### POLICE CHIEF PERDUE SPOKE TO ROTARIANS ON JUVENILE DELINQUENCY; IT IS GROWING

Norman C. Huston, T. J. McCarty, M. L. Perdue and Hartman McCall were guests of the Rotary club today at the noonday luncheon. Mr. Perdue and Mr. McCall being speakers on the very interesting program which had matters of vital interest as their subjects.

President Ernest Hittson announced that February was a 100 per cent attendance month for the local club and that today's meeting was a perfect score.

J. J. Collins introduced M. L. Perdue, Cisco chief of police, who spoke briefly and to the point on juvenile delinquency, which he said was growing in Cisco, and added that the local police could do little about it since cases had to be carried to the county judge or district judge for trial. When leniency was accorded boys arraigned, it seemed to only make their work worse.

Perdue spoke of the importance of doing something that would make good citizens out of them, rather than allowing them to drift on to criminal careers. He mentioned one young man who had been sentenced to a term in juvenile reformatory and who is now fighting in the armed forces in North Africa.

Following Mr. Perdue's talk, Dr. Gary L. Smith suggested that something be done by Rotarians to help in the rehabilitation of these delinquents. E. P. Crawford moved that a committee be appointed to make proper investigations and reports to the club. Rev. Cooper Waters seconded the move and the vote carried unanimously. President Hittson named Dr. Smith, R. N. Cluck and Asa Skiles as the committee.

Mr. Collins then introduced Hartman McCall, of Baytown, as the Cisco boy who had made good in his work with the Humble company during the past 10 years of service there.

Mr. McCall spoke little of his work, but largely of the plant and its importance in the war, both in its T. N. T. connections and in

### PASSING OF FINE CITIZEN

A. J. Olson, pioneer architect, builder and exemplary citizen here for the past 39 years, passed to his reward last night at about 8:05 o'clock, as sorrowing members of his family and many friends stood ready to do what they might in making his last moments comfortable.

Burial will be made in Oakwood cemetery, Friday afternoon, following funeral services at the First Presbyterian church at 3 o'clock. Dr. Gary L. Smith will preach the funeral. Thomas funeral home is in charge of the body.

Mr. Olson, a native of Sweden, was born in that country July 7, 1870. He came to America at the age of 17 and settled near Brownwood. After coming to Cisco in 1904, his activities as an architect and builder increased, building many homes and business structures here, the west ward school building, and many churches and public buildings all over West Texas.

Mr. Olson possessed many sterling qualities and was very active in church and community work. He was an ardent Knight of Pythias member and the lodge met in his building for many years.

Deceased is survived by his wife, two sons, Marion Olson of San Antonio, Carl R. Olson, of Oakland, Calif., a daughter, Mrs. David Franklin, of Wichita Falls, and four grand children—George Albert Olson, Caroline Olson, Carl Franklin and Pauline Franklin.

Mrs. Charles Flaherty today received good news from her son, Technical Sgt. Julian Flaherty, somewhere overseas, which briefly stated that the young man is alive and in good health.

Flaherty, 24, joined the army in May, 1941, and shipped out of San Francisco.

Though born in Illinois, the young man grew up in Cisco and attended the local schools. His father is employed in a California war plant, but the rest of the family have remained here. Flaherty was in the employ of Joe Gallagher, Phillips 66 service station, before he joined the colors.

### ALL VESSELS IN ENEMY CONVOY SENT TO BOTTOM, AND 15,000 MEN KNOWN TO HAVE BEEN LOST

GEN. MacARTHUR'S HEADQUARTERS, Australia, March 4.—Japan's time-table for the war in the South Pacific was thrown far off schedule today by the crushing loss of 22 ships and 15,000 men—first time in this area that every vessel in a convoy was left sunk or sinking after a battle.

Allied bombers, victors in one of the great air-sea battles of the war, were mopping up today in the stretches of the Pacific where crippled Japanese ships were attempting to escape the wrath of Gen. Douglas MacArthur's pilots.

Ten Japanese warships—cruisers and destroyers—and 12 transports carrying 15,000 men were blasted in a two-day battle in which the enemy defied the striking power of land-based planes in an attempt to reinforce his base at Lae, on the Huon Gulf in northeastern New Guinea. Not a single ship got through.

The smashing defeat upset whatever plans the Japanese may have to attempt to stem the tide of Allied victories which have been cutting into enemy strength since the U. S. Marines stormed the Solomons.

"Our decisive success cannot fail to have the most important result on the enemy tactical plans," said a communique issued at MacArthur's Headquarters. "His campaign, for the time being at least, is completely dislocated."

The Japanese suffered heavily in the air. Fifty-five of their planes were blasted, 38 of which are known to have been destroyed and 17 damaged. Against that figure, the Allied forces lost only one bomber and three fighters, although several planes which got back to their bases were damaged.

In the matter of enemy ships destroyed, the battle, which occurred Tuesday and Wednesday in the Bismarck Sea, between New Britain and New Guinea Island, was second of those fought in the Pacific so far. But it was the first battle in which airplanes alone attacked enemy surface vessels attempting a military incursion, and seemed to demonstrate that a powerful aerial force could wreck a convoy not heavily protected by planes.

The convoy was bound for Lae, on the Huon Gulf, in New Guinea, and the last phase of the battle was fought in the Gulf.

The victory was "a major disaster to the enemy," an army spokesman said. The tonnage of the destroyed ships totaled approximately 90,000 tons.

Texas motorists will get 20,747 Grade 1 passenger car tires in March, nearly twice the number in February, but new truck tires allotted to the state number 22,593, a decline from 27,624 last month.

The Grade 2 passenger car tire quota showed a slight increase to 11,578, but Grade 3 tires avail-

able in March will be 29,555 against 33,385 in January. Grade 3 now includes only used or re-capped tires.

REALISTIC STALIN.

"Many people suspect Stalin writes a shrewd observer of the world scene. But I have developed considerable admiration for him. First of all, he is a realist who comes near delivering on the promises he ever makes. Secondly, as he should, he fights first and foremost for Russia, and in doing so helps us as far as Hitler is concerned. As to the future, he refuses to play his hand until it is dealt, but he isn't adverse to working things around to where he gets a good hand for himself. I think we can learn much from Stalin, and if we don't learn now, we will at the next peace conference."

CAMP FIRE WEEK.

The Camp Fire Girls, more than 300,000 of them, an army in itself—are making a little history. It's their thirty-first birthday, and the list of their activities in the last year is long and varied. It's an admirable job, for they've won war bonds and stamps, acted as messengers and aides for many adult organizations, knitted, sewed, made bandages, helped with children whose mothers were at work, and performed other useful services. They are a fine group, these girls. They deserve praise and recognition. Give them a hand up whenever they ask it. What they do is well worth while.

FAIR REQUEST.

It is estimated that coal requirements of the nation during 1943 will total well over 600,000,000 tons. To achieve such production will be a "sizeable job." We don't hear a great deal about coal other than its "something to burn in the furnace to keep us warm." But that is only one of many uses. It yields gas for cooking, chemicals for explosives, tars for a thousand uses. Its products are essential ingredients in anti-knock motor fuel.
