MANY NEVER SUSPECT CAUSE OF BACKACHES
This Old Treatment Often Brings Happy Relief
Back aches occur because of the pressure of the spine. The spine is made up of 24 vertebrae, each with a small space between them. This space is filled with a fluid called synovial fluid. When the spine is out of alignment, the fluid is squeezed out, and the spine becomes stiff and painful. This is the cause of backaches. The only way to get relief is to get the spine back into alignment. This can be done by using the old treatment of chiropractic. It is a simple, safe, and effective method of treating backaches. It has helped millions of people and is the only way to get permanent relief. Get Dr. Dink's Plan.
