygen.

MacBeard, amazed by this development, rushed in. He sounded the dispersal. But the swarming note took precedence of the dispersal, and the monsters, gathering into a gigantic circle, ignoring the professor's call, began

to scurry wildly about the crater, seeking their leader.

MacBeard saw that the creatures were beyond his control. For the first time his tuning forks had failed him. He was afraid of being torn in pieces.

And up in the cave Sam Clouts found himself engaged in the most furious tussle that he had ever known. (TO BE CONTINUED.)

BIG PHILIPPINE SUGAR CROP

Modern Machinery, Supplanting Hand Labor, Results in Planting of Immense Acreage.

The Philippines are like most of the sugar cane growing regions in that the available labor supply is comparatively limited. To overcome this, the tractor and modern power machinery is being introduced. As this does not pay on the small plantations, the custom is for one organization to operate several hundred or thousand acres, and a well-organized system is involved throughout the year. Labor-saving devices are employed wherever possible.

The first process in harvesting sugar cane is stripping the leaves from the stalks, an operation requiring much time and labor, as this must be done by hand. A cane knife or bolo is used by the native laborer, who passes the knife down each side of the cane, knocking off and throwing them into the middle of the row, where other laborers pick them up and load them to be hauled to the mill.

Sugar cane milling under modern methods may be divided into four essential processes, namely, the extraction of the juice from the cane, the clarification of the juice by boiling, the evaporation of the juice so as to reduce the sugar to the crystalline form, and the freeing of the sugar from impurities. The most modern machinery for all operations is fast being installed throughout the Philippine islands, and American consumers may look forward to securing the bulk of their sugar from these distant dots on the Pacific, which owe their development to American capital and American leadership.

Five Great Men in History.

In the generation that saw the birth and the earlier years of the republic five men stand out—George Washington, Benjamin Franklin, Thomas Jefferson, Alexander Hamilton and John Marshall, says James Bryce in the Youth's Companion. Whether or not the last four of them were great men in the full sense of the word is a question on which people were not agreed in the lifetime of those four and are not agreed today; but everyone felt then as everyone feels now that Washington was great. He is a world figure. In mere intellectual power he was not superior to the other four. He had less originality and a less wide range of capacity than Franklin, less versatile activity of mind than Jefferson, less brilliant gifts for constructive policy and the exposition thereof than Hamilton, less logical grasp and penetration of thought than Marshall; but he rose superior to them all in a certain massive strength of character, in stately dignity, in a calm firmness of purpose that neither the smiles nor the frowns of fortune could divert from the course his judgment had approved. So his primacy was undisputed then and has remained undisputed ever since.

Teaching for Future Endeavor.

If the teacher knew what field of endeavor each pupil would seek in later life, he would be greatly helped in making school plans. In the case of boys he can rarely know, for the employments of men are many and unlike and unforeseen circumstances often determine what their vocation is to be. In the case of girls, however, the difficulty is not so great, for of a hundred girls more than eighty will become homemakers; they constitute so large a group with a common life business that special studies and methods adapted to their needs may fairly be required of all.—Youth's Companion.

Novel Will Held Valid.

In a novel Canadian decision recently reported from the New Brunswick courts, the court upholds as valid a bequest in a will in which the testator directed his executor "to pay a certain person whom I have made known to him, and whose name I otherwise desire to be kept strictly secret, a certain sum of money as soon after my decease as can conveniently be done, the amount of which is to be kept secret, but which has been made known to him by me."

Cleaned Up for Nothing.

George's voluntary scrubbings were few indeed. In fact, he seldom washed his hands before a meal unless ordered to do so. When Uncle Matt was expected for a visit George was made to wash himself vigorously and comb his hair neatly. But Uncle Matt did not come and that night, walking up to his father, he said emphatically: "And all my cleaning up for nothing!"

The Sensitive Heart.

The heart that is soonest awake to the flowers is always first to be touched by the thorns.—Moore.

YOUR SICK CHILD IS CONSTIPATED! LOOK AT TONGUE

HURRY, MOTHER! REMOVE POISONS FROM LITTLE STOMACH, LIVER, BOWELS.

GIVE "CALIFORNIA SYRUP OF FIGS" IF CROSS, BILIOUS OR FEVERISH.

No matter what ails your child, a gentle, thorough laxative should always be the first treatment given.

If your little one is out of sorts, half-sick, isn't resting, eating and acting naturally—look, Mother! see if tongue is coated. This is a sure sign that the little stomach, liver and bowels are clogged with waste. When cross, irritable, feverish, stomach sour, breath bad or has stomach-ache, diarrhea, sore throat, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the constipated poison, undigested food and sour bile gently moves out of the little bowels without griping, and you have a well, playful child again.

Mothers can rest easy after giving this harmless "fruit laxative," because it never fails to cleanse the little one's liver and bowels and sweeten the stomach and they dearly love its pleasant taste. Full directions for babies, children of all ages and for grown-ups printed on each bottle.

Beware of counterfeit fig syrups. Ask your druggist for a bottle of "California Syrup of Figs;" then see that it is made by the "California Fig Syrup Company."—Adv.

His Suggestion.

"No," said the positive girl, "I will never tie myself down to one man." "Perhaps," he replied sarcastically, "if I organize a syndicate you will consider our offer."—Boston Evening Transcript.

The Usual Way.

Blunderleigh—I hear that Dobbs is generous to a fault. Sharpleigh—He is, if it is his own fault.

Grove's Tasteless Chill Tonic restores vitality and energy by purifying and enriching the blood. You can soon feel its strengthening, invigorating effect. Price 50c.

The man who has never had any disappointments is in a poor position to enjoy good luck.

Itching Rashes — Soothed — With Cuticura

All Druggists; Soap & Ointment 25 & 50, Talcum 25. Sample each free of "Cuticura, Dept. B, Boston."

TYPHOID is no more necessary than Smallpox. Army experience has demonstrated the almost miraculous efficacy, and harmlessness, of Antityphoid Vaccination. Be vaccinated NOW by your physician, you and your family. It is more vital than house insurance. Ask your physician, druggist, or send for "Have you had Typhoid?" telling of Typhoid Vaccination, results from use, and danger from Typhoid Carriers. Producing Vaccines and Serums under U. S. License. The Cutter Laboratory, Berkeley, Cal., Chicago, Ill.

Are you marketing your Cream?

If not, you should. Now that dairy products are most necessary and valuable too, every farmer should do his utmost to increase the production of butter fat. This year promises to be the banner year for the cream producer. You should profit too. Ship your cream to THE MERIDEN CREAMERY CO. 21st and Central Sts. Kansas City, Mo.

Carlisle Commission Co. Wholesale Hay and Grain

Established 1880. Handle on Commission. Buy Anywhere—Ship Everywhere Anytime.

Ford Owners Attention!

A POSITIVE CURE FOR OIL PUMPERS Ever-Tyte Ford SPECIAL PISTON RINGS stop all carbon deposits and fouled spark plugs. Increase compression and speed wonderfully. PAY FOR THEMSELVES IN SIX MONTHS BY SAVING IN GASOLINE AND OIL. Guaranteed to do the work of your money back. \$6.00 PER SET OF 8 RINGS EVER-TYTES made in all sizes for auto, tractor and gasoline engines. Ask your nearest dealer or write THE EVER-TYTE PISTON RING COMPANY Department 7 ST. LOUIS, MO.

HOW TO CONSTRUCT GOOD DAIRY BARN

Entire Frame May Be Made of Plank at a Saving.

GOOD SIDING IS DESIRABLE

Building Should Have Plenty of Windows and Ventilating System Is Profitable Investment.

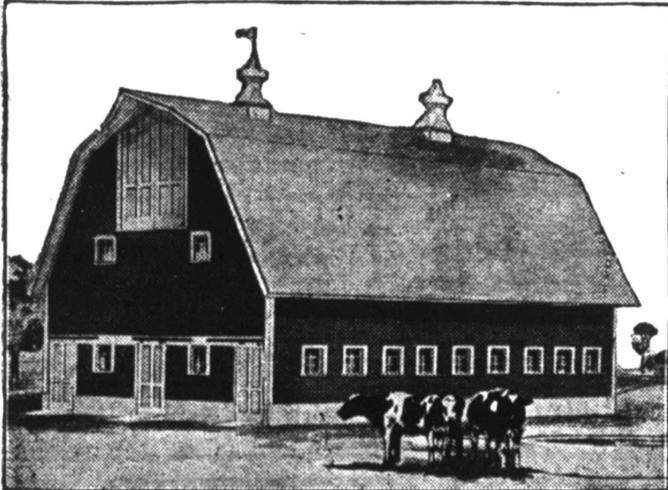

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue, Chicago, Ill., and only inclose three-cent stamp for reply.

By WILLIAM A. RADFORD.

When you build that new barn there are certain things that you will want, and in order that you may get them it is well that you consider what they are. We are supposing that this is to be a cow barn, or at least that there is to be a stable connected with it.

You will probably use concrete for the floor and perhaps for the foundation, and also for the drive floor, if there is one.

With a good wall the sills can be of plank—in fact, the entire frame may be made of plank at a considerable saving. You will want a hay loft over

the cows, even though you only use it for straw, because you can get the room here at less expense than elsewhere. If considerable storage room is desired there should be a gambrel roof. This will give you more room for the same height of posts.

A barn for two rows of cows should not be less than 30 feet wide; and anywhere up to 36 feet is better.

If you cannot readily get sawed timbers as you want for the beams, you can build them up from plank, spiked and bolted together, with the joints broken.

In a modern plank frame cow barn the joists are of 2 by 8's, run crosswise, and rest on built-up timbers or girders which are supported by iron columns in the row of stanchions, entirely out of the way.

Good Siding Desirable.

It will pay you to get a good grade of siding. You will get a better barn. It can be made to look better and can be kept looking better, for of course you will want to paint it.

Have plenty of windows. The rule

will not make extra work getting ready. Also make some provisions for running water in the barn. In short, plan for the future and make every step count toward the final result.

Take, for instance, the 60-foot gambrel roof barn illustrated in the accompanying design. It is a commodious combination barn. It provides accommodations for 20 dairy cows and 8 horses. The large central feeding alley is a feature that will be appreciated by many.

This barn is well lighted and well ventilated. The size is sufficient to meet the needs of the average farm.

We wish to say that an investment in a building of this character should be regarded in the light of a permanent improvement from which a saving will be effected, and not as an item of unnecessary expense.

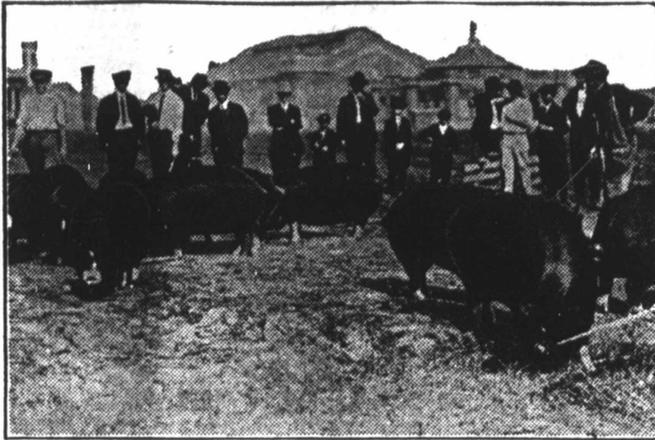

Ventilating System Important.

One of the best investments the dairy farmer can make is a ventilating system for his barn.

Almost every dairyman is satisfied beyond a doubt that ventilation in his dairy barn is a necessity, but very few dairymen have any idea what constitutes a proper ventilating system. Ventilation is not a hard problem if you do not take into consideration the fact that you want to conserve the animal heat, as it is the heat from the animals which is going to keep the barn warm.

A proper ventilating system will circulate the air through the building rapidly enough to keep the air approximately pure, and still conserve the animal heat in the stock room. If the ventilating system is to do the work it must be planned according to the building, to the height of the ceiling, number of head of stock, size of the windows and doors and other openings. Each barn presents a ventilating problem of its own.

PIG CLUBS HAVE CAUSED BIG INCREASE IN DEMAND FOR REGISTERED BREEDERS

Purebred Pigs Raised by Pig Club Members Being Judged at a State Fair.

(Prepared by the United States Department of Agriculture.)

In some sections of the country the need for better breeding stock was outstanding when the United States department of agriculture began its boys and girls pig club work.

In such cases the pig-club agents have practically insisted that only purebred pigs could be used in the breeding projects. This necessitated the importing of registered pigs of both sexes. The results of the demonstrations made by members handling these pigs under instruction from the pig-club leader have caused a great demand for pigs "just like So's." The club members' demonstrations of the advantages and possibilities of well-bred swine when intelligently fed and managed have caused a great increase in demand for breeding stock from the purebred breeders. At first the breeders were inclined to be skeptical, as they expected the boys to buy registered stock, allow it to deteriorate, then offer purebred scrub pigs at meat prices—thus destroying the demand for the breeders' pigs. The breeders were happily disappointed and are now lending their support and backing to the work. One professor says, "Pig-club work has created the greatest demand for breeding stock that this state has ever experienced."

Demand Registered Pigs.

In some cases the refusal of club members to accept anything but registered pigs has induced breeders to have their herds registered in order that they might share in the demand for pigs by club members. A typical case of the influence the purebred pigs brought in by pig-club members is given by a county agent in Arkansas. When the agent began work there were two breeders in the county producing pigs of sufficient merit to meet the demands of the club work. In the first year of his work he had 85 pig-club members. Four of these members secured registered boars. These boars sired 58 litters of pigs from scrub sows, thereby improving the blood of 402 pigs. They also sired 47 purebred hogs for farmers. Farmers also purchased three boars and 36 sows. The second year in the work the club had 42 members who had six purebred boars. They sired 71 litters from scrub sows, producing 496 pigs. They also sired 104 purebred pigs. The agent adds, "I think I can trace seven boars and 41 sows (purebreds) purchased by farmers, as a result of pig-club work in communities, during the second year of the club."

Introducing Purebreds.

Arkansas typifies the manner in which purebred breeding stock is being introduced into sections where they are needed. Last year 1,800 purebred gilts were placed with as many pig-club members. The bankers of the state financed the members. This year between 2,200 and 2,400 pigs also were placed in a similar manner. Another instance of the introduction of well-

bred breeding stock and the re-establishment of a waning industry is taking place in the free range cholera-infested section of eastern Texas. The pig-club agent, assisted by the Fort Worth Stock Yards Co. and the state and federal veterinarians, is sending many car lots of immunized sows to the club members in this region where the industry was being destroyed by the ravages of hog cholera.

Increased Swine Population.

Demonstrations of the sort are of far-reaching importance. The swine breeders and swine-record associations bear witness that there is great demand for purebred breeding stock, especially in the Southern states. The pig-club members take many purebred pigs and have been a powerful stimulus in creating demand among the adults. It is interesting to note that of the four states, Mississippi, Georgia, Virginia, and Delaware, reporting increases in swine population on September 1, 1917, over September 1, 1916, Mississippi and Georgia stand second and third in pig-club enrollment. These two states report an increase of 90,000 hogs while the country at large shows a decrease of 5,000,000 for the period mentioned.

AID FOR POULTRY CAMPAIGN

Fifty-One Experienced Poultrymen Employed as Emergency Workers in Thirty-Three States.

(Prepared by the United States Department of Agriculture.)

Fifty-one experienced poultrymen are employed as emergency workers to aid in carrying out the department of agriculture's program for the stimulation of poultry and egg production. Most of these men have had 10 years' experience or more in the industry. Seventeen have been in poultry work for 20 to 29 years, and four have been in the industry 30 years or more.

Included in the workers are a poultryman of international reputation, a vice-president of the American Poultry association, several editors of poultry publications and a number of well-known judges of poultry. All have had practical experience in handling and breeding fowls and more than a few are experienced breeders of exhibition standard-bred poultry.

In co-operation with the state agricultural colleges of 33 states these men are urging everyone who is in a position to do so to keep poultry and to handle it in such a way as to obtain maximum results.

Weeds Reduce Crop Yields.

Considering the principal crops in the United States, it is estimated that weeds reduce the yield of corn by 10 per cent; tame hay, 8 to 16 per cent; potatoes, 6 to 10 per cent; spring grain, 12 to 15 per cent; winter grain, 5 to 9 per cent; tobacco, fruit, and truck crops, 0 to 5 per cent; pasture, 5 to 50 per cent.

TO INCREASE SUGAR SUPPLY

Recommendations Given for Maintenance and Extension of Domestic Cane-Sugar Output.

(Prepared by the United States Department of Agriculture.)

The growers of cane and sugar beets can materially increase the nation's supply of sugar by giving better care to their crops so that the yields will be increased. Following are recommendations for the maintenance and extension of the domestic cane-sugar supply:

Extend the cane-growing areas; use better cultural methods; adopt a crop-rotation system; improve cane varieties; control diseases and insects; utilize more by-products; feed tops and leaves to live stock; substitute cane sirup for sugar; improve the grade of sirup; produce raw sugar to conserve the refined sugar.

To maintain and increase the domestic beet-sugar output the following recommendations are given:

Improve cultural methods; practice proper methods of crop rotation and cultivation; feed by-products to live

stock; work for maximum mill runs; cultivate new areas; drain wet areas and cultivate them; develop new irrigation systems and extend the old ones; induce more farmers to grow beets; harvest the beets more carefully; develop labor-saving machinery; produce an adequate supply of high-grade sugar-beet seed, and develop better strains of sugar beets.

No Difficulty With Sheep.

Many persons have the idea that sheep are hard to care for and handle, and while it is true that sheep have peculiarities, there are no secrets nor anything difficult in the care and management of a flock of sheep. All that is needed is an exercise of patience, perseverance and good judgment. Any country with dry, open winters, abundance of roughage and splendid markets has a decided advantage in this business.

Make-up of Light Horses.

The buyer of the light horse still likes those that are sound, correct types, smooth, of good quality, style, speed and action.

HOW THIS NERVOUS WOMAN GOT WELL

Told by Herself. Her Sincerity Should Convince Others.

Christopher, Ill.—"For four years I suffered from irregularities, weakness,

nervousness, and was in a run down condition. Two of our best doctors failed to do me any good. I heard so much about what Lydia E. Pinkham's Vegetable Compound had done for others, I tried it and was cured. I am no longer nervous, am regular, and in excellent health. I believe the Compound will cure any female trouble."—Mrs. ALICE HELLER, Christopher, Ill.

Nervousness is often a symptom of weakness or some functional derangement, which may be overcome by this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, as thousands of women have found by experience.

If complications exist, write Lydia E. Pinkham Medicine Co., Lynn, Mass., for suggestions in regard to your ailment. The result of its long experience is at your service.

DAISY FLY KILLER

placed anywhere, attracts and kills all flies. Best, clean, economical, convenient, cheap. Lasts all season. Made of metal, can't rust or tip over; will not soil or injure anything. Guaranteed effective. Sold by dealers, or 6 sent by express, prepaid, for \$1.00. HAROLD SOMERS, 150 DE SABLE AVE., BROOKLYN, N. Y.

WINTERSMITH'S CHILL TONIC

Sold for 30 Years. FOR MALARIA, CHILLS AND FEVER. Also a Fine General Strengthening Tonic. At All Drug Stores.

Kills the worm

and heals the wound.—Adv.

Some people are down on their neighbors because they are unable to come up with them.

When Baby is Teething GROVER'S BABY BOWEL MEDICINE will correct the stomach and bowel troubles. Perfectly harmless. See directions on the bottle.

A man who is supposed to know says that marriage without love is like tripe without onions.

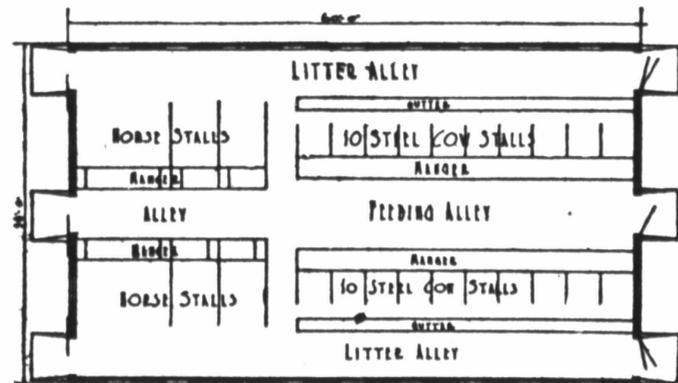

ALL WORN OUT

Doan's, However, Restored Mr. Roulston to Good Health. Results Have Lasted.

"Mornings I was so stiff and sore I could hardly get up," says A. C. Roulston, prop. blacksmith shop, 2949 Washington St., Roxbury, Mass. "The sharp pains through my kidneys were so bad I often thought I wouldn't be able to get to work. I couldn't rest comfortably and turned and tossed from one side to the other, with a dull, dragging backache. There were puffy spots under my eyes and I felt worn out all the time. The kidney secretions passed too often and were otherwise unnatural. Four or five boxes of Doan's Kidney Pills cured me. I can honestly recommend Doan's for they have surely done me a world of good."

Mr. Roulston gave the above statement in 1915 and in March, 1917, he said: "My cure is still lasting. I take Doan's occasionally, however, to keep my kidneys in good working order. One can depend upon Doan's to cure kidney ills."

Get Doan's at Any Store, 50c a Box. DOAN'S KIDNEY PILLS. FOSTER-MELBURN CO., BUFFALO, N. Y.

Floor Plan of Combination Barn.

is 4 square feet for each cow or horse. Windows on the end will admit more light than when on the side.

When there are two rows of cows it is an advantage to have them face in toward the center of the barn; but there are good reasons also for having them face out. The barn can be cleaned out and kept clean easier with the latter arrangement.

Now that silo: You may not be ready to build, but you can at least plan so that when you do build you

found, he ought to be given the fullest protection instead of the fiercest persecution.

Some ingenious workmen in Petrograd more than 175 years ago carved six cannon out of blocks of ice, turned them in lathes, and bored them for 6 inch shells. And they actually fired salutes from them. The ice was sufficiently strong to withstand the explosion of nearly 2,000 grains of real gunpowder.

SALVATION ARMY DRIVE

This is the week that is to witness the big Salvation army drive for money for war purposes. There is no question but what the Salvation army is one of the greatest factors for good in the nation. There is no doubt but what it reaches a class of people that could not be approached through any other channel. As an influence for social reform it has no equal and it should be encouraged to the fullest extent possible. The people of the United States are being called upon to finance many problems, all of them having to do, more or less, with war preparations and war efficiency. Many organizations are participating in this work and all of them are, apparently, honest and patriotic in their intentions, yet the fact remains that many of them will not be able to render service commensurate with the energy and capital expended. The Red Cross and the Y. M. C. A. are already the most powerful factors in the field. They are working under government supervision and are thoroughly and efficiently organized. They are the real agencies upon which our soldiers must rely for relief. If they are supported whole heartedly by the American people they will be able to render all the service that the conditions at the front and at the cantonments make possible. America must "bunch her hits" much like the big league clubs in their world series games. Little dabs of money scattered here and there will not produce the results that might be attained had this money been put under one head and in one fund and expended scientifically. The Salvation army could achieve a much larger efficiency and a much greater amount of actual work if it would devote its time to raising the money through its organization and then forwarding it to the Red Cross or the Y. M. C. A. as its quota for war service. Their efforts would be more patriotic if conserved in this manner than they could possibly if confined to the organization for expenditure directly. True, the organization would not participate personally, as nurses, nor would the Salvation army huts be in evidence, but their influence, their efforts, their money and their patriotism would just as certainly be present as though the huts and nurses were directly under the control and management. This is not a time for building up organizations nor for extending spheres of influence at the sacri-

ifice of wasted energy or economy. Roosevelt county has been hard hit by drouth, yet it has not been heard to complain when called upon for bond purchases, thrift stamps, Y. M. C. A. help or money for the Red Cross, and it cannot be expected to take on more at this time. These constitute the really big things in war activities and any added burdens must, necessarily, be taken on at their expense. For this reason those promoting the Salvation army drive should not be disappointed should they not get the encouragement in this locality they may feel their cause would justly entitle them.

NOTICE FOR PUBLICATION

Department of the interior United States land office Roswell, New Mexico, July 5, 1918.
Notice is hereby given that the state of New Mexico, under the provisions of the Acts of congress approved June 21, 1898 and June 20, 1910, and acts supplementary and amendatory thereto, has filed in this office selection lists for the following described lands:
List No. 8288. Serial No. 043743. Lots 1, 2, 3, 4, section 5, township 6 south, range 34 east, N. M. P. meridian, 168.54 acres.
List No. 8318. Serial No. 043921. Lots 3, 4, 5, 6, section 6, lots 2, 3, 4, section 7, lot 3, section 18 township 8 south, range 36 east, N. M. meridian, 302.48 acres.
List No. 8319. Serial No. 043922. Southeast quarter northwest quarter, northeast quarter southwest quarter section 6: southeast quarter northwest quarter, east half south west quarter section 7, northeast quarter southwest quarter section 13, township 8 south, range 36 east: south half south half section 1: south east quarter northwest quarter, northeast quarter section 12, township 8, south range, 35 east, N. M. meridian, 600 acres.
Protests or contests against any or all of such selections may be filed in this office during the period of publication hereof, or at any time before final certificate.
EMMETT PATTON, Register.

Things Personal

BY THE GUB REPORTER

B. R. Anderson is home from his trip to Wichita, Kansas.

Mr. and Mrs. J. B. Priddy went to Roswell Monday of this week.

Henry Hardt, of the Delphos community, was a cattle shipper to Kansas City this week.

Judge James A. Hall appeared as attorney for plaintiff in a civil suit tried at Dora Monday.

Mrs. E. T. Robertson, who has been visiting with Mrs. J. K. Robertson, returned to her home at Elida last Friday.

George Lougee, chief clerk of the state board of education was transacting business with County Superintendent Sam J. Stinnett this week.

Dr. R. H. Bailey and Mrs. Bailey left Monday for an outing in the Capitan mountains and to attend to some business the Dr. had there.

Frank Warnica and T. E. Bell this week shipped several cars of cattle to the Kansas City market. They report the market off and cattle light.

Mr. and Mrs. Edgar McMinn, who have been here visiting the parents of Mr. McMinn, returned to their home at Fort Worth, Texas, Monday.

Howard Leach, son of Mr. and Mrs. C. O. Leach, left Sunday morning for Roswell where he has accepted a position in the Citizens National bank.

"Chicken" Lott returned Tuesday from a trip to Carlsbad and other Pecos valley points. "Chicken" says that pickin' is rather meager in that locality.

FOR SALE—One five horse Fairbanks-Morse engine and five kw generator, both having been used about thirty days, guaranteed as good as new. R. H. Adams.

J. P. Voyles, of seven miles west, is in receipt of a card from his son which conveys the good news that he arrived safely in France and is rearing to strafe the Hun. Ralph saw service on the border and is a good soldier.

Johnnie Hubbard, the little son of Mr. and Mrs. J. W. Hubbard was run over by an automobile Saturday evening. While the injuries sustained were not serious, it was a miracle that the little fellow escaped with his life.

A party of business men of Portales spent the night at the Pardwick Monday. They drove on down the Valley Tuesday returning in the afternoon. They were S. J. Rice, Frank McNera, Frank Murrell and C. T. Harris.—Artesia Advocate.

Portales and a small scope of country contiguous to it, received about one inch of wetness Monday evening. It was a lollacooler while it lasted and did considerable good. By way of retaliation, lightning burned out two or three transformers leaving portions of the town in darkness and unable to witness the unusual spectacle of falling moisture.

The Red Cross picnic on the court house lawn Saturday afternoon was quite a success. The continued drouth here prevented as large an attendance as was desired, yet, all things considered, there was a goodly number present. Several addresses were made and much enthusiasm was evidenced.

Judge George L. Reese, Jack Wlicox, J. B. Hext, the Journal man, Miss Grinstead and Miss Nelle Carter went to Elida Monday to attend a contest case brought by Lester Prater against the homestead entry of Miss Jewel Grinstead. Miss Grinstead was represented by Judge Reese and Prater by Charley Gilbert, of Roswell. The contestant did not appear to prosecute his suit.

Dr. N. F. Wollard left Monday for Deming to attend a meeting of the doctors that are on the county draft boards. The meeting is for the purpose of perfecting a uniform system of classification and for informing the doctors more especially as to the requirements of the district and national boards, to the end that there may be less confusion and less changes in the classifications by district boards.

J. B. Sledge and Rev. W. W. Turner returned Saturday from their outing at Las Vegas. Mrs. Sledge and mother, Mrs. McGehee and Ruffin Sledge will remain for some time yet. Mr. Sledge says that they enjoyed themselves muchly but did not catch any fish.

Sheriff Arch Gregg made a trip into Texas the first part of the week on official business. In his absence Jim Reynolds occupied the position of high sheriff of the county.

ECONOMY

The world, today, faces a problem in economy, in saving, in conserving, in putting our resources and our energy into things that are worth while. Avoid ALL extravagance and unnecessary waste. Put your surplus money in the bank, get away from its jingle, the temptation to spend will not be near so great, and you'll have it when the pinch comes.

HAARLEM OIL CAPSULES IF YOUR BACK ACHES

Do you feel tired and "worn-out"? Are you nervous and irritable? Don't sleep well at night? Have a "dragged out," unrested feeling when you get up in the morning? Dizzy spells? Bilious? Bad taste in the mouth, backache, pain or soreness in the loins, and abdomen? Severe distress when urinating, bloody, cloudy urine or sediment? All these indicate gravel or stone in the bladder, or that the poisonous microbes, which are always in your system, have attacked your kidneys.

You should use GOLD MEDAL Haarlem Oil Capsules immediately. The oil soaks gently into the walls and lining of the kidneys, and the little poisonous animal germs, which are causing the inflammation, are immediately attacked and chased out of your system without inconvenience or pain.

Don't ignore the "little pains and aches," especially backaches. They may be little now but there is no telling how soon a dangerous or fatal disease of which they are the forerunners may show itself. Go after the cause of that backache at once, or you may find yourself in the grip of an incurable disease.

Do not delay a minute. Go to your druggist and insist on his supplying you with a box of GOLD MEDAL Haarlem Oil Capsules. In 24 hours you will feel renewed health and vigor. After you have cured yourself, continue to take one or two Capsules each day so as to keep in first-class condition, and ward off the danger of future attacks. Money refunded if they do not help you. Ask for the original imported GOLD MEDAL brand, and thus be sure of getting the genuine.—Adv.

Better say only half you think than to think only half you say.

It takes a strong-minded woman to keep her calendar torn off up to date.

Should Survive.

"Do you think this poem of mine will live?"

"It ought to. It seems pretty tough."

The Strong Withstand the Heat of Summer Better Than the Weak

Old people who are feeble and younger people who are weak, will be strengthened and enabled to go through the depressing heat of Summer by taking

Grove's Tasteless chill Tonic

It purifies and enriches the blood and makes you Strong. You can soon feel its Strengthening, Invigorating Effect.

GROVE'S TASTELESS chill TONIC is an exceptionally good general strengthening tonic for pale, sickly children, for delicate Mothers, for Old Folks or any one of the family who has poor blood. It is pleasant to take. Price 60c.

Perfectly Harmless. Contains no Nux-Vomica or other Poisonous Drugs.

Red-Hot Weather! Stomach Off?

No Appetite? Mouth Dry? Tongue Stiff and a Fierce Thirst? Here's Relief!!

Hot, heavy foods and iced drinks often play havoc with bad stomachs in hot weather. The weak ones haven't got a chance. A quickly chilled or overworked stomach is a starter of untold misery for its owner.

When you have that dull, depressed feeling after eating—stomach pains, bowel disorders, heartburn or nausea, belching, food repeating—it is the danger point. You want to look out—and be quick about it in this hot weather.

A way has been discovered to make sick stomachs well and to keep them cool and sweet. It is a commonsense way. No starvation plan of diet is needed. Make this test and see how quickly you get a good appetite in hot weather and enjoy the things you like without misery to follow.

EATONIC Tablets have amazed people everywhere with the marvelous benefits they have produced for thousands of stomach sufferers. Start the test today and let your own stomach tell you the truth.

EATONIC works quick—it absorbs and neutralizes hurtful, poisonous acids, juices and stomach gases caused from undigested foods. Thousands testify that it quickly puts the stomach in a clean, sweet condition—recreates—builds up the lost appetite and makes life worth living for the man who likes good things but who suffers every time he eats them.

EATONIC is absolutely guaranteed to do all this and you are to be the judge. If it doesn't rid you of stomach and bowel troubles most common in hot weather—you get your money back at once. Fight from your own druggist whom you know and can trust. No need of your taking a chance of suffering. Start EATONIC today. You will see.

GENERAL FARM NOTES

- Adopt a systematic rotation of crops.
- Do not attempt to run the binder with badly worn and torn canvases.
- Clover seed of first quality has been difficult to obtain and has reached the highest price in history.
- Millet is handled for hay much the same as timothy.
- Protect your machine from the weather, it will work better and last longer.
- Get an instruction book on your binder from the manufacturer and study it.
- Concrete sidewalks should not be filled for two or three weeks after construction, so as to allow the concrete to harden properly.

- Potatoes require good cultivation.
- Grain cannot be cut with worn or broken sickle.
- Time and money are saved by ordering repairs before harvest time.
- Oil all bearings frequently, using a little oil each time.
- Do not give the machine an oil bath at the beginning of the season and expect it to be sufficient.
- Millet may be broadcasted and covered with a harrow or drilled with a grain drill. It must be covered shallow.
- Preparedness is one of the prime essentials to the successful curing and storage of a good crop of red clover hay.
- Tomatoes ripen better when grown on a trellis or stakes. They can be set closer together in the rows than when allowed to spread over the ground.

POND LILIES.

"I can't understand it," said Mrs. Pond Lily.

"What can't you understand?" asked Miss Green Leaf.

"It never seems to be night any more," answered Mrs. Pond Lily.

"That's so. Perhaps Mr. Night is taking a holiday," suggested Miss Green Leaf.

"That might be so," said Mrs. Pond Lily, "but I have never known it to happen before, and it seems to me that I have heard that the night takes his rest every day—but that he never takes a longer one, and that there are never two days without a night in between."

"Then it's very, very queer," said Miss Green Leaf. "For there certainly must have been a good many days since there has been a night."

"There must have been—and yet there haven't been," said Mrs. Pond Lily. "It's very confusing and most extremely puzzling."

"They had been used as decorations for a very fine luncheon party and then as some visitors were expected for supper the beautiful young girl who had gathered them had said, 'How lovely the pond lilies would look on the supper table.'"

"But they will close as they always do at night," said another member of the family.

"Yes, and then they won't be pretty," said a third.

"But I think I have a scheme so as to keep them awake," said the beautiful young girl whose name was Nellie.

"What?" everyone asked.

"We'll fool them," she said.

"How?" they asked.

"We'll keep on a white tablecloth and make them think it's still bright day. Usually we change and put them on another table where there is a dark cloth and then they go to bed for the night."

So they tried keeping the bowl of pond lilies on the white cloth and sure

The Beautiful Young Girl Who Had Gathered Them.

enough the pond lilies didn't close their eyes and go to sleep! They stayed awake and later there were lights on the table for the supper party.

But the white tablecloth had fooled the pond lilies. And as they were so lovely they were used for decorations for a whole week and they had not known they had missed such a great deal of sleep.

"I don't know that I really feel so sleepy," said Mrs. Pond Lily. "That is when I think about it I don't feel so sleepy, but it really doesn't seem natural."

That night they were taken away from the white cloth and they closed right up and went to sleep.

When they were sleeping quietly Mr. Night came to them dressed in his dark night cap and heavy, dark robe.

"Where have you been all this time?" asked Mrs. Pond Lily.

"I've been around," Mr. Night answered.

"Did you have a pleasant trip?" asked Mrs. Pond Lily, feeling sure she hadn't heard Mr. Night correctly.

"I had a fine trip," said Mr. Night, "each day, and every night was back at work again."

"What do you mean?" asked Mrs. Pond Lily.

"Why, my dear Mrs. Pond Lily," answered Mr. Night, "you were wide awake because they had fooled you—the people had—they had made you think it was day by putting a bright, daytime-looking cloth under you."

"Had they, really?"

"They had, indeed," said Mr. Night. "And how I chuckled when I saw it."

"You must have," said Mrs. Pond Lily. "Well, that was a good joke on us, certainly. And to think we didn't even notice you."

"Yes," said Mr. Night, "if I had been a more sensitive old fellow I would have been very much hurt, but so many things and people go to sleep and are given pleasant dreams and rest owing to me, that I didn't mind seeing the pond lilies fooled for a change."

Only Small Sizes Left.

"These shoes are too small for me," said the customer.

"Best I can do," replied the shoe clerk.

"How's that?"

"On account of the war."

"What has the war to do with the size of shoes?"

"A whole lot. You know, they're sending shoes to the boys 'over there' in large numbers."

One of the great drawbacks in this world is that a man never knows it is too late until it is too late.

As a female entertainer the average man isn't in it with a cheap looking-glass.

Beats Hun Glass.

The United States bureau of standards has just issued a report on its tests of American-made glass for chemical use, which shows all the new American brands to be superior to the Kavalier and equal or superior to the Jena, both German glass that was almost universally used before the war.

Adruco Barbed Wire Liniment heals without a scar.—Adv.

The woman of the hour is the one who promises to be ready in a second.

A defective stomach keeps more people awake than a guilty conscience.

The Effects of Opiates.

THAT INFANTS are peculiarly susceptible to opium and its various preparations, all of which are narcotic, is well known. Even in the smallest doses, if continued, these opiates cause changes in the functions and growth of the cells which are likely to become permanent, causing imbecility, mental perversion, a craving for alcohol or narcotics in later life. Nervous diseases, such as intractable nervous dyspepsia and lack of staying powers are a result of dosing with opiates or narcotics to keep children quiet in their infancy. The rule among physicians is that children should never receive opiates in the smallest doses for more than a day at a time, and only then if unavoidable.

The administration of Anodynes, Drops, Cordials, Soothing Syrups and other narcotics to children by any but a physician cannot be too strongly decried, and the druggist should not be a party to it. Children who are ill need the attention of a physician, and it is nothing less than a crime to dose them willfully with narcotics.

Castoria contains no narcotics if it bears the signature of Chas. H. Fletcher. Genuine Castoria always bears the signature of *Chas. H. Fletcher*

Reverse Methods.

"You are the same kind of a scamp your father was before you."

"Well, then, why is it he is now always after me?"

Lemon Juice For Freckles

Girls! Make beauty lotion at home for a few cents. Try it!

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle, sunburn and tan lotion, and complexion whitener, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands and see how freckles, sunburn and tan disappear and how clear, soft and white the skin becomes. Yes! It is harmless.—Adv.

Old Grist Mill to Norristown.

The Montgomery County (Pa.) Historical society has appointed a committee to arrange for the removal of an ancient grist and sawmill in Horsham, built in 1784, to Elmwood park, Norristown. The old mill, not operated for many years, has been offered to the society by Miss Mary Iredell. It was an old relic and the town council of Norristown has signified that if it is accepted by the historical society and placed in Elmwood park along Stony creek, it would be taken care of by the borough in order that future generations may see how flour was ground and lumber sawed in pioneer days. It is the intention to bring to Norristown, if possible, the large driving wheel, turbine wheel and cob crusher.

Brazil Filling Up.

The number of immigrants entering Brazil during the period of 1906 to 1910 totaled 926,282. Their nationality was principally as follows: Germans, 33,578; Austrians, 21,843; French, 9,207; Spaniards, 190,787; Italians, 153,950; Japanese, 15,773; Portuguese, 354,820; Russians, 49,477; and Turco-Arabs, 481,534.

Not Entertaining.

Molle—"And did she entertain you last night?" Oholie—"No, she sang the whole time."

The offspring of the pugilist is apt to inherit his father's black eyes.

Not a truth has to art or to science been given, But brows have ached for it, and souls toiled and striven.

FISH WAYS FOR FISH DAYS.

One must learn how to judge a fish in the market and be able to tell a fresh one from the stale variety. The flesh must be firm, eyes bright, as well as the gills. The man who likes fish soft may have taste, but it is all bad. The sooner a fish is scaled after coming from the water the easier it is done. Take a small sharp knife and scale from the tail to the head. Pouring boiling water over the fish is recommended as an easy way to loosen the scales, but the fish must not lie in the water more than an instant. Hold knife in a slanting position while scaling and the work will be easier. One old fisherman uses a common curry comb to remove the scales; it hastens the process.

Fish, after scaling, should be split and the entrails removed, washing thoroughly; but not allowing it to lie in the water, as it will soon lose its flavor. Those of us who have eaten brook trout which have been caught, cleaned and fried within an hour, know how delicious fish can be.

When fish is to be boiled, lay it in a thin piece of cheesecloth, tie it well and put into a kettle of water. A bay leaf, pepper korns, onion or parsley may be used for seasoning. Simmer gently, allowing ten minutes to the pound for cooking. Lift out carefully, remove the cloth and garnish with lemon quarters and parsley.

To fry fish, dip it in seasoned cornmeal, then fry in any sweet fat, seasoning it well while cooking. Salt fish should be soaked in water and softened by slow cooking; if boiled rapidly the fiber will be toughened.

Fish Salad.—Cut the pieces of boiled fish in bits, or flake with two forks, season with lemon juice and arrange lightly on a bed of watercress. Peel and boil three large potatoes; drain, mash and beat until light, season with salt, two tablespoonfuls of corn oil, the yolks of two eggs well beaten and a tablespoonful of vinegar, beating well while adding.

Salt codfish, served in a white sauce, using sour cream in place of the usual milk, is a most tasty dish.

Knowledge and wisdom, far from being one, Have oft times no connection. Knowledge dwells in heads replete with thoughts of other men; Wisdom in minds attentive to their own.

—William Cowper.

SUMMER DISHES.

When vegetables are so plentiful one need not fear monotony in the diet.

Green Peas Cooked With Lettuce.—Have ready a quart of fresh peas and a head of lettuce. Shred the leaves coarsely and place the peas over the fire in boiling water; add a small onion and a bunch of parsley, cover and cook for 25 minutes, or until the peas are tender. Remove the onion and parsley. Cream a fourth of a cupful of fat. Add a teaspoonful of salt, a fourth of a cupful of flour (corn flour) and pepper to taste; add a little hot liquor from the peas and when smooth add to the dish of peas and simmer six minutes. Just before serving add three tablespoonfuls of butter substitute and turn into a vegetable dish. Serve hot.

Rochester Soup.—This is a rich dinner soup. Blanch two-thirds of a cupful of almonds, chop and pound in a mortar. Add gradually while pounding four tablespoonfuls of milk and a half teaspoonful of salt; then add three cupfuls of chicken stock, one sliced onion and throw stalks of celery broken in bits. Simmer an hour then rub through a sieve and bind with three tablespoonfuls of butter substitute and three of flour well blended. Cook until the starch is well done and serve hot.

Asparagus Salad.—Tie a bunch of asparagus tips together and steam until tender. Cut rings of tomato or red pepper, slip the stalks into the rings, lay on a lettuce leaf and serve with salad dressing.

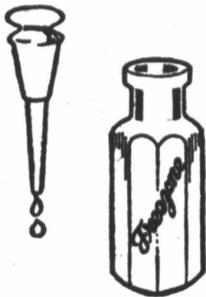

Creamed Onions.—Take two bunches of young green onions, cook and serve in a butter or white sauce as one does asparagus, making a most tasty dish; serve on toast. A few young onions with asparagus will help out when there is not enough of the asparagus to serve, and the combination is especially good.

Nellie Maxwell

LIFT OFF CORNS!

Doesn't hurt at all and costs only a few cents

Magic! Just drop a little Freezone on that touchy corn! Instantly it stops aching, then you lift the corn off with the fingers. Truly! No humbug!

Try Freezone! Your druggist sells a tiny bottle for a few cents, sufficient to rid your feet of every hard corn, soft corn, or corn between the toes, and calluses, without one particle of pain, soreness or irritation. Freezone is the discovery of a noted Cincinnati genius.

What "Maru" Means.

The word "Maru," attached to the name of every Japanese merchant ship and commonly accepted as meaning "ship," has no especial meaning, according to Captain Takeshima of the Japanese steamship Hudson Maru, recently captured and released by a German raider in the South Atlantic. Captain Takeshima said that the word is the survival of a Japanese custom centuries old. He explained the origin as follows: "There are two opinions as to how the custom originated. One of the stories is that in ancient times the Japanese attached 'maru' to the name of anything highly prized. It was first applied to a ship's name about 2,000 years ago, when the Empress Jingo sent an expedition to Korea. She added the word to the name of the ship that transported the troops to Korea. Ever since then 'Maru' has been part of the name of every steamship or sailing vessel. It is never used with the name of a warship."—Fishing Gazette.

Hard Boiled Sergeant.

At a regular Saturday morning inspection, a private was not wearing his belt.

First Sergeant—Have you a belt? Private—No, sir.

First Sergeant—You report to the quartermaster sergeant for a new one, and don't forget to tell him to charge you for the one you lost. I'll stop this carelessness!

Private—All right, top, but I loaned you the belt about two months ago. —Corp. S. C. Samuels, Battery C, One Hundred and Twenty-Sixth Artillery, in Judge.

The Community Phone.

The war has about eliminated gossip over rural telephone lines in the Owensville community. The old familiar answer from central that the "line's busy" has been crowded out by answers of this kind:

"Can't ring 'em. They are out soliciting for the Red Cross."

"You'll find 'em at the Red Cross work shop."

"Mrs. Farmer is helping put up hay. Gall later."

"Haven't been able to ring 'em all day. They are out at work."

A Daylight Scorer.

The Bee—That firefly is a slacker. The Ant—Yes, if he got up earlier he wouldn't have to make a light.

Some men take what is in sight and hustle for more.

WHY BALL CAN BE CURVED

Presence of Irregularities on the Sphere Alone Makes the Feat a Possibility.

If it were not for "mountains" on a baseball much larger in proportion than any mountains on earth the clever pitcher could not get so much as a sixteenth of an inch curve in it.

If a baseball were a perfect sphere the best pitcher in the world could not make it curve a hair's breadth other than the natural curve produced by gravity. The reason the baseball curves, says the American Boy, is because it is covered with "mountains." There are great peaks and ridges, valleys and cliffs, gullies and craters all over it. Magnified 10,000 diameters, all these things may be seen, and they present a far more rugged landscape than any mountainous region in the world. It looks like an exaggerated combination of the Grand Canyon, Bad Lands, Alps and Rockies.

It is these irregularities that make it possible for a pitcher to curve his baseball. Of course he knows how to hold and throw it, but in passing through the air the friction strikes upon these ragged edges even though they have to be magnified 10,000 diameters to be seen with the naked eye, and cause such a pressure as to make the ball leave its natural course.

Right You Are.

Mrs. Flatbush—I see that Chile's tillable soil is held by seven per cent of the population.

Mrs. Bensonhurst—That's pretty low.

"Why so?" "Because in this country the percentage of men who carry soil around on their boots is very considerably higher than that."

To get rid of germs in ice cream, boil it and serve while hot.

How superior a boy feels when he hears some other boy being scolded.

Just Once! Try Dodson's Liver Tone! Take No Calomel! Listen To Me!

If bilious, constipated, headachy or sick, I guarantee relief without taking dangerous calomel which sickens and salivates.

Stop using calomel! It makes you sick. Don't lose a day's work. If you feel lazy, sluggish, bilious or constipated, listen to me!

Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel, when it comes into contact with sour bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just try a spoonful of harmless Dodson's Liver Tone.

Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tone for a few cents. Take a spoonful tonight, and if it doesn't

straighten you right up and make you feel fine and vigorous by morning, I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not salivate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep the entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste. —Adv.

Soft Coal Increased.

The fuel administration announces that during a recent six-day period 11,688,000 net tons of bituminous coal were mined in this country. This amount is an increase of 5.7 per cent over the production of the week before. For the month, it is estimated, 46,478,000 net tons were mined, which is about 10 per cent over the amount mined during April, 1917.—Pathfinder.

Patriotic.

Patience—And so they are married! Patrice—Oh, yes.

"And where are they spending their honeymoon?"

"He's spending his in the trenches, and she's spending hers in her war garden."

She Remembered the Face.

"Now take this medicine, Bessie, it is fine for the complexion; it will make you have a beautiful face."

"But, mamma, Ethel took some of it yesterday."

"Yes, I know she did, dear."

"Well, it made her have anything but a beautiful face."

Discreet.

She—That dealer is a fraud. He said the parrot knew a lot of words.

He—Maybe they are words he doesn't like to say in the presence of a lady.—Boston Evening Transcript.

A man may succeed in becoming a hero to his valet, but to his mother-in-law—not by any means.

HUNT'S Salve

GROVE'S BABY BOWEL MEDICINE

This valuable and harmless Baby Medicine is composed of the following:

BISMUTH, LIME, PEPSIN AND CATECHU WITH PURE SIMPLE SYRUP

Bismuth is healing to the mucous membrane of the stomach; the Lime neutralizes the acid where there is a sour stomach; the Pepsin digests any indigestible food that may be in the stomach, and the Catechu acts as a mild astringent to control the bowels where there is a disposition to Dysentery, Diarrhoea, Flux or Sick Stomach.

GROVE'S BABY BOWEL MEDICINE is not a patent medicine. We give the ingredients and tell the effect of each ingredient so that you can judge for yourself.

SPECIAL NOTICE.—This preparation does not contain Morphine or Opium in any form and we don't advocate the giving of Opium unless it is absolutely necessary.

RELIEVES SOUR STOMACH

For Dyspeptics who are Troubled with Sour Stomach

AIDS DIGESTION

It Relieves Stomach and Bowel Trouble and is Just as Good for Adults as for Children

We have numerous letters on file from parties claiming that this preparation relieved their babies of Chronic Dysentery, where everything else had failed and where they had been troubled in this way for several years. Children like to take it.

For sale by all Dealers in Drugs.

Made and recommended to the public by PARIS MEDICINE CO., Manufacturers of LAXATIVE BROMO QUININE and GROVE'S TASTELESS CHILL TONIC, St. Louis, Mo.

FORDSON TRACTORS

This is to announce to ROOSEVELT COUNTY that we are the agents for FORDSON Tractors--the long expected personal invention of Mr. Henry Ford. Mr. Ford spent several years building tractor models and demonstrating them, and at last settled on this tractor. In perfecting it, they were shipped to many different states of the Union and absolutely worn out under the very hardest of usage and under the personal supervision of Mr. Ford.

Among the special features are: Weight, 2700 pounds; removable engine head, giving easy access to valves and working parts; 22 horse power; 38 inch tread between wheels; not built on frame; all gears and working parts enclosed and run in oil; will draw two 14-inch plows in stiff soil; burns kerosene, two and one-half gallons per acre being an average.

Experience has pointed to the small, light tractor, which will meet the varying conditions, will pull any implements and do all the work generally done by horses, and at less cost. In addition, by attaching a belt pulley, the FORDSON will drive farm machinery, such as silage cutter, pump water, run thresher and do a variety of work. Special devices used to keep out dust and dirt--all parts being enclosed and run in oil. The motor, transmission and rear axle are assembled together, forming one rigid unit. The absence of any frame gives quick and easy access to all parts for adjustments or repairs and allows the tractor to be taken apart in a few minutes. The motor is capable of delivering its full power continuously.

We predict that, within two years time, there will be as many FORDSON tractors in Roosevelt county as there are FORD cars now. A full stock of parts will be carried by us, and there will be no delay in making repairs or supplying parts.

We will have one FORDSON within a short time, and will demonstrate its utility. Farmers desiring delivery this fall should not delay placing their order with us. Pamphlets giving complete description can be had for the asking.

NOTICE OF PENDENCY OF SUIT

The state of New Mexico to Henry B. Allen and Martha M. Allen.
Greeting: You are hereby notified that a suit has been filed against you in the district court of the Fifth judicial district of the state of New Mexico, in and for Roosevelt county, wherein the Advance Rumely Thresher Company is plaintiff, and you, the said Henry B. Allen and Martha M. Allen, are defendants, said cause being numbered 1393 upon the civil docket of said court. The general objects of said action are as follows: Plaintiff sues the defendants upon four promissory notes and a mortgage, executed by the defendant, Henry B. Allen, and delivered to the Rumely Products Company on the 17th day of November, 1914, and thereafter duly assigned to the plaintiff, for the sum of \$1600.00 less a payment of \$668.50, with interest thereon at the rate of 8 per cent per annum until maturity and 10 per cent thereafter until paid, and the plaintiff seeks to foreclose said mortgage given for the security of said sum including 10 per cent additional on the amount due, for attorneys fees, and a further sum of \$37.46 for taxes paid by the plaintiff for the defendants, upon the following

real-estate to-wit: The northwest quarter of section twenty-seven in township one south of range thirty-three east of the New Mexico Meridian, New Mexico, and the plaintiff prays for the sale of property upon the foreclosure thereof, and for the application of the proceeds to the payment of his said judgment and demands; to have his said mortgage declared a prior lien upon said described real estate, superior to any claim of the defendant, Martha M. Allen, who is alleged to have purchased said property subsequent to, and with due notice of plaintiff's said mortgage; and for general relief, with costs of suit.

You are further notified that unless you enter your appearance in said cause on or before the 31st day of August, 1918, the plaintiff will take judgment against you by default in said cause and will apply to the court for the relief demanded in the complaint.
You are further notified that George L. Reese is the attorney for the plaintiff and that his post office address is Portales, New Mexico.
Witness my hand and the seal of the said court on this the 8th day of July 1918.
[Seal] SETH A. MORRISON, Clerk.

NOTICE OF SUIT

No. 1392
In the district court of Roosevelt county, New Mexico.

R. H. Morrow, plaintiff, vs. James J. Chapman, Ruth Chapman, the unknown heirs of said James J. Chapman and Ruth Chapman, and unknown claimants of interest in the premises adverse to plaintiff, defendants.

The State of New Mexico to James J. Chapman and Ruth Chapman, the unknown heirs of the said James J. Chapman and Ruth Chapman, and the unknown claimants of interest in the premises adverse to the plaintiff, greeting:

You are notified that suit has been commenced in the district court of Roosevelt county, New Mexico, entitled and numbered as above; that the general objects of said suit are that plaintiff have his title to the northwest quarter of section twenty-seven, and the northwest quarter of section twenty-eight in township four south of range thirty-two east of the New Mexico meridian, New Mexico, quieted and forever set at rest against your adverse claims, and that you be barred and estopped from claiming title to said premises adverse to plaintiff. Unless you appear in this cause on or before the second day of August, 1918, you will be adjudged in default and plaintiff awarded the relief he prays.
Plaintiff's attorney is James A. Hall and his business address is Portales, New Mexico.
Witness my hand and seal of court at Portales, New Mexico, this the 19th day of June, 1918.
[Seal] SETH A. MORRISON, County Clerk.

Notice has been received from Denver that knitted articles are more in demand just now. Roosevelt county's quota is 107 sweaters and 645 pairs of socks to be finished and shipped by September 1st. All branches are asked to send in their orders for yarn to the local secretary, Mrs. A. F. Jones. Mrs. J. P. Stone and Mrs. Rose McDowell have plenty of yarn on hands to supply the town chapter. Please send in finished articles at once so that they may be shipped. The Portales chapter has some cut pajamas on hands and expect a large shipment of refugee garments soon. Each branch will be asked to take as many as 20 refugee garments. All chapters are hence forth asked to buy all materials from headquarters, especially yarn, outing, etc.
Mrs. Arthur Jones, Secretary.
