Watching that Japanese campaign, for anyone who can keep his emotions reasonably under control, is a fascinating business, all the more compelling for the fear and horror involved.

College Station March 11.—Farm cooperatives are on the increase in Texas.
During 1941 the number of farmer cooperatives increased by 51 to a total of 855, C. E. Bowles of the Texas A. and M. College extension service reported today.
Of the new business organizations, 21 were cooperative gin associations, six were established primarily to buy farm supplies, four were for marketing dairy products, three were for marketing fruits and vegetables, three were cotton marketing associations, and the remaining 14 were organized to handle a variety of agricultural commodities.
Outstanding in the year's development was the consumers purchasing associations, Bowles said. New ones were organized at Dallas and Corpus Christi during the year, whereas the movement had been confined almost entirely to the western part of the state for two decades.
"Farmers are finding their cooperatives helpful in stepping up production of foods and vital fats and oil in an all-out war effort," Bowles said. "Nine are producing cheese and other high quality dairy products, and others are concentrating and processing poultry and eggs. More than 70 are storing huge stocks of wheat and rice for food reserves. Others are furnishing electricity to farmers, spinning their cotton, crushing their cottonseed, providing fire protection, increasing the efficiency of Texas farmers."

Bowles believed the spirit of farmer cooperatives is typified in the Plains Cooperative, Inc., of Plainview. In 1941 it manufactured 1,260,000 pounds of high quality cheese for home food and shipment to allied countries.
Not content with this contribution to the war effort, the 4,500 farmer members agreed to distribute their \$9,000 savings for the year—ordinarily returned as cash dividends—in the form of defense bonds.

COMPARATIVE STATEMENT OF TRANSACTIONS IN OFFICE OF COUNTY CLERK FOR 1940-1941

January, 1942, shows the largest increase in receipts of the county clerk's office of any January for the past six years. The records show receipts of January, 1942, were \$1,322.30. The top receipts for any first month of the preceding five years were \$923.07—an increase for January, 1942 of \$399.22.
Including January, 1942, the first year of each of a block of six years immediately previous, was as follows:
January, 1942, receipts \$1,322.30; January, 1941, \$923.07.
The following cash receipt figures are of record for the first month of each of the preceding years: Jan. 1940, \$848.20; Jan. 1939, \$629.50; Jan. 1938, \$519.75; Jan. 1937, \$604.92.
Comparative statement of receipts of the years of 1941 and 1940 are: 1941, \$11,139.60; 1940, \$7,976.00; increase of receipts of over those of 1940 were \$3,163.60.
"This increase during the year 1941 and of January, 1942, is accounted for, in a contributory sense, to the large number of birth certificates issued during that period," said R. V. Galloway, county clerk. "It was not necessary to have birth certificates previous to 1941 to hold government or corporate positions," Mr. Galloway explained.

Don't let their vitamins fly out the window
Illustration of a woman and two children.

Use a Modern Gas Range
It handles the vitamins with kid gloves

You buy the proper vitamins, yes; but do you use them? Good broccoli, for instance, is due to have 50 milligrams of Vitamin C per cupful when it reaches your plate (and literally thousands of Vitamin A units). But if it cooks too long, or in a tumbling boil, much of this nourishment floats away in steam.
Help yourself to a modern Gas Range that knows how to hoard these life-giving chemicals. It makes it mighty easy to feed a family right. Simmer-burners for flawless vegetables and stews... Thermostat-control for baking and roasting in a fresh-air oven... Smokeless broiler on ball-bearings for sizzling foods with juices intact.

Table with 3 columns: Vitamin, Where to Find It, What It Does For You. Rows include Vitamin A, B, B or G, Niacin, Vitamin C, and Vitamin D.
