DUBLIN DOCTOR DIES IN BLAZING WRECK

CAR STRIKES GAS TRUCK ON SMALL BRIDGE

Both Machines Burst Into Flames; Truck Driver Escapes

Dr. O. O. Gaines, 57, prominent Dublin physician, was killed and his body burned in the crash of a coupe and a gasoline truck on Highway 67 two miles east of Gorman this morning. The driver of the truck, M. L. Stone of Stephenville, was being treated at Blackwell sanitarium at Gorman. His injuries were not believed serious. The collision occurred at 10:45 on a narrow bridge as Dr. Gaines drove from Dublin to Blackwell sanitarium to see a patient, Mrs. S. W. Casey. The truck, with 1-200 gallons of gasoline in its tanks, burst into flames, enveloping both machines. Stone was able to escape from his cab, but Dr. Gaines, believed to have been killed by the impact, was trapped in his blazing machine. It was several hours before rescuers could remove his charred body from the burning wreckage. This was accomplished about 1 o'clock.

Annual Texas Exes Banquet Not to Be Held

Due to widespread illness and severe weather during January and February the annual Texas independence day dinner of the Oil Belt Texas-Exes association will not be held this year. Black Jackson, Breckenridge, secretary of the association has written F. D. Wright, Cisco, vice president of the association. E. Bender, formerly of Breckenridge, is president and the banquet was to be held in that city.

Lobos Defeat Scranton 36 to 14

The Cisco Lobos basketball team defeated Scranton 36 to 14 in a post-season game at the high school gym this morning. The Cisco team played a tight defensive game. Barnhill, smallest player on the court, was high point man with 15 to his credit for the game. Howser rang up 10 of the Cisco points. Boland was high for Scranton with eight. Lineups: Cisco, Howser and Taylor, forwards; Heysler, center; Childress and Barnhill, guards. Scranton, Boland and B. Purvis, forwards; Brummett, center; M. Purvis and Starr, guards.

Rousse Will Address County Teachers Ass'n

Thomas A. Rousse of the University of Texas will address the meeting of the Eastland County Teachers association, to be held at Eastland a Tuesday, March 2, at 9:30 a. m. It was announced today. W. G. Womack is president of the association.

The program for the meeting was announced by Miss Charlton Marx as follows: 9:30 Group singing—Led by Miss Vernelle Stinson. 9:45 Devotional—Jones W. Weathers, First Baptist church, Eastland. 10:05 "Andante Cantabile," organ solo, Widor—Mrs. Donald Kinnaird.

10:30 Address—Thomas A. Rousse, University of Texas. 11:10 Business session.

Mr. and Mrs. Bob Key have returned from a brief visit in Brownwood.

They Crossed Ocean 'On the House'

A new high in stowing away was achieved by Mrs. Margaret de la Rosa Madden Alvarez, of Philadelphia. Leaving her husband and two children in Spain, she concealed herself and three other children aboard the Italian Liner Vulcania at Lisbon and traveled unsuspected until the vessel reached Sandy Hook, where she confessed to the ship's chaplain. Mrs. Alvarez and children are pictured landing in New York.

Finns Give Up Island Fortress

HELSINKI, Feb. 27 (AP)—Kovisto islands, from which Finnish guns once guarded the eastern end of the Gulf of Finland and the western end of Finland's Mannerheim line, now are in soviet Russian hands, clearing away one more barrier to the red army drive on Viipuri.

(Editor's note: This dispatch was delayed 5 hours in transmission by worsening communications.)

The fall of Finland's "Gibraltar" brings more definitely than before a concentration of the front in a section before Viipuri. It is likely the Kovisto guns were silenced some days ago for they have not been mentioned in recent Finnish communiques.

The fall of Finland's "Gibraltar" brings more definitely than before a concentration of the front in a section before Viipuri. It is likely the Kovisto guns were silenced some days ago for they have not been mentioned in recent Finnish communiques.

The main thing now was that further intensification of the battle for Viipuri could be expected on the western half of the isthmus where the Finns have shortened and straightened their front while the Russian lines have broadened.

To take the city by a frontal attack, the red army must crash through this Finnish "second line," stretching from Kaislahti to Lake Muola.

Military informants say the Finns still hold the central section of their first line defenses as well as the eastern half of the isthmus to Taipale on Lake Ladoga.

Radio programs in this connection are being held every day through Friday from 12:20 to 12:45 from station KPFL, "Dublin, 1310 kilocycles.

The South community volleyball team defeated the Cisco Recreation directors last night, for the second time in scheduled competition, by winning four out of five games played.

The directors showed considerable improvement over their form of last week, and with continued practice periods they may be better equipped to furnish competition for the "sure-shot" South community team.

Russian bombers flew over parts of Finland again Riihimaki, Kuovio, Lanti, Hanko, Turku

COUNTY MEET AT RANGER ON MARCH 28-30

Dates Announced in Bulletin from County Superintendent

County School Superintendent T. C. Williams has announced in a bulletin sent school teachers and trustees that the annual county Inter-scholastic League meeting has been set for March 28, 29 and 30 at Ranger.

According to the bulletin the following schools have qualified: Alameda high, Alameda grammar, Bullock, Carbon high, Carbon grammar, Cisco high, Cisco west ward, Cisco east ward, Cisco grammar, Colony high, Colony grammar, Desdemona high and ward, Eastland junior and senior high, Flatwood, Gorman high and grammar, Merton Valley high and grammar, Pioneer high and grammar, Ranger high, Ranger Cooper ward, Ranger Hodges Oak park ward, Ranger Young ward, Rising Star high, Rising Star grammar, Scranton high and elementary.

The first half of the salary aid for the school year 1939-1940 in the amount of approximately \$17,463.00 for both the independent and common school districts has been received. Williams also announced. This will insure the payment of teachers' salaries for the six months ending February 23. The salaries of teachers have been paid promptly for the six months of school.

Saturday, March 2, has been set for the County Teachers' Institute. All teachers of the entire county will be expected to attend this meeting to be held in Eastland. A short, interesting program has been prepared.

March is the month for the enumeration of scholastic census for the entire county. Census enumerators will be busy in taking the school census. This is an important responsibility and census enumerators will be required to make careful reports to the proper authority before being paid for their work. Census enumerators are asked to take a census of all children in scholastic age who have not attended school anywhere during the present school year 1939-1940. This is an extra report that will be asked of census enumerators.

Youth Parade Here Wednesday Afternoon

The Rev. Roy A. Langston will speak in connection with the beer election at the following places Wednesday: At the Rising Star Livestock exchange from 12:30 to 1; in downtown Rising Star from 2:30 to 3, and at Ranger at 4.

At 4:15, young people of Eastland county will assemble on the lawn of the Cisco First Methodist church for a youth parade. Representatives are expected from churches in Cisco, Eastland, Ranger, Carbon, Gorman, Rising Star, and Scranton. Following the parade, the Rev. P. W. Walker of Eastland will speak on "Beer, Business and Old Age Pensions."

Radio programs in this connection are being held every day through Friday from 12:20 to 12:45 from station KPFL, "Dublin, 1310 kilocycles.

South Team Defeats Recreation Leaders

The South community volleyball team defeated the Cisco Recreation directors last night, for the second time in scheduled competition, by winning four out of five games played.

The directors showed considerable improvement over their form of last week, and with continued practice periods they may be better equipped to furnish competition for the "sure-shot" South community team.

Red Bombs Fall on Finnish Hospital

Nurse inspects instruments in examination room of hospital in Rovaniemi, Finland, after Red planes have dropped bombs, strewn the infirmary with wreckage. This picture, taken by Eric Calcraft, NEA staff photographer who is covering the Finnish war, shows the other side of the conflict back of the fighting lines.

City Sanitation Department Starts Drive To Rid Insects

Through the Editor's Spectacles

By GEORGE

History in this issue of the Daily Press reports the campaign of the city sanitary department to enlist public cooperation in cleaning up conditions which encourage flies and mosquitoes. Unless something is done to remedy these conditions Cisco is certain to have a recrudescence, probably in a worse degree, of the fly and mosquito epidemics of last year. Speaking frankly, those conditions were bad. There were more flies and mosquitoes in Cisco last summer than the city had had in several preceding years. The fault was not that of any particular person or institution. It was the fault of everybody. It is practically impossible to control mosquitoes and flies without the cooperation of everybody. It is especially difficult in a small city like Cisco where livestock is kept within the city limits and where garbage disposal systems are confronted with serious difficulties.

Cisco, in the days when it was possible to hire men to do nothing but work on insect control, had a proud record. The record was bought at the cost of an eternal vigilance against conditions favorable to the breeding of flies and mosquitoes. The community in effect, shifted its responsibilities upon the men employed for the purpose. They did their work well. There were few flies in the city and the presence of a mosquito was something to write home about.

But we have slipped from that position. Last summer's pests should be a warning. It is high time to put control measures into effect about the premises. Cleanliness is next to godliness, an old proverb. It certainly is next to godliness in the sense that cleanliness eliminates insects which carry the pestilences that curse mankind.

There is only one way to control the mosquito and fly pest. That way is to control the source. This, under the conditions as they occur now, can be done only by complete public cooperation in keeping premises, alleys and vacant lots free of rubbish and garbage and open water. It is idle to expect the authorities to do this. It could not be done by them with a large force of employees to do the work if there was no cooperation from the residents.

It is time that Cisco had a complete cleanup. We have gone so long with only a desultory effort now and then to accomplish such a program that a great deal of unsightliness and filth have accumulated in corners and out-of-way places to furnish ideal breeding grounds for the insects that plague us. Pestilences rise from such a source. It is a shame to blight the great advantages

CLEANUP OF SOURCES IS UNDERTAKEN

A campaign against the conditions which cause flies and mosquitoes has been inaugurated by the city sanitary department. Supt. Joe Clements announced today. The campaign will center on efforts to improve conditions surrounding garbage disposal, especially at the residences, Mr. Clements said. Failure of citizens to observe regulations laid down for handling garbage on their premises and preparing it for removal by the trucks created extremely undesirable conditions in places and the efforts of the sanitation department will be directed toward eliminating such conditions through the cooperation of the citizens.

"Unless some steps are taken to correct these conditions," Mr. Clements said today, "we are going to be faced with serious insect breeding, especially flies and mosquitoes. The citizens pay for removal of garbage and the garbage trucks do make the residential sections twice a week. However, to receive this service there are regulations which the citizens must observe. The main rule is that every citizen must have a regulation garbage can with a regulation cover or lid. Due to the difficult times the city commission has been lenient and allowed any reasonable container to be used."

The campaign is also being directed toward cleaning up alleys in the city, many of which are in a deplorable condition, Mr. Clements said. He pointed out that every empty can where water is allowed to stand is an excellent breeding place for mosquitoes, and that every pile of trash or rubbish helps increase the number of flies.

"We must all cooperate to keep our town clean in order to lessen the insect danger. Won't you please cooperate?"

Mrs. Jimmie Fox and Mrs. Earl Mayhew are spending today in Abilene.

Mrs. Warren Waters and Mrs. L. H. Choate of Fort Worth have returned to their home after visiting in the W. J. Armstrong home.

Ten Ciscoans Hear President of Rotary Speak

Ten Cisco Rotarians and Rotary Annex attended the dinner at the Hilton hotel, Abilene, last night, celebrating the 14th anniversary of the organization of the Abilene Rotary club and addressed by President Walter D. Head of Rotary International. The Cisco delegation, headed by President and Mrs. Sutton Crofts of the Cisco club, included Mr. and Mrs. E. P. Crawford; Mr. and Mrs. R. L. Ponsler; Mr. and Mrs. J. C. McAfee and Dr. and Mrs. Gary L. Smith.

Almost 400 persons from 24 cities and towns of west Texas heard the international president make the first of a series of five addresses in Texas.

"Never in my experience have human rights been trampled on so ruthlessly and so generally as they are at the present time," Head declared in his talk on Rotary in Time of War.

"It would appear that right goes to him who has might, and that human liberty—which we thought was becoming general all over the world—is a delusion and a snare. 'What, we ask ourselves,' Head said, speaking for Rotary clubs throughout the world, 'is the effect of all this going to be on Rotary, and what can Rotary do about it? The answer is that we don't know."

"When an international organization such as ours is struck by a world tornado, nobody can say what will happen."

In discussion of world conditions and what part Rotarianism could play in remedying the situation, Head said he believed the strife could be stabilized only when nations cease to look at their interests from a purely selfish standpoint.

"When will the nations of the world learn that 'He Profits Most Who Serves Best' (the Rotary motto) applies to them as well?"

Mrs. A. B. Wallace of Lovington, New Mexico, aunt of Mrs. E. L. Wisdom, Mrs. Norton Gray and Lloyd DeWitt, died at her home recently, according to word to relatives here. Mrs. Wallace was a sister of the late Dr. W. D. DeWitt.

WELLES VISIT TO ITALY HAS GOOD EFFECT

ROME, Feb. 27 (AP)—Undersecretary of State Sumner Welles' "mission of inquiry" in Europe appears to have met considerable initial success in conferences with Premier Mussolini and Foreign Minister Count Galeazzo Ciano. Scepticism with which authoritative Italians originally greeted announcement of the American envoy's visit melted noticeably after his visit and a quarter talk with Ciano Monday morning and still more after he stayed with Mussolini an hour yesterday afternoon.

A communique, issued last night, said Welles gave Premier Mussolini a signed message from President Roosevelt.

"Their conversation was most cordial, lasting an hour," the communique added.

Accompanied on both visits by United States Ambassador William Phillips, Welles made the most of his first day in Rome and prepared to depart today at midnight for Berlin, the next objective on his swing through major European capitals surveying the war situation for President Roosevelt.

Another newly arrived American envoy, Myron C. Taylor, the president's personal representative to Pope Pius XII, prepared for his first audience with the pontiff tomorrow at 10:30 a. m. (3:30 a. m. CST).

Dr. Taylor Will Speak to P.-T. A.

Dr. Thomas Taylor, president of Howard Payne college in Brownwood, will be principal speaker Wednesday evening when the West Ward Parent-Teacher association holds its regular meeting at the west ward school.

Dr. Taylor, an outstanding speaker, will use as his subject, "The American Youth." The meeting is scheduled to begin at 7:30.

Every year, the P.-T. A. holds one regular meeting in the evening so that fathers of the west ward pupils will be given an opportunity to view their children's work as the P.-T. A. members are privileged to do twice a month.

BIBLE THOUGHT FOR TODAY

We joy in God through our Lord Jesus Christ, by whom we have now received the statement—Rom. v. 11.

Through life's long day, and death's dark night,
O gentle Jesus be our light.

Do more than pardon: give us joy,
Sweet peace, and sober charity,
And loving hearts without alloy,
That only long to be like Thee.

—FABER.

Let us kindly accept from God even our own nature, and treat it charitably, firmly, intelligently, and let us never be afraid of innocent joy. God's good, and what He does is well done.—Ariel's Journal.

Homespun Symphony Music

WHERE you'd least expect it, a symphony orchestra has sprung up.

It grew right out of the soil, among farmers and traveling salesmen and housewives and factory workers who thought they'd never again get around to picking up the old oboe or the dust-caked cello. The

project was organized last fall in Greenfield, Mass., with 22 members from the surrounding community. There are now 46 in the orchestra. Two concerts have been held, and hundreds of folks came to hear their neighbors play the classics.

The musicians are people who like to play from sheer enjoyment, and whose composite talent is appreciated by everyone in the neighborhood. In a small way, it is a revival of a movement that lost ground when the various forms of "canned" music invaded homes.

It is the kind of project that can spring up anywhere. Big cities need have no monopoly on symphony music. Any community that wants it will find plenty of talent in all sorts of unsuspected places.

They Tell It to Diaries

IT was scarcely surprising to learn that Londoners have been buying more diaries since the war began—locked ones, at that.

During the war, all citizens, even in democratic Britain, are expected to be of one mind. And, people being what they are, can never be unanimous in thought. Britons, no more than Germans, can be expected to agree with every government war policy. Many of them, perhaps, don't agree that there should even be a war. But it isn't discreet to say so out loud. Hence, the diaries.

It would be interesting to open all those diaries after the war to learn what people were really thinking. How much hating did they do, and how many sacrifices did they make and how much sorrow did they suffer?

These are things one can't learn easily from statistics. Only the people themselves, and to some extent, the diaries, hold the answer.

A new type of water-proof hat for women will make it unnecessary for them to carry umbrellas. As if rain could do any further damage to some of the current numbers.

The price of weddings is being cut in Britain for soldiers. It's hard to imagine any man joining up with the army just to get a bargain rate on his own private quarrels.

Three Naval Ships Have Been Named "Texas"

Three ships of the United States navy have borne the name of Texas. The first of these was an iron-clad ram built and in the service of the Confederate States. It was captured at the fall of Richmond, Va., on April 9, 1865, and put in service of the U. S. navy. This ship was sold by the U. S. government on October 15, 1867.

The second U. S. S. Texas was a second-class battleship authorized by an act of congress on August 3, 1886. This ship was an armored vessel of 6,315 tons, built at Norfolk, Va., and launched on June 28, 1892. During the Spanish-American war of 1898 the Texas assisted in the destruction of Cayo del Toro and also took part in the battle of Santiago. The ship's name was changed to San Marcos on February 16, 1911, and on October 11 of the same year the San Marcos was used as a target and stricken from the list of U. S. navy ships.

The third (and present) U. S. S. Texas is a first-line battleship of 27,000 tons displacement and has a main battery of 10 14-inch and 12 5-inch guns. The ship is 573 feet long, and has a beam of 106 feet. It has a complement of 1,507 officers and enlisted men.

A large percentage of the crew of the battleship Texas are native Texans who enlisted at the U. S. navy recruiting station at Dallas, Fort Worth, Waco, Wichita Falls, Abilene and Marshall.

Most of the conveniences of a modern city are found on board the battleship Texas. A telephone system links all departments of the ship. Shops equipped with most modern machinery and in which approximately 55 trades are represented are built in as parts of the ship. For the comfort and convenience of the Texas' crew there are two ship's stores which sell at reduced prices candies, tobacco, magazines and many other articles desired by the sailor at sea. Profits from these activities go into the crew's amusement fund.

The crew's recreation room is fitted out like that of a first-class civilian club and contains a library of more than 2,000 books. A motion picture show at which

the best current releases are shown is held each night, weather and other conditions permitting. A ship's newspaper, "The Texas Steer," is published weekly in the ship's print shop and distributed free of charge to the crew. The battleship Texas is now stationed on the Atlantic coast of the United States.

The Drums

Federal Old-Age and Survivors Insurance

(Editor's Note: The following is the twelfth of a series of articles prepared by W. O. King, manager of the Abilene, Texas, Social Security board field office, to be published in this newspaper. The information contained in the articles is educational and for the public in general and the wage earners in particular. For additional information concerning the federal old-age and survivors insurance program, our readers are requested to contact the Social Security board field office, located at 205 Alexander building.)

WAGE CREDITS OF OLDER WORKERS

Under the original Social Security act, wages received by a worker after his 65th birthday did not count toward old-age insurance benefits. Under the amended law, this "stop-date" at

age 65 has been removed, so that an employe in commerce or industry may continue to build up his credits toward benefits as long as he remains at work.

A store, mill, factory or office worker who was 65 or more when the original act went in effect on January 1, 1937, can now receive credit for all wages paid to him in covered employment since 1938. In other words, the amendment with regard to workers past 65 years of age became effective as of January 1, 1939. Beginning with that date, wages received in commercial and industrial employment count toward insurance benefits regardless of the age of the worker.

The amended law, as it affects older commercial and industrial workers, is summarized as follows:

- 1. A wage earner who reached age 65 after 1936 and before 1939 will count toward his benefits all wages he was paid after 1936 and before his 65th birthday, plus all wages he was paid after 1938.

- 2. A wage earner who reaches 65 at any time during the year 1939 or thereafter can count toward benefits all the wages he received since the original act went into effect in 1937.

- 3. A wage earner who was 65 years old before 1937 will count toward his benefits all the wages paid to him after 1938.

LEAVE 'EM WHERE THEY LIE

Wounds — Infections Leave 'Em Where They Lie—Treat Shock, Control Bleeding

There are five different kinds of wounds:

1. Contusions in which the skin is not broken but just bruised. The blue brown color comes from broken blood vessels underneath.

2. Abrasions in which the top skin is rubbed off. Such wounds are superficial and do not bleed much.

3. Lacerations are torn jagged wounds through the skin and may be deep, even into and tearing the muscles. Bleeding may be severe. Control bleeding, as you were told—TREAT SHOCK!

4. Fracture wounds are caused by some object having been driven or pushed through the skin into the flesh. Such wounds do not bleed much unless a blood vessel has been torn. See last issue on control of bleeding.

5. Cuts: These are clean cut wounds through the skin and may reach any depth and bleed more than any other wound.

If cut excessive of the arm or leg or body they bleed the most because the blood vessels which run up and down are cut across.

So do what? Control bleeding and prevent INFECTION. What is "infection"? It is the contamination with germs of any wound and is the cause of all inflammation and blood poison. The air, the skin, your clothes, the ground, all things contain germs (bacteria) that at once enter the wound and start infection.

How should you prevent or limit infection? See treatment of wounds in the next issue. CONTROL BLEEDING—LEAVE 'EM LIE—TREAT SHOCK!

Prepared by the Fracture Committee, Texas State Medical Association, sponsored by Texas State Highway Department and Texas Public Safety Commission.

Son Is Charged In Father's Slaying

COMANCHE, Feb. 27 (AP)—W. B. Ash, 66, well known in livestock and rodeo circles in central and west Texas, was shot to death at his home two miles from DeLeon, near here, Monday, and a son, Sam Ash, 29, surrendered and was charged with murder. One bullet entered the slain man's heart. The son gave him-

self up to Chief of Police Joe Underhill at DeLeon and handed the officer a .38 caliber pistol which contained one discharged shell.

After the murder charges were filed before Justice of the Peace W. B. Smith at DeLeon, Ash was brought here by Sheriff Wid Spivey and Deputy M. F. Stone and lodged in the county jail. The dead man was in the meat business for many years at Round Rock and had participated in numerous rodeos at San Angelo and

Stamford in recent years. He was an expert roper. Ash's wife died from accidental burns in their home a year ago.

Comm'n Votes Against Change In East Texas

AUSTIN, Feb. 27 (AP)—The railroad commission voted Monday against any change of the proration policy for the famous East Texas oil field.

The decision apparently meant that it would be enjoined by a three-judge federal court from enforcing its proration order against Humble Oil and Refining company, largest operator in the big pool, and the firm of Rowan & Nichols of Fort Worth.

Commissioner Jerry Sadler, who opposed the action of the commission majority, predicted "chaos" in the field unless the court stayed execution of its judgment pending outcome of an appeal to higher courts.

"I am requesting the attorney general," he said, "to petition the court for a stay of order until the case has been fought through the higher tribunals. Oil men from all over the state have been telephoning me that chaos will result if the injunction becomes operative."

Commission Chairman Lon A. Smith and Commissioner Ernest O. Thompson took the position that it would be better to appeal from the injunction than to cut minimum well allowable of 20 barrels daily effective in East Texas. Thompson voiced the opinion conditions would not become chaotic.

Notwithstanding the decision of the three-judge court that the existing proration method is unconstitutional, Thompson said he believed there was a 50-50 chance the supreme court of the United States would uphold the method.

"If the 20-barrel well minimum is abolished," he added, "the little man in East Texas cannot continue to exist."

The three-judge tribunal stated last week that it would issue an injunction against the commission unless the proration order was changed.

Allied Troops Blocked From Finns

Blocked in by walls that block out allied troops, Finland is forced to battle the invader with only the help of volunteer fighters. Germany has warned Scandinavian countries against giving military aid or permitting passage of allied army units to assist the Finns. Swedish roads are still open to individual volunteers and shipments of munitions.

British Sentiment to Aid Finland Grows

LONDON, Feb. 27 (AP)—Oliver Locker-Lampson, conservative member of parliament, last night took over house of commons lead-

ership of the growing agitation for immediate intervention in Finland with a large British army.

A resolution calling for the government "to free a substantial force for instant service in Finland" was introduced by Locker-Lampson. He asked that a day be

given to debate on the question.

It was not considered likely that the government would acquiesce to the debate, although the problem is known to have received intensive study here and in Paris. Locker-Lampson's resolution cited the "loss of Poland and

Czechoslovakia and the imminent peril of Finland's overthrow." He then suggested inasmuch as "the allies' armies remain intact despite six months of war" that Britain send a military force to fight under the league of nations agreement to give Finland aid.

Red Losses May Slow Up Drive Through Isthmus

By KIRKE L. SIMPSON Associated Press Staff Writer Reports that Russian casualties on the Karelian isthmus have reached the stunning total of 100,000 appear of greater significance than the Finns' abandonment of their western flank "anchor" forts.

Evacuation of the Koivisto defenses on the Gulf of Finland end of the Mannerheim line has been foreshadowed since the red army's advance in the center of the isthmus bent and extended that line. Conservation of limited Finnish man-power on a shorter defense line was essential.

On the other hand, the reported extent of the red army's losses raises a grave doubt that the Russians can press the attack immediately on that shorter and more easily defended front to which the Finns have retired. If the Russian losses aggregate anything

like 100,000, there is every reason of military experience to suggest that the attack must halt soon. Russian front line units must be badly disorganized, and in no shape to take full advantage of their victories. Red communication lines to Leningrad are jammed with a two-way traffic and increasingly subject to enemy harassment.

The flow of the human wreckage of war in sick and wounded back into Russia passes under the eyes of replacements being brought up. The effect on red army morale is a factor not to be ignored.

Nor can Russian leaders ignore the plain evidence on their maps of the isthmus that even harder going lies ahead of them, if the Finns have taken advantage of all topographical possibilities in establishing their secondary defenses.

The report of Russian losses, with all its implications, sheds light on the action of the conference of foreign ministers of Denmark, Sweden and Norway, in urging again that the war be ended by a negotiated settlement preserving Finland's "full independence." Presumably, their proposal rests on the hope that Moscow may now be ready for mediation for practical reasons.

Rockefeller center, one of New York's show places, covers about 12 acres. It is leased for a long period from Columbia university.

Domestic money orders in the United States first were issued on November 1, 1864.

EVERYBODY'S FRIEND

Who are the best friends of advertising?

The manufacturer? . . . Yes, for advertising gives him a chance to acquaint thousands of people at once with the fine product he has made.

The merchant? . . . Yes, for advertising draws people to his store who might never have known about the outstanding goods he has to sell.

The consumer . . . you? . . . Yes, because advertising informs. It tells what, it tells where, it tells when, it tells how much. It saves you infinite trouble, and makes life easier, more economical, more satisfying.

Every one profits from advertising. That's why advertising's friends are many . . . and loyal!

Cowboys Start Spring Grid Work March 11

ABILENE, Feb. 27. — Spring grid training for the Hardin-Simmons University Cowboys will begin on March 11, and will climax by annual custom with the annual intra-squad game on H-SU Senior Day in April, Coach Frank Kimbrough announced today.

Backbone of the '40 eleven at Hardin-Simmons, as the Ranchers look toward fall, will be the 17 letter men from last year's team that won seven, tied one and lost to Loyola in an upset that cost a prospective Cotton Bowl bid.

Seniors gridders were headed by Bulldog Turner, All America center, and Neal Davis, right end, both of whom earned three letters as Cowboys. Kirk McKinnon, backfield ace; Drate Cathey and Larry Cunningham, guards, and Joe Pee and Travis Green, tackles, complete the septette.

Goes to Bears
Turner will continue workouts with the Rancher squad this spring to condition for fall, when he is scheduled to report to the Chicago Bears of the national pro league, and Davis, who earned little All America mention at end, will remain at H-SU next fall as freshman grid mentor.

Letter men are eight strong in the backfield, headed by Owen Goodnight Holland, and L. B. Russell, hereford, pass and scout touchdown twins; Moon Mullins, Marshall; Sam Oatman, Paducah, and Bud Vandever, Amarillo, all to be seniors, and Murray Evans, Burkburnett; Lloyd Flahie, Cross Plains, and Dean Walsh, Ranger, juniors to be.

In the forward wall, veterans are Leslie Lewis, Decatur, who alternated at center last fall; Wilford Moore, Littlefield; Estel Becker, Floydada and Winston Tucker, Seymour, guards; Long John (Deadway, Nacogdoches); Robert Thompson, Haskell, and Bob Russ, San Angelo, tackles; H. C. Burrus, Big Spring, and Deward Marcum, Amarillo, ends.

All will be seniors except Thompson and Burrus, juniors. Returning squad men with experience are Al Holman, Paint Rock, center; J. S. Fikes, Anson, guard; Ed Beeman, Barnhart; J. B. Heard, Hobbs, N. M., and Truett Rattan, Matador, tackles; D. A. Parker, Azona and Woodrow Coats, Big Spring, end.

Coming up from last year's freshman squad, Coach Kimbrough smiles at the promise shown by several yannigans. Particularly E. C. "Jug" Bennett, Graham, guard, and Tommy Chadwick, all around Colorado City back.

In Virginia, state relief funds are granted to counties on a population basis but county officials must match every state dollar with 60 cents of county funds.

BORN THIRTY YEARS TOO SOON

House Votes 60 Million For Farmers

WASHINGTON, Feb. 27 (AP). — In response to a radio-gram from President Roosevelt, the house voted Monday to make \$60,000,000 of next year's agricultural fund available immediately to keep crop control checks flowing to farmers.

Members of the house appropriations committee reported that the president had approved the transaction in order to replenish the regular \$300,000,000 benefit payment fund which has been depleted by increased farmer compliance with crop control plans. A few minutes later they added the \$60,000,000 to a \$30,069,139 deficiency bill designed to meet emergency needs of various government agencies until July 1.

Late yesterday, the house passed the measure, which now goes to the senate.

Committee members announced that an agreement had been reached with senators that an equal amount would be deducted from the 1942 farm appropriation bill pending before the senate appropriations committee.

Won't Increase Total
Secretary of Agriculture Wallace, asserting that the agriculture department had underestimated the number of farmers who currently would participate in the AAA programs, told the house committee that the transfer would not increase the total of \$1,000,000,000 that would be appropriated in two years.

He predicted, however, that it would result in a small decrease in individual payments to farmers in 1941.

While the house was considering the deficiency bill, Wallace told the senate appropriations committee, which is studying the 1941 appropriation measure that failure to include money for "parity" payments or the equivalent might interfere with control programs. Farm state legislators have talked of voting about \$200,000,000 for such payments.

Certificate Plan
The secretary recently advocated a certificate plan, similar to the old processing tax, as an "equivalent" for parity payments.

In approving the deficiency bill, the house trimmed \$4,020,704 off the president's budget estimates. The senate passed a \$107,079,000 annual appropriation bill for the state, commerce and justice

Bees' Shortstop Ready to Buzz Again

His broken left leg as sound as ever, Eddie Miller, Boston Bees' star shortstop, gets in some pre-training camp exercise at Orlando, Fla., by acting as instructor at Joe Stripp's baseball school. A collision with Al Simmons put Miller in the hospital last season two weeks before he was to play in the all-star game.

Seek Federal Designation for East West Route

BRECKENRIDGE, Feb. 27 — Delegates from a number of towns from Fort Worth to Carlsbad, N. M., at the meeting of the East-

West Highway association here Monday decided to reapply for federal designation of state Highway 15 and reported on much work being done in west Texas to make this route an all weather highway.

A committee was named with C. E. Sawyer, Breckenridge as chairman, to draw up resolutions to be presented to state highway Engineer Julian Montgomery asking that he recommend to the American Highway association federal designation of the route from Fort Worth to Carlsbad.

Other members of the committee are J. J. Roach, Seminole; G. D. Triplett, Anson; Ray E. Dickson, Snyder; M. C. Johnson, Carlsbad; W. S. Wisley, Fort Worth; Allen Guinn, Mineral Wells; W. G. Webb, Albany; Fred Stevenson, Roby; Judge Charles Nunnally, Gail; J. E. Hayes, Weatherford; Sam Richardson, Lamesa

and Mary Dunbar, Palo Pinto. Progress was reported in highway work in counties of West Texas from Roby to the New Mexico line, and in New Mexico the work was reported complete with the exception of 26 miles, this to be completed in May.

Floyd Jones of Breckenridge was elected president; C. E. Sawyer, Breckenridge, Texas secretary, and Victor Minter, Carlsbad, N. M., secretary. Jones succeeds W. J. Ely of Snyder.

It was decided to hold the next meeting in Seminole in May or June.

Michigan, although an inland state, has the longest coastline of any state in the union, more than 3,000 miles. The Atlantic coast line is 1,773 nautical miles.

For relaxation, Andre Tardieu, former French premier, reads American detective stories.

Comm'n Candidate

ROSS HARDIN

Political Twin In Race for Railroad Comm'n

Ross Hardin, one of the Hardin twins in the state legislature, this week actively began his race for state railroad commissioner, opposing Chairman Lon A. Smith.

Promising to "clean up the East Texas oil field" and to institute some economy measures in the Austin office of the railroad commission, Hardin said he favored "cutting down on some of those 'dead-head' employees — down there," and prohibiting issuance of allowables on dead wells.

Ross, who serves Limestone county in the house of representatives, while his twin brother Doss serves as state senator, made the first talk Wednesday in the series of weekly radio broadcasts he will make during the campaign. The outspoken young legislator

Show Business Big for 4-H Boys in 1939

The show business was big business for Texas 4-H club boys during 1939 as they exhibited 17,007 head of livestock at 170 shows, collected premiums totaling \$31,245.33, and made sales that brought in \$254,762.25.

Beef calves, fed out and trained by the club members lead in volume, with 2,776 head. The annual report of L. L. Johnson and J. W. Potts, state boys' club agents of the Texas A. & M. extension

speaks at 1 p. m. each Wednesday over the Texas Quality Network, just following the Crazy Crystals program.

During his six years in the house, Ross Hardin has championed the old-age pension cause. He voted for the joint resolution designed to finance the pensions.

service, shows that the calves brought premiums of \$16,774.14. The total weight of the animals sold at show sales was 1,838,931 pounds, and receipts totaled \$186,798.31.

In addition to local, district and state shows, Texas 4-H club beef calves, fed under the supervision of county agricultural agents, took grand champion honors at the Chicago and San Francisco shows.

There were 3,757 sheep and lambs exhibited, weight 283,212, premiums of \$3,806.79, and sales brought in \$24,245.36.

Club boys showed 5,172 head of swine, weight 584,358, premiums \$5,606, and total sales \$32,401.08.

Few of the 1,361 dairy animals exhibited were sold, but the few individuals offered brought fancy prices that totaled \$5,680. Premiums added up to \$3,391.75.

The 12,967 poultry entries brought premiums of \$1,672.64. Again most of the birds were kept for future demonstrations, but sales came to \$5,637.50.

Daily Press Adds NEA Telephoto Service Newspictures Sent Over Telephone Wires

Readers Given Benefit of Quickest Photo Coverage

The Cisco Daily Press has obtained exclusive rights to NEA Telephoto Service in this territory. With the inauguration of the new service today newspapers from all parts of the country speed toward this newspaper over long-distance telephone lines...

This new service which the Cisco Daily Press brings to its readers represents the latest advances in the field of high-speed transmission of newspapers. It is made possible by the co-operation of more than 700 enterprising newspapers in the nation.

Bureaus Throughout the Nation

NEA Telephoto bureaus have been established in strategic geographical centers throughout the United States. Each of these bureaus is equipped with a Telephoto Trans-Ceiver, which both transmits and receives pictures over telephone lines.

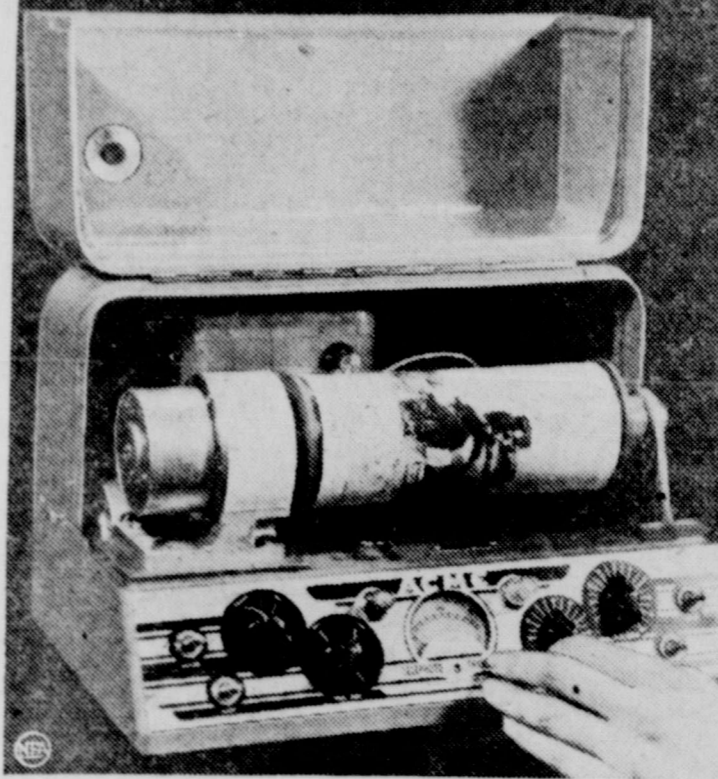

The camera-recording of an event in the farthest corner of the nation can be faithfully reproduced in seven minutes in every NEA Telephoto bureau. Pictures that formerly took as much as two days by fastest mail to reach this section, are received in only seven minutes at a nearby Telephoto bureau and rushed to this newspaper for the earliest possible edition.

Coverage of All News Fronts

NEA Telephoto covers not only the national scene but also the "home" front... pictures of particular interest in this locality... and the "war" front in Europe. The photos from Europe are sent first by cable or radio to New York, and then by telephone lines to this section.

No expense is spared to bring newspaper readers the picture of

Better Newspictures--Faster!

This Acme Telephoto Trans-Ceiver, small as a typewriter, both transmits and receives pictures over ordinary long-distance telephone lines. Similar machines are spotted throughout the country.

Telephoto Trans-Ceiver Machine Makes Service Possible

The Telephoto Trans-Ceiver, which makes this new service possible for The Cisco Daily Press, is one of the marvels of modern science. Smaller than a standard-size typewriter, it has the power of drawing far-off scenes through thousands of miles of fine wires...

Fundamentally, this is how the Trans-Ceiver works: The photograph to be transmitted is clamped against a drum. A tiny beam of light is thrown against it. The drum rotates, and the beam works its way across the photograph in seven minutes, "scanning" one-hundredth of an inch with each revolution.

Within the machine, a photo-electric cell picks up the light reflected from the photograph. The reflected light varies according to the light and dark parts on the photograph. This light is changed into electric impulses and sent over the telephone lines, which causes exactly equal fluctuation in a tiny beam of light on the receiving end.

The receiving beam is focused on a regular photographic negative or film which is also clamped to a drum. The beam of light gradually exposes the film as the drum revolves.

At the end of seven minutes the entire negative has been exposed. The exposed negative is taken from the machine and a print made by regular photographic methods.

Plugged Into Any Phone Line

These machines can be plugged into a telephone line anywhere. They can send pictures simultaneously to several points, so the entire country can be covered in a matter of minutes.

well as it does to the individual?" he said.

"I believe that the conditions that reign in the world today are temporary. It is easy to be depressed, but there is no sense in adopting an attitude of pessimism. X X X I interpret peace somewhat rather more broadly than mere absence of war. I interpret peace to mean peace of mind, contentment, and a happy heart. What more can any man expect reasonably to get from life?"

The Amazon river is navigable for large steam vessels 2,500 miles from the sea.

Butter was used by the Arabs since the earliest times.

nazi merchantmen reported on February 13 to have left Vigo, Spain, in an effort to get through the allied blockade. Two others of the six, the Morca and Rostock, were intercepted by allied sea patrols.

The attacks Monday were reported from the northernmost tip of Norway, where a British naval detachment of unknown size was known to have been patrolling last week. Press reports said French warships had joined the patrol.

The warships took up their station there after the British and French had expressed dissatisfaction with Norway's "ineffective" neutrality in permitting German ships to use Norway's territorial waters past the blockade. In Paris it was announced that measures would be taken to put a stop to the traffic.

Two German Ships Sunk by Allied Patrol

BERGEN, Norway, Feb. 27 (AP).—Allied warships, which only last week began an Arctic blockade to halt German-Russian sea traffic along Norway's irregular coast, were reported to have sunk two German vessels in action near the Finnish shore.

Reports from Vardoe, 50 miles northwest of Finland's Petsamo Fjord, now occupied by soviet forces, did not say whether the sunken German ships were warships or freighters.

Nor was it clear whether the sinking had taken place within Norwegian territorial waters—which would create within ten days a second incident threatening Norway's neutral status.

The 4,354-ton German steamer Orizaba, which ran aground yesterday at Skjervoy, near Hammerfest, 175 miles west of Vardoe, was reported to have sunk. There was no indication that war action had figured in her sinking.

A ship passing the vicinity said there was no sign of the Orizaba except floating debris. The crew
