

THE CISCO DAILY PRESS

(Successor to the Cisco Weekly Citizen and Citizen-Free Press)

Published each afternoon, except Saturday, and Sunday morning at Cisco, Eastland County, Texas, by the Free Press Publishing Corporation, incorporated under the laws of the state of Texas.

A Home-Owned and Home-Controlled newspaper devoted to the upbuilding of Cisco and Eastland county, independently democratic in politics.

SUBSCRIPTION RATES: ONE YEAR \$5.00

National advertising representatives, Frost-Lewis and Kohn, New York City; Dallas, Texas, and Detroit, Mich.

Any erroneous statement reflecting upon the character or reputation of any person will be gladly corrected if brought to the attention of the publishers.

Entered as Second Class Matter December 11, 1924, at the post office at Cisco, Texas, under the act of March 3, 1879.

MEMBERS OF THE ASSOCIATED PRESS The Associated Press is exclusively entitled to the use for publication of all news dispatches credited to it or not otherwise credited to this paper and also local news published herein.

BIBLE THOUGHT FOR TODAY

Now the God of hope fill you with all joy. Holy, holy, holy, is the Lord of Hosts; the whole earth is full of His glory.—Rom. xv. 13; Isa. vi. 3.

Eyes, that with holy tears are dim, Shine when God's sunbeam on them plays, In stricken souls angelic lays Are rising like a happy hymn.

To be truly happy is a question of how we begin, and not of how we end; of what we want, and not of what we have.—Stevenson.

Wide Latitude

AMONG the numerous flexible provisions of the proposed wage and hour law, now before congress, which give wide scope of authority to its administration, is one that provides that the labor standards board, in which administration would be vested, may vary the basic work-week in a particular situation with due consideration to the number of persons available for employment.

sympathies or politically articulate groups, might devise in a given situation. Patently, it shifts the basic responsibility of employers from economic duty to their customers, stockholders and working communities, to the social duty of caring for all within what the board considers the area of its obligation who may seek jobs, regardless of whether or not those persons may be qualified.

IN view of the current attitude of the administration toward the activities of the Lewis unions, it is not reassuring to speculate upon the requirements designed by a board that might be under his influence, or the influence of similar organizations commanding political force.

Wheat Income

SOMETHING of the magnitude of the income from the wheat crop in this country is gained from a story in the Moran News this week which says that up to Wednesday evening 19 cars of wheat had been shipped from Moran and that estimates of the total shipment this season average 50 cars. With the grain selling at around 85 cents a bushel this means that more than \$27,000 has already come into the Moran area from wheat shipped by railroad alone and that the sum will eventually reach more than \$65,000.

THE last statement reminds that the Cisco area is in the fortunate position of not having to depend upon one money crop. Its eggs are in several baskets, a condition that provides insurance against general failure. In addition to wheat, and other grains, there are livestock, cotton, fruits, truck crops, pecans and, outside the agricultural industry, gas and oil which provides a considerable income to land owners through lease rentals and royalties.

These Boys Make No Bones About Working With Skeletons

CHICAGO (AP)—Herbert Sigler and Elmer Luecht don't shiver at the sight of skeletons any more. Herbert assembles and Elmer paints em. They prepare the bones, which come un-assembled from various European countries, for medical schools or anyone with the price—\$95 to \$150. The boys say Europe has a monopoly on skeletons because it is unhampered by compulsory embalming laws. (Embalming discolors the bones.)

Breck Jurist to Preside in 88th

EASTLAND, June 18.—B. H. Atchison, judge of 90th district court at Breckenridge, has been assigned by George L. Davenport, judge of 91st district and judge of the eighth administrative judicial district to preside in 88th district court for the seventh week of the May term beginning Monday.

Among The Derricks

STRUCTURE PROVED INTO HAWLEY TOWNSITE ABILENE, June 18. (Sp.)—Flowing by heads at the rate of 75 to 80 barrels per hour on about 10-minute intervals yesterday afternoon, the west extension well for the Guitlar pool at Hawley was drilled into pay zone. Brown Eagle Oil company and S. B. Roberts company No. 1 Will S. Lewis, a quarter mile west of the Guitlar Trust estate No. 1 fee, proved structure into the Hawley townsite as productive as that in the field.

Storage Awaited

The well flowed into pits yesterday. Storage had not arrived from Graham, and the well will probably be shut in today until it arrives. Owners said although the test probably had enough flow to make top allowable, it will be treated with 3,000 gallons of acid in the lower lime pay.

Purchases

Among purchasers were J. E. Stowe and several other Abileneans who took block 44, and Dr. J. M. Estes was reported buying of a block to the west. Dr. H. Arthur Swan earlier had purchased a block back of the telephone office.

Man's Wooden Leg Fools Rattlesnake

TALIHINA, Okla., June 18.—For once, A. L. Peck was not he had a wooden leg. While he was working on a farm near here a rattlesnake struck at him. Its fangs sank into the wooden leg, and Peck saw the reptile loose and killed it with a stone.

91st Court Jury List Is Announced

EASTLAND, June 18.—Following is the petit jury list for the third week of the June term of 91st district court starting Monday. R. A. Gowan, Gorman; Oscar Wilson, Eastland; Roy Acker, Carbon; F. W. Hoffman, Eastland; Doss Alexander, Pioneer; J. E. Martin, Carbon; T. J. Reynolds, Cisco; S. B. Mize, Cisco; J. M. Thurman, Carbon Rt. 2; R. A. Pool, Eastland; W. M. Medford, Carbon; Dave Wolf, Eastland; J. S. Davis, Carbon; F. E. Langston, Ranger; F. L. Boland, Scranton; J. S. Burkhead, Eastland; G. C. Pence, Cisco, Route 1, H. B. Self, Rising Star; Jack Muirhead, Eastland.

One Billion Kilowatt Hours May Be Furnished by One Glass of Water

HOBOKEN, N. J., June 17.—The day may come when material science will draw from a glass of water useful energy that would yield more than a billion kilowatt hours of energy and endless fuel from the sun, in the opinion of Dr. Ernest O. Lawrence, University of California professor of physics and director of the radiation laboratory there, speaking at the sixty-fifth annual commencement of Stevens Institute of Technology here June 13.

A Washington Daybook

By PRESTON GROVER WASHINGTON, June 18.—How would you like your great-grandchildren to read this item: "It was in the year 2,000 A. D. that the noted Japanese Admiral Perry-Moto sailed into San Francisco harbor with a fleet of super-dreadnaughts and told quaking-kneed petty officials that it was time for the United States to come out of its shell of isolation and be a part of the world."

Friend To None

"A series of naval imitations treaties went to pot because of international mistrust. The United States then began to build ocean ships to keep enemies far from its shores.

"Because war scares developed both in Europe and the Far East, the United States enacted a neutrality act 17 years after the World war. It was a solemn, fearful thing. The United States, no matter what, would help neither friend nor foe and would order its ships off the high seas in time of war for fear they might get into trouble.

"An international economic conference in 1933 was suddenly scuttled when the Roosevelt administration suspected that any discussion of stable money might jeopardize plans to rebuild domestic prosperity. Frightened even by European war preparations, the United States passed a resolution saying 'No more loans to Europe unless it pays what it already owes.'

"That was the capstone on a trade-isolation program framed earlier under the Smoot-Hawley act which put tariffs so high that few nations could ship stuff here.

"Russia was forbidden to do communist missionary work in the United States and teachers in certain public schools were forbidden even to mention that alien doctrine.

"Japanese Laughed" "It was about 1940 that war finally broke out in Europe and the United States, in a panic that it might be involved, forbade Americans to visit Europe, ordered all ships off the seas and virtually locked its ports to belligerent vessels.

"For fear public sympathy might be aroused for one side or another, radio waves were blanketed out and foreign news was strictly censored. Foreign trade was strangled to avert international commitments and to protect the home market. Foreign scholars with alien ideas were barred. Foreign films and literature were censored, then outlawed. Foreign lecturers and finally foreign visitors were shut out.

2,000 Barrels

Operators estimated natural flow to be at the rate of about 2,000 barrels daily, but on a 24-hour gauge off at 3:30 p. m. today, it is expected to flow about 1,800 barrels.

Location is in the southeast corner of the northwest quarter of the southwest quarter of section 44-15-T&P survey.

Quarter mile to the east of the Guitlar producer, the Thomas D. Humphrey No. 3 Guitlar was swabbing yesterday afternoon before treatment with 3,000 gallons of acid. On the swab it flowed at about 35 to 40 barrels per hour from pay at 1,985 to 2,007 feet, the total depth.

It is located in the southwest corner of the northwest quarter of the southeast quarter of section 44.

Operators were cementing six-inch casing on the R. B. Farris No. 2 Guitlar, west offset to his No. 1 producer, after top of gas sand was found at 1,977 feet. Location is on a 13-acre strip on the north of the northwest quarter of the southwest quarter of section 44, which Farris purchased for a consideration of \$23,000 from the Guitlars.

J. C. Hunter president of the Brown Eagle Oil company, said next location on the Will Lewis 26-acre tract will likely be on the north of the No. 1. Space for five other locations remain on the tract, which Hunter and Roberts reportedly bought last month for \$4,000 cash, \$4,000 oil, from R. C. Humphrey.

Texas Commercial Failures Decrease

TEXAS, June 18.—Commercial failures in Texas during May most reached the vanishing point, the university of Texas business research has announced. There were only eight failures during the month against 17 in the preceding month and 18 in May 1926—decreased of 52.9 per cent and 50 per cent respectively, according to reports from Dun and Bradstreet Inc. The decline in liabilities was even greater than that in the number of failures. Total liabilities for the month amounted to only \$23,000, a decline of 93.7 per cent from April and 81 per cent from May last year. Average liability per failure was only \$3,000 against \$1,000 the preceding month and \$1,000 the corresponding month of 1926.

Man's Wooden Leg Fools Rattlesnake

TALIHINA, Okla., June 18.—For once, A. L. Peck was not he had a wooden leg. While he was working on a farm near here a rattlesnake struck at him. Its fangs sank into the wooden leg, and Peck saw the reptile loose and killed it with a stone.

Storage Awaited

The well flowed into pits yesterday. Storage had not arrived from Graham, and the well will probably be shut in today until it arrives. Owners said although the test probably had enough flow to make top allowable, it will be treated with 3,000 gallons of acid in the lower lime pay.

Purchases

Among purchasers were J. E. Stowe and several other Abileneans who took block 44, and Dr. J. M. Estes was reported buying of a block to the west. Dr. H. Arthur Swan earlier had purchased a block back of the telephone office.

"Many Other Bargains"

MURDER ON THE BLUFF BY ESTHER TYLER

SYNOPSIS: Jude Blinshop, my old flame, is mysteriously shot to death. That started our stormy weekend at Farrington Bluff, home of Michael's aunts. A series of strange attacks occurs. Then we find the body of Michael's mad father below the bluff. Aunt Martha is shot in the shoulder, then nearly finished with sleeping powders. The Skipper, Mike's tall, tweedy younger aunt, disappears and we search for her frantically. Cook, William, the chauffeur, and Annie, the maid, suspect Higgins, the old butler. William tells me why.

Chapter 42 We Lock Up Higgins

A sound from the stair railing grated on our ears, spinning us all about simultaneously. Higgins, fully dressed, stood on the landing, staring down at us. How long he had been there, we had no way of knowing. It is one thing to confront murderous fiends in tabloid headlines, but it is quite another to stand face to face with one in the form of an old family servant whom you have known for a good part of your life. My lips were dry as I slipped the key case into my pocket.

"Hello, Higgins," I said. "Come on down. We were just talking about you."

The silence got under my skin. I waited for the man to answer, for Cook to explode, for Annie to scream. Nothing happened. For a space of fully 15 seconds we stood there while the old man studied our faces.

"Were you, sir? I can't seem to sleep and I thought I would make myself a pot of coffee."

He came down the stairs slowly, as deliberately as he had ever descended them in his life. Habit is certainly a powerful factor. If ever I had wanted to collar a man, Higgins was that man. And yet—I couldn't.

I said casually, "Sure. Make enough for the rest of us. I guess we can stand it."

No one spoke. We sat there and watched him measure out coffee, pour in water, and set the pot on the stove. He turned from the operation, smiling.

"I'm glad it's nearly over, Mr. Jimmie. There will be a boat here by morning, see if there isn't."

I could do nothing but murmur, "Yes."

He was guilty. I was sure of it. But sitting there looking at him I couldn't see myself telling him so. I cleared my throat.

"Higgins," I said, "you've lied to me on every single question I've asked you—haven't you?"

For one fraction of a second the eyes turned toward me were the sick, tired eyes of a very old man. In the next instant they were veiled and calculating.

"What gives you that impression, sir?"

I stood up. "You were seen out of your room on the night when Miss Blinshop was killed. You were seen going into your room fully dressed just before Mr. Michael called you and reappearing as if you had been asleep a moment later. You own the only gun in the house. You were seen coming down the stairs immediately before we discovered the injured cat, when you swore that you had been in the next room. You were on hand when Miss Farrington was wounded. You even tried to get my fingerprints on the revolver. William and I are going to lock you in your room. You will be kept there until the police arrive."

Those strange eyes never once left my face, not even after I had completed my distasteful task.

Making a Mistake?

"Mr. Jimmie," he said very quietly, "you've known me for a long time. Do you believe what you are saying?"

"I'm sorry, Higgins. Yes."

A ghost of a smile crossed his face.

"I see," he said. "Do you object to my having my coffee before you lock me up?"

"Don't take no chances with him," cautioned William.

And so we sat there waiting for that coffee, waiting to be served by a man whom we intended to deliver into the hands of the law to lose his life. I was too busy with my own feelings to notice particularly what went on in that room. Once or twice the clumsy shuffling of Cook's feet penetrated my consciousness, but that was all. I doubt if any coffee on the face of the earth ever took as long to boil as that did.

At last Higgins moved to the closet and set out five cups and saucers. Cook stood grimly over him while he poured, his mind running, I imagine, to all the varieties of poison that could be dropped into those cups. My own mind was too full of all the other cups Higgins had handed me—of all the decent little favors he had done me. I choked trying to drink the stuff. Higgins drank his calmly and set the cup down.

"I'm quite ready, Mr. Wells," he said.

But I wasn't. Suddenly, strangely, I felt that I was making a great mistake. Where and how, I could not see, but I was sure that I was making one. I had a strong conviction that if Higgins were guilty, he would never have taken the accusation as he

had. If Higgins had done all the things we had imagined his doing, Higgins was insane, for he was without a conceivable motive. And an insane man, confronted with captivity, is not usually as placid as he was. At least, I didn't think so. It was a straw, but I gasped at it frantically.

"Higgins," I said, "haven't you anything to say to defend yourself?"

"Not a thing, sir."

William and I took him upstairs. It was consistent with my general stupidity that, although I had many qualms about his guilt, I no sooner slipped the key of his locked door into my pocket than I regarded the entire episode as closed. It was all over. And now—what?

William stirred uneasily at my elbow. "I feel like a rat, sir. He's an awful old man."

I wanted to get away from William.

Without replying I made off down the corridor to the main hall. Lights still glared there, and I could hear the intermittent murmur of voices in M. Farrington's room. I knew that I should go in there and tell them what had happened. I knew that they were in all probability working themselves into a fine frenzy waiting for me. But I was in no mood to face M. Farrington—or even Michael.

The Case Against Higgins

I went downstairs into the cold, deserted library, where I made a fire, helped myself to a stiff drink and sat down to think. For the most part I was concerned with the whereabouts of the Skipper. That Higgins in his right mind would in any way injure the Skipper seemed to me out of the question. And I could not convince myself that Higgins was not in his right mind.

I went over and over the question. I took another drink and then another. I threw myself down at the desk and tried to write. The feel of a pen in my hand was comfortingly familiar. More to quiet my nerves than in hopes of proving anything, I set to work.

HIGGINS

Knew of the presence of Norman Farrington. Whereabouts at the time of the death of Jude suspicious. Easy to imagine him in the confidence of every single person molested to date—Jude, Norman Farrington, M. Farrington, and the Skipper. Seen upstairs when the cat was killed and the room torn up. Lied about it afterward.

Only person who might have removed letters from William's room. Witness for his alibi on the shooting of M. Farrington (Skipper) missing. Obtained something from drug store. Poison? Started to tell me something. A confession? Tried to get my fingerprints on the gun used on M. Farrington. Carried keys to every room in the house.

Note: Standing at my own elbow when Cook was attacked. Locked in room with others when William and I were attacked. Has seemed afraid of something from the beginning. Seems relieved to

be locked up. Motive inconceivable.

Pausing for a cigarette, I surveyed my results. A pretty disorderly mess. Well, it could be straightened out later. At least my nerves were steadying down.

WILLIAM

Convicted of felony. Served full term in spite of interest of Mr. Blinshop. Seems to indicate that no vindicating evidence has yet been found. Nnew the Blinshops. Only person with conceivable motive—revenge. Only person to give evidence against Higgins. Substantiation of all his evidence comes from his wife and Cook, who are clever enough to have fooled the household over a long period of time.

Knew of Higgins' gun and admits to being a good shot. Alibi covering killing of cat and brain- ing of wife and Cook questionable. Proof of whereabouts during death of Jude again rests on those two. Found Jude's body. Might have dealt with me in his room. Might have planted and removed letters to cast suspicion elsewhere. Suggested the locking of upstairs rooms. May have had Higgins' keys at the time. May have seen Norman Farrington when Michael saw him. Servants' gossip from the Blinshops' might have told him who Norman was. Might have had Higgins suspecting him.

Strong enough to have overpowered both the Skipper and her brother. Seems well versed in drugs. Admits going to drug store. Note: Was injured when I was. (Might have thrown himself down the stairs). Did revive M. Farrington. Admits locking us in cellar.

I placed the two lists side by side and considered them with unabashed delight. It seemed to me that the case against William overshadowed the case against Higgins.

(Copyright, 1937, Esther Tyler)

Sunday, I check the cases against Mike, Gay, Cook, Annie and M. Farrington.

Zoning Orderly Arrangement of City Into Areas

By MAJ. E. A. WOOD
Director, The Texas Planning
Board.

AUSTIN, June 18.—Zoning is nothing more than the orderly arrangement of a city into areas according to a plan in which like uses are placed side by side in such a manner that no specific use injures adjoining properties. The severest restrictions are placed upon the dwelling areas. This is because of the health, safety, fire prevention and sanitary aspects. Dwelling areas are home districts, and children are born there, people live there, raise their children there and die there, and certainly they are entitled to all the protection a city can provide.

These areas, which are frequently highly improved with attractive homes and gardens, often represent the life savings of the families; consequently, these areas are entitled to all reasonable safeguards for maintenance in healthful, safe and moral conditions.

Thus far, only use restrictions have been applied, and if the purposes of zoning, as set for in the Texas statute, are complied with, namely, to protect the health, safety, morals and general welfare of the community, additional restrictions must be applied, otherwise it might still be possible to erect slums and skyscraper tenements in any district and so defeat the purposes of zoning.

To forestall slum and tenement conditions two additional sets of restrictions are applied to each district. These are area and height of building restrictions.

Area restrictions consist of limiting the depth of front and rear yards and the width of side yards

in some districts, together with specifying the minimum widths of lots and the minimum area of lot required for every family. Height restrictions consist of limiting the height of every building. For example, a dwelling district will usually require 25 feet for the depth of front yard, 25 feet for the depth of rear yard and 5 1-2 feet for the width of a side yard. On a lot 50 feet by 100 feet there will remain 41 feet by 50 feet for building purposes after deducting the above requirements. This remaining area is much more than is ordinarily used for building purposes. These restrictions ensure a minimum distance of 9 feet between houses and a uniform building line or set-back of 25 feet; and provide sufficient space for light, air, sunshine, playground space for children and privacy.

One of the chief sources of slum conditions is the small lot. Consequently, a zoning ordinance specifies the minimum average width of lot for residence purposes. For example, the average minimum width specified for a single-family dwelling is 50 feet, and 75 feet is usually specified for a two-family dwelling. This is done to prevent undue congestion of population with its consequent heavy drain on the municipality for utilities, playgrounds, schools, and street space.

Six thousand square feet is usually specified for the area of a lot for a single family dwelling and 9,000 square feet for a two-family dwelling. In dwelling districts, heights of buildings are limited to 2 1-2 stories for the dwelling and 35 feet for the garage, servants' house or any other building.

Area and height regulations are made less severe as the use of property approaches the commercial designation. For example, no front, side, or rear yards are required in commercial districts, and the only requirements are a certain number of square feet per

REG'LAR FELLERS

family and adequate court space for light and air for occupants who live on the premises. However, the height limitations are greatly increased to permit the construction of tall buildings. Since one tall building can shut out the light, air and sunshine from a similar building across the street, a ratio is usually worked out so that at a height of 1 1-2 times the width of the street a set-back must be provided in the structure to furnish additional light, air and sunshine. This practice has created a distinctive type of American architecture used in the construction of office buildings known as the "set-back" type.

To be workable, a zoning ordinance must be practical, and provisions must be made for contingencies. The typical zoning ordinance, therefore, contains sections relating to non-conforming uses and to special area regulations and exceptions.

Since the various use, area and height districts, with their respective boundaries, are actually laid out on a map of the city, and since this map is made a part of the zoning ordinance, all uses of property that do not conform to the requirements of the ordinance are called non-conforming uses. And, since the zoning ordinance cannot be made retroactive but must take effect from the date of its passage, no existing use of property is disturbed. Consequently, those properties that do not conform to the ordinance are allowed to continue "subject to such regulations as to the maintenance of the premises and condition of operation as in the judgment of the board of adjustment may reasonably be required for the protection of adjacent property." In addition, no non-conforming use may be changed except to a conforming use. Reasonable repairs are permitted but not enough to rebuild the property in case of fire. Thus, in the course of time, non-conforming uses are changed to conforming

uses, and the value of property is increased, obsolescence is prevented and blighted areas gradually disappear.

The zoning ordinance is enforced by the building inspector who must scrutinize every application for a permit to build for conformity with the zoning ordinance. He is given no authority to vary the terms of the ordinance. Consequently, an application for a permit is either granted or denied.

Realizing that injustice might be done if there were no appeal from the building inspector's decision, the Texas statute provides for a board of adjustment to make "special exceptions to the terms of the ordinance in harmony with its general purpose and interest and in accordance with general and specific rules therein contained." And to keep the board of adjustment from exceeding their authority, the zoning ordinance specifically sets forth duties and limitations. If this were not done, the purpose of the ordinance might be destroyed and many hardships

Proof Enough

be inflicted upon properties adjacent to those claiming exceptions by a too liberal board of adjustment. It is interesting to know that the Texas statute provides for public notice of all meetings of the Board of Adjustment, together with a notice of the exception claimed. By this means the public is advised at all times of attempts to change the zoning maps, and property owners have the right to appear before the board and present their views.

Since the city council can adopt a zoning ordinance, it can also change the provisions and the zoning map at any time. However, this prerogative should be sparingly used and then only when an injustice has been done.

Otherwise, the people will not receive the full protection afforded by the ordinance.

Cities in Texas that have zoning ordinances in effect are Austin, Brownsville, Dallas, El Paso, Highland Park, Sherman, University Park and Waco. Dallas was the first Texas city to adopt a zoning ordinance. This occurred in 1929. Sherman is the last city, having adopted its ordinance in 1936.

CLEANLINESS OUR MOTTO
Mr. and Mrs. C. L. Kimmel

"Humble Ho! There's relief ahead"
Right you are, young sir—for both your tired and thirsty mount, and yourself. The Humble Service Station is a highway oasis for man and car. All Humble Service Stations have been specially designed to make highway travel in Texas more comfortable, and they've been fully equipped to give your car the service it requires to keep it running right and looking good.
You'll always receive a friendly, Texas welcome at Humble Service Stations. You'll find free air and water for your car, free ice water for yourself. Restrooms are spotless. And whether you drive a tried and true old-timer or the latest streamline model, you'll discover that Humble Service Stations supply you with the motor fuel and the motor oil of your preference.
Stop—today—for service where you see the Humble sign. Whether you're in trouble or you'll find a friendly, Texas welcome awaits you. A sincere effort to be helpful. Get acquainted with the Humble station men in your neighborhood on the highways you travel. Follow the lead of the sands of fellow Texans—get the Humble habit.
HUMBLE OIL & REFINING CO.
A Texas institution manned by Texans
Complete service for you and your car: Spotless restrooms—ice water—free air and water—trained, helpful salesmen—highway information—complete lubrication service—first aid kits—motor fuels and motor oils for every car—accessories.
Humble Dealers
are located at convenient points throughout Texas. They are carefully selected men, chosen for their ability as retail merchants of petroleum products. They are friendly, courteous, helpful, and the Humble Company offers them every encouragement in the rendering of a complete service to motorists. Stop for service where you see the Humble sign.
