THE CISCO DAILY PRESS

Combined With Cisco Daily News and Cisco American and Round-Up November 1, 1937

In an area of benevolent climate, blessed with an abundance of the purest lake water, possessing the best in recreational facilities, situated on the Bankhead all-weather route, with three railroads and many highways, Cisco is the best place in Texas to live and to work.

VOLUME XX.

CISCO, TEXAS, TUESDAY, MARCH 12, 1940

NUMBER 186

FINN-SOVIET PEACE AGREEMENT REPORTED

Dies After Initiation

Authorities at the University of Missouri, Columbia, are expected to investigate the death of Hubert C. Spake, Jr., 21-year-old student, who smothered in bed after initiation into a fraternity. The organization he joined is not recognized by the university.

NEW ENGLAND SERMONS NOT LITERATURE

AUSTIN, March 12 (Sp).—Declaring himself in rebellion to having the sermons of "dreary New England preachers" foisted off on Texas children as American literature, J. Frank Dobie, University of Texas author, today called for a southwest brand of writings for Texas students of English.

Claiming for the southwest a distinct cultural heritage, Dobie pointed out how their environment could be interpreted for students through reading, for instance, how Cabeza de Vaca, the first white man in Texas, lived for weeks on prickly pear apples, or how Texas' first man of letters, John C. Duval, escaped the Goliad massacre aided by a mustang grapevine.

"Any people have a right to their cultural heritage," he said, "though the sheep-like makers of text-books and the sheep-like imitators of American literature have until very recently, either ignorantly or willfully, denied this right to the southwest."

Much of the early New England literature taught in our schools is more foreign to young Texans than certain Spanish chronicles and a vast body of cowboy lore and southern humor already in print, Dobie said.

"To know nothing of the significance of the mesquite tree, for instance," he said, "is to be cheated out of a part of life."

At one time the teaching of American literature in American colleges and universities was fiercely resisted by professors of English, but was finally adopted when people showed a desire to know about their own surroundings, Mr. Dobie explained.

Southwestern literature as a course in our Texas schools has the same logical basis," he said.

Man Has Fine Sense of Distinctions

HOUSTON, March 12 (AP)—Isaac Roberts, 27-year-old negro, was charged with stealing tires and tubes.

He pleaded guilty to taking the tires.

"Didn't you take the tubes?" the judge asked.

"No, sir, judge," Isaac answered. "Them tubes was just in the tires—I didn't steal them."

The judge gave him a \$45 fine and 10 days in jail.

Mrs. C. B. Powell, who recently underwent appendectomy, is reported much improved.

VIIPURI IS RINGED WITH RED TROOPS

Communique Reports Northern and Eastern Limits Taken

MOSCOW, March 12 (AP).—Soviet troops closed a ring around Viipuri, by occupying the eastern and northern parts of the city, Leningrad military headquarters reported today.

Russian troops still are advancing in successful actions along the western shore of Viipuri bay, the regular communique declared.

The communique was the second to announce occupation of a part of Viipuri, one of Finland's largest and oldest cities, since the main offensive of the red army got under way on the Karelian isthmus February 1.

Nine days ago, the Russians said their troops had entered the southern part of the city and captured the railroad station.

Subsequent communique did not mention further progress in this part of the city, however, or whether the troops were forced to withdraw.

The Russian press ignored Prime Minister Chamberlain's pledge of allied aid to Finland, paid little attention to the conflict and printed only terse comments.

"The U. S. S. R. is liquidating an anti-soviet base, and simultaneously assisting the Finnish people and the Finnish peoples' government liberate themselves from the hateful white Finnish government," said today's issue of Trud, organ of trade unions.

In general the tone of this comment has not changed recently.

The Helsinki government frequently is referred to as a "bloody band of British-French servants."

45,000 Acres Are Leased in Game Project

AUSTIN, March 11.—With the leasing of 30,000 acres of adjoining land in Polk and Tyler counties and of 15,000 in Colorado county, the Texas Game, Fish and Oyster commission has completed half of the preliminary work on a huge project which includes the leasing of more than 100,000 acres of land for six game restoration areas.

The first area leased and upon which work is already well under way was in Robertson county. Other projects being pushed are to be in Goliad, Calhoun and Dimmit counties.

Deer and turkey restoration on the six large areas is the aim of the game department, according to its executive secretary. However, upon the Polk-Tyler county area and the Colorado county preserve, the primary objective is to restore wild turkey. Other work will be incidental, but it is believed several species of game, including deer, will profit. Both deer and turkey restoration will be attempted on the other four areas.

It is unnecessary to add to the deer population in well-stocked Colorado county, but the turkey have long since vanished from that section due to overhunting. In the Tyler-Polk preserve an attempt will be made to save and increase in number approximately 250 turkey which are believed to be the only remaining eastern strain wild turkeys anywhere from Texas to the Atlantic coast.

The procedure to be used in management practices for the restoration are practically the same on each of the two turkey areas. Protected nesting areas will be provided by fencing and food patches will also be protected in that manner. Native foods are

Ribbentrop Sees Rome Dignitaries

(NEA Telephoto.)

German Foreign Minister Joachim von Ribbentrop is in Rome, Italy, where he had audiences with Pope Pius, King Victor Emmanuel, Premier Benito Mussolini and Cardinal Maglione, Vatican secretary of state. Von Ribbentrop is shown above, left, as he was greeted by Count Galeazzo Ciano, Italian foreign minister, upon his arrival in Rome. (NEA Telephoto.)

rites Held Sunday for Mrs. Kelly

Brief services were held Sunday morning for Mrs. G. B. Kelly, prominent church, club and civic worker who died Saturday morning after a lingering illness. The services were held at the Kelly home with Green Funeral home in charge, after which the body was sent to Kansas City, Kan., for burial.

Mrs. Kelly was a native of Kentucky and spent her girlhood in Kansas City. As a young woman she and Mr. Kelly came to Cisco, where they made their home since.

Two years after its organization, Mrs. Kelly joined the Twentieth Century club and was an ardent worker for the Cisco public library throughout the years. During her membership in the club, she was president, secretary, treasurer, trustee and parliamentarian. She was also president of the City Federation, a trustee of that organization and a supporter of the Eastland County federation. She has served as chairman in state federation activities a number of times, and was recently secretary of the sixth district.

As a citizen and friend, she was loyal, true and steadfast, ever holding high the standards of right, appreciation and honor. Thus into the tapestry of her life was woven many griefs and joys, many sacred records of bygone days, many treasured memories of deeds well done, recalling with each breath a life well spent in lovable service.

WIND BLOWS LUCK

PALESTINE, Texas, March 12.—A high wind blew good luck for Miss Dorothy Jane Jenkins. Fifteen years ago Miss Jenkins, then a child, lost a gold pin while playing in the yard of her parents' home. March winds of the past few days whipped away the dry topsoil, leaving the pin exposed to view, and Miss Jenkins reclaimed it.

3,500-ACRE BLOCK BEING WORKED UP

Eastland Group to Drill Test West of Romney

E. H. Young and associates of Eastland are now securing a 3,500-acre block of oil and gas leases located a mile west of Romney, and about nine miles due south of Cisco in Eastland county, on which they expect to drill a well 3,500 feet deep unless oil or gas is found in paying quantities at a lesser depth.

This block is about five miles north of the Hilburn field, which was famous as one of the really big producing fields in Eastland county back a few years ago and is still producing a considerable quantity of high grade oil.

W. E. Lowe of DeLeon is the geologist in charge of this block and is now engaged in making a re-survey of the territory from a geological point of view.

Project to Re-Index Records Approved

A project providing for the re-indexing of the marriage, birth and death records in the office of County Clerk R. V. Galloway has been approved, it was announced today by Area WPA Engineer R. Towner Dickinson.

The project, providing for an expenditure of \$11,978.58, will result in the re-indexing of 12,000 marriage, 12,000 birth and 6,000 death records. The Cott system will be employed.

WPA workers have been employed since September 8, 1938, in record work at the county clerk's office. R. W. Creavenger, who is in charge of the work, has reported that the indirect index of 58,000 entries and 30,000 entries of the direct index completed in the work of indexing deed records from 1865 to 1912.

Several years ago the index on all deed records from 1912 to date had been transcribed to modern indexes, but the ones from 1865 to 1912, consisting of about 85 deed record books, and eight old styled indexes, were not modernized at that time, necessitating much more time to locate an old record back of 1912.

A crew of five persons has been working on this project in the basement of the clerk's office since the project began.

All of the work will be thoroughly checked by the force in the county clerk's office before they are put into permanent form for the use of the public, to eliminate any errors that might occur, according to Clerk Galloway.

Jaycees Will Elect Officers Next Month

The Junior Chamber of Commerce had its regular monthly dinner at the Laguna hotel Monday evening.

During the business session which followed the meal, a membership committee was appointed to begin a campaign for a larger enrollment in the organization. The committee is composed of Neil Lane, chairman, and A. D. Starling, Edward Lee and C. M. Nevill.

A nominating committee for the election of officers at the next regular meeting was also appointed, including James E. Harvey, chairman, Edward Lee, Charles Moad and Ed Brown.

Reports were heard from the rodeo committee.

Mrs. Bobby Robinson of Ranger is visiting her parents, Mr. and Mrs. W. E. Spencer.

Accused in Judy Garland Kidnap Plot

Details of a kidnaping plot against Judy Garland, juvenile screen and radio star, were related to police by Bob Wilson, 19-year-old transient, who said he lost his nerve at the last moment. He involved a mysterious "Foster" who was to be his accomplice, but was unable to give a satisfactory description of "Foster." He is being held by Los Angeles police. Photo shows Wilson in Los Angeles jail.

Cockrill on Stand in Libel Case

J. W. Cockrill, secretary to Cong. Clyde L. Garrett, was placed on the stand in 88th district court this morning in the trial of the \$100,000 libel suit of former Cong. Tom Blanton against Garrett and Cockrill this morning. Blanton, conducting his own case with the assistance of a son, Tom, Jr., placed Cockrill on the stand near noon after a morning-long session of bickering over legal points and admissibility of evidence.

Technical Men Essential to New Industry Finance

AUSTIN, March 12.—Investment-minded bankers contemplating new industries for Texas during the next 50 years must turn to the advice of technical men—and it's up to Texas schools to provide these men.

This theory was advanced as a foundation for a state industrial program by Dr. E. P. Schoch, veteran University of Texas chemist, speaking here recently before a state-wide radio audience. Dr. Schoch emphasized the need for graduate instruction to train young men to a degree of technical skill second to none.

"We want Texans as well as Texas industrialized," he explained. "If Texas is industrialized by anybody except Texans, then the people of the state have gained nothing. To do this we must train Texans to be able to do the job."

Dr. Schoch's address was one in the current university industrial broadcasts, "Frontiers of Progress."

Before the state can adjust itself to the "Chemical Age," Dr. Schoch calls for proper handling of Texas' three great resources: (1) minerals in the earth; (2) biological resources on the farms and ranches; and (3) human resources in the minds and hands of Texas people.

"It is foolish to start an effort to grow more or produce more of a particular product without first studying the markets, then research to develop new uses for

(Continued on Page Four)

SIGN TREATY TOMORROW, IS DISPATCH

Another Report, However, Says Rumor Unfounded

LONDON, March 12 (AP).—The Exchange Telegraph News agency today reported in a Stockholm dispatch that the Finnish delegation in Moscow had been authorized to sign a peace treaty.

Stockholm sources were quoted as saying the treaty would be signed tomorrow and that hostilities would cease.

The Reuters news agency, however, said that the Finnish radio stated late today that rumors of a peace agreement had been reached were unfounded.

PEACE TALKS REGARDED DRAGGING

STOCKHOLM, March 12 (AP).—Informed Scandinavian radio peace negotiations at a critical stage today as hour after hour passes without word of a decision that will decide the issue of peace in Finland or continued war with its threatening implications for the rest of northern Europe.

Observers said the negotiation were in a race with the weather already turning warm in Finland and threatening to bog down military operations even if a peace does not stop them.

Disputed Points

The Finnish delegates were believed here still to be in Moscow with negotiations containing yet today over new disputed point which had arisen in the conference with Foreign Commission Vyacheslav Molotov and Joseph Stalin, and in which United States Ambassador Steinhardt was reported to have taken an important role.

Swedish observers lost some of the optimism, which yesterday started stock exchange quotation on the rise, as the negotiation dragged along and some circle said the result of the negotiations might not come as soon as they had supposed.

Considerable political activity was noted in Helsinki, however, where meetings of members of the parliament and the cabinet were held.

According to one version of Ambassador Steinhardt's activities the conferees met at the American embassy in Moscow until the negotiations were moved to the Kremlin, where Stalin took part.

In this connection it was suggested that Steinhardt's recent trip to neighboring Baltic state was to prepare the groundwork for the negotiations by arranging telephones and courier posts between Helsinki and Moscow by way of the Baltic states.

Regardless of the outcome of the negotiations, it was considered probable here that there would be no announcement until the Finnish premier, Risto Ryti, return to Helsinki to lay the proposal before the government and parliament.

If they agree to the decision the next step would be to authorize the negotiators to sign in Moscow.

ATHYNE RUSSELL, Society Editor

A home-owned and home-controlled newspaper devoted to the upbuilding of Cisco and Eastland county, independently democratic in politics.

SUBSCRIPTION RATES: Within First and Second Postal Zones, Per Year, \$3.50. Rates Higher Within Other Zones. Weekly Rural Edition, per year, \$1.00 in Eastland County.

National advertising representatives, Texas Daily Press League, Dallas, Texas.

Any erroneous statement reflecting upon the character or reputation of any person will be gladly corrected if brought to the attention of the publishers. The Cisco Daily Press assumes no responsibility for errors in advertising insertions beyond the price of the advertisement.

Entered as Second Class Matter December 11, 1934, at the post office at Cisco, Texas, under the Act of March 3, 1879.

BIBLE THOUGHT FOR TODAY

Rejoice even with joy and singing. — Isa. xxxv. 2.

As with gladness men of old
Did the guiding star behold.
As with joy they hailed its light,
Leading onward, beaming bright:
So, most gracious Lord, may we
Evermore be led by Thee.

—W. C. DIX.

Sunshine is like love; it makes everything
shine with its own beauty. God makes our sun-
shine; we make our own clouds.

Where Does Everybody Stand?

NOTHING serves to illustrate more poignantly the lack of direction in the world's current wars than the vacillating alliances among nations. Sacred principles may not be so much at issue as purely material and imperialistic designs.

In a general way, we are told, it is democracy against fascism. Do or die. Fight to the finish. On that basis, the sides ought to be fairly easy to line up: England, France and China on the side of democracy, among the big powers; Germany, Italy, Japan with recently adopted Russia on the fascist side.

Numerous Articles Made By YA Woodshop

CISCO, March 12 (Sp.)—J. Barr, supervisor of the YA wood shop, has compiled a list of articles made in the shop during the past year under supervision, which shows a large quantity of work has been done by the boys taking the wood shop training.

Political Announcements

The Cisco Daily Press is authorized to announce the following candidates for the offices under which their names appear, subject to the action of the voters in the primary of 1940.

- Congress,
7th District of Texas:
OTIS (Out) MILLER,
Anson, Texas.
- County Assessor-Collector
CLYDE S. KARKALITS
- County Clerk—
R. V. (Rip) GALLOWAY
- Sheriff—
LOSS WOODS (Re-election)
WALTER EVANS
- County Judge—
S. ADAMSON (Re-election)
L. RUST
S. ELDRIDGE
- County Treasurer—
GARLAND BRANTON
(Second Term)
- District Clerk—
IN WHITE (For Second Term)
- Criminal District Attorney—
EARL CONNER, JR.
- County Comm'r, Precinct No. 4
RICH BINT (Re-election)
H. QUALLS
- City Comm'r—
(Three to be elected)
H. C. HENDERSON
J. R. BURNETT
W. R. WINSTON
CHARLES J. KLEINER
EDWARD LEE
A. V. CLARK

There should be a clear line of demarcation, with the opposing ideologies as represented by these nations pitted against each other.

TRY it out on paper, and see how it works. With democracies labeled "D" and pro-fascist nations tagged "F," this will give you a rough idea:

1. Germany (F), Italy (F) and Japan (F) together in anti-Comintern pact.
2. Germany (F) signs up with Russia (F).
3. Italy (F) and Japan (F) oppose Russia (F).
4. France (D) and England (D) oppose Germany (F).
5. Britain (D) and France (D) are being wooed by Japan (F).
6. Germany (F) gives assistance to China (D) in war against Japan (F).
7. Russia (F) fights Finland (D).
8. Italy (F) aids Finland (D).

HOW can the baffled little man who's standing along the ropes with a worried look on his brow choose sides? If he's one of the democratic neutrals, he has a general idea that he's rooting for the allies. But he can't be sure. Britain and France are said to be lending receptive ears to Japan, while Germany, arch enemy of democracy, is in there pitching for China. It doesn't add up.

Maybe democracy isn't in the scrap at all. It could be that this highly illusive national virtue ducked out just in time and is even now hiding behind an island somewhere, resentful that its name is being used in vain over the spilled blood of a lot of nice young men.

A Pennsylvania beauty queen wants a husband who can boss her, she says. Anyone will if she gives him half a chance.

Stalin and Hitler have been deeded a house in Brooklyn by an owner faced with mortgage foreclosure. They had better hang on to it. One can never tell when a hideaway will come in handy—even in Brooklyn.

The British say they are not opening United States mails just to learn trade secrets. They just want to see whether Aunt Hilda in River Junction got over that rheumatism.

Mussolini doesn't want to fight over a few lumps of coal—especially with warmer weather coming on soon.

done by the boys taking the wood shop training.

Towns which have secured a number of articles made in the shop include Eastland, Ranger, Gorman, Colony, Clyde and Cisco, with schools in most of these towns having work done.

The list includes:

Six four-drawer filing cases and typewriter desk for City of Eastland; eight bookcases for the NYA shop and dormitory; 200 school desks finished for Ranger public schools; 150 office chairs for the City of Eastland; four large pulpit sets, City of Eastland; two office desks, City of Eastland; one book case, prosecuting attorney; one bed room suite, City of Eastland; two seven foot clothes closets, NYA girls' dormitory; five office desks, City of Eastland; 800 miniature oil derricks, Ranger public schools; 80 youth-hours on playground equipment, WPA nursery, Ranger.

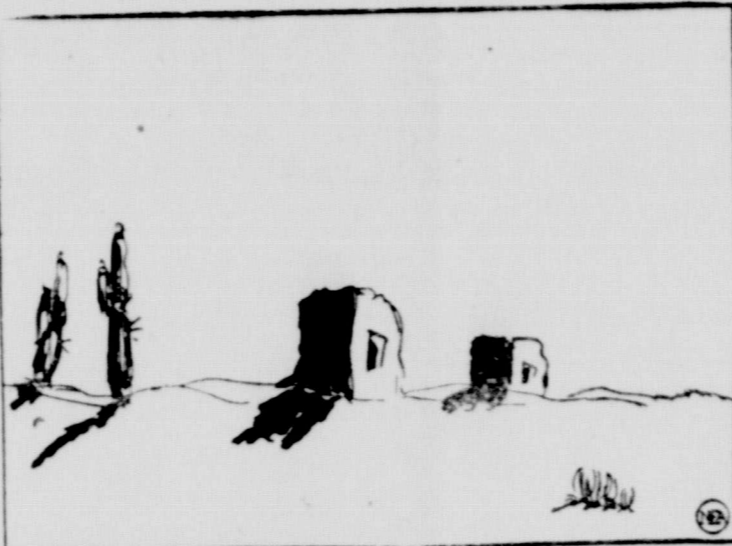

Five dining room suites, NYA girls' dormitory, Ranger; two tables, Gorman high school; one pulpit, Gorman high school; one office desk, NYA office, Eastland; one office desk, NYA office, Ranger; one 4-drawer filing case, NYA office, Eastland, and one for Ranger; 195 school desks refinished for Colony school district; one book case, chamber of commerce, Ranger; one 7-foot music cabinet, Ranger high school; two book cases, Ranger junior college; one information counter, Ranger school tax office.

Two office desks, City of Ranger; two filing cases, City of Ranger; four table cabinets, WPA office, Eastland; one ping-pong table, NYA dormitory; four domino tables, NYA dormitory; four mess hall tables and benches, NYA

THE STORY OF DEMOCRACY

By Hendrik Willem van Loon
Illustrated by the author

When Good Democracy Turns to Bad, There Is Growth of Autocracy

Cities like Babylon or Ninevah are Absorbed by the sands of the desert.

CHAPTER EIGHT
In a little book devoted to not too pleasantly, I am afraid, to Adolf Hitler, I laid down the rule that "autocracy is invariably the result of bad democracy." One could of course transpose these two words and the statement would still make sense, for it is equally true that "democracy is invariably the result of an intolerable form of autocracy."

The theory about "historical cycles" can be carried a little too far, but the available evidence of the last three thousand years undoubtedly points to a wave-like movement in history.

A golden age arises out of an era of hard and plodding labor.

It reaches a point of almost unnatural perfection. Then invariably, the people seem to tire of the exalted regions which they have reached, of too much prosperity, of too much fine sculpture, too many excellent paintings, too many interesting plays, and they grow indifferent. They grow weak. Unlike their ancestors, they are no longer willing to fight for their own good rights—or what they used to consider their good rights.

Their neighbors, still in the state of plodding and hard labor, cast envious eyes upon the well-being and glory of the country just beyond their frontiers. And when they find out that those frontiers are no longer being defended, but have become paper lines of demarcation, they will cross them at the first convenient moment and the muse of history records another disaster. An Acropolis becomes a barracks, a famous cathedral is turned into a stable, a Grand canal is lined by a row of ruined palaces.

Or, worse than that, cities like Babylon or Ninevah are absorbed by the sands of the desert or the population of Rome is reduced from a million to less than forty thousand.

Greece, one of the most painful examples of this theory of historical cycles, could only develop its democratic experiments while it was free from foreign domination.

In the year 479 B. C. the fourth and last expedition of the Persians against Hellas was routed at

Leads in Race

JOHN N. GARNER

Garner Prestige as Candidate for President Grows

WASHINGTON, March 12 (Sp.) Texas has contributed many great statesmen since its heroic struggle for independence a century ago but not since the days of Sam Houston has a Texas acquired the national following which John Nance Garner enjoys today.

As astute political observers in the nation's capital agree that Vice President Garner is the democratic party's best bet for 1940.

Garner's phenomenal strength in all sections of the country is being attributed to four factors.

1. He is more experienced in governmental affairs than any other man. He is the only living man to have presided over both houses of congress. He has been a conscientious public servant in Washington for more than 35 years.
2. He is a lifelong liberal of the practical variety. Most of the liberal measures enacted during the past few years were urged by Garner long before the new deal came into power. He has opposed the new deal only on questions of extravagant spending and its consiliatory attitude toward the sit-down strikes.
3. His sturdy log-cabin Americanism.

the mistakes of Pericles and his contemporaries who ruined the democracy of Athens and brought about the introduction of a dictatorship.

WHY SUFFER Functional FEMALE COMPLAINTS

Lydia E. Pinkham's Vegetable Compound Has Helped Thousands!
Few women today do not have some sign of functional trouble. Maybe you've noticed it in the form of nervousness, irritability, or a general feeling of being unwell. It may be due to a lack of iron, or to a deficiency of some other essential element. Lydia E. Pinkham's Vegetable Compound is a natural, safe, and effective remedy for all these conditions. It contains the most potent natural sources of iron, and it is the only medicine that has been shown to be effective in the treatment of all these conditions. It is a natural, safe, and effective remedy for all these conditions. It contains the most potent natural sources of iron, and it is the only medicine that has been shown to be effective in the treatment of all these conditions.

ALLY OOP

RED RYDER

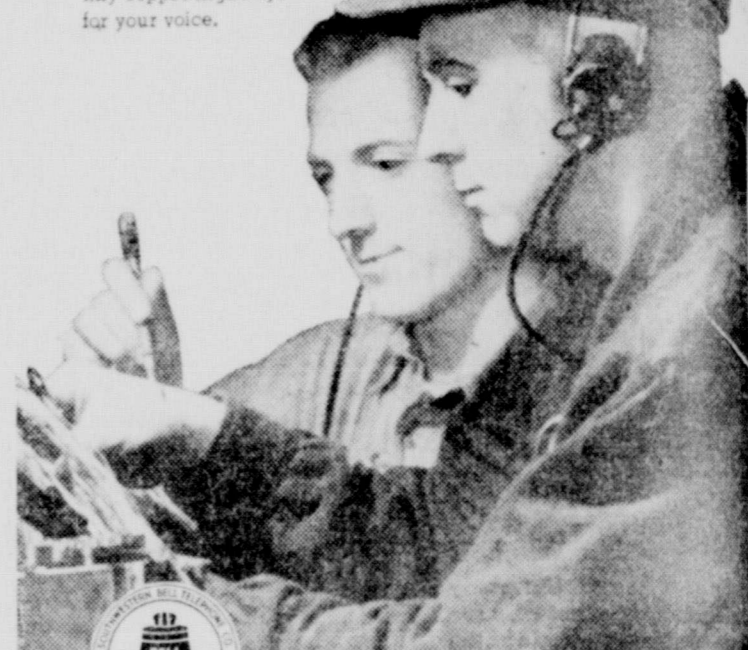

canism is the people's best safeguard against involvement in war. He is a genuine patriot, a believer in George Washington's advice against meddling in foreign disputes.

He is a vigorous and rugged personality that inspires confidence. Despite his 70 years, his out-door life and clean living have kept him virile and alert. Moreover, he is a plain American—a homebody, who has been happily married to a charming and gracious wife for more than 40 years.

These attributes of John Garner's appeal to the best elements in American life, leading political observers to believe that he is the strongest nominee the party could select.

Manufacturing increased 49 per cent in Texas between 1935 and 1937. U. S. bureau of commerce figures show. Oil refining, gasoline manufacture and production of carbon black accounted for most of the gain.

TELEPHONE CABLE SPLICERS...

tie together thousands of tiny copper highways for your voice.

PEOPLE at work plus MONEY at work equals Texas telephone service

Furnishing you telephone service in Texas requires two things... people at work, and money at work. It takes money to provide the poles, wires, switchboards, cables... it takes people at work to mold this equipment into a telephone system for Texas.

Busy at the job are 8,500 skilled men and women. Behind each of these 8,500 telephone jobs in Texas is more than \$15,000 in telephone equipment and plant.

The invested savings of thousands of people, the skill and judgment of Texas telephone employees, team together to furnish the best and most dependable telephone service at the lowest possible cost to the user.

Willing Workers Have Business Meeting Monday

Mrs. George Groeclose entertained the Willing Workers' class of the First Christian church with its monthly business meeting Monday evening. Mrs. C. C. Greenhaw, president, was in charge of the meeting.

A sandwich plate with spiced tea was served to Mmes. A. J. Sanders, J. F. Benedict, Lonnie Shockley, Guy Ward, Bob Taylor, James Flournoy, C. C. Greenhaw, Crale Swartz, I. A. Brunkenhoefer, Ace Lucas and the hostess, Mrs. Groeclose.

Mr. and Mrs. D. R. Harper and daughter, Lucille, who recently moved from Cisco to DeLeon, have returned to their home from a short stay here.

Mr. and Mrs. John Bailey and Mr. and Mrs. Gordon McCullies attended the Southwestern Exposition and Fat Stock show in Fort Worth Sunday.

Personals

Mr. and Mrs. L. G. Ball spent Sunday in Abilene.

Mr. and Mrs. Carl Lowery are transacting business in Dallas after a brief visit with friends and relatives here.

Odwin Cate of Mineral Wells spent the week-end with his mother, Mrs. J. B. Cate.

Mr. and Mrs. Jack Strickard of Brownwood were recent visitors here.

Dale Moore and Roger Haynes have returned from two weeks spent in points in California.

Mrs. A. L. Osborn is visiting her mother in Baird for a few days.

R. L. Yeager of Putnam transacted business here today.

Mrs. Larty Burnside of Eastland transacted business here today.

Mr. and Mrs. R. D. Jones have returned from a short visit in DeLeon.

42,000 Acres...

highly important to turkeys and such food as acorns, beech mast, pinto seeds and various berries such as huckleberry, dewberry and blackberry are to be protected from the forage of hogs, sheep and cattle.

On the Tyler-Polk area an attempt will be made to more fully protect and to restore the native east Texas deer.

A total of fifty turkeys, trapped in other sections of the state, will be supplied in the Colorado county area. Thirty-seven of them have already been placed on the area and the remainder will be stocked soon.

A twenty-acre pen has been built on the Colorado county preserve. A dozen of the turkeys will be placed inside the pen with their wings clipped. They will be able to nest there, but will be unable to leave. It is expected they will act as decoys for the birds outside the area and keep them on the preserve and near the better food and cover sections.

All the six areas planned by the game department are being leased for a period of five years with an option to renew for an additional five years. They will be closed to hunting during that time, but

Safety Shorts

From Oil Belt Safety Council

THIS is the story of Peephole Percy.

Percy didn't bother about steamed-up windows when he drove his jalopy in winter weather. He would wipe a little peep-hole in the vapor on the windshield and drive blithely along—until one day he made a left turn and smacked another car.

Percy found the peep-hole wasn't much good for seeing to the right or left.

The Oil Belt Safety council suggests you take a tip from Percy and maintain clear vision through all the windows of your car. A defrosting device may be cheap life insurance.

Members of the jury are G. R. Nance of Cisco, J. L. Dorsey of Eastland, A. D. Baker of DeLeon, E. E. Todd of Gorman, Calvin Brown of Ranger, R. L. Band of Olden, Roy Tucker of Carbon, Cyrus I. James of Olden, Onis E. Littlefield of Ranger, Hort Bryant of Gorman, C. B. Wellman of Eastland and M. L. Bransford of Mangum.

REST REQUEST

PEARISBURG, Va., March 12 (AP)—In a spirit of levity preceding an election, eight citizens presented a petition to the Giles county board of supervisors, requesting that the authorities provide pads to cover the gnarled roots of the shade trees on the courthouse lawn, where the citizenry seeks shade in summer, and also to "provide pillows with freshly laundered pillow cases, for those weary citizens who at times are unable to sit erect and must needs recline at full length."

Mrs. J. E. Spencer has gone to Fort Worth for a visit with her sister, Mrs. R. L. Shaw.

Lloyd Sissell of Los Angeles, California, is a guest for a few days in the home of Mr. and Mrs. Mac Stephens.

The single state of Texas has 1,386,000 barrels of oil refining capacity a day, or almost one-third the nation's total of 4,650,000 barrels.

\$15 a Week...

(Continued from Page Three)

however, to banish it from the place of fine fabrics and Ann had picked it up for practically nothing at a basement counter. Ignoring the vagaries of the design, she gloried in the richness of the material. Her cheeks grew rosy as she cut and sewed and fitted the lovely thing to her more lovely lines.

"I'm going to be \$4 short on my budget," she thought, "but I don't care. Just this once, I don't care." She made a little slip of rayon—it had the sheen of taffeta. She bought gold slippers that had once pinched the toes of a more fortunate girl. The Italian let her have them for \$2 as he had no call for gold slippers with rhinestone heels. She could have cried over them because they were so beautiful.

Mrs. Follet's third floor was in an uproar on the night of the party. The twins showed Ann the latest dance steps. Clara offered her array of 10-cent-store ban-

gles. Florabelle came across the hall with a black moire evening wrap. Myrtle stood against the wall in awed silence.

Ann had washed her own hair and set the natural wave. It was soft and lustrous. It hung loosely over her shoulders. She had her hair curled when she had manicured her head. She had manicured her own nails and painted them shell pink. When she slid her white and gold dress over her head and let the folds fall over the gold slippers, she had her taste of real bliss.

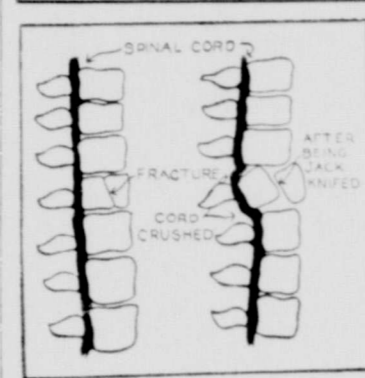

The gown was a masterpiece of artistry. It was plain—Ann thought it much too plain—it was long, lovely body lines. Ann's back and shoulders were flawless. Her bare arms would have made a sculptor sigh with delight. Her eyes were dazzlingly bright, her red mouth tremulous with happiness.

Looking in the mirror, Ann had a moment of wistful doubt. Was it to be a Cinderella evening or another disappointment?

LEAVE 'EM WHERE THEY LIE

Fracture of the Spine (Broken Back)—Leave 'Em Where They Lie—Treat Shock!

The back is made up of a series of round bones that are flat on top and bottom by layers of cartilage and joined to each other by little knobs that you can feel on the backbone. In this canal is the spinal cord that carries all of the nerves from the brain that go to make up the nerves of the body.

What happens when there is an injury to the back?

One of five things:

1. There may be only a bruise or sprain.
2. One of the bony processes that come off of the vertebrae may be cracked or broken.
3. One of the round bodies of the vertebrae may be broken.
4. There may be a spring-back displacement (partial dislocation springing back into place) between two of the vertebrae which may crush the spinal cord between them.
5. The spinal cord may be pinched or severed (mashed in two) by a crumpling break of one of the round bodies.

The next issue will describe what to do in a case of a broken back.

LEAVE 'EM LIE—FLAT—TREAT SHOCK! When you move 'em keep 'em FLAT with something under the back.

A vertebra may be dislocated but you cannot know this without an X-ray. So treat it as a broken back.

LAY 'EM FLAT—on their back with a cushion or folded coat under it. AFTER SHOCK is less, bring 'em in—laying FLAT.

Prepared by the Fracture Committee, Texas State Medical Association, sponsored by Texas State Highway Department and Texas Public Safety Commission.

cow. Presumably, hostilities would not cease until then.

Observers noted that the weather could change the entire picture of this northern war.

Snow already is melting in parts of Finland, and water is beginning to appear on the lakes.

Spring floods would prevent, or at least interfere with large scale operations and the Russians might be forced to slow down, just as the blizzards and deep snows bogged them down early in the war.

Some observers said the Finnish forces still were strong enough to hold the Russians back until the real thaw and a general flood relieves them of the pressure.

Technical Men...

new crops—or for new products," Dr. Schoch pointed out.

"That is why we consider the large sums set up in research laboratories such a necessary prerequisite for progress in Texas in this age of chemistry," he said.

POSSUM KINGDOM DAM
PALO PINTO, Texas, March 12 (AP)—A temporary court injunction granted last week, Monday stayed contractors and the Brazos River District authority and the contractor from closing holes in the Possum Kingdom dam and flooding the basin until landowners had been paid for their land.

Again, A GAIN in Gasoline Quality

Again, Humble's policy of continuous improvement gives you a gain in gasoline quality. Building on past improvements, Humble now offers you definite, new improvements in two already fine gasolines: the newly improved Humble gives you a gain in quality which means new heights of performance; Esso Extra is without an equal among motor fuels.

Humble

Motorists know that today's automobile engines* must have a gasoline of high quality to give expected performance.

To meet this demand of your modern car, Humble has made additional improvements in its regular-grade gasoline; these improvements give you noticeably improved performance.

The next time you need gasoline, fill up with Humble. Notice improved performance as you drive your car through traffic, as you "step on it" for a quick pickup. We believe that the performance of this newly improved product will convince you that there is a difference in gasolines.

Restating our policy of CONTINUOUS IMPROVEMENT

HUMBLE technical men are constantly experimenting, in the laboratory and on the road, with improved products for your car. This constant research results in continuous improvement of the gasolines, motor oils and other products you get under the Humble sign. The process of improvement is so continuous that specific improvements frequently are made without public announcement. It is only when marked improvements are made, like the improvement in quality of these fine gasolines, that your special attention is called to them.

It all adds up to this: we promise you that you will find Humble products second to none, that you can depend on continuous improvement to keep the quality of Humble products up with, or a little ahead of, the performance built into your car.

Esso has always been a peerless motor fuel. Now it is so much improved, we call it Esso Extra—it gives you extra performance with every gallon.

You can't surpass the performance of Esso Extra in your car at any price. And yet—if you're an average motorist—you can use Esso Extra, you can get its superb extra performance, at an astonishingly low extra cost: you pay only an extra nickel a day for Esso Extra! And you'll get that

nickel back, many times multiplied, in extra performance. We're enthusiastic about Esso Extra. When you try it, you will be, too. Fill up with this unequalled motor fuel today!

*New cars in the lower-price range need just as good a gasoline as more expensive automobiles; compression ratios are every bit as high, and in some instances, higher.

HUMBLE OIL & REFINING COMPANY

For improved performance, use one of Humble's improved motor fuels!

Fill up with these improved gasolines at the nearest Humble sign
