

THE CISCO DAILY PRESS

Combined With Cisco Daily News and Cisco American and Round-Up, November 1, 1937

In an area of benevolent climate, blessed with an abundance of the purest lake water, possessing the best in recreational facilities, situated on the Bankhead, all-weather route, with three railroads and many highways, Cisco is the best place in Texas to live and to work.

CISCO, TEXAS, TUESDAY, MAY 6, 1941

NUMBER 231

VOLUME XXI.

KING LOBO VIII TO BE CROWNED TONIGHT

ROYAL COURT WILL DISPLAY RARE BEAUTY

Musical Pageant to Include 1,000 Voices of Cisco Schools

Cisco's schools' contribution to National Music Week is a musical pageant of folk songs and folk lore of the Lone Star state, in a mass chorus of a thousand voices, ranging from the tiny tots in the ward schools, through high school and Cisco Junior college contributions.

Proceeding this great music drama, resembling the Cavalcade of Texas, will be the traditional crowning of King Lobo VIII, and his lovely queen in a ceremony presided over by Prime Minister O. L. Shames, replete with gorgeous costumes of lords and ladies and other attendants of the royal party. The setting of the stage will be at Chesley football field under lights where an immense stage has been built for the special occasion.

This delightful event was to have been held last Friday night, but rains made it impossible for an out-door presentation, and owing to the elaborate stage setting and beautiful costumes, much of the chorus would be marred by an indoor presentation. It was, therefore, postponed until tonight.

"A Century of Texas in Song," is the name of the colossal pageant that is to be depicted at Chesley field tonight following the crowning of King Lobo, the identity of whom has not yet been revealed to the schools. All schools, including ward schools and Cisco Junior college, are to have parts in this huge Cavalcade of Texas that in a manner will rival the famous Billy Rose show at Casa Manana in Fort Worth. Of course, the costumes will not be so gorgeous as those worn by the actors in that famous play, but the depiction of the ages through which Texas passed so romantically, will be quite realistic and the portrayal will be good, indeed.

First will come the crowning of a high school student as the king, who in turn will bestow his royal favor upon a fair damsel of his choosing. All royalty attendants of this famous court will then enjoy the Pageant in Song "A Century of Texas History," composed by Mamie Polsohn Wynne, of Dallas, who is to be the guest of the Cisco schools that night.

Folk dances and folk songs, sung by a thousand voices of Cisco school children, will be features of this gigantic aggregation. The pageant in costumes will depict the period of the Indians, followed by French explorers, to be in turn followed by the Spanish settlements and teaching of the white man's religion to the simple natives. Then comes the period of the pioneers, who won their freedom from Mexico, finally joining the Union to become one of the states.

Then comes the joining of the confederacy and the defeated period that followed, featuring the cowboys of the great cattle ranges, the gay nineties, the World war period and the period of patriotism, and the finale.

The entertainment for the king, queen and royal court ends. The recessional is brilliantly beautiful as the royal cortege leaves the stage. And King Lobo VIII passes into history, to be followed next year by his successor and the high school body that becomes the actors as these 1941 graduates begin real action on the stage of life.

Miss Vernelle Stinson is in charge of the training of this stupendous task of handling this mass of boisterous young America, but all faculty members, including those from the college, have been able assistants and have aided in producing this masterpiece of school pageantry.

Mrs. G. W. Troxell went to Eastland Monday afternoon for a visit with relatives.

Soon It May Be Justice Jimmy

Boy of 12 in South Carolina.

At mine strike about 1913.

Supreme Court Candidate.

JAMES FRANCIS BYRNES, dapper, smiling democratic senator from South Carolina, looks a sure bet for the U. S. Supreme Court seat vacated by Justice James C. McReynolds, Tennessee democrat and bitter foe of New Deal. Born in Charleston in 1879, Byrnes worked as an office boy for a Charleston law firm, took a court reporting job, studied law and was admitted to the bar in 1903. He married the former Maude Busch of Aiken, S. C., landed in congress in 1911 and stayed there until 1925. During the World War, Byrnes handled naval appropriation bills and got chummy with Assistant

Secretary of the Navy Franklin D. Roosevelt. Elected to Senate in 1930 and 1936, he is one of its most popular and influential members. He seldom orates but is the top trouble-shooter for the president when going gets tough for New Deal measures. Byrnes' smile is as quick as his Irish wit. He relaxes by reading detective stories and singing "My Wild Irish Rose." Byrnes would be the fourth South Carolinian appointed to court in nation's history and the sixth justice named by President Roosevelt to the nine-man tribunal.

The 88th court grand jury adjourned its recess session last Thursday and made its final report to Judge Patterson and were discharged, after finding nine true bills during the recess session.

The report in full is as follows:

Grand Jury Report

To the Hon. B. W. Patterson, presiding Judge:

We, the grand jury for the March term of the 88th court, desire to submit our final report.

We have been in active session 12 days, during the time we have returned 26 felony, and 9 misdemeanor true bills of indictments, and have interrogated 129 witnesses.

A thorough investigation has been made by this grand jury of all matters brought to our attention, and we have disposed of the same in keeping with our best judgment.

All officers and officials connected with law enforcement in Eastland county are to be commended highly for their cooperation with the grand jury and with each other in the discharge of their duty.

(Turn to Page FOUR)

O. C. White Trial For Murder Opens 88th Dist. Court

Judge B. W. Patterson convened the May term of the 88th district court Monday, with the first case called for hearing being that of O. C. (Buddy) White, colored, who is answering his second trial for the fatal shooting of Ethel Williams, a colored woman, last summer. This is the defendant's second trial, as the first trial at a previous term of the court, was a mistrial. Clark Roberts, Cisco attorney, is representing the defendant.

Judge Patterson ordered a special venire of 60 names from which to select a jury to try this case, called for hearing this morning.

The case of Gertrude Williams, under indictment for murder in connection with the fatal shooting April 20 of Dorothy Smith, a neighbor of the Williams woman. Both were colored. Gertrude Williams will go to trial tomorrow, Wednesday, May 7. The special venire will also be used in this trial.

Following is the personnel of the venire from which a jury was selected this morning:

Special Venire

J. N. Jordan, O. D. Brogdon, Wayne White, Gorman; W. A. Lewis, Neal Scott, A. J. Blevins, Odel Cole, J. Q. Adams, Alton Jennings, J. A. Hart, Ira McCrum, J. R. Finto, Arthur S. Duffebach, L. W. Meadow, Edwin George, W. H. Clark, C. W. Blakeney, George D. Rhoads, W. F. Deaton, Ranger, W. L. Curtis, C. L. Reich, J. B. Webb, J. W. Gerhart, Risning, Star, B. A. Adams, George Boyd, Roy Tucker, W. L. Yeager, W. T. Booth, C. E. Prickett, Cisco.

H. H. Harrison, L. D. Stanaford, J. A. M. McBeth, Arthur Cozart, A. M. Green, J. I. Harris, A. N. Simpson, Nimrod; J. W. Greathouse, H. O. Satterwhite; J. C. Petty, Virgil M. Murphy, E. M. McCoy, H. L. Jackson, E. H. Jones, L. L. Hartman, Pat Smith, W. L. Darr, H. P. Pentacost, Eastland; S. Ramsey, H. G. Hines, Carbon; W. H. May, Mangum; E. H. Everett, C. A. Howell, J. P. Crawford, C. J. Langitz, F. O. Fidler, Olden, E. L. Hazlewood, Dothan, Melvin Bailey, W. T. Hughes, Scranton; J. H. Rushing, H. H. Roe, Desdemona.

Mrs. M. M. Bowles of Odessa visited relatives in Cisco over the week-end.

The Oldest Mother--

The special Mother's Day edition of The Cisco Daily Press Sunday, May 11, will be dedicated to the Oldest Mother in Cisco. Pursuant to that end, we seek the cooperation of all Cisco people in aiding The Press to locate that mother.

If you know of an aged mother in Cisco whom you think might qualify, please send or bring her name, together with her birth date, and some information regarding her. This information must not be later than Friday of this week, the earlier, the better.

Clock Two Hours Ahead of Britain

LONDON, May 6.—Great Britain has enlisted the sun to help in her intensified war effort.

"Double summer time," putting the clocks two hours ahead of Greenwich time, was adopted during the week-end, giving workers more time to relax in sunlight after their day's work. This is expected to improve their health and their work.

The new time, popularly called "Morrison time," for Herbert Morrison, home security minister, became effective at 2 a. m. Sunday, when clocks were moved ahead an hour. Daylight savings time had been in effect all winter.

Nursery School Eye-Opener To One Who Visits Project For First Time

The "Open House" held at the Cisco Nursery School on Thursday was indeed an eye opener to the reporter who visited the school, located in the building on South Main street formerly used as the South Ward school.

On entering, we observed the floral decorations of cut flowers placed on the desk in the office, on tables and piano, making the surroundings cheerful and attractive for the little tots in attendance at the school. Passing on, we noticed the small garments hanging neatly in rows in the inspection room; and as the little folk cannot yet read to tell which is their garment, pictures of animals, birds, etc., are placed above each garment to indicate ownership. Mrs. Pass tells us that each child remembers accurately the picture above his garment.

In the bathroom, rows of single

JOHNSON IS ENDORSED BY TWO MAYORS

RANGER, May 6.—Congressman Lyndon Johnson, the candidate for the United States senate who has wholeheartedly supported President Roosevelt, rounded out an impressive hand-shaking campaign here this morning and left for Brownwood under the endorsement of two mayors and several Eastland county delegations. The two mayors, Hall Walker of Eastland, declared they were endorsing of Lyndon Johnson in order to give President Roosevelt all possible help at once during the grave war situation.

"If we ever needed a man who knows what is going on, it is right now," Mayor Huffman asserted. "Congressman Lyndon Johnson is that candidate. His experience in dealing with national problems for the past ten years well qualifies him."

Mayor Walker described Johnson as a Number One friend of the president.

He added: "Lyndon Johnson has done more for his country and national unity and the national defense program than all others who have refused to follow our commander-in-chief as good soldiers."

Johnson spoke to the crowd of supporters who came from Eastland, Cisco and other points at the Ranger meeting. He got a big cheer when he told his audience how, if elected senator, he would go right down the line with Roosevelt for American defense, and that "anybody who gets in the way in trying to hold us up in this great task will get run over."

War Flares in Iraq, Original Eden

Iraq (Mesopotamia), whose Tigris-Euphrates valley is believed the original Garden of Eden, becomes the first nation of the Near East to be enveloped in Europe's modern war. Map shows vital oil fields, railways and principal towns of the country.

Cisco Business Begins March of Improvements

Work began Monday on the improvements for the Dean Drug company building—which is to include a new and ultra-modern front and windows. The work will be in tile in beautiful Rexall blue in keeping with the special line represented by this store.

J. H. Latson is contractor in charge. Other carpenters at work are S. H. McCanlies and Roy Findley.

Work of remodeling the brick building at 615 D avenue, recently purchased by the Goodyear service store, also began Monday. A modern front is to be installed, and the building put in first class condition, according to R. W. McCauley, local manager.

Shobal Houston of the Western Supply company is also to make improvements on his building, recently acquired on Eighth street, where the sewing school was located.

Funeral Held This Afternoon For Mrs. Gray

Funeral services were to be held this afternoon for Mrs. Rhoda Gray, 85, 406 West Seventh street. The services will be conducted by Rev. J. R. Wright, pastor of the First Christian church, of which she was a member, at the family residence this afternoon, 430 Green's funeral home was in charge of the body. Burial will be in Oakwood cemetery.

Mrs. Gray was born in Mississippi, December 29, 1855. She has resided in Cisco and this section for many years. Mrs. Gray has six children surviving, three sons and three daughters. One son, Norman Gray, in Cisco; Walter Gray of Eastland, and one son in New Mexico. One daughter, Miss Joe Gray, lived with her mother. Miss Lilla Gray is employed at the post office in Mexia, the third Mrs. Bessie Nix, lives in Oiler, Texas.

There are several grandchildren.

Dunnie Simms, student in TCU, a member of the chorus from that institution who sang at the Christian church Sunday evening, visited his cousin, Mrs. G. W. Troxell, while in Cisco.

Ranger Lions Convention Successful; Lee Made Governor, Breckenridge Host

One of the best conventions ever held in district 2-E was closed at Ranger Monday May 5 with a governor's banquet and program, following the election of A. B. Lee, Decatur school superintendent, as district governor, over his opponent, Charles F. Williams, Fort Worth, by a narrow margin of 73 to 72 votes. Breckenridge was given the next convention for May, 1942, and a vote of thanks given Ranger for her splendid programs and care for delegates, with only a preparation time of something like 3 weeks in which to prepare for handling the 450 delegates who attended.

The program at the governor's banquet Monday night featured a floor show with an elaborate program and glamorous costumes, with songs and dances. The Shadow dance was unique, precisely executed and brought down a thunderous applause.

Retiring Governor Frank Crip-

Aspermont Votes \$3,000 Bond Issue

ASPERMONT, May 6.—The Aspermont school district Saturday voted a \$3,000 bond issue to finance further improvements.

The new primary building is of native stone, and has four rooms. One is for each of the first three primary grades, and the fourth is a reading and recreation room. The other new building will house band equipment, and the vocational agriculture department.

George B. Hull Honored With Cake and Gifts

Mrs. Carrie Hull entertained members of her family Thursday, May 1, honoring the Twentieth birthday of her son, George B. Hull, Grandmother Hull, aged 87 baked a beautiful birthday cake as her loving contribution to the event.

George B. received lovely gifts and a bouquet of flowers. Word was received of a delayed gift that was to come from the state of Maryland which would arrive later. Music on radio and piano, together with singing by nephews and nieces, was enjoyed.

W. Warren of Baird was a guest.

DOCTOR JOINS NAVY

ANSON, May 6.—Dr. Knox Pittard, Jr., has left for Washington where he will be a surgeon with the United States navy. Prior to his leaving his father, Knox Pittard, pioneer druggist, was given a birthday party at his home here and also present were a daughter and husband, Mr. and Mrs. Joe Thiele of San Antonio.

Miss Marie Winston returned to Abilene Monday, after spending a few days in the home of her parents, Mr. and Mrs. W. R. Winston.

Mrs. Della Shook left Monday on a business trip to Oklahoma.

About Our Friends

By STEP A. LONG

Frank Bond brought in from his home Monday some of the most beautiful roses we have ever seen grown anywhere. All over Cisco, roses fill the air with their fragrance and delight the eyes of the beholder with their beauty at the present time.

Well-kept lawns, studded with appropriate shrubbery and lovely flowers of sufficient variety to follow each other in sequence so that looming beauty will be an all-season feature, is a thought the present leaders of the Garden club are now working on—Cisco, as an 11-year flower city, is an ambition worthy of the best efforts of these civic-minded women. A program large enough to command the attention of the civic-minded citizenship will receive an enthusiastic support from all classes of business and professional people.

The greatest handicap to the consummation of any worth-while program is the lack of vision by its promoters, large enough to command the respect and support of those who are in position to give aid and make it a success. Years ago we found it was much easier for us to sell a page-size advertisement than perhaps a \$3 ad, if we had a thought worthy of the page insertion. That means no thing—Big thoughts appeal to men and women who have large visions—the small idea finds few adherents.

So, if the Garden club will sponsor an all-year program for flowers—and that is easy since this delightful climate often sees the sweetest of roses in bloom for Christmas and after—it will be easy to obtain financial and cooperative support in carrying out such a worthy idea.

OTHER!

The thought should vision a lovely city of well-cared for lawns that will extend to the lowliest and most humble home. No poverty is so abject but what if the we of beauty is present, that it will not find means to give expression to that Heaven-given desire.

We are reminded of the prof of this by a trip we made down to the interior of Old Mexico to Mexico City a few years ago. Nowhere in the whole world will you find more primitive people than are some of those who dwell in the mountains and deserts of that country where descendants of the ancient Aztecs and Indian tribes have taken refuge for their peaceful natures in the hidden recesses of that still primitive country. Some passed miserable huts, and some little better than wild east dens, but flowers were growing beside them, showing the tender care of loving natures. And God must have been actively aware of that love for the beautiful he had implanted into the hearts of His creatures, when He made the wild plains and glens so bloomingly beautiful for those beings who must roam them and spend upon them to satisfy that raving until such a time as development of mental experience would enable man to grow for himself.

BATH TOWEL

And so if Cisco should catch such a vision of beauty, we are persuaded that universal cooperation would be secured. And Cisco would be talked about from Texas to Maine. From the Atlantic seaboard to the sun-kissed western limit of tropical California—a home city—a place where it should be a delight to live and do business. What more could one offer as a

HAND-WRINGERS.

The United States has every right to glory in its strength, and to face with a serene pride and confidence whatever the future may bring. No Delilah has yet shorn the locks of the American Samson; none is likely to do so. Yet he is having an occasional hair plucked out of his head from time to time by certain people who go about wringing their hands and lamenting that "we haven't got this, or we haven't got that," or "we can't do this and we can't do that."

The American people and the United States government are not old and decrepit. We are strong, vital, at the very height of our powers. Why this hand-wringing? "This country, since last June, has produced more goods and services than it, or any other nation, ever did in a like number of months."

That statement is from Leon Henderson, government economist and price controller, and he ought to know. It is not the kind of a record that justifies pessimism or hand-wringing. More goods, and services than we produced in 1929? More goods and services than any other nation ever produced? Should such a nation tremble and crouch, and fear the future?

There was a generation of Americans, a few years back, who may have made a mistake of themselves by swimming river Europe and bringing that whatever they saw was not-size compared with what they had at home. Socially, this manner may have left something to be desired, but behind it was a rugged confidence and a restless vitality. That pessimism did not lose the future—it rushed out to meet it and to mold it the way it wanted it to be.

Bringing is a bad thing. We are in no need to bring today. But we need a little of that spirit. There is no time now to waste on wringers of hands, no time for those who would cover in a corner and hope to serve what they can of the past for the future.

Strong, indomitable, determined, the American people must look the future in the face today, feeling strength in every rippling muscle and hope in every surging thought, go forward to whatever destiny a new world holds for them.

Forward, march!

SHIPBUILDING IN TEXAS

Texas is destined to become the shipbuilding center of the nation, if the present trend of this activity continues.

Already shipbuilding contracts have taken the lead over all other national defense awards in this State and it is known that a number of other projects of large size and importance are in process of negotiation.

Thirteen ports along the 370-mile coast line of Texas can qualify as meeting the requirements of the shipbuilding industry.

The Gulf of Mexico is the most easily protected and will doubtless be the most closely guarded body of water along the seaboard of the United States.

Ship channels to Texas ports run from the Gulf many miles inward, out of any possible combat zone.

Private harbors are available in or connecting with many of these channels, offering available sites for shipbuilding yards at considerable savings in dredging costs.

Moderate all-year climate provides maximum advantages to production schedules and reduces the cost of living of workers.

Fuel costs in the coast area are as low as any available in the United States, and the fuel supply is practically unlimited.

Ninety-seven per cent of the labor in Texas is native-born. An adequate labor supply is available, and steps are now being taken to give skilled labor the technical

"Remember When We Used to Fear 'Overproduction'?"

Contract required for shipbuilding activities.

Contracts for more than \$123,000,000 have been awarded to Texas shipbuilding concerns since July, 1940. Plant facilities of these establishments have been increased by \$11,000,000 during that period.

Basic materials required by the industry are to be found in great variety within the State itself.

Strikes of both capital and labor against defense efforts must cease—Lyndon Johnson, Texas congressman.

If Eastland county is to secure a federal project, it now appears we will have to devise new ways and means and work a little harder. It develops that Eastland county had a mighty good friend as well as a powerful one, when the lamented Morris Sheppard passed on.

Those who hope Gov. Lee O'Daniel will not enter the U. S. senatorial race, have about convinced themselves that Mr. O'Daniel has decided to serve out his second term as governor. However, all admit there is no telling what O'Daniel will do. It is generally agreed that the governor race has the late Senator Sheppard's best if he sees fit to retire as governor and announce for the senate. If Governor O'Daniel does not enter the contest, Congressman Wright Patman might decide to do so, if it is rumored.

The Texas petroleum industry now pays 44 per cent of all state business and property taxes, NOT including sales taxes such as the gasoline tax. If sales taxes are counted, petroleum and its products bear 54 per cent of the state's tax income.

One leading cause for this unhappy condition is to be found in the attitude of our present labor government. President Roosevelt's sincere devotion to "social gains" and his insistence that they be not interfered with even in the name of defense, has gone to the heads

Other Editors

WHAT PRICE SOCIAL GAINS? (Printers' Ink)

Those who are calling strikes in various vital industries are making their plans with a devilish ingenuity worthy of Hitler himself. Even a casual survey of the situation reveals the disconcerting fact that the plant tieups have been cunningly distributed in such a way as to bring the maximum damage to national defense. Bethlehem Steel and Ford—favorite whipping boys of the more radical new dealers—suffered from walkouts and violence, as did Allis-Chalmers and others. These were major producers of defense material.

Other plants here and there, involving sometimes only a few hundred men, were closed. These were making small but vital parts of the engines of war. Insignificant in size, their stoppage of production paralyzed a huge portion of the defense production effort.

Who is there naive enough to believe that these strikes, large and small, just happened to be distributed that way?

We do not charge that militant labor leaders, savagely detested by the Wagner act to fit their needs and getting away with it, are consciously plotting against the country as such. But they do seem to be so much interested in seeing what labor can get out of the present crisis that they are strategically planning the program of stoppage in key factories so as to produce the greatest possible embarrassment in the shortest possible time.

ASK BEER VOTE

BROWNWOOD, May 6.—The Brown County Commissioner's court Monday accepted a petition from local dry forces asking that a beer election be called May 17.

The dry petition contained 912 signatures. Rev. David A. Johnson, pastor of the Austin Avenue Presbyterian church, and Dr. Kaul H. Moore, First Baptist church pastor, appeared before the court.

Brownwood has been dry for many years. Every previous beer election has resulted in a victory for the dries.

Sooner but not later, the division is going to require a pretty complete inventory of all stocks of critical materials, on hand, on order, in process of manufacture. That will mean not only a much larger staff in Washington, but also a field force and probably some inspectors to see that there is no cheating.

The latest monthly priorities

critical list of items for which preference ratings are authorized numbers 220. It includes large items from drycloths, flensing, to small items like insignia, uniform. Only eight are so scarce as to require preference ratings on every order. These are: aluminum, magnesium, nickel, nickel steel, tungsten, neoprene (artificial rubber), machine tools and zinc. Zinc has a trick control by which all producers put 17 per cent of their output into a pool which is adequate for distribution among manufacturers of army and navy equipment.

When, therefore, Joseph d'Oakes wants say an electric motor for his gadget factory, he doesn't have to get a preference rating if the manufacturer has what he wants in stock, even though electric motors are on the critical list of 229 items. If the manufacturer is tied up with defense orders, however, and can't stop to make a special motor for the D'Oakes plant, Joe will have to get his preference rating and show that his gadget is essential to the completion of drycloths, flensing, or insignia, uniform, or something.

Supposing, now, old man D'Oakes wants a new turret lathe for his gadget factory. That's different. Lathes, turret, are tools, machine. And machine tools are one of the eight items for which preference ratings are required in every case.

The D'Oakes Company will have to write the Division of Priorities, Office of Production Management, New Social Security Building, Washington, D. C., and get forms to fill out. The forms are two in number, PD-1 and PD-1A. PD-1 is the application for preference rating, a simple little thing of 11 questions on four pages. It must be filled out in duplicate and sworn to before a notary public.

It isn't all as complicated as this sounds. Once a business man has gone through this apparatus, it's easier the second time, but it is illustrative of the importance of priorities, and why it is necessary to check up on every order of every item.

Ranger Lions-- (From Page ONE)

many sacrifices would have to be made, both in lives and in tax payments, like the like of which America had not seen. But he said he had confidence in the pluck of the American people to be equal to the task, if the nation's leaders would prove their leadership by devoting themselves to the preparation so laggingly carried on during the past months.

Lyndon Johnson, candidate for the senate seat made vacant by the death of Morris Sheppard, was presented, and he responded by a few moments talk on the gravity of the world situation. In a reception following the adjournment of the convention, Mr. Johnson told the larger crowd of men and women who remained to hear him, something of himself, and what he stood for in the war program. He emphasized the gravity of the situation and told how importantly necessary it was to have dependable men in the senate of the United States who realized the true condition of world politics, and who were brave enough to grapple with the situation. His talk inspired confidence in his ability and has received many assurances of active support.

The entire program, consisting of a church service at the First Methodist church of Ranger, Sunday evening, at which Rev. Byron Keathley of Mineral Wells was speaker; the presidents, secretaries and key members break-

fasts, and the model luncheon given on Monday, were alive with interest, bespeaking much planning and organized execution. Out of the 450 delegates present, 243 delegates registered for voting. Many of the clubs in the district were not represented on account of unsettled weather and difficult roads over the district.

Brownwood Water Line Is Cracked

BROWNWOOD, May 6.—The main water supply line from the Round Mountain pumping and filtration plant to the 2,000,000-gallon storage tanks atop the hill, broke Monday after an earth movement caused by the heavy rains of the last few days.

The Round Mountain plant supplies water for Camp Bowie and the city of Brownwood.

A city-owned filtration and pumping plant on Pecan bayou was immediately put in service and workmen began constructing a by-pass line at the Round Mountain plant.

Mayor Wendell Mayes said there was no danger of a water shortage if the re-operation of Brownwood residents was received.

He urged all domestic and industrial consumers to restrict water use to the absolute minimum until the by-pass line can be completed.

Two or three days may be required for the repair work.

BRUCE CATTON'S AMERICAN ROUNDUP

CLASS IN COMPLICATIONS WILL COME TO ORDER AND EXAMINE THIS THING CALLED PRIORITIES

BY PETER EDSON NEA Service Staff Correspondent

WASHINGTON.—If volume of mail received is any basis for judgment, there is perhaps more confusion in the minds of business men scattered around the country as to what constitutes a "priority" than almost any other phase of the defense program.

Joseph d'Oakes wants to know why he can't get structural steel for an addition to his gadget factory. The answer may be that we're short of magnesium just now, but an answer of that kind won't satisfy Mr. d'Oakes and it isn't always possible to explain to him that the steel is needed to build the ships that haul the ore to the factory that's being built to process the magnesium that we're short of.

So there's a Division of Priorities in the Office of Production Management to take care of all this and to see that everyone is done right by. The division is headed by E. H. Stettin, Jr., of the United States Steel Settlements, who is perfectly competent to handle all this confusion and there is no need to be alarmed about it. It is unquestionably confusing to the little man who is bumping into the priority system for the first time, and that's what a good many of the letters are about.

Sooner but not later, the division is going to require a pretty complete inventory of all stocks of critical materials, on hand, on order, in process of manufacture. That will mean not only a much larger staff in Washington, but also a field force and probably some inspectors to see that there is no cheating.

The latest monthly priorities

critical list of items for which preference ratings are authorized numbers 220. It includes large items from drycloths, flensing, to small items like insignia, uniform. Only eight are so scarce as to require preference ratings on every order. These are: aluminum, magnesium, nickel, nickel steel, tungsten, neoprene (artificial rubber), machine tools and zinc. Zinc has a trick control by which all producers put 17 per cent of their output into a pool which is adequate for distribution among manufacturers of army and navy equipment.

When, therefore, Joseph d'Oakes wants say an electric motor for his gadget factory, he doesn't have to get a preference rating if the manufacturer has what he wants in stock, even though electric motors are on the critical list of 229 items. If the manufacturer is tied up with defense orders, however, and can't stop to make a special motor for the D'Oakes plant, Joe will have to get his preference rating and show that his gadget is essential to the completion of drycloths, flensing, or insignia, uniform, or something.

Supposing, now, old man D'Oakes wants a new turret lathe for his gadget factory. That's different. Lathes, turret, are tools, machine. And machine tools are one of the eight items for which preference ratings are required in every case.

The D'Oakes Company will have to write the Division of Priorities, Office of Production Management, New Social Security Building, Washington, D. C., and get forms to fill out. The forms are two in number, PD-1 and PD-1A. PD-1 is the application for preference rating, a simple little thing of 11 questions on four pages. It must be filled out in duplicate and sworn to before a notary public.

It isn't all as complicated as this sounds. Once a business man has gone through this apparatus, it's easier the second time, but it is illustrative of the importance of priorities, and why it is necessary to check up on every order of every item.

Legal Notices

AN ORDINANCE PROVIDING FOR THE REGISTRATION OF AND REGULATING THE EQUIPMENT OF BOATS OPERATING AND MAINTAINED ON LAKE CISCO AND LAKE BERNIE AND DECLARING AN EMERGENCY.

BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF CISCO:

SECTION ONE: It shall hereafter be unlawful for any person to maintain or operate a boat on Lake Cisco or Lake Bernie without first registering the same, and equipping said boat as hereinafter provided for.

SECTION TWO: There shall be obtained a license for each boat, and there shall be issued to the licensee by the City Secretary of the City of Cisco a metal tag which shall be permanently attached or affixed to said boat and which shall have stamped thereon the number of the permit granted to the owner or operator of said boat.

SECTION THREE: All row boat and outboard motor boats shall be equipped with air chambers sufficiently large to support and keep afloat such boat when submerged and each inboard motor boat shall be equipped with a life preserver for each occupant, sufficient to support and keep afloat an adult.

SECTION FOUR: It shall be the duty of the City Inspector of the two lakes named above to carefully check from time to time all boats maintained or operated on the two City lakes named above, and any person or persons operating a boat on either of the lakes named above shall at all times, when requested to do so by the City Inspector at the lakes, cease using or operating a boat until such license has been obtained or until such boat has been properly equipped with life preservers or air chambers.

SECTION FIVE: Any person or persons violating any provision of this ordinance shall be fined in any sum not less than \$5 and not to exceed \$50.

SECTION SIX: In view of the fact that the fishing season will open within the next few days and inasmuch as there is not in effect now an ordinance regulating the matters hereinabove mentioned, there is declared an immediate emergency and the publication of this ordinance on three separate publications is hereby dispensed with. An emergency is declared and this ordinance shall become effective from and after its passage and publication for 10 days.

Passed on this, the 22nd day of April, A. D., 1941.

Louise Shookley, City Secretary

Approved: G. P. Mitham, Mayor

SERIAL STORY

LOVE POWER

BY OREN ARNOLD

COPYRIGHT 1941
NEA SERVICE, INC.

YESTERDAY: Bob is worrie about the X-999. When the plane runs into a storm over the mountains he is certain that it will crash, that the X-999 will explode. There is one chance for escape. Quickly, he forces Carolyn to don a parachute harness, orders her to jump. She kisses him, leaps into the blackness.

SAFE LANDING
CHAPTER XVIII
Carolyn never knew what a strange, age-old impulse within her made her take that utterly impossible leap from the airplane.

It was as if she had been stripped of all superficialities, all earthly pretense, when she had lingered there that last moment in the ship. Bob was crazed with anxiety for her. He had ordered her to jump. She was unafraid!

And now, actually in the mid-night storm, she still experienced no great terror. Her senses were temporarily numbed. She had shut her eyes tight against rain. She felt a harsh whirring, then a sense of ethereal, timeless floating as if in some fantastic nightmare.

First genuine consciousness returned when her ears began to "pop," as one's ears do in a swift elevator descent. Next instant she realized the rain was gone and there was even a hint of visibility.

"OH-H-h-h-h!"
The shriek was snatched out of her mouth. But now she was aware! She clawed at the metal ring on her chest.

WHO-O-o-o-sh!
Invisible arms grabbed her, pulled her, snatched her, turned her crazily around—and then she began rocking.

The wind changed to a smaller cross breeze, and there was a singing tautness in her head. Breath came in gasps.

In the same moment, which had begun with a high point of fright, a triumphant exaltation seized her. Something in this appealed to her youth! Here was excitement! Darling! Adventure! Success!

She had no time to reason about that but presently her alert senses did tell her that she had literally dropped away from the storm. The worst part of it now was far overhead and driving toward the horizon.

A flash of frenzy assailed her—Bob Hale was still up there!—but common sense made her look immediately to her own welfare. For him she could only utter a quick, devout little prayer.

The pilot had said they were over the mountains and she didn't doubt it. Obviously, then, she would strike one of them at any moment. She looked down.

There was an irregular black void, swelling and bulging and boiling. But no! The apparent boiling was due not to its motion, but to her own.

"In a minute—in just a minute!"
She could not actually speak through the swift air stream, but she knew she was about to strike

Cisco Relatives To Stephenville

Jamison went to Stephenville Sunday to attend the Parent-Day celebration held at John Tarleton college.

The Notebook

Wednesday
The Alpha Delphian chapter will meet at the club house at 9:30 for the final meeting of the year.

Thursday
The Cecilia singers will hold their regular rehearsal and business meeting at the studio of Hjalmar Burgh, 730 p. m.

The Loyal Women class of the First Christian church will hold their business and social meeting at the Humbleton home of Mrs. W. C. Hogue at 8 o'clock.

Friday
The XXth Century club will meet in regular session at 3 p. m. in the club rooms of the library.

There before a complete stranger she broke down and cried.

Her samaritan was distressed. It took him half an hour to hear her out, to comfort her and warm her with his coat, to walk incredulously back toward her parachute and then return without seeing it, to start with her toward town.

He felt that he had picked up some sort of miracle. He was a pleasant gentleman, past middle age, to whom such things just never happened.

"I can never thank you enough," Carolyn began, when she was calm again. "Are—can you tell me where we are?"

"This is Arizona, miss. Were you lost up there long?"

"Years, I think. I must know what happened to my friend! Is Arizona nothing but mountains? Oh, I'll go crazy if—"

"Now, now, miss, take it easy. There's not many people, but some. I looked on the gasoline map. Little place name of Blair is next community, and—"

"Blair?" She sat up. "That's where—here—oh, how far from Boulder Dam is Blair? Where is there a landing field? No! He said he would jump, too! Or maybe—"

"Look, mister, have you heard an explosion? Any kind of noise? A really BIG noise? So big that—that—"

She stopped, thinking frantically. The driver swallowed, and nodded in kindly sympathy.

Plainly he had to rush this stranded girl to a doctor, he told himself; delirium was setting in.

(To Be Continued)

SOCIETY and CLUBS

By MRS. KATE RICHARDSON
Phone 93.

Hardin-Simmons Artists Give Program of Music

Hearty encore was given the three young artists from Hardin-Simmons university Monday night when they appeared in the program, sponsored by the Cisco Music club, given in deference to National Music Week.

In a few well chosen words, the assembly was welcomed by Mrs. R. S. Cope, president of the club, who told of the origin of National Music Week, 21 years ago. Mrs. Cope mentioned the members of the Year Book committee, Mrs. S. E. Hittson, Mrs. Alex Spears and Mrs. Ben Krauskopf stating that the program of the evening was due to their endeavors.

She thanked members of the XXth Century club for the use of the library club rooms.

Mrs. Cope presented Mr. Hayes of Hardin-Simmons university, who accompanied the three young artists to Cisco to present the program. In response to a request, Mr. Hayes gave a brief description of the "Harp," its mechanism and history. He stated that the harp was first known in Egypt, where it was much esteemed by the people and it is portrayed in ancient sculpture. He related a legend of an Egyptian priest, who while hunting with his bow and arrow, discovered certain musical sounds as he manipulated the weapon. He received the idea of adding more strings and making an instrument of music.

The one used in the program is of Italian origin, has seven pedals by which each note of the scale in all the different octaves can be made a semi-tone higher. It also has 46 strings. Mr. Hayes introduced the young artists, whom he called the three Virginias: Miss Virginia Sheridan, harpist, who played during two periods of the program; Miss Virginia Carley, a coloratura who gave vocal numbers, two periods of the program, and Miss Virginia Thompson, piano accompanist. Program numbers given were operatic and classical. Popular music was played and sung in response to the encores.

Approximately 100 people attended the program.

Mrs. Jack Leech Is Circle Hostess

Mrs. Jack Leech was hostess to the E. G. Wilcox circle of the First Baptist church Tuesday, May 6, with Mrs. Otho Kean presiding. Opening prayer was read by Mrs. Leech.

Following the business session and reading and approval of the minutes of the preceding session, a very interesting lesson was brought. Mrs. Fowell closed the meeting with prayer.

Those present were Mmes. James Huddleston, Otho Kean, Harry Schaefer, W. W. Fowell and the hostess.

Approximately one-sixth of the population of Texas depends upon the petroleum industry for their entire living.

Nursery School-- (From Page ONE)

splendid, nourishing food every day.

Following is a list of things provided for the healthful up-bringing of these children, which is sponsored by the city of Cisco.

Adequate building facilities, utilities, laundry, necessary equipment, transportation of children to and from school, services of nurses and physicians, all costs of food in sufficient quantity and variety to provide nutritious and well-balanced meals, all costs of teaching supplies, and to provide sufficient funds to maintain and operate the project effectively.

Officers and active board members in the Cisco Nursery school are: Chas. J. Kleiner, chairman; Mrs. W. C. Hogue, vice chairman; Mrs. Judson Prince, recording secretary; Mrs. R. E. Carwell, financial secretary; D. G. Streater, treasurer; Mrs. James Moore, publicity chairman.

Mrs. Chas. Sandler, Mrs. Sam Kimmell, Mrs. Sutton Crofts, Mrs. B. E. Morehart, Mrs. Garland Nance, Mr. and Mrs. Joe Clements, Mrs. Edward Lee, Jess Proctor.

Dinner Compliments Mrs. H. J. Wooldridge

Honoring Mrs. H. J. Wooldridge on her birthday, Mr. and Mrs. John Bailey, who reside at 103 Liggett avenue, invited Mr. and Mrs. Wooldridge to partake of a lovely noon-dinner with a special birthday cake served Sunday.

After enjoying the meal, the two couples spent the afternoon driving into the country around Dothan, returning to Cisco in time to attend the musical program at the Christian church.

FOR TEXAS NEEDY
WASHINGTON, May 6.—More than \$1,000,000 was allotted Monday for handling surplus commodities for the needy in Texas. Texas members of congress were notified by the Works Project Administration that President Roosevelt had approved \$1,287,073 which will be used to assist the Texas Department of Public Welfare in its work.

Verbatim Copy of Cisco's City Debt Proposal to Dunne-Israel

Herewith is a verbatim copy of the proposal submitted to The Dunne-Israel Co., Wichita, Kansas, by the City of Cisco. As previously printed in The Daily Press, the proposal was not complete.

Verbatim Copy

Dunne-Israel Company
Wichita, Kansas
Gentlemen:

This proposal is submitted to you in triplicate originals. Your acceptance will be indicated by executing as to all three copies the acceptance clause at the close of the instrument. You have indicated to the City that you own and represent some of the outstanding bonded indebtedness of the city. By your acceptance of this proposal you will indicate your willingness to accept in behalf of the bonds represented by your plan of composition suggested in this proposal and your willingness under the terms of this proposal to submit said plan to other bondholders and to serve said bondholders as their representative, as is more fully set out in this proposal.

For convenience in this instrument the City of Cisco will be referred to as "the City" and you will be referred to as "Bondholder's Representative."

The outstanding indebtedness of the City consists of refunding bonds in the approximate amount of \$1,600,000, dated November 1, 1934, and due November 1, 1974, optional at any interest paying date, bearing interest ranging from One (1) per cent in 1934 to Five (5) per cent during the years 1950 to 1974. The principal elements of the proposed plan of compromise and the items of service which you are to perform are as follows:

1. It is evident that the proposed plan cannot be accomplished without the service of an attorney skilled in matters of Municipal Finance, who will direct the proceedings for the issuance of the refunding securities and will cooperate with the City and its attorneys in filing and conducting proceedings under the Municipal Composition Act in the Bankruptcy Court of the United States, so as to make this plan effective as to the securities of non-consenting holders; to that end the City agrees, if you accept this proposal, to employ such an attorney who will be acceptable to you providing that the fee to be charged by such attorney is to be paid by you.

2. Issuance of refunding bonds shall be authorized by the City Commission, executed by the City officials and placed in the office of the Comptroller of Public Accounts for delivery to the respective holders of and in exchange for the present outstanding bonds of the City in a manner herein-after more fully explained. Attention is directed to the fact that the exact amount of outstanding indebtedness of the City

during a current year and after a sum of not less than \$3,000 shall have accumulated and so long as said \$3,000 remains intact as a reserve to take care of any deficiency in making such monthly installment payments into the interest and sinking fund, any additional money remaining of said net revenue may be used by the City for other public City purposes. No tax shall be levied to secure said issue of bonds. The bonds of said series shall be designated substantially as follows:

"City of Cisco Waterworks and Sewer System Revenue Refunding Bonds"

The bonds of this issue will also be dated the First day of November, 1941; will bear interest at the rate of Three (3) per cent per annum, payable semi-annually; will mature forty years after date and the City will have the right to call for redemption at par and accrued interest any bond on any interest paying date.

3. The plan of composition shall provide for the use periodically of all monies accumulated in the interest and sinking funds to be created for the new issues, after taking care of current interest requirements and after establishing a reserve account for each of said refunding issues equivalent to not less than six months interest requirements, in buying for cancellation said bonds on the bid and tender plan after proper advertisement for offers of bonds at discount prices. The provision for such use of available money shall be mandatory. Available money remaining in the interest and sinking funds, not so used in buying bonds after such periodical advertisement for tenders, shall be used in calling said bonds. Bonds called for redemption shall be selected by lot.

4. The present outstanding bonds of the City are in denominations as follows:

- \$330
- \$165

Refunding bonds of each issue will be prepared in denominations so as to accommodate the following procedure:

In exchange for each \$330 bond, the Comptroller will register and deliver refunding bonds aggregating in principal amount \$200. In exchange for each \$165 bond, the Comptroller will register and deliver refunding bonds in the aggregate principal amount of \$100. Each holder to receive in exchange for each \$330 bond a \$100 City of Cisco Waterworks and Sewer Revenue Refunding Bond, hereinafter described, and a \$100 City of Cisco, Texas, Refunding Bond, secured by ad valorem taxes, as hereinafter described. The holder of each \$165 bond shall receive a \$50 bond of each class.

5. The proposed plan will provide for the issuance of bonds in more convenient denominations than as above set forth if such arrangement can be made to accommodate the holders of large blocks of the present outstanding bonds.

6. The money in the interest and sinking funds will be utilized to make interest adjustments to the date of the proposed refund-

their respective duties. This cooperation on their part has enabled the grand jury to dispatch its business without delay. We desire to commend all officers of the various towns of the county for their assistance rendered to the courts, and to the grand jury.

An inspection of the court house and jail has been made and we found both have been well cared for, and are glad to report that there are only four prisoners in the jail, all but one of whom have already been tried and are now serving sentence of the court.

Having completed our investigation and deliberations upon all matters brought to our attention, we respectfully request that we be discharged.

K. B. TANNER, Foreman.
J. H. RUSHING, Secretary.

HEL

THE coronation of Robert Lee Latson, Ruby Pauline Kent, Minister O. L. Stamey a coronation ceremonies at Cisco last night, marks one of the outstanding events of the celebration.

The handling of 1,500 students, ranging from the ward schools to a high school in a red-letter day in pipeline and stage mar Cisco schools, children united to give suppers, Stinson and I stands in staging the ant, "A Century of long." The behavior and student body of the coronation, and too much of it to put upon this upon the part of the st. The Cavalcade of T really was in another Texas scene. A dress and vivacious costumes and clear little blue Bonnet and actors, each of the charm of the coronation of our minutes, the cowboy, the French, Spanish, list, but by no means close, were beautiful beyond words. The attendance here were about 1,000, a great drama. The trectors should be mified. Outside support, there being vrs of royalty from of Ranger, Breck am, Rising Star and ng provinces. Space forbids me ames playing prome pageant, but evence was good. Congratulated for hav really big things alent and willinge art to respond. A outstanding depiction ve will go forward.

Funeral Rites

Mrs. Miller Held Monday

Funeral Services were held yesterday afternoon for a woman who died at the home of her daughter, Mr. and Mrs. Weiser, in the Lutium, Sunday afternoon. The funeral was conducted by Rev. Henry Stroeb.

PARENTS OF Mr. and Mrs. A. Kermit, are the daughter who is morning at the G. um. The young lad seven and one-half granddaughter of N. A. Brown, and Emma Gay.

Both the young and daughter are well.

WEST TEXAS: cloudy Wednesday general to cool winds on the coast WEST TEXAS: and Thursday excellent cloudiness over Wednesday; little perature.

THE RECORD... Facts That Concern You

No. 28 of a Series

A couple of bad eggs... but why blame the hen?

A bad egg does turn up once in a while... but that's not a sensible reason for destroying all the good eggs... or for taking it out on the hen.

Beer retailing in America is something like that. The vast majority of beer retail establishments are clean, law-abiding, wholesome places. And still there may be a few "bad egg" retailers who violate the law or permit anti-social conditions.

The brewing industry wants these undesirable eliminated entirely... to protect your right to drink good

beer... and our right to make it. And also to protect the many benefits brought by the beer industry to Texas... such as the 31,165 jobs created... and beer's \$22,076,182 annual payroll. Beer contributed \$2,273,968.64 last year in taxes to help pay the cost of government in this state.

You can help us in our program of law enforcement, if you will, by (1) patronizing only the legal and reputable places that sell beer and (2) by reporting any abuses to the proper law enforcement authorities.

BEER... a beverage of moderation

Mexico Fights Malaria With Mosquito Stamp

MEXICO'S battle against malaria and yellow fever has an important place in the stamp collector's album. Mexico's stamp album, picturing a giant mosquito towering above a man, was compulsory on all mail. Proceeds from the sale of stamps helped fight disease.

Malaria is transmitted by the mosquito; yellow fever by the mosquito. The common mosquito is not known to be a carrier of disease.

Mosquitoes were the worst enemies of the builders of the Panama Canal. Disease halted French construction, and it was not until Col. William C. Gorgas conquered the insects, that the U. S. project could be completed. Colonel Gorgas is pictured on both Canal Zone and Panama stamps.

Dr. Walter Reed, pictured on the U. S. 5-cent stamp of the scientists group of Famous Americans, proved mosquitoes carried yellow fever in Cuba in 1898. Dr. Reed's experiments were based on theories of Dr. Carlos Finlay, whom Cuba has honored with a portrait stamp. Sir Ronald Ross, British physician who revealed the life history of malaria parasites in mosquitoes, is not included in philately's gallery.

on this 25th day of April, A. D. 1941, and in accordance with the authorization of the City Commission passed on this 25th day of April, A. D. 1941, and recorded in the Minutes in Book 4 at Page 67.

CITY OF CISCO, TEXAS, By: G. P. Mitcham, Mayor.
