# THE CISCO DAILY PRESS

Combined With Cisco Daily News and Cisco American and Round-Up November 1, 1937

In an area of benevolent climate, blessed with an abundance of the purest lake water, possessing the best in recreational facilities, situated on the Bankhead, all-weather route, with three railroads and many highways, Cisco is the best place in Texas to live and to work.

VOLUME XX.

CISCO, TEXAS, MONDAY, APRIL 1, 1940

NUMBER 203

## CITY ELECTION POLLS OPEN AT 8 TUESDAY

Through the Editor's

### Spectacles

By GEORGE

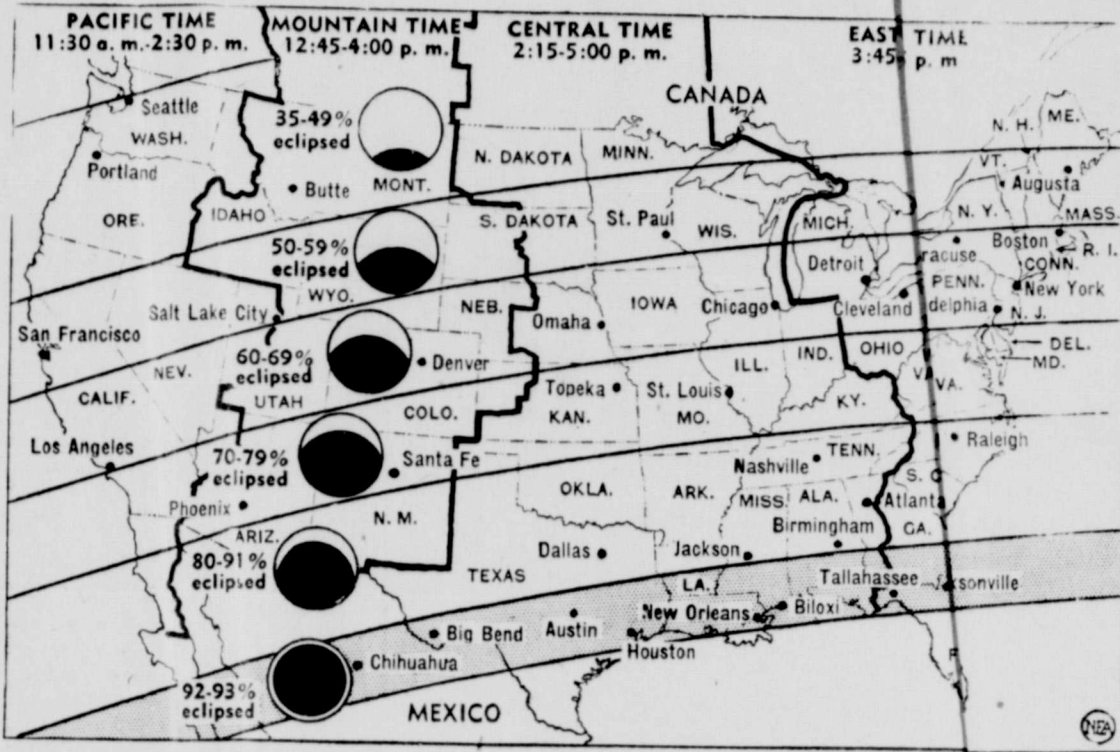

Two elections, the United States census and an eclipse of the sun are on the program for the ensuing seven days. That, I should think, is a menu of excitement amply sufficient for a municipality as small as Cisco over so brief a time. The first election and the start of the census occur tomorrow. The second election occurs Saturday and the eclipse Sunday. Cisco will be north of the main path of the eclipse, which will pass through Austin, San Antonio and Houston, and will take the form of what is known as an annular eclipse, with a ring of fire surrounding the dark blot of moon covering the sun's surface. In our part of the country the eclipse will be seen as a sickle-shaped segment of fire as the moon's disk covers about 92 per cent of the diameter of Old Sol. Red glasses will come in handy then. A map of this page and a story in the Davis mountains gives some interesting information about the forthcoming phenomenon.

The happenstance of an eclipse visible in this part of the world gives prominence to the new observatory which the University of Texas erected at Mount Locke with a grant of money from the McDonald estate at Paris, Texas. Two great astronomical feats will be undertaken by the observatory staff during this eclipse. One will seek to measure the strength of the infrared rays of the sun's edge. The measurement, the Associated Press science editor says, may some day be useful in long-range weather forecasting. The other will involve the use for the first time of a curious instrument, the coronator.

It is a long cry from the superstitions which once surrounded the eclipse of the sun and the marvels of scientific research which extract useful information from such phenomenon to make life safer and happier on this planet. Remote to the untutored mind indeed is any idea of even successfully measuring certain elements of sun's glare, much less the employment of such information in forecasting weather conditions. For that matter, such a scientific process is not understood by learned men and women who have no acquaintance with the science involved. But man has come a long way in his probing of the mysteries of nature and the universe since the invention of the telescope and he has been able, with certain facts and a few real principles, to penetrate deep into the secrets of the vast universe in which he lives.

He has been able to measure the distance between stars, to weigh stars, to accurately forecast years and centuries in advance the eclipse of the sun or moon,

### All U. S. To See Rare Annular Eclipse of Sun

Annual eclipse of the sun on April 7, 1940, will be best seen by the U. S. in narrow band indicated by shaded area on map. Shaded discs show how ring blackout will appear at various sections of the country, with moon moving from right to left across face of sun. Percentages indicate portion of sun's diameter covered by moon's shadow.

### U. S. FLEET PREPARES FOR WAR GAMES

SAN PEDRO, Calif., April 1 (AP)—The United States fleet, with all the precautions and preparedness of wartime, was ready for instant action at San Pedro, San Diego and Hawaiian bases, on the eve of the 1940 war games in the Pacific.

Some of the units moved to sea today, others will go out Tuesday. Secrecy shrouds the actual movements. Insofar as all officers and men are concerned their realistic war of 1940 is on. All the safeguards against spying, sabotage, mines and submarines in channels to sea, and air attacks, are emphasized in these preliminary movements.

Within the next 24 hours, eleven battleships, twelve heavy cruisers, eight light cruisers, three aircraft carriers and sixty-five submarines will move to sea to form two opposing forces, the Black fleet and the White fleet. From the Hawaiian area eight heavy cruisers, one light cruiser and three squadrons of destroyers will be underway. The others will move from San Diego and San Pedro bases.

In addition to these units of the two fleets, submarines and auxiliaries will also put to sea for participation in later phases of the seven weeks' war games.

The fleet flagship Pennsylvania awaited the secretary of the navy, Charles Edison, who was to board the dreadnaught with full naval ceremonies today. He was to be welcomed by Admiral J. O. Richardson, commander-in-chief.

Secretary Edison will spend a busy ten days with the fleet. Aboard the Pennsylvania he will witness the first two parts of the exercises, the departure of fighting units, and the operations of the two opposing fleets contesting control of an ocean area of wide extent. When the second part is concluded, somewhere east of the Hawaiian islands, the units will combine as the fleet as a whole into advanced tactics.

During this period, Secretary Edison will be moved at sea from ship to ship, visiting the various types to gain first-hand knowledge of the capabilities and limitations of the different classes of craft.

The secretary will leave the fleet at Honolulu about April 10 and, after an inspection of Hawaiian naval installations, will return to the Pacific coast by cruiser. The fleet will continue maneuvers until the middle of May.

Mr. and Mrs. H. A. Moore and son, Dale, left today for Fort Worth, where they will attend the convention of the Southwestern Photographers' association.

### No Amendment to Trade Bill To Be Accepted

WASHINGTON, April 1 (AP)—Senator Pat Harrison (Dem.) of Mississippi insisted Sunday the administration would not accept any amendment to the pending reciprocal trade agreements legislation, squelching reports that a senate compromise might be reached to freeze excise taxes on oil, copper, coal and lumber.

A group of western senators had hoped to win administration consent to an amendment by Senator Patrick McCarran (Dem.) of Nevada which would forbid any change in excise taxes on the four commodities when future agreements are negotiated.

The Mississippi senator, in charge of the pending bill, said he believed six years of operation of the program had shown there was no need for such a limitation.

He predicted senate approval of the measure Wednesday by a vote substantially larger than the 441 to-41 margin by which the administration beat off an attempt by Senator Key Pittman (Dem.) of Nevada last Friday to require senate ratification of the agreements.

McCarran and Pittman said they thought the excise tax amendment, because of its wide appeal to Westerners, would command more votes than Pittman's ratification proposal.

"I believe we have the votes to put it across," McCarran said.

### Over 8,000 Cases of Measles in Texas Reported

AUSTIN, April 8 (Sp.)—"During 1939 over eight thousands cases of measles were reported to the state department of health. This large number is not unusual, since the disease characteristically assumes a cyclic nature with alternate periods of high and low incidence. 1937 represented a year of an expected large number of cases, with a total of 14,768, while 1938 dropped to 5,710 cases. Low incidence in the past half decade was in 1935, with 4,073 cases of measles reported," states Dr. Geo. W. Cox, state health officer.

"Of considerable importance, however, is the fact that parents of small children frequently are entirely indifferent to this disease. Assuming a more or less fatalistic attitude, many of them believe that the sooner the disease be contracted by their young children the quicker the trouble will be over. This viewpoint undoubtedly is a result of a false sense of security regarding measles.

"That many cases of measles

### ECLIPSE TO BE STUDIED AT M'DONALD

By DR. OTTO TRUVE  
Director McDonald Observatory,  
Fort Davis, Texas

The annular eclipse of the sun on April 7, 1940, will be visible throughout the United States, but the path of the annular phase, where the sun will be visible as a ring, passes only through the southern states, Texas, Louisiana, Mississippi, Alabama, Florida and Georgia. The central line passes through the city of Chihuahua, in northern Mexico, into the Big Bend region of the Rio Grande river, where the line passes approximately 30 miles south of the McDonald observatory of the University of Texas.

It then continues eastward and passes through the town of Del Rio on the Mexican border, San Antonio, and Austin, the capital of the state of Texas, to Baton Rouge in Louisiana, Tallahassee, and Jacksonville, Florida. The eclipse will take place at the McDonald observatory, the central phase will be reached 4:38:38m central standard time. The duration of the annular phase will be approximately 3 minutes, and the fraction of the diameter of the sun which will be 0.93, thus leaving visible ring on 0.07 of the diameter of the sun. The duration of the annular phase in New Orleans will be 4.7 minutes, and at Tallahassee 5.4 minutes.

### Expedition to Big Bend

At the McDonald observatory the eclipse will not be annular, but the magnitude of the eclipse will be 0.92, differing by only one-hundredth of the diameter of the sun from the most favorable condition. An expedition from the McDonald observatory will be sent into the Big Bend National park in the Chisos mountains of southwestern Texas, where the central line of the annular eclipse cuts from Mexico into the United States. Dr. C. T. Elvey will be in charge of the expedition, and Drs. Philip C. Keenan and Fred T. Rogers will participate in the observations. Special equipment has been prepared for observing the surface brightness of the outermost layers of the sun. Theoretical astrophysical studies require a knowledge of the so-called "darkening at the limb of the sun." It is well known that the surface brightness of the sun is not uniform; direct photographs show the limb underexposed when the central portions are greatly overexposed. The darkening from the center toward the edge of the sun proceeds according to a law which involves the cosine of the angle

(Continued on Page Four)

### CENSUS TAKER BEGINS COUNT ON TUESDAY

#### Decennial Enumeration May Require Period of 2 Weeks

If your doorbell rings tomorrow don't take it for granted that your caller is a bill collector, a salesman or just one of the neighbors whom you'd rather not see at the moment. Chances are it will be one of Uncle Sam's C-men or C-women.

For the decennial count of noses in the United States starts tomorrow and enumerators will start ringing door bells and asking questions which, if you refuse to answer them, will subject you to a fine of as much as \$500.

These questions will concern much of your personal affairs, even to the extent of asking what your income is, the amount of the mortgage on your home and whether or not you share a bathtub—if you use one at all—with other members of the family.

The information is intended to be kept secret and for the use of the census bureau only. If one of the enumerators reveals any of the information obtained from you that enumerator will be subject to a fine of \$200 and given two years in prison.

The census will result in a great deal of useful information. It will determine whether or not Cisco is the largest city in Eastland county and, if so, by what margin of population. It will determine the population of the county, the number of homeowners, the number of farm-owners, the number of mortgages, the number of bathtubs and a lot of other statistical information.

The enumeration won't be over in a day. Probably two weeks will be required to finish the counting.

### Recreation Activities Are Announced

Public activities of the Cisco Recreation project for Tuesday will include a scheduled program at the following places:

Recreation center—2 to 8 p. m.—Open to the public.

Tennis court (Methodist church) 2 to 6 p. m.—Open to the public.

East Ward playgrounds, 3 to 6 p. m.—General playground activities.

Fee Esta park 2:30 to 6 p. m.—General playground activities.

City hall (music center) 1 to 5 p. m.—Adult and children's music classes.

Smithville (colored)—General playground activities.

Special activities for the day will include a Boys' club meeting at the Smithville center beginning at 8 p. m. and closing at 10 o'clock.

The regularly scheduled practice period in folk dancing has been postponed until further announcement.

### 16 Per Cent Drop In Stock Shipments

AUSTIN, April 1.—Movement of Texas livestock in February dropped 16 per cent below the preceding year, totaling only 3,647 cars, University of Texas agricultural statisticians reported today.

Slackening of cattle shipments from 2,691 to 2,028 cars accounted for the bulk of the loss, Dr. E. A. Beuchel, assistant director of the bureau of business research, explained.

Shipments of hogs dropped 15.5 per cent to 591 cars, but calf and sheep shipments picked up. A total of 628 cars of calves moved, a gain of 4.7 per cent, while sheep movement totaled 400 cars, up 20.8 per cent.

### Ikkes Addresses Kilgore CofC Dinner

Secretary of Interior Harold L. Ikkes, Roosevelt third term advocate, invaded Vice President John N. Garner's home state to address the Kilgore, Texas Chamber of Commerce banquet. Ikkes is shown above, left, being greeted by Mayor Roy Laird of Kilgore.

### Wisconsin Votes to Test Strength

WASHINGTON, April 1 (AP)—The first direct tests of strength between supporters of President Roosevelt and Vice President Garner, on the democratic side, and between Thomas E. Dewey and Senator Arthur Vandenberg, on the republican side, make this week a key one in pre-convention jockeying for the major party presidential nominations.

### O'Daniel to Give Answer Wednesday on Second Term

AUSTIN, April 1 (AP)—Gov. Lee O'Daniel told his radio listeners Sunday he would give the answer Wednesday night to the question of whether he will run for a second term.

Disclosure of his intentions, he said, will be made through a special broadcast from 8 to 9 p. m. Wednesday.

Most capitol observers have believed for several weeks the former Fort Worth flour salesman will try to continue in the governor's office another two years. This opinion was strengthened by the announcement he would launch a weekly paper next Thursday.

O'Daniel, shortly after the opening of his regular Sunday program, said that "I want to announce I will broadcast a one-hour special broadcast next Wednesday night starting at 8 o'clock at which time I will answer the question which has been asked by thousands of my friends about whether or not I will offer myself as a candidate for re-election."

Again just before the close of his talk, he called attention to the scheduled Wednesday night broadcast.

Virtually all of the remainder of the program was devoted to a tribute to the Texas rose industry, centered at Tyler.

### Ciscoan Sustains Slight Injuries

Miss Jessie Lee Haynie, daughter of Mr. and Mrs. James Haynie, is reported suffering from slight injuries sustained when she was struck in the temple by a rock while driving Sunday afternoon. She was resting well at noon today.

With Miss Haynie at the time were her sister, Patty Nell, and Miss Jane Moore.

### 3 MEMBERS OF COMM'N TO BE NAMED

#### Six Candidates Are Offered for Places on City Council

Qualified candidates for Cisco will go to the polls tomorrow to name three members of the city commission out of a field of six candidates to serve for periods of two years. The election will be held at the city hall beginning at 8 o'clock in the morning. The polls will close at 7 o'clock in the evening.

Incumbent Commissioner J. B. Burnett, H. C. Henderson and W. R. Winston and Charles J. Kleiner, Edward Lee and A. V. Clark are candidates for the three places.

Election judge will be Haywood Coburn with W. R. Huestis as assistant judge. Three members of the original staff who could not serve have been replaced. The staff as now made up will be F. I. Shookley, C. M. Nichols, G. M. Meglison, Mrs. Sam Kimmel, Mrs. J. S. Mobley, Lee Mahaney, W. W. Powell, D. G. Streater and W. B. Hayes.

The second local election to be held here during the week will be the election for two members of the board of school trustees Saturday April 6. Five candidates have offered for the two places, which are for terms of three years. They are W. J. Armstrong, F. E. Shepard, W. R. Huestis, George P. Fee and Dr. Paul M. Woods.

Election judge will be R. W. Mandell, who will be assisted by Mrs. R. B. Carswell and J. C. Donica. The polls will be located at the city hall.

### Misunderstanding

There has been a misunderstanding of the attitude of the Cisco school board with respect to candidates for election as trustees next Saturday. President O. J. Russell said today it is not correct, he said, to say that the board as an institution is sponsoring any of the candidates.

Mr. Armstrong and Mr. Shepard were prevailed upon by members to run before it was known that any other candidates would announce and with the thought that most citizens are reluctant to run for the "thankless" service on the school board, and that it was necessary that some experienced and able citizens be elected to carry on the program that the schools have undertaken, he said.

"To prevent any reflection being cast upon the fine men who have since announced and to assure the public that whoever is elected will meet the entire approval and satisfaction of the board, I wish to make this statement in official capacity as president of the board," Mr. Russell said. "Any candidate who may offer for the board will, on proper petition, be approved for the ballot."

### POSTAL RECEIPTS

AUSTIN, April 1.—Swinging 8.6 per cent above February, 1939, postal receipts in 40 respective Texas cities for February totaled \$1,319,724, the University of Texas bureau of business research has reported. The February total was 3.1 per cent below that of January, however, the report showed.

Miss Frances Little of Dallas is visiting relatives and friends here for a few days.

### Weather

East Texas—Partly cloudy Monday and Tuesday; cooler in northwest portion Tuesday afternoon or night.

West Texas—Increasing cloudiness Monday, partly cloudy Tuesday, somewhat cooler north portion Tuesday.

(Continued on Page Four)

# The Cisco Daily Press

and CISCO DAILY NEWS  
(Consolidated with Cisco Daily News and Cisco American and Round-Up, Nov. 1, 1937)  
Member of the Texas Press Association

Published each afternoon, except Saturday, and Sunday morning at Cisco, Eastland County, Texas, by the Free Press Publishing Corporation, incorporated under the laws of the state of Texas. Editorial and Publication offices at 304-306 D Ave., Cisco, Texas. Telephone 608.

**THE FREE PRESS PUBLISHING CORP.**  
CHARLES J. KLEINER, President.

B. A. BUTLER, Editor and Publisher  
STANLEY WEBB, Advertising Manager  
W. D. BRECHEEN, Superintendent  
CATHRYNE RUSSELL, Society Editor

A home-owned and home-controlled newspaper devoted to the upbuilding of Cisco and Eastland county, independently democratic in politics.

**SUBSCRIPTION RATES:** Within First and Second Postal Zones, Per Year, \$3.50. Rates Higher Within Other Zones. Weekly Rural Edition, per year, \$1.00 in Eastland County.

National advertising representatives, Texas Daily Press League, Dallas, Texas.

Any erroneous statement reflecting upon the character or reputation of any person will be gladly corrected if brought to the attention of the publishers. The Cisco Daily Press assumes no responsibility for errors in advertising insertions beyond the price of the advertisement.

Entered as Second-Class Matter December 11, 1934, at the post office at Cisco, Texas, under the Act of March 3, 1879.

### BIBLE THOUGHT FOR TODAY

The people that walked in darkness have seen a great light. They joy before Thee according to the joy in harvest, and as men rejoice when they divide the spoil.—Isa. ix. 2, 3.

Father! what hast Thou given to me?  
A joy all joys above,  
Something more sweet than a fear,  
More tender than a love.

—FABER.

When Jesus is present with us all things go well and seem comfortable. If Jesus speaks not in the mind of man, little good can worldly comfort do him. But let Jesus speak but a word, and great joy shall he feel.—Thomas A. Kempis.

### Keeping Americans "Free and Equal"

MORE than 260 years ago, Thomas Jefferson decreed that "all men are created free and equal," and on those words a nation was launched.

The Jeffersonian conception of equality has been modified from time to time, but, above everything, the meaning that the Colo-

nial patriot meant to convey was that the nation he helped found must be kept free of castes in the sense that they existed in the old world. His idea was to establish a nation devoid not only of earls and barons and feudal landowners but also of all the shackles and evils for which class society stood.

Today that tradition is being menaced, President James B. Conant of Harvard University recently told those participating in the 72nd birthday observance of the University of California at Los Angeles.

DR. CONANT conceded that modern college youngsters are inclined to sneer at the phrase, "equality of opportunity." It is up to the universities to make some revolutionary changes in their methods of preparing young folks for adulthood, the educator said. The idea of a casteless nation must be revitalized, given new impetus in colleges, he maintained.

But is it enough merely to preserve the ideal? Isn't American society as a whole largely responsible for preserving the equality tradition by giving the youngsters with their brand-new diplomas a chance to use the things they learned in school? How can anyone assure the hopeful graduate a job when the existence of from 8 to 12 million unemployed remains an uncomfortable reality?

Educators can do their part in renovating the school system to meet the needs of a new, technological America. It's up to those of us not in college to find a way to make use of this new talent. When we do, the idea of equality will become a living thing. It won't need to be pumped into anyone.

Boston women are taking a course, learning how to prepare hors d'oeuvres while the rest of us are still learning how to say it.

Roosevelt says he never said anything nasty about Jim Farley. Just gossip over the tea cups probably.

Chamberlain evidently isn't interested in Hitler's 11-point program. He would rather read Punch or "Mein Kampf."

Just to prove they are willing to meet an issue half way, Mussolini and Hitler hold a rendezvous in the Brenner Pass.

## "I've Got a Good Mind to Throw That Guy Over"

contest, a barbecue and the Calcutta pool.

President Paul Comoli announces the following committee chairmen: Entertainment, O. O. Harris; ladies entertainment, Mrs. Bill Sheridan; registration, Henry M. Rogers; prizes, Rigon Edwards; rules, Guy Wilson; pairings, R. R. Lacy; Calcutta pool, L. M. Watson; publicity, George D. Barber.

The Lake Sweetwater course was increased to 18 holes in July of last year, and many golfers have declared it to be one of the sportiest lay-outs in this section of the state. Grass tees and tee shelters have been added and an additional footbridge has been put across an arm of the lake on one of the six water hazards.

in cards for the third annual and this number is expected to be exceeded on April 18 this year.

**BUILDING PERMITS**  
AUSTIN, April 1.—Building permits in 34 representative Texas cities slumped during February, 21.7 per cent under January and 5.4 per cent below permits of February, 1939. The University of Texas bureau of business research has announced.

Aggregate permits in these cities totaled \$6,813,182, the report showed.

The silk industry in China has flourished for 4,000 years.

The United States paid Russia about 2 cents an acre for Alaska.

### Carry S. S. Cards, Job Seekers Advised

"Workers looking for employment should carry their social security number cards with them," W. O. King, manager of the Abilene Social Security board office, said today. Furthermore, the worker should be sure to show the card to the employer immediately upon being hired.

"This procedure is very important," King continued, "as the social security number is the means of identifying the worker's wage account with the federal government." If the employee does not show his card to the employer, the latter might report the wages without an account number. In this case, the wages cannot be posted to the worker's account by the Social Security board.

Since the benefits payable under the old-age and survivors insurance provisions by the Social Security act are related to the worker's account is obvious. "The new benefits under the Social Security act amendments are of vital importance to workers and their families. Therefore, we urge each wage earner to assure for himself full credit for his wages

### STAMP NEWS

THE scientists group of the U. S. Famous Americans series will be released during April. Dates and places of first-day sales of these five stamps are: John James Audubon, Francisville, La., April 8; Dr. Crawford W. Long, Jefferson, Ga., April 8; Luther Burbank, Santa Rosa, Calif., April 17; Dr. Walter Reed, Washington, D. C., April 17; and Jane Addams, Chicago, Ill., April 26.

Collectors desiring first-day cancellations should send self-addressed covers, not to exceed 10, to postmasters of cities of first-day sales, together with money order covering cost of stamps to be affixed. Each cover should bear a penciled notation in upper right-hand corner, designating number of stamps to be placed on the cover.

Rumania has announced a new issue of six airmail semi-postals to raise funds for national aviation. A series commemorating the recent meeting of the Balkan Entente is also forthcoming.

Cuba's commemorative honoring the 50th anniversary of the Pan-American Union will bear a portrait of Gonzalo de Quesada y Arostegui, noted patriot and the island's first minister to Washington.

Great Britain will issue a series of four stamps to commemorate the 100th anniversary of the postage stamp. The stamps will be placed on sale in May.

### Safety Shorts

From Oil Belt Safety Council

The Oil Belt Safety council urges every mother to learn the principles of first aid—how to stop bleeding, how to counteract the effects of poison. You never know when your child will have an accident. Suppose you think this over. Would you know what to do?

Mothers, it's just as important to know first aid as it is to know the proper method of feeding children!

Look in the Classified First.

### Best Well In Years Completed In Stephens

Completion of the best well in this section in years was marked this week as Clyde Greathouse and others No. 1 J. J. Robertson, Norton survey, five miles west of Crystal Falls in the Dance pool of Stephens county, flowed 249 barrels of oil in two hours. This test, report on which was from an authoritative source, establishes the well as a potential producer of 2,988 barrels daily.

Flow of the oil, of 40 degrees gravity, was through open two-inch tubing. Pressure of 550 pounds on both casing and tubing was registered. Pay was from lime 3,551-72 feet, total depth. The well had been acidized recently with 5,000 gallons.

Meanwhile, completion of No. 1 Robertson marked the seventh producer for the Dance pool. This is an eastern extension of the pool, opened about two years ago by Horwitz and Odum. The pool is now defined as about one mile long and one-half mile wide. All wells drilled in the pool have produced and the No. 1 Robertson was the best. The well is in the Norton survey.

**Sloan Test Watched**  
Oilmen were watching with interest progress on Ed McAdams and others No. 1 Sloan, Yeamans survey, which is in the southeast edge of the pool and now drilling around 3,500 feet.

In the same county J. R. Tolbert was rigging up on a new test, No. 1 Mrs. Rose Martin, five miles northwest of Caddo, section 1,335, ET&L survey, which is to be a 3,900-foot cable job. It is located 1,400 feet from the east and 440 feet from the north lines of the survey.

Frank and Fred Jones No. 1 A. Cloh and others, five miles southeast of Ivan, section 3, block 3, SPRR survey, Stephens county, was drilling at 900 feet.

**Insure in Sure Insurance with E. P. CRAWFORD Agency NEW LOCATION 108 W. 8th. Phone 453**

### Sweetwater Golf Tournery Prepared

SWEETWATER, April 1 (Spc).—Preparations are under way for West Texas' first golf tournament of the 1940 season, the fourth annual invitation of the Sweetwater Golf association, to be played over the 18-hole grass-greened course at Lake Sweetwater April 18 through the 21. Lonnie Wendland of San Antonio is the defending champion and he has indicated he will be here to defend the title.

More than \$300 in prizes will be awarded the winners and runners-up of each flight, winners of

handle Refining company No. 1 Frank Magers, section 1, block 3, SPRR survey, 15 miles north of Breckenridge, was drilling below 3,000 feet.

**Other Activity**  
Other activity in this section, by counties, is as follows: Eastland county: Burton and Womaek, section 11, H&TC survey, three miles northwest of Gorman, has been spudded.

Frank Kirk and others No. 1 Gilmore, W. D. Moss survey, four miles northeast of Gorman, is drilling at 75 feet.

Dobbs Oil corporation No. 1 H. D. Thompson, two miles south of Carbon, and in the S. H. Key survey, is drilling at 450 feet.

The same corporation's No. 1 Poe, five miles west of Carbon, section 37, block 3, H&TC survey, at 600 feet is drilling.

Hickok Producing and Development company No. 1 Wright and Harrell, J. B. Hoxie survey, four miles northeast of Cisco, at 1,500 feet is drilling.

Erath county: Operators continued to test on the T. G. Jackson and others No. 1 J. W. Taylor, four miles northeast of Deadwood, W. S. Prater survey, after a shot in sandy lime from 3,360 to 3,375 feet. The well will make some kind of an oiler.

O. D. Dillingham and others No. 1 J. B. Moring heirs, Moses Goff survey, in the old X-Ray field, has been drilled to 2,100 feet.

Hamilton county: A. C. Caldwell No. 1 W. W. Jones, W. H. Crowder survey, sixteen miles southwest of Hamilton, is drilling below 1,550 feet.

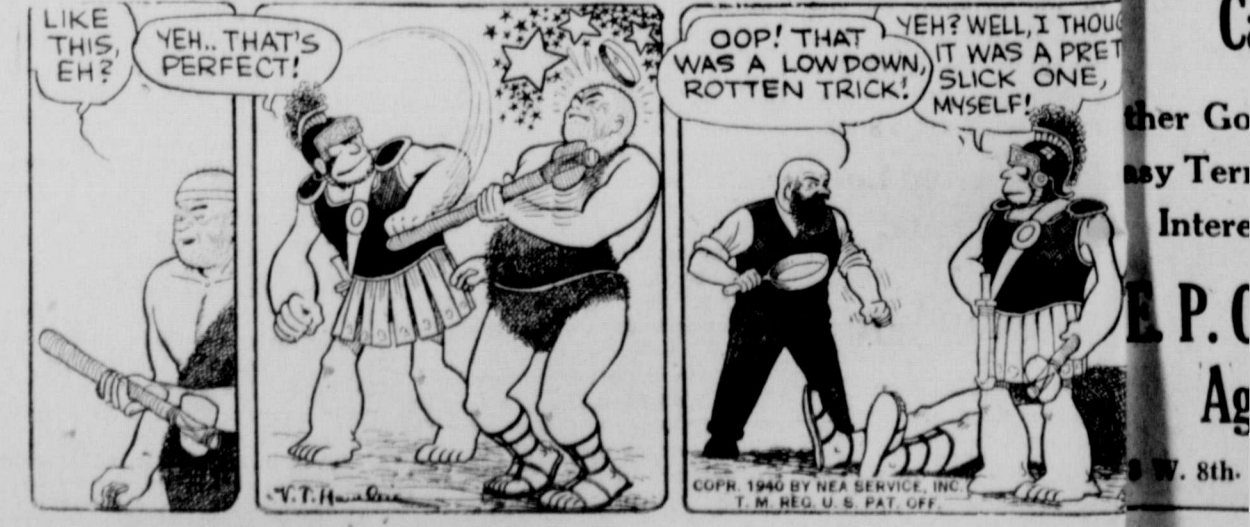

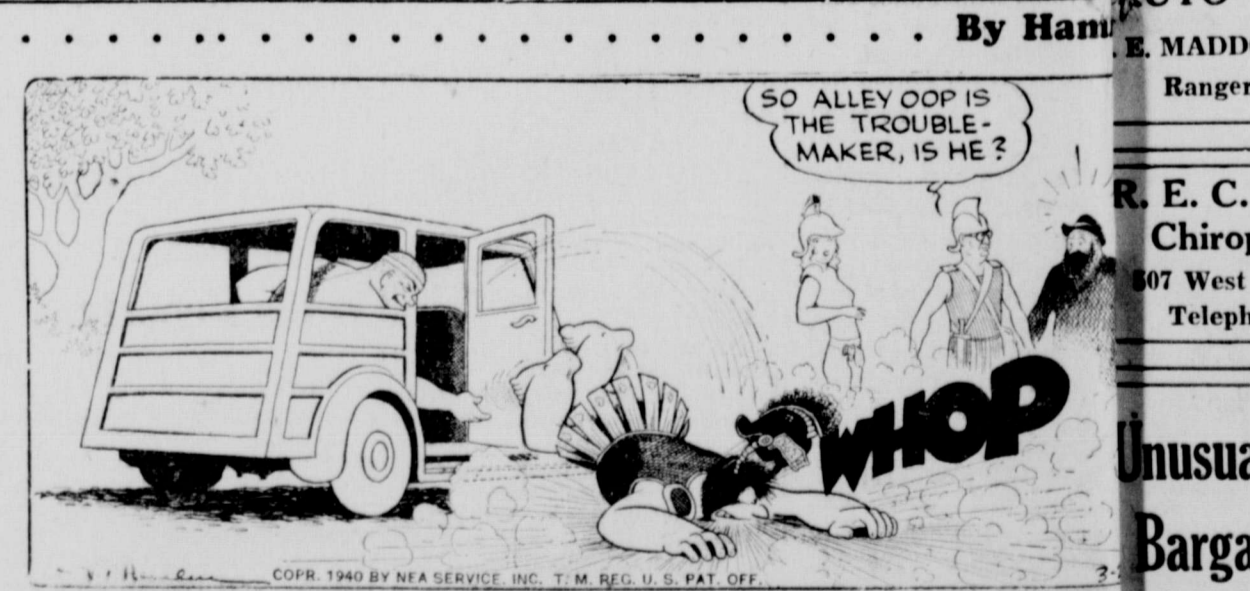

Twelve miles northwest of Hamilton, Grady Wallace and others No. 2 C. E. Lund, section 51, P. J. Bailey survey, is drilling below 3,200 feet.

Palo Pinto county: W. K. Gordon No. 4 W. R. Ringo, section 80, block 2, T&P survey, six miles north of Gordon, is drilling around 2,750 feet.

## SERIAL STORY

### K. O. CAVALIER

BY JERRY BRONDFIELD

COPYRIGHT, 1940, NEA SERVICE, INC.

YESTERDAY: Hansen arranges to have three sailors let themselves be shanghaied, just to give Val a thrill. The men are taken after a battle, and the Northern Belle sails on time. An hour at sea, Mike Kelly rushes to Hansen, tells him there's been a mistake. Instead of the sailors, they've shanghaied Eddie Cavalier, his manager and his trainer.

#### CHAPTER III

Captain Steve Hansen went down the steps three at a time, a lurid Scandinavian oath trailing in his wake.

For just a brief moment Val felt as though paralyzed. Then she flew after Hansen, a hundred thoughts racing through her head. Eddie Cavalier aboard the "Northern Belle" . . . shanghaied . . . by her . . . no wonder the three victims had put up such a terrific battle . . . And it must have been Cavalier who was black-jacked!

She caught up with Hansen just as he started to go below. "Steve," she gasped. "Steve, before you talk to them, tell me . . . you had this thing all framed for my benefit, didn't you?"

"Of course, Matey, but who'd ever dream these three eggs would happen along at just the right time and right spot. How was MacGregor to know in that darkness?"

He groaned. "Those three guys Barney had lined up probably didn't want to sign on anyway, took their 10 bucks each and got themselves oiled."

She clutched his arm. "Steve . . . what're you going to do?"

"Only one thing we can do, I guess, and that's take 'em back to Frisco and try to convince 'em there's been a big mistake."

"That," she murmured, "will take an awful lot of talking. And Steve, if we turn back now we won't be able to get out again until morning — if then," she added meaningfully. "Port authorities might want to know why we turned back. And our three friends below might cause us a lot of trouble and get us held for investigation. We don't dare take the chance, Steve. That contract means too much."

"Besides, Steve," she said slowly. "I've just had a wonderful idea."

He snorted. "Another one of your ideas, eh. You'll be sinking the ship next."

"Steve, I'm going down to see them with you. And, Steve, do you have enough faith and confidence in me to . . . to let me handle this situation? I mean it, Steve, in all seriousness. Take your cues from me."

"Okay, honey. We're in it deep enough. Might as well go deeper. Let's drop in on our guests."

Hansen opened the cabin door with his master key and they stepped inside.

"Well, if it isn't our rising young middleweight. Fancy meet-

ing you here, Mister Cavalier," Val smiled.

Eddie Cavalier got up from the bunk. His handsome dark face clouded with anger and made the ugly welt above his eye stand out still more.

It took him a full moment to recognize her and then he let out a howl. "Duffy . . . Duffy, look who it is. That female sports writer! What've you got to do with all this?"

She motioned him to be silent. "In due time," she said coolly. "Perhaps we'd better have some introductions first. Captain Hansen, meet Eddie Cavalier, his manager, Duffy Kelso, and the other gentleman, I believe, would be his trainer, Pop Grimes, or am I mistaken?"

Hansen nodded to all in turn. Duffy Kelso yanked the cigar from his teeth so he could have freedom of action. He was a little fellow with a bristling mustache and shoe-button eyes.

"What's the meaning of this?" he shrieked. "What goes on? What the hell is this? Who's responsible? I'll have you locked up for life, you pirates!"

"Take it easy, Duffy." Deliberately Val seated herself in a chair. "In the first place, there's been a big mistake made, but we'll have to make the most of it."

"Mistake!" the little man howled. "Toots, that's the first sensible thing you've ever said in your life. You never did have a good word to say about us in that column of yours . . . you . . . you . . ."

He sputtered helplessly and Val smiled benignly. "A question please. Just what were you gentlemen doing on that dock at that time of night?"

Duffy Kelso looked as though he would explode and it was the

trainer who spoke up quietly. "Well, lady, if it'll help clear up this mess, we been doin' a little fishin' on the bay. On our way back from Oakland our motor went dead on the little speedboat we'd rented and we drifted around until dark, when someone picked us up and towed us in. And that's where they happened to drop us off."

"I see."

Duffy Kelso, regaining his voice, glared at her. "I don't know who's boss around here, but you'd better have your admiral friend turn us back to Frisco."

"And what if we refuse?" Val inquired sweetly.

Duffy Kelso once again strangled over his attempts to talk and it was Cavalier who answered her. "You'd be an idiot to refuse. Where you bound for, anyhow?"

"Prince Rupert, British Co-

lumbia," she announced quite calmly. "And you won't be back for at least 12 days. I might inform you, also, that while on board you'll have to earn your keep. We're shorthanded and you'll have to fill in. However," she added, "you'll receive standard wages for your efforts."

Duffy Kelso's shriek almost split the cabin walls. "You crazy dame, you can't do that to us. We've gotta fight in two weeks. Get us off this tub immediately or I'll murder you myself!"

"Disregard the sensitive gentleman on your left, Captain Hansen. He becomes violent on the slightest provocation. He's really harmless, however."

"Quit clowning," Eddie Cavalier said ominously. "Do we go back or not?"

"The answer is 'not.' About your fight. If I recall correctly,

you and Johnny Massini are meeting to see who gets a crack at the champ. Right?"

"For the first time in your life, —yes."

"As much as I hate to say it, you ought to take Massini without too much trouble," she said meditatively.

"Look, lady . . . what're you driving at?" Duffy Kelso grated. "You're killin' me by inches. Why don't you get it over with and end my agony?"

"Okay, Duffy. Here it is," she

said exultantly. "You'll be able to go through with your fight with Massini, all right, but in so doing, you're going to give me the scoop of the year. You're going to train for that fight right on board this ship and I'm going to file my stories by ship's radio every day."

"Yowee! What a setup," she chortled. "The more I think of it the greater the idea sounds. What a story this'll make. What a story!"

#### Cisco Women To Appear At Club Convention

A number of Cisco clubwomen have gone, or are planning to go, to Colorado City this week to attend the convention of the Sixth District Federation of Women's clubs. The convention is being held today, Tuesday and Wednesday in the assembly room of the First Presbyterian church. This is the 25th annual convention of the district, of which Mrs. M. H. Hageman of Ranger is president.

The administration theme for the convention will be "Education for Successful Living," and the convention theme subject will be "Women in Democracy."

Those from Cisco who will appear in different parts of the three-day program will be Mrs. C. H. Fee, district Golden Jubilee chairman; Mrs. Alex Spears, club institutes chairman, and Mrs. William Reagan, district parliamentarian.

The following women left today for the convention: from the First Industrial Arts club, Mrs. A. J. Olson and Mrs. Joe Wilson, and from the Twentieth Century club, Mrs. Alex Spears, J. J. Butts, C. H. Fee, William Reagan, John Shetzler, F. D. Wright, J. T. Anderson and E. P. Crawford.

#### The Notebook

##### Tuesday

Circles of the First Presbyterian auxiliary will meet at 3 o'clock as follows:

Circle One with Mrs. H. A. Bible.

Circle Two with Mrs. F. D. Pierce.

Circle Three with Mrs. Elizabeth McCracken.

The district Parent-Teacher association convention will be held in Stephenville today and Wednesday.

All circles of the First Methodist Women's Missionary society will meet at the church at 3 o'clock for the regular monthly business meeting.

All circles of the First Baptist Women's Missionary society will meet at the church at 3:15 for a business meeting. The Sunbeams will meet at the same hour.

##### Wednesday

The Alpha Delphina Study club will meet at the clubhouse at 9:30.

##### Thursday

The Industrial Arts club will meet at the clubhouse at 3 o'clock.

The French are reported to have found a new use for structural glass—gravestones.

The inhabitants of Guam call themselves chamorros.

#### New York Couple Parents of Girl

Mr. and Mrs. Eddie leVine of 162 West 54th street, New York city, are parents of a son, born Saturday, March 30. Mother and baby are reported doing nicely.

Mrs. leVine is the mother of Miss Margie Linder, member of the Radio City Rockettes.

#### Cisco Couple Marry Friday

Miss Yvonne Potter and Leon Thackerson were married here Friday night in the study of the First Baptist church with the Rev. Judson Prince officiating. They were attended by Mr. and Mrs. Ronald Rhodes.

The young couple are making their home here.

#### Specs---

(Continued from Page One) to probe the chemical mysteries of heavenly bodies which cannot even be seen with the naked eye, and to plot with marvelous accuracy all the intimate circuits of an infinite universe of wheeling stars and suns and planets. The proof of his figures is supplied by the behavior of the celestial bodies themselves. His knowledge has, in great measure, conquered the firmament.

But it has not been able to do one more important thing: It has not taught him how to live with himself in peace and harmony.

#### Wisconsin Voters---

(Continued from Page One) silence on the third term issue, two slates of delegates pledged to him will be on the Wisconsin ballot. One is known as the Roosevelt-Farley ticket, and is backed by National Committeeman Charles E. Broughton. The postmaster general's name was included, supporters of the ticket say, as a complimentary gesture. The second Roosevelt group, calling itself the democratic party organization of Wisconsin, is pledged to support whomever Mr. Roosevelt desires as his successor should he not run himself.

#### Where Knowledge Is Costly

PUEBLO, Colo., April 1 (AP)—It's six dollars extra if you "know the judge" in Justice S. A. Bates' court.

A speeder, arrested by State Patrolman Earl Ormsbee, made a grandiloquent gesture. "Okay, give me a ticket," said he. "I know the judge."

Those were costly words, for Justice Bates made no sign of recognition next morning when he assessed a \$9 fine, \$6 more than a first offender pays when he admits he was moving too rapidly.

### Personals

Mrs. S. W. Poe of Baird is the guest of her daughter, Mrs. Cecil Huffman, and Mr. Huffman.

Mr. and Mrs. Herbert McCormick of Abilene spent Sunday with Cisco friends.

Miss Noma King has returned to Austin after spending the week-end with her parents, Mr. and Mrs. J. C. King.

Mrs. J. W. Robertson, accompanied by Mr. Robertson and son, Terry Wayne, and Mrs. Robertson's brother, Rankin Blackburn, left Sunday for Temple, where Mrs. Robertson will undergo major surgery at Scott and White hospital.

Mrs. R. L. Shaw and son, Robert, Miss Alice Spencer and Harold Thornton, all of Fort Worth, spent the week-end in the J. E. Spencer home.

Judge and Mrs. B. L. Russell of Baird visited here a short while Sunday.

#### Over 8,000 Cases---

(Continued from Page One) are mild in comparison with those of the other communicable diseases is true. It is a fact, also, that many victims recover without grave consequences. Nevertheless, there is another side to the story that deserves consideration.

"In children under five years of age measles is a serious disease. The illness is more severe, the complications more numerous, and death occurs much more frequently than in those who are attacked at an older age. Though only a fraction of the total measles cases occur in the age group under five years, the greatest majority of deaths result from those comparatively few cases. Moreover, undoubtedly suffering from other diseases, regardless of age, are more severely affected than are normal children.

"It should be apparent, therefore, that every care should be taken to protect young children from exposure until they have passed that period of life in which the disease takes its greatest toll. "It efforts to protect fail, it follows naturally that nursing care and medical advice should be applied promptly, especially whenever a child under five years of age contracts the disease.

"It is important that a sufficient period of isolation, particularly among school children, should be had to prevent needless transmission of the disease. An isolation period of two weeks is usually sufficient."

The principality of Liechtenstein is virtually taxless.

Indians in Canada are minors under the law.

"me a ticket," said he. "I know the judge."

Those were costly words, for Justice Bates made no sign of recognition next morning when he assessed a \$9 fine, \$6 more than a first offender pays when he admits he was moving too rapidly.

### Childish Arms Welcome Soldier-Father

Little Margaret Jenkins rushed across a London, England, railroad station with outstretched arms to welcome her father home. The meeting, shown above, took place just after Jenkins arrived on a furlough from the English fighting forces in France. Photo radioed from Europe.

#### Sun Eclipse---

(Continued from Page One)

It is very important that such observations be secured in order to interpret the nature of the material which makes up the outer parts of the sun's atmosphere. The instrument designed by Dr. Rogers consists of a thermocouple mounted behind the focus of a small reflecting telescope, with a diaphragm limiting its aperture to about four inches. In order that the thermocouple will be uniformly illuminated, an additional quartz lens is to be placed just behind the focal plane so that a small image of the main telescope mirror will be formed on the receiver of the thermocouple. One of the chief difficulties encountered is that of finding a color filter which will transmit only a narrow band of radiation at the wave lengths desired, and it will probably be necessary to combine several filters of different types. The elimination of the sun's visible light is especially important because the infrared radiation is very much weaker.

#### Observation Methods

The bolometric measure of Dr. C. G. Abbott of the Smithsonian institution, extending into the infrared spectrum as far as 2.1 microns, indicate that the contrast between the center and the limb of the sun becomes gradually smaller. In other words, if we could obtain a complete photograph of the sun's light in infrared radiations, we should not be able to detect a marked underexposure of the outer portions as compared with center. No observations have been made in regions which are still farther in the infrared than the region observed by Dr. Abbot.

picturesque sections of Texas. It is approximately 50 miles south of the railroad station at Alpine on the main line of the Southern Pacific railroad, and it is only a few miles north of Santa Helena canyon of the Rio Grande. The elevation of the proposed site is approximately 5,000 feet, and a good road, safe in dry weather, but treacherous after heavy rains, connects in with Alpine.

#### Not Total Eclipse

This eclipse does not present

the same interest as does a total eclipse of the sun. Since the apparent size of the moon will be appreciably smaller than that of the sun, the unobscured rim of the latter will prevent the corona from being seen with the naked eye. Recalling that at the most favorable phase of the eclipse only 0.93 of the diameter of the sun will be covered by the dark disk of the moon, it will be seen that the unobscured area of the sun will be approximately 0.07 of the total area of the sun. Expressed in stellar magnitudes and allowing for the effect of darkening at the limb, the remaining edge of the sun will be about four or five magnitudes fainter than the unobscured sun. Since the latter has an apparent visual magnitude of about -27, the apparent magnitude of the ring will be about -22 or -23. The apparent visual magnitude of the full moon is -13. Hence the brightness of the sun at the annular eclipse will be very much greater than that of a moonlit night, and although there will be an appreciable darkening, the visual impression to the observer will be more nearly like that of a hazy or cloudy day than that of a total solar eclipse.

Amateur astronomers who want to observe this eclipse should look for prominences which may well become visible at the obscured edge of the sun, especially when observed through a red filter. Prominences, Bailey's beads, and the mountain regions at the edge of the moon may all be photographed with equipment of moderate size. The flash spectrum will be seen at the edge of the sun, but good spectrographic equipment is needed to photograph it.

At the McDonald observatory proper, an effort will be made to record the corona of the sun by means of the television equipment recently developed by Dr. A. M. Skellett of the Bell Telephone company. This apparatus has been designed to record the

small additional light of the corona when superposed on the normal blue sky of daylight observations secured by Dr. Lett at the Cook observatory near Philadelphia, Pennsylvania, have given encouraging results and there is all reason to believe that a complete picture of the corona will be available when the apparatus is used on April 1. Casual observers should be cautioned against observing the sun without smoked glasses.

#### REWARD FOR KINDNESS

ROSTOCK, Germany, (AP)—A 22-year-old German was sentenced to nine months imprisonment because he had been a Polish war prisoner working on a farm here a suit of clothes then took him to a movie dance hall in town. He was accused of having disregarded the danger of espionage and was punished through his contact with a prisoner.

#### Beware Coughs Following

After the flu is over and your chest feels tight, it is a reliable and ready help. Creomulsion relieves promptly because it acts right to the seat of the trouble—loosen germ laden phlegm, soothe and aid nature to heal raw, tender, inflamed, and chial mucous membranes. No other how many medicines you have tried, it quickly allays the cough and are to have your money back.
