### Big Sugar Beet Mass Meeting Called for Saturday, 1:00 P. M., at Court House! Be There!

#### Preparing Land For Irrigation

More crop failures on the irrigated lands of New Mexico may be traced to faulty leveling than to any other cause under the control of the farmer. Poorly leveled lands are expensive to irrigate, both with regard to the amount of water and the amount of labor required; and in addition the plants in the different parts of the field are so unequally watered that unsatisfactory crops are the result. The machinery necessary for leveling on the small farm is simple and inexpensive, and should be kept, in order that all spare time of men and teams can be used to the best advantage. On the small farm all that is necessary is a small Fresno scraper, a plow, and a plank drag.

In leveling, the first thing to do is to decide just how the land is to be put into shape by moving the least amount of dirt. A good way to begin is to set stakes to represent borders, and see how they may be located in order to obtain the best results. It is not necessary that an entire field should be level, but only that the soil within a border be so; and each border may drop lower or rise higher than the one adjoining, without any serious inconvenience in either seeding or harvesting. Borders should not be spaced too wide. Forty-five to sixty feet will be a good width if the field is at all sloping; and it is not best to make them more than 100 feet apart, even when the land is level. Locate each border definitely, and mark it by throwing up a couple of furrows, or in any other way that is convenient. Then beginning the high end of the field, work out the first border, taking all excess dirt from the high places and spreading it where needed in low places. In sandy soils the borders should not be more than 200 or 300 feet in length, but on clay soils no limit need be set for the length. For the location of the borders, especially if they are long, it is almost necessary that a level be used. These may be purchased for about \$18 to \$20. Permanent borders should be built at the time of leveling. These should be just high enough to control the movement of water and should be wide enough to prevent any danger of their being dragged down by machinery or washed down by the running water. A convenient and very satisfactory way to build such borders is to drag up the dirt with a scraper and deposit it along the lines of the border; where it should be smoothed into the desired shape. If the borders are built with a broad base and slowly sloping sides, crops can be grown along the sides and top without any difficulty. The base of such borders should not be less than eight to ten feet wide. After all borders and the checks or cross borders are complete, it is best to go over each section of the field and true up all slight inequalities that may have been missed in the first leveling. Here again the level is of great value, as it points out these errors much more closely than the best trained eye. If

there is free and abundant supply of water, and the field will not need it for some time, it is well to give it a trial irrigation, making note of all the points that are either low or high, and correcting these as soon as the soil is dry.

One thing that must be borne in mind is that where any large amount of earth is hauled into a low place, the level of the soil will be destroyed by this soil settling, after the first few irrigations, unless allowance is made for this and a slight excess of soil is moved in. This is hard to estimate, and for this reason it is well that the field be not seeded to a permanent crop, like alfalfa the first year after any decided leveling. The small grains are perhaps the best crops to try on newly leveled fields. They do not occupy the soil for a great length of time, and can stand an excess of water in any place that happens to be low, perhaps better than a majority of the crops grown in this region. Then too, the surface is left in an excellent condition for correcting slight inequalities in level that may yet remain. When these corrections are made, the soil should be ready to put in alfalfa or any other crop that will be on the land for years with no fear of drowning out the lower levels. Great advantage in operation results from the use of well built boxes and gates for the turnouts and other control of water.

J. H. SQUIRES, Agronomist.

#### Register For City Election

Every legal voter of Portales should see to it that he is properly registered for the coming city election. It greatly facilitates the work of the election and it is required by law. The board of registration is composed of T. L. Keen, Judge H. F. Jones and Joe Beasley. Do not delay this matter.

Not the largest but the best at the lowest prices is the combination offered in the grocery, feed and sale stables of E. S. Boucher. Try it and be convinced.

#### Collinsworth-Givens Nuptials

Tuesday at high noon, at the home of Mr. E. P. Aldredge in Portales, two of the best known and highly esteemed young people of the Macy community were united in holy wedlock, ye editor officiating. The contracting parties were Mr. A. M. Collinsworth and Miss Mabel B. Givens, Mrs. E. P. Aldredge, Dr. N. F. Wollard and Eulalia Wollard and the minister making up the party. Mrs. Collinsworth has been a member of the Macy community for four or five years, being the daughter of Mr. Sam Givens; while Mr. Collinsworth has spent some three years in the futile attempt to run a successful "Bachelor's Ranch" in the same community. He soon got enough of that pro-

gram and knew it, and no sooner did he get Miss Givens' consent to change her name to Collinsworth and break up the monotony of "batching on a New Mexico claim" than he was ready to come into town and launch the new program of living "at home."

They are splendid young people of mature age and had evidently thought out the problem for themselves and in a very matter of fact way determined to link their lives forever.

The Herald extends them its most cordial good wishes and expresses the belief that if hundreds of other New Mexico young people would follow their example, both they and New Mexico would be better off.

Go to Dobbs' for all the leading magazines and dailies.

#### Portales Has Tag Day

Portales has survived a "Tag Day!" It probably occurred to the average citizen Tuesday that every man, woman and child in Portales was made a victim of the tag day graft, so complete was the surfeit of tags which hung streamer-like from the lapel of every coat. Had only the city marshal been out with his tags and attached the stray canines about the town, the whole family would have been properly labeled.

This tag method is decidedly the most scientific method of separating a fellow from his coin that has ever been devised. It works like a charm on all classes—being no respecter of persons. The grouch, the miser, the broke and bent, as well as the fellow who is always willing to cast his bread upon the waters freely, are alike easy victims, being willing to disgorge a shop-worn dime for the little piece of paste-board which will be proof positive that he has been taken to the branch and made to drink.

It makes no difference whether the man is married or single, he is sure to cough up by this modern method. The beauty about the plan is that it can get the money without any semblance of the cork-screw operation—in fact it is painless, superb—it gets the money and leaves a smile on the face of the victim.

As we started out to say, the plan works admirably on all classes—the married, the single, the fat and the lean and every class and condition of humanity—even the knocker. The plan usually contemplates a bevy of beautiful young ladies as the selling agents, and this is really the secret of the success of the enterprise. Just you let a beautiful little dash of femininity approach the average citizen on the streets of Portales and dare to tie a tag in the button hole which adorns the lapel of his coat and see how quickly he will submit to the operation—even if it does cost him a dime or a quarter for the simple little piece of paste-

board. If he be a married man, this personage of the apron-string variety at once forgets the coaching of years and submit to the nervous sensation of having the little label tied in place, all the while wondering why he cannot refrain from acting like a silly school boy. A little incident which occurred in the postoffice a few days ago illustrates the position in which the average married man finds himself on tag day also conveys a very definite idea as to how it works on the old bachelor. The writer was in a certain group of men waiting at this public place for the day's grist of mail, when he heard Judge Seay chiding a prominent young married man for gazing at a couple of Portales' most beautiful young ladies. In answer to the Judge's challenge, the aforesaid young benedict replied that he just simply couldn't help it! A case-hardened bachelor standing near and hearing the retort, said: "I don't even try!" So there, you have the secret of the amazing success of tag day.

This writer knows that he will strike a sympathetic chord in the hearts of every married man in town when he says that the tag scheme as it is usually conducted strikes him at a point of least resistance. Even if he is normally as invulnerable as Achilles this tag scheme will find the susceptible opening and before he is aware of it he has separated with a piece of his silver and is endeavoring to assume a Chesterfield demeanor while the tag is finding its abiding place upon his person. It always was a most embarrassing position to the average man to have some dainty little artist of loveliness (other than his wife) to four-in-hand his tie, pin a bunch of violets on his coat lapel or ditto a tag, but notwithstanding this antipathy on the part of man, he very rarely takes the tag and places it himself, though some few do—take the whole thing with a gulp, give up his money, take the tag and then stick it in his pocket. Of course this class get very little for their money—not even sympathy or pity. And it is usually this type of man who would go away and say that the whole thing was a graft from beginning to end.

But this tag day enterprise was no graft. The proceeds are used to defray the expense of some high and noble purpose of the Mother's Club of Portales, which has done and is doing and will do things for the social uplift of the community, and there is not a soul who contributed to the enterprise so small as to say aught against it.

The total gross receipts of the day amounted to some \$56.00.

The Woman's Club in regular session yesterday extended a vote of thanks to Mrs. O. B. Staples for efficient services rendered the club as secretary. In the departure of Mrs. Staples, the Woman's Club loses a valuable member. The meetings will begin promptly at three o'clock hereafter.

Editor Darnell of Elida was up yesterday attending court.

**No Statehood Yet.**

New Mexico has again suffered irreparable loss at the hands of a few political joke-smiths who think it a small matter to trifle with 800,000 people in order to conserve their own selfish political designs. This death dealing blow has been attributed to Senator Owen of Oklahoma, democrat, who is charged made the approval of New Mexico's constitution contingent on the approval of that of Arizona and by successful filibustering killed New Mexico's chance for admission at the sixty-first congress. However, statehood is only postponed and without disapproval at next regular session or with affirmative action at extra session which is called for April 4 we will yet become a state.

The loss of statehood at this session was received in Portales with varying degrees of satisfaction and disappointment, some willing to proclaim Senator Owen a hero, while others could not appreciate the attitude at which he was placed by his admirers. It is needless to say that the delay of statehood will at least have the effect of dampening the ardor of the many patriots who had concluded to offer themselves for public office in the new state. Of course most of these cases were merely instances where the insistence of "friends" had finally urged them to come out and offer themselves, which leaves the saddest part of the story to these selfsame "friends" rather than the candidate.

It is a travesty to justice that the admission of New Mexico should ever have made contingent on the admission of Arizona. This, of course, involves no opinion as to the merits of Arizona's claim to admission. If Arizona did not satisfy the conditions imposed by the enabling act, that was not New Mexico's fault, and New Mexico ought not to have been made to suffer. Yet New Mexico was made to suffer when, by means of a filibuster, Senator Owen forced New Mexico into the same boat with Arizona. Senator Owen's course could be justified only on the ground that the interests of a party are paramount to the rights of a people, and we shall live a very long time before subscribing to that theory. The fact that the admission of New Mexico without the admission of Arizona would have had the effect of increasing the Republican strength in the Senate and in the electoral college makes an argument only in the minds of those who are more sensitive to party than to patriotic considerations. If there is any excuse for Senator Owen, it is to be found in the fact that he emphasized the irrepressible issue between progressive and reactionary statesmanship.

So long as the chances of the two territories for statehood is placed in the balance as to whether their admission will affect the standing of either two of the political parties in power, just that long may we expect disappointment at the hands of shyster politicians. If the admission of New Mexico as a state had been considered on its merits rather than the complexion which its star would have cast in the future strength of either one of the two political parties we would long ago have been in the Union. As it is, it is

purely a game of politics, in which the destiny of a great commonwealth is toyed with as if we were blind mice. Such is the mass of political machinery with which we are entrapped and held captive at the will of self-seeking politicians.

**Sanity About Prevail.**

It is significant that the erstwhile warring factions which have dominated the city elections in Portales are coming together on some plan to segregate the selection of its aldermen from the prohibition issue, all of which shows that we are progressing in the matter of working out our own salvation.

The Herald has scarcely been able to detect one dissenting voice in the plan proposed in an article which occurred in last week's paper under the caption "The Coming Municipal Election," though there are several features connected with the perfecting of the plan which have not yet been worked out, and which the scope of that article did not contemplate. But it is enough at this juncture to commend the efforts of those to facilitate the ONE-TICKET idea for the reasons heretofore mentioned. After this has been agreed upon by the people it is then time to wage the campaign "For" or "Against" the saloon. This paper is gratified at the prospect for the harmonious plan of getting together on the men whom we know to be best qualified for the places of alderman, for it removes the prohibition fight from personalities and leaves this issue to be settled solely on its merits. The prohibition issue then becomes a matter of principle and is not confused with speculations as to whether this or that alderman is a pro or an anti, or as to whether he will likely exert himself to enforce the prohibitory ordinance if he is placed in position so to do. This latter consideration can reasonably find solution in the choice of the men.

After the preliminaries are all settled in the furtherance of this plan it will then remain for the prohibitionists of the town to get busy as they never have before. The Herald serves notice in advance that it will wage a ceaseless warfare against the return of the saloon during the short time in which we have to make the campaign, and our desire to see thoroughly crystallize the sentiment of the town for the absolute suppression of the traffic as far as this locality is concerned has been the paramount consideration in our advocacy of the plan to segregate the election of aldermen from the settlement of the prohibition issue. It can readily be seen that a newspaper can do its best work in behalf of a cause along the lines of this proposed plan, for then it is not a matter in which the personal element enters, but is very clearly a question of principle which can be discussed according to well defined laws of logic.

Believing as we do that the saloon has no place in an enlightened community the Herald will enter the arena with a keen sense of the duty which it owes to its constituency.

Fully nine out of every ten cases of rheumatism is simply rheumatism of the muscles due to cold or damp, or chronic rheumatism, neither of which require any internal treatment. All that is needed to afford relief is the free application of Chamberlain's Liniment. Give it a trial. You are certain to be pleased with the quick relief which it affords. **Accomplishments of 61st Congress**

Washington, March 4.—Out of the grist of bills that went to the mill of Congress in the session that ended today emerge these results of more or less imperative interest:

**Positive results:**  
Provision of \$3,000,000 for the fortification of the Panama Canal.

Provision for two new battleships.

Recodification of the judicial code—regarded as most important for the amelioration of the law's delay.

Creation of forest preserves in the Southern Appalachian and White Mountains.

Provision for the construction of embassy and legation buildings abroad.

Requiring the inspection of locomotive boilers.

Creating Robert E. Peary a Rear Admiral on the retired list of the navy and formally tendering thanks of Congress to him.

Creating a commission of five Senators and five Representatives to investigate conditions in Alaska.

**Negative results:**  
Failure of the Canadian reciprocity agreement in the Senate and consequent certainty of an extra session.

Failure of the permanent tariff board bill which passed the Senate, but was killed by a filibuster in the House.

Failure of the resolution to admit to statehood Arizona and New Mexico following a filibuster in the Senate.

Failure of the proposal to increase the rate of postage on the advertising sections of large magazines.

Failure of the Senate resolution providing for the direct election of United States Senators.

Failure of the general age pension bill.

Failure to act on Ballinger Pinehot investigation reports.

Failure to enact the ocean mail subsidy, passed by the Senate.

Failure of bill fixing canal tolls and settling form of government for canal zone.

Failure of congressional reapportionment bill based on the new census.—Ex.

Are you frequently hoarse? Do you have that annoying tickling in your throat? Does your cough annoy you at night, and do you raise mucus in the morning? If so, take Chamberlain's Cough Remedy and you will be pleased. Sold by Pearce & Patterson Pharmacy.

Call the garage, 45-2r. when in need of automobile repairs and accessories, oils and etc.

**To Close at Six.**

The merchants of Portales have entered into an agreement to close their places of business at 6:00 p. m. during the spring and summer months, except Saturdays, the new order going into effect the 13th inst. This arrangement is made necessary in order to give those who are confined to their places of business day in and day out an opportunity to recreate. The buying public can easily accommodate itself to the plan by remembering this.

(Exact Cut of Clifford G.)

**CLIFFORD G.**

This is the horse owned and handled by Jno. H. Young, season '10. **CLIFFORD G.** is a standard bred saddle and harness horse, a thorough-going pacer, an excellent saddle horse that can show you the gaits; he is a beautiful seal brown, has fine style, good back, good strong quarters, heavy muscles, good bone, excellent feet, stands 16 hands and weighs 1005 lbs. at 3 yrs. 5 months old; fine disposition, quiet and easily managed—any woman or child who can manage a horse can drive or ride him, and he wins admiration wherever shown. If you want a horse on which you can rely for safety in any and all conditions, you want to raise a Clifford.

**Pedigree**—Clifford G. was sired by Clifford H. Jr.—the Guideless Wonder—2:19; he by Clifford H.; he by Major P., 2:28; he by Bay Tom; he by Bedford Beauty; he by Knight's Snowwheel, sire of the dam of Hal Pointer 2:04; he by Dr. Knight's Tom Hal; he by Kittrell's old Tom Hal. Bay Tom's first dam Dove, by Clardy's Copperbottom, sire of Mohawk and he the sire of Pat Malone; 2nd dam by Traveler, 3rd dam by Packett's Glencoe, 4th dam by Stump Thedealer, he by Timoleon. Major P's 1st dam by Crockett's Black Prince of Kentucky; he by Ticonderoga, grand sire of Blackhawk; he by Sherman's G. G. Justin Morgan. Clifford H's 1st dam by Pat Malone, he by Mohawk. Clifford H. Jr's 1st dam Susie Bone, by Black Hal; Susie's 1st dam Nellie, by Bonesetter 2:10. Nellie's 1st dam by old Tom Hal, the sire of Hal Pointer 2:04, Brown Hal 2:12 and Little Brown Jug 2:11. Brown Hal is the sire of Star Pointer 1:59 and a number of others. Clifford G's 1st dam Kate by Payne Horse; Kate's dam by Bay Tom Jr. 2:30, sire of Duplex 2:17; he sire of Reflector 2:07, Hollina 2:08 and 15 others better than 2:25; Bay Tom Jr. sire of Duplex 2:17, Jennie Woods 2:24, Billy A. 2:13, Fannie Hollman 2:16 and 9 others better than 2:30.

**Clifford G. will make the stand of 1911 Season at The Clovernook Stock Farm, 12 miles S. W. of Portales, and at Portales, New Mexico.**

**Terms**—\$15.00 for season, cash to be paid at time of service, with return privilege. To those raising best colt from each stand will be given 1912 season free. For further particulars see or write, R. A. DEEN, OWNER, Delphos, New Mexico.

**The Marlin Model 20 REPEATING RIFLE**

You can buy no better gun for target work and all small game up to 200 yards.

Without change of mechanism it handles .22 short, long or long-rifle cartridges perfectly. The deep Ballard rifling develops maximum power and accuracy and adds years to the life of rifles.

The added tip in protection from defective cartridges—prevents powder and gas from being blown back. The side ejection never lets ejected shells and spent brass fall into your face. Accurate repeat shots. With simple take-down construction, removable action parts—best gun of any .22—fits the pocket and is easy to clean. A great vacation rifle. Ask any gun dealer.

The 124 page Marlin catalog tells you all you need to know about this rifle. Send 3 stamps for it today.

## Winter Months on the Farm

How to Improve Them

### Winter Care of Machinery

How to Store Farm Implements to Prevent Rust and Rot and to Get Greatest Service  
 By PROF. C. A. COCKE  
 Wisconsin College of Agriculture

Copyright, 1911, by Western Newspaper Union

Over \$100,000,000 is expended annually in the United States for farm machinery. The average American farmer exhibits progressiveness in his adoption to and ready purchase of improved machinery, but woefully falls by the wayside in his care of this same machinery. A short trip into even the best farming districts will show barnyards dotted with valuable machines which have absolutely no protection from storms and weathering. The farmer houses his stock, crabs his corn, fills his silo and granaries and protects these from the elements, but shortsightedly leaves his grain binder, cultivator, plow, drill and the rest of his machinery exposed to all kinds of weather.

**Exposure Worse Than Wear.**  
 If these same farmers will stop to consider that by their own shiftlessness, they are shortening the life of this machinery from 60 to 80 per cent., the need of better methods will be self-evident. To a certain extent they are aiding in the ultimate wreckage of their machinery just as though they gradually smashed it to pieces with a sledge hammer. There is no need to ask for the solution of this question, it is so simple. Some \$200 or \$300 expended in a machine shed would pay for itself in two years due to the prevention of a depreciation in value of the machines through exposure. Practical experience has shown that while machinery without shelter lasts only five years, that the same machines well housed and protected remain in good serviceable condition for over 12 years. A machine shed returns at least 30 per cent. on the original investment. It increases the life of the machinery from 60 to 100 per cent.

Furthermore, the improved appearance of the barnyard argues in favor of the storage of machinery. The prospective buyer or real estate agent always notes unstored machinery scattered about the yard and accordingly values the farm at a lower price, due to its unfavorable external appearance.

**Farm Tool Shed.**  
 An excellent machine shed, with a farm shop in one end readily accessible for repairs, should be about 34 by 60 feet. The shed should be provided with sufficient sliding doors so that the various implements can be taken out and returned with greater saving of time and labor. The building should face the south so that the doors will not be exposed to beating, driving storms from the north or to the accumulation of snow and ice. Such a shed and shop provided with a concrete foundation would cost approximately \$350. Considering the prolonged life and value of the machinery, due to storage the cost of the building would average about \$26 a year.

The farmer, well provided with a suitable shop and machine shed, can employ his spare time very efficiently during the winter in repairing and caring for his machinery.

One ironclad rule should be rigidly

ing the winter months and should be carefully looked after. The spreader should be cleaned out after being used, or some of the soft manure will freeze in the box drum and a breakdown may result.

An occasional coat of paint is another great preservative which considerably lengthens the serviceable use of the farm machines. A small stove can be installed in the workshop during cold weather and the various implements can be painted in the shop with good results.

Special attention should be paid to the same and storage of farm steam engines during cold weather. No oil or grease should be left in the cups to congeal or harden. Resting in the stuffing boxes should be prevented by cleaning out and replacing the old packing. On large engines the scale should be removed from the interior of the boiler while the exterior should receive a coat of asphalt paint. During the cold months never leave water overnight in boiler or water jacket of the engine, or it will freeze and probably burst these parts.

**Winter Care of Gasoline Engine.**  
 The inexperienced operator meets with many difficulties in handling gasoline engines during severe winter weather. The first essential of the gasoline equipment, year in and year out, is a good, strong, concrete foundation. Where use of concrete is impossible, the engine should be securely bolted to heavy timbers fastened to the floor. They should be of sufficient size to absorb all violent vibration. A secure foundation increases the floor bearing of the engine and secures greater rigidity.

The engine should never be run faster than its specified speed, as otherwise the operator is merely wasting the power of the machine without obtaining the most efficient results. Care should also be exercised in belting the engine to a piece of machinery to use the correct size pulleys, so otherwise energy which the engine generates will be wasted.

In starting a new engine the valves are sometimes gummed to such an extent that they will not entirely close. This reduces the amount of the compression of the engine. In other instances the valves stick so that the compression is wholly lost. The remedy is to squirt a little gasoline or kerosene on the valve stems and clean off the sticky oil. Compression is also lost due to a lack of lubricating oil on the piston and cylinder walls. To correct this difficulty the operator should turn the flywheel over until the piston is drawn out of the cylinder and then cover the projecting portion with a liberal coating of lubricating oil. The oil will act as a seal.

In general the operator should use judgment and common sense as regards the amount of work an engine should do. One cannot abuse a gas engine without disastrous results. Good lubricating oil should be used in the engine, and care should be observed to see that the oil cups are kept free and

enforced on the farm, and that is that every implement or machine should be returned to its place in the machine shed immediately after it has been used. Then one knows the location of the machine and its condition, when it is again required for use. It takes but little extra time to return tools to the shed when the team is hitched to them in the field.

**Cleaning and Oiling Machines.**  
 All the machines should be overhauled and thoroughly cleaned before storing them for the winter. Broken parts should be ordered and repairs ordered so as to allow plenty of time for their shipment. All bolts should be tightened up, bearings saturated with lubricating oil, and wearing surfaces should be coated with a good quality of hard oil to prevent rusting. The binder attachment of the grain binder and the mower mechanism should be taken apart and thoroughly cleaned. All the old gummy oil should be removed; some of the more delicate parts of the machine should be cleaned in kerosene. There are examples of grain binders well cared for and intelligently used which have been worked 30 years.

The cultivator plows, common plow shares, and harrow teeth should be sharpened during the period of slack work in the winter. New hay rake teeth, sickle sections, and other broken or ready to break parts should be replaced wherever necessary. The manure spreader is usually in use dur-

that the oil is not restricted in its passage from the cup to the cylinder.

Another great difficulty is the starting of engines during cold weather. Water-cooled engines can be more easily started by closing the drain in the bottom of the cooling jacket and pouring in about two pails of warm water. The last pail of water should be very warm but not to the boiling point, as radically sudden expansion might result in cracking the cylinder. The increased warmth of the cylinder will result in a quick ignition of the charge.

Another simple plan used in case of either air or water-cooled engines is to open the intake or exhaust valve and then inject a small amount of gasoline into the cylinder. Allow the engine to stand for a few minutes so that the gasoline may evaporate, then crank it and it will usually start on the first trial.

**Strangles in Horses.**  
 An epidemic of strangles is always a source of alarm to horse owners, as this disease is most insidious in its attack and usually leaves its victims in such a debilitated condition that they are incapacitated for work for weeks.

**Hothouse Hogs.**  
 The hothouse hog schemes hatched by experienced city farmers lately are more likely to bring them valuable experience than great riches.

## In Black and White

**AN EXQUISITE** hat for high occasions is developed in black and white. The shape, of rich white felt, is faced with black velvet, perfectly fitted to the broad brim, with its graceful curves and flowing lines. Such hats are covered in factories devoted to making hats of a high class, and the velvet is steamed and stretched to the underbrim, turning up around the edge in a tiny cordlike finish.

Most hats of this character are very simply trimmed. A big spray of feathers, a curious novelty in gold, or a long curling ostrich plume are most often chosen. Big black hats with gold in a striking ornament and gold roses on the bandeau, resting against the hair, or such ornaments in tarnished brass effects, make superb millinery.

In the model shown delicate gauze roses surround the crown and cover

the bandeau. Heavy aligrettes are used here, but, as those are likely to fall into disuse on account of the crusade against them, and a growing public sentiment adverse to their use, it is best to make another selection. The feathers of the gours or crown pigeon are equally effective, and may be worn, with a clear conscience, or a comparatively clear conscience at least.

The wearing of hennin, by the way, is prohibited by law in several states, and in July of next year it is said a law will go into universal effect prohibiting the buying, selling or wearing of these feathers. As they are very expensive, it is best not to invest in them. There are so many pretty feathers to choose from that cannot disturb the conscience or call down criticism, it would seem no hardship for a woman of taste to make another choice.

JULIA BOTTOMLEY.

### ATTRACTIVE TAFFETA WAIST

This very attractive waist is of old blue taffeta with sleeves cut in one piece with the body of the waist.

Sleeves and waist are tucked and trimmed with bands and straps of black taffeta, and with buttons and silk embroidery matching the blue silk.

**Reversible Cloak.**  
 A useful and attractive garment, that can be made at home by any woman used to simple tailoring, is the reversible cloak, made semititting, with kimono sleeves, and usually of broadcloth lined with soft satin. The broadcloth side is of some dark color or black, with plain light or white revers of satin; and it is used for afternoon wear. The satin side is in some light evening shade, with satin revers in a slightly darker color, and makes a charming wrap for the theater, etc. It is not nearly so hard to make as it sounds, and is extremely economical, being really two garments in one.

**Stripes in Millinery.**  
 New modes of using stripes—black and white and blue and white—in smart millinery are being devised as the season advances. The striped material is generally satin, and it may have as a facing over a border for a white brim. A fetching new model is a toque—made entirely of black and white striped satin and trimmed with a little rose colored velvet ribbon. Numerous bows and other forms of decorations for hats are also shown in which a striped effect is produced by the use of alternate rows of black and white outcups.

### FLESHY WOMAN FINDS FAULT

Has Not a Good Word to Say for Frocks or Millinery of This Season.

It is interesting to note the animosity with which women, or rather some women, attack the present styles. It is invariably the woman of flesh who is the most emphatic in disapproval. Not a good word is to be said by her for frocks or millinery of this season.

Hats are imprudently absurd, skirts immodestly cut, jackets trivial, and even the efforts of great dressmakers dubbed futile and unconvincing, as she tells it. It is a season, according to the woman whose hips refuse to remove themselves, of grotesque absurdities. The hysterical note is struck. So why argue?

Whether we argue or not, certain things must be acknowledged. The present fashions in some directions have reached such perfection that to condemn them is ridiculous, to ignore them impossible. So let us forget the fact that our too comfortable contours refuse brazenly to confine themselves within the slim limits of the present silhouette and see if we cannot judge of the fashions of the day with an unbiased eye, if not with entirely untrammelled hips.

In spite of criticism and caricature they may alone be called epoch making. Line and drapery have clothed themselves in such artistic grace; color and fabric have attained such perfection of combination and weave that they take their places with famous fashions of other days.

They are in a great measure revivals, yet revivals so skillfully adapted to our needs and environment that they are accepted with enthusiasm by the intelligent few. The lover of color and line rejoices in their existence, the beauty-loving eye revels in their softly woven and luxurious fabrics. The great dressmakers have gathered from the Greeks and Romans, from Egyptians and Orientals, from the Alexandrian and first empire periods fashions, fabrics and color-which, when combined and crystallized, place the styles of this season uniquely apart.

**Beavers This Year.**  
 More fashionable than the long nap or furry beaver is the one that has shorter fur and is smooth and shiny. These are called silk beavers and very beautiful indeed they are. Sometimes the under part of the brim is of velvet, usually black, and the top part is another color, or may be black, as one prefers. This top part, however, is of this lustrous silk beaver, and the crown is usually composed of the same material. These hats make charming picture hats, and are exquisite when trimmed with sweeping plumes.

## THE FARMER SOWS WHAT HE EXPECTS TO REAP. IF YOU WISH A COMFORTABLE OLD AGE, PLANT SOME MONEY IN THE BANK NOW

In 1623, a copy of Shakespeare sold for \$5. In 1886 Oliver Wendell Holmes was offered this same book for \$4,000. But had \$5 been put out at compound interest (4 per cent.) in 1623, it would have amounted in 1886 to \$160,000.

Make our Bank your Bank.

## Portales Bank & Trust Co.

NOTICE OF LIS PENDENS,  
 No. 695.

In the District Court of Roosevelt County, N. M.

Charles R. Wheeler, plaintiff,  
 vs. T. S. O. McDowell and  
 Rose B. McDowell, defendants.

The defendants will take notice that a suit has been filed against them in the District Court of Roosevelt County, New Mexico, by the above named plaintiff, styled and numbered on the docket of said court as above.

The nature and objects of said suit are to collect a certain promissory note made, executed and delivered to said plaintiff by said defendants of date Oct. 22, 1909, for the sum of \$16,000.00, due Oct. 22, 1914, with 5 per cent interest thereon from date until paid. Interest due and payable semi-annually, said note being secured by a mortgage which stipulated that should defendants fail to pay the interest on said note as the same became due, the whole of said note, both as to principal and interest might become due at the option of the owner or holder thereof; said defendants having failed to pay the interest or any part thereof as the same became due, said plaintiff, as the owner and holder of said note has exercised his option in such mortgage stated and declared the whole of said debt including both principal and interest due and payable.

Said suit is further to foreclose a mortgage executed by said defendants to said plaintiff of date date with said note to secure the due payment thereof, by which said defendants conveyed to plaintiff the following described lands, to-wit: Section 11 in Twp. 3 south, range 84 east, N. M. P. M., and also section 7 in township 3 south, range 85 east, N. M. P. M., in Roosevelt county, New Mex., conditioned for the due payment of said note according to its tenor and effect, and providing that the said defendants should pay to said plaintiff in the event of the collection of said notes by foreclosure, a reasonable attorney's fees, which plaintiff also seeks to collect in his said suit in the sum of \$1250.00.

The said defendants are further notified that unless they appear and answer in said cause on or by the 27th day of March, 1911, judgment will be rendered against them by default and the plaintiff be given the relief demanded in his complaint.

Winslow Evans, whose post-office address is Peoria, Illinois, and T. E. Mears, whose postoffice address is Portales, New Mex., are attorneys for the plaintiff.

In witness whereof I have hereunto set my hand and seal as clerk of said court this 28th day of January, 1911.

(Seal) S. I. Roberts,  
 Clerk.  
 By Llewellyn Carter, Deputy.  
 Mar. 2-4t

The Methodist church is now undergoing repairs. The repapering will be done this week, the building will be wired immediately and the carpet and railing will be put in next week.

### Boost Your Town.

There are plenty of towns, good towns situated in rich communities, that have about as much activity as a railroad tie.

The merchants are scared of each other, they are grouchy, they never get together and they are afraid to act independently.

There never was a town that could grow without co-operative boosting.

From all sections comes news of special events held by merchants in a town that bring big crowds of good buyers.

Don't be afraid that your competitors are going to learn something about your business.

They probably don't care and you couldn't prevent them finding out if you tried.

Nothing helps a town so much as a Commercial Club that has a banquet once a month.

Nothing may start the first time.

But as the merchants become better acquainted something is certain to happen.

Every merchant has good ideas about boosting his town, but for the lack of a common meeting place, has never given publicity to his plan.

If you can't do anything better, hire a band to play all afternoon and evening on the street.

Do something. Start something. Boost your town.—Ex.

## OUR ADVERTISING COLUMNS

are read by the people because it gives them news of absorbing interest. People no longer go looking about for things they want—they go to their newspaper for information as to where such things may be found. This method saves time and trouble. If you want to bring your wares to the attention of this community, our advertising columns

Should Contain Your Ad

### The Portales-Clovis Road Meet.

Last Saturday night a committee of Portales citizens met with and were entertained by a similar committee from Clovis, in the parlors of the Commercial Club of Clovis. The following citizens represented Portales, viz:—Messrs. Sam J. Nixon, G. M. Williamson, J. B. Priddy, Monroe Honea, R. G. Bryant, T. J. Molinari, J. E. Morrison, W. E. Lindsey, A. T. Monroe, and some others whose names we could not get.

Among other things the committee appointed two special committees, the one on the cost of the materials for the proposed road between Clovis and Portales, which committee consisted of Messrs. McBee, Shurick, and E. R. Hart, all of Clovis.

The other committee consisted of Sam J. Nixon, Atty. Williams, C. V. Harris, T. J. Mabry, the county commissioner of Melrose. This committee in conjunction with the Territorial Engineer and Monroe Honea of Portales are to go over the proposed route of the road and if possible determine the route. Both committees are to meet together and make reports of work done and confer further about the proposed road March 18th.

Another matter was brought to the attention of the meeting by ex-Governor Curry who was a special guest of the meeting, viz. that it was quite likely that we would be able to secure state aid in the construction of this road from the "Good Roads Fund" since the eastern side of New Mexico has had as yet, no share of these funds.

Medicines that aid nature are always most successful. Chamberlain's Cough Remedy acts on this plan. It loosens the cough, relieves the lungs, opens the secretions and aids nature in restoring the system to a healthy condition. Sold by Pearce & Patterson Pharmacy.

### Macy News.

(Received March 8th)

Some have commenced farming in the neighborhood and report that the ground is in good condition after the recent rain and snows.

Albert Fletcher and wife left for Cordell, Oklahoma last Saturday.

John Logan is able to be about after a severe case of measles.

Mrs. O. O. Ellett who has been ill several days is improving.

The party at the home of Mrs. Porter Fletcher Tuesday night was enjoyed by a large crowd of young people.

Miss Lena Carroll of Portales is visiting in the community, and attended church at Macy Sunday.

Rev. Webb filled his regular appointment at Macy Sunday morning and night. Rev. McClellan preached in the afternoon.

D. D. Oroark has returned from an extended visit with his people in Kentucky.

Mr. and Mrs. J. B. Shay, who have lived here for years, have gone to Alva, Okla. to make their future home. We regret losing them, but wish them all prosperity in their new home.

Barred Plymouth Rock eggs, for setting of 15, 75c.

Address, W. F. KENNEDY, Star Route, Portales, N. M. M 2-4f

Chamberlain's Stomach and Liver Tablets are safe, sure and reliable, and have been praised by thousands of women who have been restored to health through their gentle aid and curative properties. Sold by Pearce & Patterson Pharmacy.

Groceries and feed stuffs of all kinds at the Boucher Wagon Yard. The farmer visiting Portales is cordially invited to house his team at this yard where the best of conveniences and care is afforded.

### The News From Bethel.

Floyd Baker made a business trip to Clovis last week.

Joe Smith is working 40 acres of the Tom Smith irrigated land this year. He is busy from morning until night preparing his land.

George Smith has gotten a new disc sulky plow. You ought to see him turning the dirt.

Mr. and Mrs. R. W. O'Neal spent last Sunday with Mr. and Mrs. J. T. Elliott.

Louis Anderson is going to assess the taxes for Uncle Josh in our community this spring.

The rain and snow that we had put a fine season into the ground and the farmers are taking advantage of it by busily turning their land.

Fred Boon is going to work some of the Charlie Stinnett irrigated land. Tommie Mears has rented some of the Ben Smith irrigated land.

The conversation of the Bethel people now in their farming business is different from what it was before irrigation came to us. Most of the farmers had a few cows and gave the greater part of their time to the selling of cream and raising feed for their cattle. Those in the irrigation project have disposed of their cattle and are giving their full time to developing their irrigation possibilities. We trust that Bethel will prove to be one of the main places to which the Governor of our Territory was pointing in his recent discourse speaking of the resources of New Mexico. Mr. Mills said that the land around Portales could be filed on just a few years ago, but with the steps they are taking in an irrigating way, land would be very valuable in a short while in that section of the country. Bethel took a larger hold than any other portion of the country in putting into, and helping to push that monster ten thousand acre proposition. Is she sore and sitting down on other projects for fear she will get into it again? No, she is taking a larger hold in the beet industry than any other part of the country. Are you sorry for Bethel? Do you believe that she is too hasty and is running too big a risk in promoting the country's standing, in doing what she can to materialize that God given wealth that is hidden within her bosom? If not, why not join her effort to secure this beet proposition.

Fairy Drill on St. Patrick's Day. Be sure to see "Irish Colleen" in Fairy Star Drill and Chorus at Wonderland Theater March 17. Benefit Portales Concert Band and 1st division W. H. M. S. Admission 25c and 35c. Tickets on sale at Joyce-Fruit's and Pearce & Patterson's

Speaking Saturday on Streets. The Herald is requested to announce that Capt. Wendel will speak on the street in Portales next Saturday at 2 p. m. Subject will be "The White Slave Traffic," with illustrations.

Dr. C. E. Worth left Tuesday in quest of a location which will exactly conform to his ideal of an earthly paradise, and it is significant that he did not purchase a ticket direct to the destination but instead purchased some two thousand miles of transportation. This makes the second long journey which the Doctor has made within the last month in his search for a better place than Portales. The Herald thinks that after all this wandering he will return to this hamlet a wiser and more contented citizen.

Chamberlain's Stomach and Liver Tablets invariably bring relief to women suffering from chronic constipation, headache, biliousness, dizziness, sallowness of the skin and dyspepsia. Sold by Pearce & Patterson Pharmacy

Graham Bryant is in Kansas City this week attending to some business matters.

### WHAT THE KIDNEYS DO.

THEIR UNCEASING WORK KEEPS US STRONG AND HEALTHY.

All the blood in the body passes through the kidneys once every three minutes. The kidneys filter the blood. They work night and day. When healthy they remove about 500 grains of impure matter daily, when un healthy, some part of this impure matter is left in the blood. This brings on many diseases and symptoms—pain in the back, headache, nervousness, hot, dry skin, rheumatism, gout, gravel, disorders of the eyesight and hearing, dizziness, irregular heart, debility, drowsiness, dropsy, deposits in the urine, etc. But if you keep the filters right you will have no trouble with your kidneys.

Fritz Sena, 1205 Twelfth Street, East Las Vegas, N. Mex., says: "Experience has proven to me that Doan's Kidney Pills fulfil the claims made for them. For several weeks I suffered constantly from backache and in the morning when I got up, I had acute pains across my kidneys. Exercise brought some relief, but it did not entirely rid me of the trouble. The kidney secretions pained in passage and at times were discolored. Hearing so much said in praise of Doan's Kidney Pills, I procured a supply and commenced their use. After I had taken a few doses, I noticed a marked improvement and before I had finished the contents of the box, I was completely cured. I have been entirely free from kidney complaint since."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other. 15 2t

### Methodist Revival Closes.

The revival meeting at the Methodist Church, this city, closed last Monday night. Rev. James E. Savage, pastor of Epworth Federated Methodist church Oklahoma City, started the meeting and remained ten days. Then John E. Green, the railroad engineer evangelist of Houston, Texas came and remained to the close.

There was good interest from the first service. From two to four services daily were held. During the last week of the meeting, the business houses closed from 10 to 11 a. m. and the attendance of men each day was the largest in the history of the town.

The visible results of the meeting are:—The church life of Portales materially strengthened, a better feeling among all classes promoted, and the tides of worldliness checked. There were 40 additions to the membership of the Methodist church. On Monday night, Rev. Green raised \$100 on the benevolence of the church. The two preachers who assisted in the meeting received together for their services \$200.

People from the country can find a sanitary wagon yard in which to lodge themselves and their teams at the Boucher Wagon Yard. Also a full line of staple and fancy groceries and feed of all kinds is accessible to the yard.

Mrs. A. T. Monroe, representative of the Mother's Club, and Mrs. Sam J. Nixon, who represents the Woman's Club of Portales, leave Saturday for Las Cruces to be in attendance at a meeting of representatives of Woman's Clubs from all parts of the Territory which convenes there Monday for the purpose of federating.

Prof. O. B. Staples, Superintendent of city schools the past term, and his wife leave tomorrow for north Louisiana where they intend living on their farm in the hope that Mr. Staples will regain his health.

### Socialist Lecture.

Mr. P. G. Zimmerman of Texas, candidate for Lieutenant Governor of that state, will lecture at the Armory next Saturday night, his theme being on Socialism. Mr. Zimmerman is credited with being a forceful and instructive speaker in the realm of Socialist thought and everybody is invited to hear him.

One of the little girl babies of Mr. and Mrs. A. G. Trout is quite sick this week.

Monday night the Socratics of the public schools entertained the Agatheridians at the Commercial Club room. The decorations were streamers of the societies' colors and pennants. Refreshments were served.

C. S. Hart and John Tyson were among those who attended the Panhandle Stockmen's Convention at Dalhart, Texas this week.

John DeGraffenreid came in Sunday from Melrose on a visit.

Mrs. S. H. Birdwell arrived here Monday for a visit with her parents, Mr. and Mrs. C. Harvey. Mr. Birdwell is now station agent at Kenna.

C. P. Mitchell this week purchased the Jim Turner residence in the south part of town and will establish his family there at once.

Anderson Automatic computing scales, the best in the world, for sale by C. M. Dobbs.

E. P. Alldredge is in Elida this week assisting Rev. W. J. Downing in a meeting.

H. E. Easterling has assumed the management of the Pecos Valley Hotel.

See our samples of engraved cards and initial and monogram stationery.

Prices of Engraved Cards range from \$1.50 to \$3.50 per hundred with plate furnished. The Herald will order them.

The regular business meeting of the Methodist Philathea-Baracas was postponed from tonight to Tuesday night, March 4th.

C. M. Dobbs keeps best candies and fruits.

J. L. Gilliam and family moved to their farm some nine miles out the first of the week.

Dr. Seder, the Anti-Saloon League Supt. of Albuquerque will be here next Sunday morning and night to fill the pulpit.

ENGRAVED CARDS. Have the Herald order them for you, also monogram stationery. Call and see samples.

Mrs. Ed. Hall of Elida came up Monday to Portales to visit with her sister, Mrs. Jno. Tyson.

E. G. Galbraith, principal of city schools, resigned his position here, school closing this week, and accepted a position in the public schools at Socoro, N. M. Mr. Galbraith is a young man of sterling worth, as well as an instructor of ability, and his numerous friends here are confident of his success in Socoro, where he assumed his duties Monday.

W. I. Luikart returned home Sunday from St. Louis where he purchased the new season's creations for the big store of Miller & Luikart.

Elmer Walker, brother of Mrs. Sam J. Nixon, left Monday for Wellington, Texas.

John Compton left Monday for Childress, Texas where he has a brother.

J. A. Monroe and wife left Tuesday for Mesades, Texas where they will make their home. Mesades is near Brownsville and is rapidly coming to the front as an irrigated section. Mr. and Mrs. Monroe came here several months ago from Colorado, Mr. Monroe engaging the while in the coal business.

Miss Hutchison entertained the high school basket ball teams Saturday night.

In buying baking powder examine the label and take only a brand shown to be made with Cream of Tartar

## Dr. PRICE'S CREAM BAKING POWDER

A pure, wholesome, reliable Grape Cream of Tartar Baking Powder. Improves the flavor and adds to the healthfulness of the food.

No Alum—No Lime Phosphate

Both Reduce the Healthfulness of the Food.

"I am quite positive that the use of alum baking powder should be condemned."

—Prof. Vaughan, University of Michigan.

Read the Label and remember that

"Alum, sodium alum, basic aluminum sulphate, sulphate of aluminum, all mean the same thing—namely, BURNED ALUM."—Kansas State Board of Health.

### District Court.

District court convened in regular session Monday morning with Judge Pope presiding. The labors of the session up to the present time have been very largely confined to civil cases, there being only two criminal cases disposed of, in which the defendants in each case entered pleas of guilty. The grand jury has returned an indictment against O. F. Chaney for the murder of Frank Hamby and tomorrow morning at nine o'clock this case will be taken up.

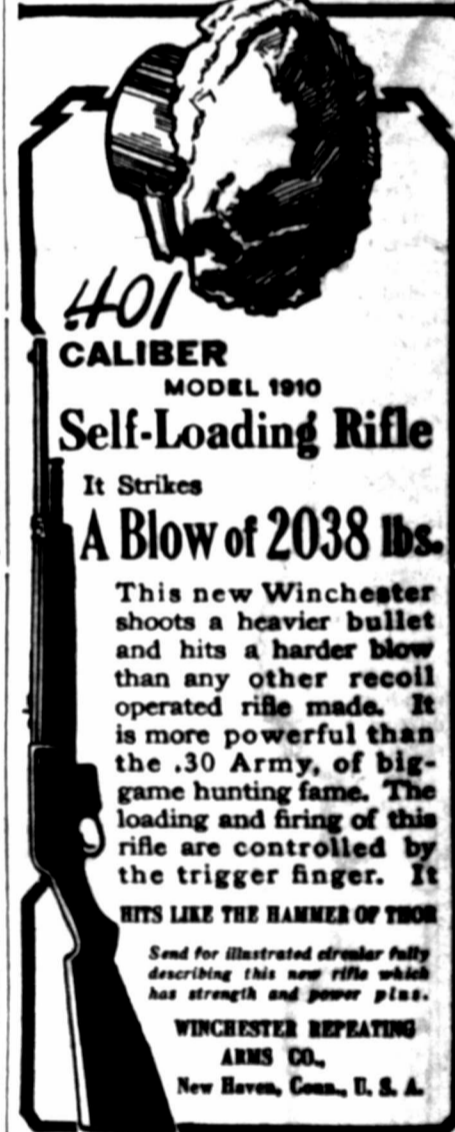

B. J. Reagan and wife left today for Mineral Wells, Texas, taking with them their little son who is a sufferer of rheumatism. The attack of this disease has been very acute with the coming of spring and it was thought necessary to remove him to a lower altitude.

For sale or trade, one good draft stallion, also good Kentucky bred jack, both in fine condition and superior breeders. Would trade for cattle or good, young sheep. For particulars call on or write Geo. W. Rector, Schroeder, Chaves county, N. M. or C. A. Rector, Portales, N. M.

Dr. L. K. Hough has traded his auto and 40 acres of irrigated land for 80 acres of improved land at Cuba, Mo. C. A. Rector negotiated the deal.

Mr. Edward arrived here Monday from Missouri and will now enter actively into the management of the Traveler's Inn.

## WINCHESTER

401 CALIBER MODEL 1910 Self-Loading Rifle

It Strikes A Blow of 2038 lbs.

This new Winchester shoots a heavier bullet and hits a harder blow than any other recoil operated rifle made. It is more powerful than the .30 Army, of big-game hunting fame. The loading and firing of this rifle are controlled by the trigger finger. IT FITS LIKE THE HAMMER OF THOR

Send for illustrated circular fully describing this new rifle which has strength and power plus.
