## **NO CAUSE FOR** ALARM, AUSTIN PEOPLE TOLD

vtime a Gentile thinks he Flood Peak 90 Miles Upstream: Dam 'Flattens' Waters

> AUSTIN, Sept. 22 (A)\_The weather bureau said today that there is no reason for alarm here because the Colo rado river flood apparently is not as bad as had been forecast upstream.

The crest here will probably feet in June of last year, it said. The crest was reported 90 miles above Austin.

Fritz Englehard, Lower Colorado River Authority official, said that the half-finished Buchanan dam, above Marble Falls, was "flattening out" the water severa feet and that the peak stage belo the dam will be several feet less than above but that the high water will last longer.

## Frankly Speaking

Today's best story deals with a man who, for obvious reasons, will remain anomymous. He probably has already had to buy enough drinks to insure silence on the part of his friends.

Yesterday he went to Rising Star, parked his car, and transacted his business. When he had finished the business he came out and drove home.

It was not until he reached Cisco that he discovered that he had driven off in the wrong car -which was of the same model as his and had been parked beside it.

But not so the car owner. He reported that his car had been stolen and Rising Star officers began burning up the telephone wires in all directions to broadcast the alarm.

Henry Stubblefield, after receiving a telephone call, heard which way the car had gone and started out to "capture" it and the driver. Being a desk sergeant he doesn't often have an opportunity to make a hero of himself, and started out the Rising Star highway with both the siren and the throttle on his car

Police estimates vary, but one officer placed his approximate speed at 110 miles an hour: He overtook the car and its driver somewhere between Cisco as the much chagrined and absent minded Ciscoan was returning the machine to its owner.

The difficulty apparently had been straightened out this morning and the desk sergeant was contentedly smoking a cigar.

tions, only to find that the very forces which elected them are infiltrated with the crookedness of underworld powers.

Hoover stressed the need for higher wage scales as an incentive to capable men seeking a career in police work. Calking is a process in which

oakum is forced into seams of a wooden ship to prevent entrance of water.

BODY FOUND IN RIVER WACO, Sept. 22.-The body of a man said by police to be that of Paulino Gernades, Mexican, was taken from the Brazos river Sunday, near the west end of the Cotton Belt bridge. Condition of the body indicated it had been in the water several days. Justice Claude Segrest, who held the inquest, said his verdict probably will be death from accidental drowning.

Kentucky officials say 446 insurance companies are licensed in that state.

## For her sake PLEASE DON'T GUESS **ABOUT LIGHT**

Reading music and reading books are very much alike in their demands upon the eyes. Those wrong notes, or improperly played passages, may be due to insufficient light, rather than to carelessness. Practice becomes easier when eyes don't have to peer and foreheads

wrinkle. Good light at the piano is as important as good light for reading or study. Insufficient or wrongly placed light, or glaring light, breeds eyestrain. Good light makes all eye work easier and that makes study and practice more attractive, more effective.

#### HOW MUCH LIGHT DO YOU NEED TO PROTECT EYESIGHT?

Science has now determined how much light we need to see easily and comfortably...for reading books...for reading newspapers . . . for sewing . . . and for other eye tasks. It has also made a device, the Light Meter, which

measures your lighting in a jiffy. You read the story of your lighting on the dial as you read the story of temperature on a thermometer. How does your home measure up? We will be glad to show you.

## It costs nothing to check your lighting

And it may prevent serious eyestrain in children and others of your family. One of our representatives will gladly assist you-with the aid of the Light Meter and other special equipment that he will bring. There is no charge for this service.

See the new I. E. S. Better Light-Better Sight Lamps

which give much more light at low cost.

See them at our display room.

#### Gregg County Police To Get Radio System

LONGVIEW, Sept. 22-Installaon of equipment for operation of 150-watt radio station to serve Gregg county from the headquarters in the sheriff's office is being completed, and plans are being made to tie in five East Texas counties, Gregg, Smith, Harrison, Rusk and Upshur, in a short-wave

police broadcasting network. An attempt is being made to establish a five-county police system similar to the one that is now being operated by Dallas county and surrounding divisional units. If this is done, the 150-watt station will be increased to 500 watts.

## A GOOD NEIGHBOR

Railroad men are good neighbors. Every merchant likes railroad families for customers-churches and lodges like them for members. Steady and responsible, most railroad men own their own homes. They pay their bills, meet their taxes, keep up their insurance. Some of them live in your neighborhood. For the railroad is a home industry.

When you travel or ship via train you help your own community by making more railroad jobs for local men, supporting local families, patronizing local businesses. Western railroads and allied industries last year employed 750,000 workers.

The railroads themselves are good neighbors. They pay huge tax bills. They buy 70,000 commedities from factories, stores, farms, mines, quarries, lumber companies and diversified industries.

We invite you to use our services-fast freight with Free pick-up-and-delivery of LCL-world's finest passenger transportation in sleeping cars or coaches at lowest cost—substantial savings on round trip tickets - air-conditioning - dependability - comfort - safety. . . . See the railroad agent.

Proud of our achievements, we appreciate the gublic's good will and increased patronage, and pledge continued progress
