1 FILL LASTED 13,398 MILES - Certified

Then how long is a quart of this great New Motor Oil?

STRAIGHT FROM SIZZLING DEATH VALLEY COMES YOUR ANSWER...

The lock-guarded engines of 6 coupes faced the Death Valley desert with oil exactly up to "Full!" Not a drop could be added. The destination of all 6 identical everyday engines was... Death!

Here were 6 high quality motor oils getting the same strictly fair opportunity to show how long they'd let an engine live on one exact fill and no more.

Down in Death Valley-hotspot of the U. S. A.—every car sped at 57 miles an hour, till its oil gave out and the engine smashed. The brand of oil that used up quickest was outlasted 8,268 miles by a revolutionary new oil in this impartial, certified test. This new oil exceeded the average mileage of the other 5 oils by all of 7,057 miles! Certified. This longestlasting oil in the test, which your car can have today - at popular price - is new

CONOCO Nth MOTOR OIL with its Man-made new Economy aid

The record long life that defied Death Valley comes from a new laboratory creation . . . man-made . . . called Thialkene inhibitor. Its action in some ways suggests Vaccination - which puts the right protective substance on guard to keep a trouble from even starting on you.

The trouble aiming to start on motor oils lurks in the engine's normal firing. Filth is formed that tends to start the oil "festering." First one drop spoils-then two drops "catch it"-then four-then sixteen-faster, faster, FASTER. Soon oil stamina is sapped; the engine suffers, and cries for quart after quart ... but not IMPARTIAL

ucts of 5 leading competitors bought retail by Referee.

New everyday coupes in alike. Engines taken apart for Referee-to assure uniformity.

Cars tuned alike. Same Death Valley route for all. Drivers rotated to even up on skill. One fill per car. None

added. Engines under lock-under scrutinyevery mile.

when the worst of this "festering" attack is nipped in the bud-inhibited-by the life-giving Thialkene inhibitor in new Conoco Nth motor oil.

Now you'll never rashly exceed the proper oil-change period for your car and driving conditions-any more than you ignore traffic rules just to "get away with it." But Certified Proof from the desert that new Conoco Nth could outlast the other oils in the test by as much as 161%, gives you more than mere hopes of long Summer mileage between quarts. Change to Conoco Nth-at Your Mileage Merchant's Conoco station . . . today. Continental Oil Company-Pioneers in Bettering America's oil with Synthetics

AND CONOCO Nth OIL OIL-PLATES YOUR ENGINE!

Long the keystone of Conoco success, OIL-PLATING comes from another great Conoco synthetic . . . man-made under the famed Germ Processed oil patent. By magnet-like action, OIL-PLATING is bonded to inner engine parts. Then it can't all drain down-not even overnight-not while you're using Conoco Nth. So oil-PLATING is on guard against wear in advance!...and helps mileage, as it did in Death Valley. An OIL-PLATED engine is one more economy you get from a change to popular-priced new Conoco Nth oil.

CERTIFIED I hereby certify that the Death Valley Test and related work were thoroughly and fairly conducted. Engine Destruction occurred in each case at the mileage stated.
