GOLD FOR SOLDIERS

There is not only "gold in them hills" and gold in Kentucky underground vaults, but there's gold in North Africa. And the last-named variety is not hidden or dusted but shiny yellow coins that jingle joyfully when soldiers have a couple of them to snack against each other. Unofficial reports seem to indicate that American gold is getting into circulation there.

That would be natural, because metal money is the only thing that counts in that region. The natives would turn up their noses at paper certificates. But if the expeditionary troops are paid at least partly in gold, they can get along anywhere, and find even a heartier welcome than their military services and American food would insure.

To Americans at home, it has seemed a time the chief interest will be in a partial release of the gold hoard that for so many years has been flowing in a one-way stream and going up in government vaults. The total store is supposed to be somewhere near \$25,000,000,000. The reason for accumulating that yellow treasure, and also the enormous quantity of silver that keeps it company, has never been officially disclosed.

It might be that the reported use now made of the precious metal is the use contemplated all along by U. S. treasury experts.

CORSICAN VENGEANCE

One by one the few parts of Europe that have not been submerged by the flood of war find it sweeping over them. The latest is the island of Corsica, lying east of Italy and a part of France. The Nazis have just captured it in their effort to control the Mediterranean before it is too late.

Corsica to most people suggests little except bandits, who have long been pretty thoroughly cleaned out and the vendetta or blood-feud, which for generations has kept families at enmity.

The most famous Corsican bandit offered vividly the career of the island's most illustrious son, Napoleon Bonaparte. The Bonapartes and the Pozzo di Borgo families quarreled over politics and Carlo Andrea Pozzo di Borgo, vowed vengeance upon Napoleon. It fell to this humble Corsican to bid the rise high in the world, and in a

strange direction—he became foreign minister of the Czar of Russia. As such he built alliance after alliance against Napoleon, and finally had the pleasure of signing the Treaty of Paris, which meant the emperor's downfall.

Hitler would do well to think twice before incurring the enmity of even the humblest Corsican.

MANY PLANS

"I was glad to hear Mr. Wilkie say that in war it is necessary to look ahead to time of peace," remarked the household editor of a daily paper to a group of fellow-workers. "Seems to me that needs to be said often."

"Suppose on the household side a woman says she'll get tonight's dinner before worrying about tomorrow's breakfast?" She's a poor manager. The competent housewife plans at least three meals ahead and if she's really good she plans for several days. When the food is all in the house, she gets tonight's dinner without distraction about tomorrow. She does not concentrate on tomorrow's lunch and forget tonight's dinner, either. She keeps all work and playing in a steady flowing stream. She must know before Christmas shopping how much money she'll need to replenish sheet and towel supply in January. Otherwise she gets herself and family into bad jams.

Good management is the same in any field. Set the future moving, and then you can concentrate on the present. The manager may have to change a detail quickly in emergency, but if he has a schedule he can adapt it without confusion. If he has none, emergency brings chaos.

It begins to look as if Mr. Wilkie and the Household Gal both have something. Plan for peace and fight the war all in one steady stream.

RULERS AND FOLLOWERS

As the struggle against Napoleon approached its climax, the Allies issued a famous proclamation that they were not warring against the French people, but against Napoleon. It helped to rally against the emperor the submerged hostility to him among the French and contributed powerfully to his overthrow.

Nearly a quarter of a century ago Woodrow Wilson's words distinguishing between the German people and their rulers, helped sow a seed among the enemy and even more the strokes of Foch overthrew the kaiser.

Now many wonder whether any such distinction can either profitably or truthfully be made between Hitler and Mussolini on the one hand, and their more or less willing followers. These have been said to profit by the booty wrung from the conquered nations. Why should they escape penalty for a support whose enthusiasm wanes only with defeat?

War isn't all killing—a lot of it just now is poker. It would be well for everybody to remember that when decided to doubt the judgment of General Eisenhower in his dealings with the disreputable French admiral Darian. There is every reason to believe that Eisenhower of Texas is true-blue, vengeance upon Napoleon. It fell to this humble Corsican to bid the rise high in the world, and in a

Defeat in Victory

Cisco Daily Press:

Small victories can lead to defeat if we are not properly educated about the military strength

of our enemies. Even if we have a final complete victory, we can lose the peace—as we did in the last war—or be defeated within by low morale. Some Americans may be misled by well-intended propaganda which may lead them to believe that this war will be completely over this winter. Pub-

lic ignorance of the strength of the Axis' war machine has led us to a lot of foolish, wishful-thinking. Only when we know the strength of our enemy can we understand the job we MUST do. If the war

Fifty Years Ago—

... people did things that they dare not do today. Many bought their homes without an abstract, and the title usually was good. But how times have changed! Multiplied thousands of titles were clouded during the oil boom days and since, by the passing of time. And the property you have in mind buying now without an abstract may be one of them.

Play safe when you buy real estate. Always demand an abstract.

is continually prolonged, serious damage to our morale may be the result.

The disastrous defeat of Rome's four divisions, and our successful landing of five or ten divisions in a partly-friendly Africa, will prevent Dakar from being used against us. In addition, it will eliminate the danger to Suez and re-open the Mediterranean sea lanes to merchant convoys.

Of course, we have reason to be proud of this minor job, but let us not forget the seriousness of our major job—of opening up a real second front.

America, stay awake! Buy more defense bonds; continue a BETTER war against waste. Do not stop saving grease, metal and rubber because you think the war will be over tomorrow!

We had had a 20 per cent increase in venereal disease in the last year. Let us not lose our standards, America!

When the fighting of this war

stops, remember that the peace is just as important as the war. Let's not be defeated by premature victories.

ISN'T HE WORTH IT?

THIS message is written to you mothers—from your government.

It concerns the most precious thing in all the world to you—your child.

It asks you to help protect that child—from fear, from starvation, from death—the fate that has befallen millions of children under the rule of Nazi and Jap tyrants.

It asks you to urge your husband to join the Payroll Savings Plan—the easy way to buy War Bonds that will furnish the ships and guns and tanks and planes so desperately needed to guard you and yours from the horrors of defeat.

Or, if your husband is already buying War Bonds through the Payroll Savings Plan—it asks you to urge him to buy more, to increase his savings to at least ten per cent of his salary or wages.

Remember. Millions of your brothers, husbands, sons, friends are risking everything. You are asked to risk nothing. War Bonds are the World's Safest Investment.

As you buy them through the Payroll Savings Plan—today, you are doing your part

to help protect your child today! And at the same time setting up a savings fund to help bring up, educate, and develop that child—tomorrow.

Talk it over with your husband tonight. And resolve to put at least ten per cent—not 6%, or 7%, or 8%—into War Bonds through the Payroll Savings Plan. Do it for that child of yours. Isn't he worth it?

WHAT YOU SHOULD DO

If you are ...

1. Already setting aside 10% of your pay in War Bonds through the Payroll Savings Plan—boost that 10% if you can.
2. Working in a plant where the Plan is installed, but haven't signed up yet—sign up tomorrow.
3. Working in a plant where the Payroll Savings Plan hasn't been installed, talk to your union head, foreman or plant manager—and see if it can't be installed right away. The local bank will be glad to help.
4. Unable to get in on the Payroll Savings Plan for any reason, go to your local bank or wherever bonds are sold. They will be glad to help you start a Plan of your own.

Proud of her investment in the American way of life and equally proud of the crime of war production on her face and arms, the young lady in this "Women At War Week" poster symbolizes two of the chief activities of women at war. Not only does she work in a war plant; she also helps finance the war by purchasing War Savings Bonds regularly through payroll savings. "Women At War Week," November 22 to 28, will focus the spotlight on women's activities on the home front.

LOVELY SHOWER HONORED BRIDE

Mrs. Barton Philpott, Mrs. Mack Stephens and Mrs. E. J. Poe, assisted by circle four of First Baptist women's missionary society, were hostesses in the Philpott home Thursday for a lovely shower, honoring Mrs. Howell Ray Clark, recent bride.

The spacious living room was made festive with seasonal full-blown cut flowers. The mantel was artistically decorated with fruits and vegetables in keeping with the Thanksgiving season. The dining table, laid with lace cloth, held as a centerpiece the large crystal bowl, filled with fruit punch. REDDY: A lot of horses, isn't it? Well, Uncle Sam this year is using just that many extra horse-power, "harnessed" by America's electric companies under business management.

YOU: That's not surprising—they tackle a job in a business-like way.

REDDY: Sure. The American way! Sound business management, experience, and training provided those 3 million extra horse-power needed by Uncle Sam to turn out the ships and planes, guns and tanks . . . all vitally needed by our soldiers. It's a record that proves our American system of free enterprise is worth preserving . . . worth fighting for.

YOU: Very true. It's that system which inspires all of us to look ahead, plan for the future, save, and invest our money for future needs.

REDDY: Right! It is this system that has already given this country the greatest supply of electric power in the world . . . more than all the Axis nations combined have been able to produce—

YOU: I know! And the electric companies under business management, including the West Texas Utilities, are supplying over 90 per cent of the total U. S. supply of electricity.

REDDY: Right! The men and women who operate this company are trained and experienced people whose success depends on bringing the greatest possible service to the greatest number of homes at the lowest possible cost.

YOU: That's the American way . . . the West Texas way of doing business!
