ground. That is more than two-thirds of all RED RYDER monetary gold in the world. The last billion has come in the past six months.

We are furiously buying all that is of fered at prices higher than anybody else will pay. And we are committed to a policy, of "cash-and-carry" for sale of war goods. What is "cash"? Gold.

CONOMISTS fret. They see possibilities of a tremendous inflation in this great golden hoard. They see a day, the war over, when the emerging nations, having no gold, will turn to other monetary plans, leaving the United States with superfluous tonnage of tooth filling.

There is a comedy-within-a-comedy here, in that Congress has also ordered the treasury to buy silver at a price high above its worth until the amount bought furiously again, mostly abroad, but gold has increased so fast that it has been utterly impossible to buy the specified amount of

TO say that this is silly is easy enough. Of course it is. But to know what to do about it is something else again. Here the economists disagree; few have any positive ideas at all.

One thing could be done: Congress could order the treasury to buy outright for gold, surplus stocks of military or other supplies not produced in the United States, from friendly neutral countries like those in South America, the Dutch East Indies, and

That may be only a partial solution, but it is better than cringing helplessly before the golden flood.

Change now to OIL-PLATING... and "the old gray engine seems more like she used to be"

At birth her cylinder walls were almost like mirrors. The more of that polish you want to keep, the more you want your engine OIL-PLATED by changing now to patented Conoco Germ Processed oil.

1600 Life

OIL-PLATING in your engine, like chrome-plating on bumpers, stays constantly PLATED UP. For an apparently magnet-like attraction comes to Germa Processed oil from its man-made extra ingredient, so that engine parts are surfaced with their close-held shield of oil-PLATING ... drain-proof.

Remaining fully PLATED UP in the highest-speed engines, OIL-PLATING plainly keeps Wear from doing Summer "business as usual." Wear once thrived during starting periods, but now before the starter ever starts, your oil-PLATED engine is ready-lubricated - a positive step toward preserving the old gray engine...or a new one. OIL-PLATED cylinders long keep the roundness of youth, and that makes your Germ Processed oil keep. Change today-to Your
