AUSTRALIA HAS BIG CITIES AND VAST RANCHES; IMPORTATION OF NON-WHITES IS RESTRICTED

WASHINGTON, March 20.—As Australia is now more and more of the headlines, certain outstanding features of the southern hemisphere's great island continent become increasingly significant. A bulletin from the National Geographic Society points out that Australia is approximately the size of continental United States, and has about seven million inhabitants, compared with more than 130,000,000 in the United States.

Most of the people of Australia are found within a narrow coastal belt. Nearly half of the population is concentrated in the nation's half-dozen cities, led by Sydney with more than a million quarter inhabitants, and Melbourne, with a little more than a million.

Interior Thinly Settled.

Since both Sydney and Melbourne lie on the southeast coast of Australia, many hundreds of miles still separate them from the active theater of war. To come from the island of New Guinea, where the Japanese have set footholds, is a matter of 2,000 air miles. Sydney, directly south of the southeast tip of the Netherlands — Australian possession, is about 1,700 miles from Canberra, the country's year-old, made-to-order capital, about 100 miles southeast of Sydney, between that port and Melbourne.

Farmer Fears Failure for Grain Crops

Tom Connolly of the Cross Plains section—no kin to the senator, he says—shopped in Cisco today, selling about 40 dozen eggs, products of about one week's work by his flock of some 200 Brown Leghorn and Ancona hens.

Farmers are needing rain badly in the lighter land sections, and a rain in the sandy parts would do no harm, he stated. Some farmers have gardens up and growing, but most of them must have moisture. Nearly all grain crops Connolly has heard of are being ruined by bugs of various kinds. A hard rain might drown them, but he isn't sure. Present prospects for grain crops are about the worst he ever saw, he stated.

ALBANY YOUTH DIED HERE AT 6 THURSDAY

Vernon Rountree, 12-year-old son of Mr. and Mrs. Leonard Rountree of Albany, died at Graham Sanitarium, Cisco, late Thursday afternoon. The boy arrived at the hospital about two hours before his death.

Young Rountree's death was caused by injuries received when a car driven by Robert Hamrick struck him while he was going from an Albany school house to his home for lunch, at noon Thursday. He was riding his bicycle at the time.

OUTLOOK IS BRIGHTER—Better days are seeming in store for the native land of Sir Girja Baijpai, envoy from India to U. S., pictured enroute to White House to discuss U. S. mission to India with F.D.R. England is considering Indian self-government.

OIL JOURNAL TALKS ABOUT JOHN O. SUE

The Oil and Gas Journal for March carries an article concerning a former Cisco man, John Sues, which will be read with interest by Mr. Sues's many Cisco and Eastland county friends. The article follows:

"Greater attention directed to special hydrocarbons for production of strategic materials has added materially to the duties of J. O. Sues, Houston, Tex., superintendent of the natural gas and natural gasoline department of Humble Oil & Refining Co. Mr. Sues's familiarity with the basic problems is complete for he has been in his present position since April 1, 1935.

"He was born in Stephens county, Texas, one of the first areas in Texas to produce large amounts of natural gasoline, on December 27, 1889. After completing schooling at Cisco, Tex., he worked for a short time in abstract offices in Stephens and Eastland counties. Later, he accepted a position in a bank and followed that line of business until joining Humble's production department as a clerk. Mr. Sues received several promotions before he was placed in charge of gas testing. In January 1929, he was transferred to Humble's Houston, Tex., headquarters.

"Before moving to Houston, Mr. Sues was actively interested in civic matters and is one of the charter members of the Rotary club at Cisco. He is past exalted ruler of the Elks lodge at Cisco and served on several state and national committees of that fraternal organization. Before entering the oil business, Mr. Sues married Gertrude Murrell of Eastland, Texas. They have one daughter, Margaret, who is the wife of Dr. W. M. Rust, Jr., of Houston. A son, J. O. Sues, Jr., is in the U. S. Army Air Corps.

Mr. Sues's hobbies are entertaining his grandson and playing golf. He excels in both endeavors, friends say. He spoils the grandson and talks a good game."

ROESER SAYS 63,000,000 LBS. OF SCRAP COLLECTED AS RESULT MID-CONTINENT OIL CAMPAIGN

DALLAS, March 20.—A total of 28,000 long tons, or nearly 63,000,000 pounds, of scrap have been collected as a result of the Texas Mid-Continent Oil and Gas Association's scrap campaign, Charles F. Roeser, general chairman, reported today.

Five hundred carloads of scrap have already been shipped to Texas foundries and eastern mills and three hundred carloads more are now on hand to be shipped at once, Mr. Roeser said. This makes a total of 800 carloads or around 28,000 long tons.

"These totals are for the 36 principal shipping centers used in our campaign," Mr. Roeser said. "There are an equal number of collection points from which we have not had full reports. When all these centers also report, the total should go over the 30,000 long ton mark."

Scrap is still being hauled into most of the shipping points, he added.

"Our reports are mainly on the results of our intensive collection drive," Mr. Roeser explained. "We are going to 'get in the scrap' for the duration of the emergency, so we hope to keep a smaller but steady stream of scrap metals and rubber coming in as long as this is needed."

High praise for the work of the county chairman and co-chairmen and committeemen was expressed by Mr. Roeser.

TWO SCHOOLD PREDICTS TRUSTEES TO LABOR SHORT-AGE BY FALL

The Cisco school board announces appointment of Mrs. R. B. Carswell, Bob Mancill and Nancy McCrea as election officers for Saturday, April 4, when Cisco voters—between the hours of 8 and 7 o'clock—will choose two school trustees to fill the positions now held by J. C. McAfee and L. A. Warren, whose terms are expiring. The voting booths will be located at city hall, as usual.

Ballots will be printed on April 2—two days before the election— which means that those who wish to get on the printed ballot as candidates should file with Frank Walker, school secretary, before that date.

So far, two names have been publicly mentioned for the vacancies—that of L. A. Warren, one of the present incumbents, and E. L. Jackson. The Daily Press is informed that the names of these two men will be filed with Secretary Walker by friends. Both have agreed to serve if elected, it is stated.

J. C. McAfee and family expect to move to Fort Worth within the near future, hence Mr. McAfee was not considered as a candidate for re-election.

MRS. LANE IS CISCO BOOSTER; SETS OWN HENS

Mrs. J. N. Lane of near Okra sold 36 dozen eggs in Cisco Thursday and says that is about an average week's production for her White Rocks—these being her favorite breed because, she says, they are healthy, lay well during the colder months and then they look so pretty, plump and clean.

She doesn't buy baby chicks, but sets her hens—likes that way best. "It may not be just the most modern way, but I have always been used to just setting my hens and I usually grow around 400 fryers," she said.

Asked if she canned many vegetables and fruits, she stated that she did. Her pantry is still nearly full of such things. Says the best thing for all of us is to see to it that we have plenty to eat, for the armies will probably need what we can spare of the things we usually buy in stores.

Mrs. Lane is going to try for an unusually big garden this year. Likes to trade in Cisco—says merchants are friendly and finds prices are always right.

Honoring Mr. and Mrs. Dewey N. Sage, whose marriage on Feb. 1 was recently announced, a miscellaneous shower was held in the home of Mr. and Mrs. D. T. Dunn Tuesday night. The guests were greeted by Mrs. D. T. Dunn and presented to the honorees, Mrs. J. M. Dunn presided at the bride's book.

A number of interesting games were played, after which an array of gifts which had been brought by the guests were assembled and presented to Mr. and Mrs. Sage. A refreshment plate with coffee was served.

Those present were Mr. and Mrs. Dewey N. Sage, Mr. and Mrs. J. M. Dunn, Mr. and Mrs. F. E. Sage, Mr. and Mrs. T. R. Prickeitt, Mr. and Mrs. R. J. Rains, Mrs. Myrtle Agnew, Miss Carrie Adams, Miss Jo Nell Rains, Mrs. Dalton Adams, Miss Betty Farmer, Mrs. Sam B. King, Mrs. Robert Sugg and small daughter, Kathleen, Miss Dottie Bailey, Mrs. C. L. Smith, Clifford Smith, Mrs. R. W. McAuley, Mrs. W. Z. Latch, Miss Lela Latch, Miss Stina Fields and the hosts, Mr. and Mrs. D. T. Dunn.

NATURALIZED WHEN 108

HOUMA, La., March 20.—WPA workers have found what probably is the all-time record for naturalization at an old age. An entry in an old minute book showed that William Yarrow, born in Africa, was naturalized Oct. 24, 1868, at the age of 108.

M'ARTHUR TO BATAAN AT PROPER TIME

Two American commanders -- Gen. Douglas MacArthur and Lieut. Gen. Joseph Stilwell -- told the world today that the United Nations' armies in the Far East were going to strike back at Japan.

In a terse fighting statement issued in Australia, MacArthur as supreme commander in the Southwest Pacific, said he would carry out President Roosevelt's instructions to organize counter-offensives and that he would return to aid the heroic forces in the Philippines.

Stilwell, taking command of American forces in China, India and Burma and of Chinese armies fighting with the British in Burma, said the Allies were going to carry the war to Tokyo.

The 900-pound animal was purchased by Pabst Brewing company of Chicago. R. G. Brantley, district manager, represented the company at the sale. The animal then was donated by Pabst to the Fort Worth community chest.

Today's wars are not fought and won on battlefronts alone. This new kind of warfare rains bombs on women and children, the aged and infirm, in small town and large city with complete impartiality. To help maintain order and teach civilians to take proper care of the wounded if such should come, the American Red Cross has called on thousands of doctors throughout the country to teach first aid to civilians. This knowledge should also come in handy if our armed forces are compelled to engage the enemy on home soil. For then, this civilian first aid army could materially assist in caring for the wounded behind the front lines. How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

MEXICAN PLANT MAY END GANGRENE, HOPED

AUSTIN, March 20. — Indian tribes of Mexico, noted for quick recoveries from serious wounds, use a plant that American scientists today hope will end gangrene in war wounds and save thousands of lives in army field hospitals. The plant has been revealed as Castilian Malva. An unnamed

\$510,000,000 IN TAXES!

WHAT does it Mean to Joe?

TAXES paid by America's electric companies will equip 2,400,000 soldiers like Joe.

Just in case you don't know, it cost this country \$211 to equip Joe. Multiply that by an army—and you have a lot of money. Over 2,400,000 Joes could be completely outfitted with the \$510,000,000 which America's electric companies paid in taxes last year. That's considerably more than a million dollars a day!

And that brings up a point: You can't fight a war or run a government without taxes. It takes money to equip an army, build planes and ships. We're proud of our stake in the fight for Freedom and Democracy... proud to be able to pay our share of the cost to maintain the American way of living.

This immense tax bill is being paid without any increase in the cost of Electric Service and in the face of mounting payrolls and higher prices for

materials. On the contrary, the electric rates you pay have been going down steadily.

The average home today uses two or three times as much service for the same money as it paid 15 years ago!

Magic? No. Sound business management.

Greater efficiency and economical methods make it possible for your electric company, managed by business men, to pay a big share of our national tax bill, provide abundant power for wartime usage, and, at the same time, serve you well—and cheaply!
